## PREFACE TO THE POEMS

THOUGH Poe was constantly reprinting and revising his poems, there is in most cases no difficulty about deciding upon the text which must be accepted as final. It has been observed that, except in one case, Poe never returned to an earlier reading, and we must therefore obviously accept, for such poems as occur therein, the latest edition published during his lifetime—that of 1845. Of this volume, moreover, Messrs. Edmund Clarence Stedman and George Edward Woodberry, editors of the *Works of Edgar Allan Poe* in ten volumes, were fortunate enough to find a copy, ‘recently bequeathed by James Lorimer Graham, Esq., to the Century Association’, which is enriched by marginal notes in Poe’s handwriting ‘for the purpose of being incorporated in later editions’. By the courtesy of Messrs. Duffield & Co., ‘publishers of the Stedman-Woodberry edition, copyright 1894’, we have been enabled to incorporate this valuable material.<sup>1</sup>

*The Raven and other Poems*, by Edgar A. Poe, 1845, contained the bulk of its author’s work in this kind, and has been here reprinted, with preface and dedication, precisely as issued, except for the poems revised after the Lorimer Graham copy, which are marked by an asterisk in our list of contents.

Presumably it represents all that Poe was most anxious to preserve; but posterity without doubt will ‘ask for more’, and an editor can feel no hesitation in including everything now discoverable.

We have first, then, a few poems from the early volumes not reprinted in 1845. For *Tamerlane and other Poems*, 1827, we have, like all our predecessors, followed Mr. R. H. Shepherd’s reprint (George Redway, 1884), noting his ‘emendations’ in the Notes. For the text of ‘1829’

<sup>1</sup> An edition of this work was also issued in England by Messrs. Lawrence & Bullen, who have kindly confirmed Messrs. Duffield’s permission.

and 1831 we have accepted the transcripts in Messrs. Duffield's edition of *The Works*, the original volumes not being in the British Museum.

Poems published after 1845 seem to me best printed from *The Works of Edgar Allan Poe*, in two volumes, edited by R. W. Griswold, 1850. His text is almost identical with that of the magazines or papers in which they first appeared, and has the authority of one who, whatever his prejudices, had full access to the poet's manuscripts and was, apparently, a careful and experienced editor.

In reprinting from these volumes of 1827, 1845, and 1850, I have deliberately returned to Poe's own, somewhat erratic but clearly intentional, punctuation, and observed his frequent use of dashes and italics. His own 'Notes' are given, as he printed them, with the poems themselves; and I have supplemented the main contents by a few complete copies of earlier versions, varying so extensively from the final texts as to be almost different poems. Many of them, in fact, were published, and have been reprinted, under different titles.

The textual notes do not present an exhaustive 'variorum' edition. They record only significant variations from important sources,<sup>1</sup> but we believe that no point of vital interest has been overlooked. They certainly offer a remarkable example of care bestowed during a lifetime on work nearly always musical in form, and yet constantly thus growing more word-perfect.

The Bibliography reveals the exact progress of Poe's poetical development, and the three remarkable essays on different aspects of Poetry (reprinted from 'Griswold', with quotations revised by the original issues) afford a most striking comment on his work, supplementing, moreover, the 'Letter to Mr. B——' (p. xlix) issued by way of Preface to the 'Poems' of 1831.

R. B. J.

<sup>1</sup> Including some early MSS., formerly in the possession of L. A. Wilmer, and first printed in Messrs. Duffield's Edition.

**POEMS PUBLISHED BEFORE 1845**

## THE HAPPIEST DAY, THE HAPPIEST HOUR

[*Tamerlane and other Poems*, 1827.]

THE happiest day—the happiest hour  
 My sear'd and blighted heart hath known,  
 The highest hope of pride and power,  
 I feel hath flown.

Of power ! said I ? yes ! such I ween ;  
 But they have vanish'd long, alas !  
 The visions of my youth have been—  
 But let them pass.

And, pride, what have I now with thee ?  
 Another brow may even inherit  
 The venom thou hast pour'd on me—  
 Be still, my spirit !

10

The happiest day—the happiest hour  
 Mine eyes shall see—have ever seen,  
 The brightest glance of pride and power,  
 I feel—have been :

But were that hope of pride and power  
 Now offer'd, with the pain  
 Even *then* I felt—that brightest hour  
 I would not live again :

20

For on its wing was dark alloy,  
 And, as it flutter'd—fell  
 An essence—powerful to destroy  
 A soul that knew it well.

## STANZAS

[*Tamerlane and other Poems*, 1827.]

How often we forget all time, when lone  
 Admiring Nature's universal throne;  
 Her woods—her wilds—her mountains—the intense  
 Reply of HERS to OUR intelligence!

[BYRON, *The Island*.]

## 1

In youth have I known one with whom the Earth  
 In secret communing held—as he with it,  
 In daylight, and in beauty from his birth :  
 Whose fervid, flickering torch of life was lit  
 From the sun and stars, whence he had drawn forth  
 A passionate light—such for his spirit was fit—  
 And yet that spirit knew not, in the hour  
 Of its own fervour, what had o'er it power.

## 2

Perhaps it may be that my mind is wrought  
 To a fever by the moonbeam that hangs o'er, 10  
 But I will half believe that wild light fraught  
 With more of sovereignty than ancient lore  
 Hath ever told—or is it of a thought  
 The unembodied essence, and no more,  
 That with a quickening spell doth o'er us pass  
 As dew of the night-time o'er the summer grass ?

## 3

Doth o'er us pass, when, as th' expanding eye  
 To the loved object—so the tear to the lid  
 Will start, which lately slept in apathy ?  
 And yet it need not be—(that object) hid 20  
 From us in life—but common—which doth lie  
 Each hour before us—but *then* only, bid  
 With a strange sound, as of a harp-string broken,  
 To awake us—'Tis a symbol and a token

## 4

Of what in other worlds shall be—and given  
 In beauty by our God, to those alone  
 Who otherwise would fall from life and Heaven  
 Drawn by their heart's passion, and that tone,  
 That high tone of the spirit which hath striven,  
 Tho' not with Faith—with godliness—whose throne 30  
 With desperate energy 't hath beaten down ;  
 Wearing its own deep feeling as a crown.

## EVENING STAR

[*Tamerlane and other Poems*, 1827.]

'Twas noontide of summer,  
 And mid-time of night ;  
 And stars, in their orbits,  
 Shone pale, thro' the light  
 Of the brighter, cold moon,  
 'Mid planets her slaves,  
 Herself in the Heavens,  
 Her beam on the waves.  
 I gazed awhile  
 On her cold smile ; 10  
 Too cold—too cold for me—  
 There pass'd, as a shroud,  
 A fleecy cloud,  
 And I turn'd away to thee,  
 Proud Evening Star,  
 In thy glory afar,  
 And dearer thy beam shall be ;  
 For joy to my heart  
 Is the proud part  
 Thou bearest in Heaven at night, 20  
 And more I admire  
 Thy distant fire,  
 Than that colder, lowly light.

## DREAMS

[*Tamerlane and other Poems, 1827.*]

OH ! that my young life were a lasting dream !  
 My spirit not awakening, till the beam  
 Of an Eternity should bring the morrow.  
 Yes ! tho' that long dream were of hopeless sorrow,  
 'Twere better than the cold reality  
 Of waking life, to him whose heart must be,  
 And hath been still, upon the lovely earth,  
 A chaos of deep passion, from his birth.  
 But should it be—that dream eternally  
 Continuing—as dreams have been to me 10  
 In my young boyhood—should it thus be given,  
 'Twere folly still to hope for higher Heaven.  
 For I have revell'd, when the sun was bright  
 I' the summer sky, in dreams of living light  
 And loveliness,—have left my very heart  
 In climes of my imagining, apart  
 From mine own home, with beings that have been  
 Of mine own thought—what more could I have seen ?  
 'Twas once—and only once—and the wild hour  
 From my remembrance shall not pass—some power 20  
 Or spell had bound me—'twas the chilly wind  
 Came o'er me in the night, and left behind  
 Its image on my spirit—or the moon  
 Shone on my slumbers in her lofty noon  
 Too coldly—or the stars—howe'er it was  
 That dream was as that night-wind—let it pass.

I have been happy, tho' in a dream.  
 I have been happy—and I love the theme :  
 Dreams ! in their vivid colouring of life,  
 As in that fleeting, shadowy, misty strife 30  
 Of semblance with reality, which brings  
 To the delirious eye, more lovely things  
 Of Paradise and Love—and all our own !  
 Than young Hope in his sunniest hour hath known.

## SPIRITS OF THE DEAD

[*Al Aaraaf, Tamerlane, and Minor Poems*, 1829.]

THY soul shall find itself alone  
 'Mid dark thoughts of the grey tomb-stone ;  
 Not one, of all the crowd, to pry  
 Into thine hour of secrecy.

Be silent in that solitude,  
 Which is not loneliness—for then  
 The spirits of the dead, who stood  
 In life before thee, are again  
 In death around thee, and their will  
 Shall overshadow thee ; be still.

10

The night, though clear, shall frown,  
 And the stars shall not look down  
 From their high thrones in the Heaven  
 With light like hope to mortals given,  
 But their red orbs, without beam,  
 To thy weariness shall seem  
 As a burning and a fever  
 Which would cling to thee for ever.

Now are thoughts thou shalt not banish,  
 Now are visions ne'er to vanish ;  
 From thy spirit shall they pass  
 No more, like dew-drop from the grass.

20

The breeze, the breath of God, is still,  
 And the mist upon the hill  
 Shadowy, shadowy, yet unbroken,  
 Is a symbol and a token.  
 How it hangs upon the trees,  
 A mystery of mysteries !

## TO M——

[*Al Aaraaf, Tamerlane, and Minor Poems, 1829.*]

O ! I care not that my earthly lot  
 Hath little of Earth in it,  
 That years of love have been forgot  
 In the fever of a minute :

I heed not that the desolate  
 Are happier, sweet, than I,  
 But that you meddle with my fate  
 Who am a passer by.

It *is* not that my founts of bliss  
 Are gushing—strange ! with tears—  
 Or that the thrill of a single kiss  
 Hath palsied many years—

10

'Tis not that the flowers of twenty springs  
 Which have wither'd as they rose  
 Lie dead on my heart-strings  
 With the weight of an age of snows.

Not that the grass—O ! may it thrive !  
 On my grave is growing or grown—  
 But that, while I am dead yet alive  
 I cannot be, lady, alone.

20

THE RAVEN AND OTHER POEMS  
1845

TO THE NOBLEST OF HER SEX—  
TO THE AUTHOR OF  
' THE DRAMA IN EXILE '—  
TO MISS ELIZABETH BARRETT BARRETT,  
OF ENGLAND,

I DEDICATE THIS VOLUME,  
WITH THE MOST ENTHUSIASTIC ADMIRATION  
AND WITH THE MOST SINCERE ESTEEM.

E. A. P.

## PREFACE

THESE trifles are collected and republished chiefly with a view to their redemption from the many improvements to which they have been subjected while going at random 'the rounds of the press'. If what I have written is to circulate at all, I am naturally anxious that it should circulate as I wrote it. In defence of my own taste, nevertheless, it is incumbent upon me to say, that I think nothing in this volume of much value to the public, or very creditable to myself. Events not to be controlled have prevented me from making, at any time, any serious effort in what, under happier circumstances, would have been the field of my choice. With me poetry has been not a purpose, but a passion; and the passions should be held in reverence; they must not—they cannot at will be excited with an eye to the paltry compensations, or the more paltry commendations, of mankind.

E. A. P.

## THE RAVEN

ONCE upon a midnight dreary, while I pondered, weak  
 and weary,  
 Over many a quaint and curious volume of forgotten lore,  
 While I nodded, nearly napping, suddenly there came  
 a tapping,  
 As of some one gently rapping, rapping at my chamber  
 door.  
 ' 'Tis some visitor,' I muttered, ' tapping at my chamber  
 door—

Only this, and nothing more.'

Ah, distinctly I remember it was in the bleak December,  
 And each separate dying ember wrought its ghost upon  
 the floor.

Eagerly I wished the morrow ;—vainly I had sought  
 to borrow

From my books surcease of sorrow—sorrow for the lost  
 Lenore—

For the rare and radiant maiden whom the angels name  
 Lenore—

Nameless here for evermore.

And the silken sad uncertain rustling of each purple  
 curtain

Thrilled me—filled me with fantastic terrors never felt  
 before ;

So that now, to still the beating of my heart, I stood  
 repeating,

' 'Tis some visitor entreating entrance at my chamber  
 door—

Some late visitor entreating entrance at my chamber  
 door ;—

This it is, and nothing more.'

Presently my soul grew stronger ; hesitating then  
 no longer,

' Sir,' said I, ' or Madam, truly your forgiveness I implore ; 20

But the fact is I was napping, and so gently you came  
rapping,  
And so faintly you came tapping, tapping at my chamber  
door,  
That I scarce was sure I heard you '—here I opened wide  
the door ;—  
Darkness there, and nothing more.

Deep into that darkness peering, long I stood there  
wondering, fearing,  
Doubting, dreaming dreams no mortals ever dared to dream  
before ;  
But the silence was unbroken, and the stillness gave no  
token,  
And the only word there spoken was the whispered word,  
' Lenore ! '  
This I whispered, and an echo murmured back the word,  
' Lenore ! '—  
Merely this, and nothing more. 30

Back into the chamber turning, all my soul within me  
burning,  
Soon again I heard a tapping somewhat louder than before.  
' Surely,' said I, ' surely that is something at my window  
lattice :  
Let me see, then, what thereat is, and this mystery  
explore—  
Let my heart be still a moment and this mystery explore ;—  
'Tis the wind and nothing more.'

Open here I flung the shutter, when, with many a flirt  
and flutter,  
In there stepped a stately raven of the saintly days of  
yore ;  
Not the least obeisance made he ; not a minute stopped  
or stayed he ;  
But, with mien of lord or lady, perched above my  
chamber door—  
Perched upon a bust of Pallas just above my chamber  
door—  
Perched, and sat, and nothing more. 40

Then this ebony bird beguiling my sad fancy into  
smiling,  
By the grave and stern decorum of the countenance it wore.  
'Though thy crest be shorn and shaven, thou,' I said,  
'art sure no craven,  
Ghastly grim and ancient raven wandering from the  
Nightly shore—  
Tell me what thy lordly name is on the Night's Plutonian  
shore!'

Quoth the Raven, 'Nevermore'.

Much I marvelled this ungainly fowl to hear discourse  
so plainly,  
Though its answer little meaning—little relevancy bore ; so  
For we cannot help agreeing that no living human being  
Ever yet was blest with seeing bird above his chamber  
door—  
Bird or beast upon the sculptured bust above his chamber  
door,  
With such name as 'Nevermore'.

But the raven, sitting lonely on the placid bust, spoke  
only  
That one word, as if his soul in that one word he did out-  
pour.  
Nothing further then he uttered—not a feather then he  
fluttered—  
Till I scarcely more than muttered, 'other friends have  
flown before—  
On the morrow *he* will leave me, as my hopes have flown  
before.'

Then the bird said, 'Nevermore'. 60

Startled at the stillness broken by reply so aptly spoken,  
'Doubtless', said I, 'what it utters is its only stock and  
store,  
Caught from some unhappy master whom unmerciful  
Disaster  
Followed fast and followed faster till his songs one  
burden bore—  
Till the dirges of his Hope that melancholy burden bore  
Of "Never—nevermore".'

But the Raven still beguiling all my fancy into smiling,  
Straight I wheeled a cushioned seat in front of bird, and  
bust and door ;

Then upon the velvet sinking, I betook myself to  
linking

Fancy unto fancy, thinking what this ominous bird  
of yore— 70

What this grim, ungainly, ghastly, gaunt and ominous  
bird of yore

Meant in croaking 'Nevermore'.

This I sat engaged in guessing, but no syllable expressing  
To the fowl whose fiery eyes now burned into my bosom's  
core ;

This and more I sat divining, with my head at ease  
reclining

On the cushion's velvet lining that the lamplight gloated  
o'er,

But whose velvet violet lining with the lamplight gloating  
o'er,

*She* shall press, ah, nevermore !

Then methought the air grew denser, perfumed from  
an unseen censer  
Swung by Seraphim whose footfalls tinkled on the tufted  
floor. 80

'Wretch,' I cried, 'thy God hath lent thee—by these  
angels he hath sent thee

Respite—respite and nepenthe, from thy memories of  
Lenore !

Quaff, oh quaff this kind nepenthe and forget this lost  
Lenore !'

Quoth the Raven, 'Nevermore'.

'Prophet !' said I, 'thing of evil !—prophet still, if  
bird or devil !—

Whether Tempter sent, or whether tempest tossed thee  
here ashore,

Desolate yet all undaunted, on this desert land en-  
chanted—

On this home by horror haunted—tell me truly, I  
implore—

s there—is there balm in Gilead?—tell me—tell me,  
I implore!’

Quoth the Raven, ‘Nevermore’. 90

‘Prophet!’ said I, ‘thing of evil—prophet still, if bird  
or devil!

By that Heaven that bends above us—by that God we  
both adore—

Tell this soul with sorrow laden if, within the distant  
Aidenn,

It shall clasp a sainted maiden whom the angels name  
Lenore—

Clasp a rare and radiant maiden whom the angels name  
Lenore.’

Quoth the Raven, ‘Nevermore’.

‘Be that word our sign in parting, bird or fiend,’ I  
shrieked, upstarting—

Get thee back into the tempest and the Night’s Plutonian  
shore!

Leave no black plume as a token of that lie thy soul  
hath spoken!

Leave my loneliness unbroken!—quit the bust above  
my door! 100

Take thy beak from out my heart, and take thy form from  
off my door!’

Quoth the Raven, ‘Nevermore’.

And the Raven, never flitting, still is sitting, still is  
sitting

On the pallid bust of Pallas just above my chamber door;

And his eyes have all the seeming of a demon’s that is  
dreaming,

And the lamplight o’er him streaming throws his shadow  
on the floor;

And my soul from out that shadow that lies floating on  
the floor

Shall be lifted—nevermore!

## THE VALLEY OF UNREST

*ONCE* it smiled a silent dell  
 Where the people did not dwell ;  
 They had gone unto the wars,  
 Trusting to the mild-eyed stars,  
 Nightly, from their azure towers,  
 To keep watch above the flowers,  
 In the midst of which all day  
 The red sunlight lazily lay.  
*Now* each visitor shall confess  
 The sad valley's restlessness. 10  
 Nothing there is motionless—  
 Nothing save the airs that brood  
 Over the magic solitude.  
 Ah, by no wind are stirred those trees  
 That palpitate like the chill seas  
 Around the misty Hebrides !  
 Ah, by no wind those clouds are driven  
 That rustle through the unquiet Heaven  
 Uneasily, from morn till even,  
 Over the violets there that lie 20  
 In myriad types of the human eye—  
 Over the lilies there that wave  
 And weep above a nameless grave !  
 They wave :—from out their fragrant tops  
 Eternal dew comes down in drops.  
 They weep :—from off their delicate stems  
 Perennial tears descend in gems.

## BRIDAL BALLAD

THE ring is on my hand,  
 And the wreath is on my brow ;  
 Satin and jewels grand  
 Are all at my command,  
 And I am happy now.  
 And my lord he loves me well ;  
 But, when first he breathed his vow,  
 I felt my bosom swell—  
 For the words rang as a knell,

## BRIDAL BALLAD

21

And the voice seemed *his* who fell  
In the battle down the dell,  
And who is happy now.

10

But he spoke to re-assure me,  
And he kissed my pallid brow,  
While a reverie came o'er me,  
And to the church-yard bore me,  
And I sighed to him before me,  
Thinking him dead D'Elormie,  
' Oh, I am happy now ! '

And thus the words were spoken,  
And this the plighted vow,  
And, though my faith be broken,  
And, though my heart be broken,  
Here is a ring, as token  
That I am happy now !

20

Would God I could awaken !  
For I dream I know not how !  
And my soul is sorely shaken  
Lest an evil step be taken,—  
Lest the dead who is forsaken  
May not be happy now.

30

## THE SLEEPER

At midnight, in the month of June,  
I stand beneath the mystic moon.  
An opiate vapour, dewy, dim,  
Exhales from out her golden rim,  
And, softly dripping, drop by drop,  
Upon the quiet mountain top,  
Steals drowsily and musically  
Into the universal valley.  
The rosemary nods upon the grave ;  
The lily lolls upon the wave ;  
Wrapping the fog about its breast,  
The ruin moulders into rest ;  
Looking like Lethe, see ! the lake

10

A conscious slumber seems to take,  
 And would not, for the world, awake.  
 All Beauty sleeps !—and lo ! where lies  
 Irene, with her Destinies !

O, lady bright ! can it be right—  
 This window open to the night ?  
 The wanton airs, from the tree-top, 20  
 Laughingly through the lattice drop—  
 The bodiless airs, a wizard rout,  
 Flit through thy chamber in and out,  
 And wave the curtain canopy  
 So fitfully—so fearfully—  
 Above the closed and fringed lid  
 'Neath which thy slumb'ring soul lies hid,  
 That, o'er the floor and down the wall,  
 Like ghosts the shadows rise and fall !  
 Oh, lady dear, hast thou no fear ? 30  
 Why and what art thou dreaming here ?  
 Sure thou art come o'er far-off seas,  
 A wonder to these garden trees !  
 Strange is thy pallor ! strange thy dress,  
 Strange, above all, thy length of tress,  
 And this all solemn silentness !

The lady sleeps ! Oh, may her sleep,  
 Which is enduring, so be deep !  
 Heaven have her in its sacred keep !  
 This chamber changed for one more holy, 40  
 This bed for one more melancholy,  
 I pray to God that she may lie  
 For ever with unopened eye,  
 While the pale sheeted ghosts go by !

My love, she sleeps ! Oh, may her sleep  
 As it is lasting, so be deep !  
 Soft may the worms about her creep !  
 Far in the forest, dim and old,  
 For her may some tall vault unfold—  
 Some vault that oft has flung its black 50  
 And wingèd panels fluttering back,

Triumphant, o'er the crested palls,  
 Of her grand family funerals—  
 Some sepulchre, remote, alone,  
 Against whose portal she hath thrown,  
 In childhood, many an idle stone—  
 Some tomb from out whose sounding door  
 She ne'er shall force an echo more,  
 Thrilling to think, poor child of sin !  
 It was the dead who groaned within.

60

## THE COLISEUM

TYPE of the antique Rome ! Rich reliquary  
 Of lofty contemplation left to Time  
 By buried centuries of pomp and power !  
 At length—at length—after so many days  
 Of weary pilgrimage and burning thirst,  
 (Thirst for the springs of lore that in thee lie,)  
 I kneel, an altered and an humble man,  
 Amid thy shadows, and so drink within  
 My very soul thy grandeur, gloom, and glory !

Vastness ! and Age ! and Memories of Eld !  
 Silence ! and Desolation ! and dim Night !  
 I feel ye now—I feel ye in your strength—  
 O spells more sure than e'er Judæan king  
 Taught in the gardens of Gethsemane !  
 O charms more potent than the rapt Chaldee  
 Ever drew down from out the quiet stars !

10

Here, where a hero fell, a column falls !  
 Here, where the mimic eagle glared in gold,  
 A midnight vigil holds the swarthy bat !  
 Here, where the dames of Rome their gilded hair  
 Waved to the wind, now wave the reed and thistle !  
 Here, where on golden throne the monarch lolled,  
 Glides, spectre-like, unto his marble home,  
 Lit by the wan light of the hornèd moon,  
 The swift and silent lizard of the stones !

20

But stay ! these walls—these ivy-clad arcades—  
 These mouldering plinths—these sad and blackened  
 shafts—

These vague entablatures—this crumbling frieze—  
 These shattered cornices—this wreck—this ruin—  
 These stones—alas ! these grey stones—are they all— 30  
 All of the famed, and the colossal left  
 By the corrosive Hours to Fate and me ?

‘ Not all ’—the Echoes answer me—‘ not all !  
 Prophetic sounds and loud, arise forever  
 From us, and from all Ruin, unto the wise,  
 As melody from Memnon to the Sun.  
 We rule the hearts of mightiest men—we rule  
 With a despotic sway all giant minds.  
 We are not impotent—we pallid stones.  
 Not all our power is gone—not all our fame— 40  
 Not all the magic of our high renown—  
 Not all the wonder that encircles us—  
 Not all the mysteries that in us lie—  
 Not all the memories that hang upon  
 And cling around about us as a garment,  
 Clothing us in a robe of more than glory.’

### LENORE

Ah, broken is the golden bowl ! the spirit flown forever !  
 Let the bell toll !—a saintly soul floats on the Stygian river ;  
 And, Guy de Vere, hast *thou* no tear ?—weep now or  
 nevermore !

See ! on yon drear and rigid bier low lies thy love, Lenore !  
 Come ! let the burial rite be read—the funeral song be  
 sung !—

An anthem for the queenliest dead that ever died so  
 young—

A dirge for her the doubly dead in that she died so young.

‘ Wretches ! ye loved her for her wealth and hated her for  
 her pride,  
 And when she fell in feeble health, ye blessed her—that  
 she died !

How *shall* the ritual, then, be read?—the requiem how  
     be sung 10  
 By you—by yours, the evil eye,—by yours, the slanderous  
     tongue  
 That did to death the innocence that died, and died so  
     young?'

*Peccavimus* ; but rave not thus ! and let a Sabbath song  
 Go up to God so solemnly the dead may feel no wrong.  
 The sweet Lenore hath 'gone before', with Hope, that  
     flew beside,  
 Leaving thee wild for the dear child that should have  
     been thy bride—  
 For her, the fair and *debonair*, that now so lowly lies,  
 The life upon her yellow hair but not within her eyes—  
 The life still there, upon her hair—the death upon her  
     eyes.

'Avaunt ! avaunt ! from fiends below, the indignant  
     ghost is riven— 20  
 From Hell unto a high estate far up within the Heaven—  
 From grief and groan, to a golden throne, beside the King  
     of Heaven !  
 Let no bell toll, then,—lest her soul, amid its hallowed  
     mirth,  
 Should catch the note as it doth float up from the damnèd  
     Earth !  
 And I !—to-night my heart is light !—no dirge will I  
     upraise,  
 But waft the angel on her flight with a Paeon of old days !'

## CATHOLIC HYMN

At morn—at noon—at twilight dim—  
 Maria ! thou hast heard my hymn !  
 In joy and woe—in good and ill—  
 Mother of God, be with me still !  
 When the hours flew brightly by,  
 And not a cloud obscured the sky,  
 My soul, lest it should truant be,  
 Thy grace did guide to thine and thee ;

Now, when storms of Fate o'ercast  
 Darkly my Present and my Past, 10  
 Let my Future radiant shine  
 With sweet hopes of thee and thine !

## ISRAFEL

And the angel Israfel, whose heart-strings are a lute, and who has the sweetest voice of all God's creatures.—*Koran*.

In Heaven a spirit doth dwell  
 ' Whose heart-strings are a lute ' ;  
 None sing so wildly well  
 As the angel Israfel,  
 And the giddy stars (so legends tell),  
 Ceasing their hymns, attend the spell  
 Of his voice, all mute.

Tottering above  
 In her highest noon,  
 The enamoured moon 10  
 Blushes with love,  
 While, to listen, the red levin  
 (With the rapid Pleiads, even,  
 Which were seven,)  
 Pauses in Heaven.

And they say (the starry choir  
 And the other listening things)  
 That Israfeli's fire  
 Is owing to that lyre  
 By which he sits and sings— 20  
 The trembling living wire  
 Of those unusual strings.

But the skies that angel trod,  
 Where deep thoughts are a duty—  
 Where Love's a grown-up God—  
 Where the Houri glances are  
 Imbued with all the beauty  
 Which we worship in a star.

## ISRAFEL

27

Therefore thou art not wrong,  
    Israfeli, who despisest  
An unimpassioned song ;  
To thee the laurels belong,  
    Best bard, because the wisest !  
Merrily live, and long !

The ecstasies above  
    With thy burning measures suit—  
Thy grief, thy joy, thy hate, thy love,  
    With the fervour of thy lute—  
    Well may the stars be mute !

Yes, Heaven is thine ; but this  
Is a world of sweets and sour ;  
    Our flowers are merely—flowers,  
And the shadow of thy perfect bliss  
    Is the sunshine of ours.

If I could dwell  
Where Israfel  
    Hath dwelt, and he where I,  
He might not sing so wildly well  
    A mortal melody,  
While a bolder note than this might swell  
    From my lyre within the sky.

## DREAMLAND

By a route obscure and lonely,  
Haunted by ill angels only,  
Where an Eidolon, named NIGHT,  
On a black throne reigns upright,  
I have reached these lands but newly  
From an ultimate dim Thule—  
From a wild weird clime that lieth, sublime,  
    Out of SPACE—out of TIME.

Bottomless vales and boundless floods,  
And chasms, and caves, and Titan woods,  
With forms that no man can discover  
For the tears that drip all over ;

Mountains toppling evermore  
Into seas without a shore ;  
Seas that restlessly aspire,  
Surging, unto skies of fire ;  
Lakes that endlessly outspread  
Their lone waters—lone and dead,—  
Their still waters—still and chilly  
With the snows of the lolling lily.

20

By the lakes that thus outspread  
Their lone waters, lone and dead,—  
Their sad waters, sad and chilly  
With the snows of the lolling lily,—  
By the mountains—near the river  
Murmuring lowly, murmuring ever,—  
By the grey woods,—by the swamp  
Where the toad and the newt encamp,—  
By the dismal tarns and pools

Where dwell the Ghouls,—  
By each spot the most unholy—  
In each nook most melancholy,—  
There the traveller meets aghast  
Sheeted Memories of the Past—  
Shrouded forms that start and sigh  
As they pass the wanderer by—  
White-robed forms of friends long given,  
In agony, to the Earth—and Heaven.

30

For the heart whose woes are legion  
'Tis a peaceful, soothing region—  
For the spirit that walks in shadow  
'Tis—oh, 'tis an Eldorado !  
But the traveller, travelling through it,  
May not—dare not openly view it !  
Never its mysteries are exposed  
To the weak human eye unclosed ;  
So wills its King, who hath forbid  
The uplifting of the fringed lid ;  
And thus the sad Soul that here passes  
Beholds it but through darkened glasses.

40

50

By a route obscure and lonely,  
 Haunted by ill angels only,  
 Where an Eidolon, named NIGHT,  
 On a black throne reigns upright,  
 I have wandered home but newly  
 From this ultimate dim Thule.

## SONNET—TO ZANTE

FAIR isle, that from the fairest of all flowers,  
 Thy gentlest of all gentle names dost take !  
 How many memories of what radiant hours  
 At sight of thee and thine at once awake !  
 How many scenes of what departed bliss !  
 How many thoughts of what entombèd hopes !  
 How many visions of a maiden that is  
 No more—no more upon thy verdant slopes !  
*No more !* alas, that magical sad sound  
 Transforming all ! Thy charms shall please *no more—* io  
 Thy memory *no more !* Accursèd ground  
 Henceforth I hold thy flower-enamelled shore,  
 O hyacinthine isle ! O purple Zante !  
 ‘Isola d’oro ! Fior di Levante !’

## THE CITY IN THE SEA

Lo ! Death has reared himself a throne  
 In a strange city lying alone  
 Far down within the dim West,  
 Where the good and the bad and the worst and the best  
 Have gone to their eternal rest.  
 There shrines and palaces and towers  
 (Time-eaten towers that tremble not !  
 Resemble nothing that is ours.  
 Around, by lifting winds forgot,  
 Resignedly beneath the sky  
 The melancholy waters lie.

10

No rays from the holy heaven come down  
 On the long night-time of that town ;

But light from out the lurid sea  
Streams up the turrets silently—  
Gleams up the pinnacles far and free—  
Up domes—up spires—up kingly halls—  
Up fanes—up Babylon-like walls—  
Up shadowy long-forgotten bowers  
Of sculptured ivy and stone flowers— 20  
Up many and many a marvellous shrine  
Whose wreathed friezes intertwine  
The viol, the violet, and the vine.  
Resignedly beneath the sky  
The melancholy waters lie.  
So blend the turrets and shadows there  
That all seem pendulous in air,  
While from a proud tower in the town  
Death looks gigantically down.

There open fanes and gaping graves 30  
Yawn level with the luminous waves ;  
But not the riches there that lie  
In each idol's diamond eye—  
Not the gaily-jewelled dead  
Tempt the waters from their bed ;  
For no ripples curl, alas !  
Along that wilderness of glass—  
No swellings tell that winds may be  
Upon some far-off happier sea—  
No heavings hint that winds have been 40  
On seas less hideously serene.

But lo, a stir is in the air !  
The wave—there is a movement there !  
As if the towers had thrust aside,  
In slightly sinking, the dull tide—  
As if their tops had feebly given  
A void within the filmy Heaven.  
The waves have now a redder glow—  
The hours are breathing faint and low—  
And when, amid no earthly moans, 50  
Down, down that town shall settle hence,  
Hell, rising from a thousand thrones,  
Shall do it reverence.

## TO ONE IN PARADISE

THOU wast all that to me, love,  
 For which my soul did pine—  
 A green isle in the sea, love,  
 A fountain and a shrine,  
 All wreathed with fairy fruits and flowers,  
 And all the flowers were mine.

Ah, dream too bright to last !  
 Ah, starry Hope ! that didst arise  
 But to be overcast !  
 A voice from out the Future cries,  
 'On ! on ! '—but o'er the Past  
 (Dim gulf !) my spirit hovering lies  
 Mute, motionless, aghast !

10

For, alas ! alas ! with me  
 The light of Life is o'er !  
 ' No more—no more—no more— '  
 (Such language holds the solemn sea  
 To the sands upon the shore)  
 Shall bloom the thunder-blasted tree  
 Or the stricken eagle soar !

20

And all my days are trances,  
 And all my nightly dreams  
 Are where thy grey eye glances,  
 And where thy footstep gleams—  
 In what ethereal dances,  
 By what eternal streams.

## EULALIE—A SONG

I DWELT alone  
 In a world of moan,  
 And my soul was a stagnant tide,  
 Till the fair and gentle Eulalie became my blushing bride—  
 Till the yellow-haired young Eulalie became my smiling  
 bride.

Ah, less—less bright  
 The stars of the night  
 Than the eyes of the radiant girl !  
 And never a flake  
 That the vapour can make 10  
 With the moon-tints of purple and pearl,  
 Can vie with the modest Eulalie's most unregarded curl—  
 Can compare with the bright-eyed Eulalie's most humble  
 and careless curl.

Now Doubt—now Pain  
 Come never again,  
 For her soul gives me sigh for sigh,  
 And all day long  
 Shines, bright and strong,  
 Astarté within the sky,  
 While ever to her dear Eulalie upturns her matron eye— 20  
 While ever to her young Eulalie upturns her violet eye.

## TO F—S S. O—D

[Mrs. Frances Sargent Osgood.]

THOU wouldst be loved ?—then let thy heart  
 From its present pathway part not !  
 Being everything which now thou art,  
 Be nothing which thou art not.  
 So with the world thy gentle ways,  
 Thy grace, thy more than beauty,  
 Shall be an endless theme of praise,  
 And love—a simple duty.

## TO F——

[F—— is, presumably, Mrs. Frances Sargent Osgood.]

BELOVED ! amid the earnest woes  
 That crowd around my earthly path—  
 (Drear path, alas ! where grows  
 Not even one lonely rose)—  
 My soul at least a solace hath  
 In dreams of thee, and therein knows  
 An Eden of bland repose.

And thus thy memory is to me  
 Like some enchanted far-off isle  
 In some tumultuous sea—  
 Some ocean throbbing far and free  
 With storms—but where meanwhile  
 Serenest skies continually  
 Just o'er that one bright island smile.

10

## SONNET—SILENCE

THERE are some qualities—some incorporate things,  
 That have a double life, which thus is made  
 A type of that twin entity which springs  
 From matter and light, evinced in solid and shade.  
 There is a two-fold *Silence*—sea and shore—  
 Body and soul. One dwells in lonely places,  
 Newly with grass o'ergrown ; some solemn graces,  
 Some human memories and tearful lore,  
 Render him terrorless : his name's ' No More ' .  
 He is the corporate Silence : dread him not !  
 No power hath he of evil in himself ;  
 But should some urgent fate (untimely lot !)  
 Bring thee to meet his shadow (nameless elf,  
 That haunteth the lone regions where hath trod  
 No foot of man,) commend thyself to God !

10

## THE CONQUEROR WORM

Lo ! 'tis a gala night  
 Within the lonesome latter years !  
 An angel throng, bewinged, bedight  
 In veils, and drowned in tears,  
 Sit in a theatre, to see  
 A play of hopes and fears,  
 While the orchestra breathes fitfully  
 The music of the spheres.

Mimes, in the form of God on high,  
 Mutter and mumble low, 10  
 And hither and thither fly—  
 Mere puppets they, who come and go  
 At bidding of vast formless things  
 That shift the scenery to and fro,  
 Flapping from out their Condor wings  
 Invisible Woe !

That motley drama—oh, be sure  
 It shall not be forgot !  
 With its Phantom chased for evermore,  
 By a crowd that seize it not, 20  
 Through a circle that ever returneth in  
 To the self-same spot,  
 And much of Madness, and more of Sin,  
 And Horror the soul of the plot.

But see, amid the mimic rout  
 A crawling shape intrude !  
 A blood-red thing that writhes from out  
 The scenic solitude !  
 It writhes !—it writhes !—with mortal pangs 30  
 The mimes become its food,  
 And seraphs sob at vermin fangs  
 In human gore imbued.

Out—out are the lights—out all !  
 And, over each quivering form,  
 The curtain, a funeral pall,  
 Comes down with the rush of a storm,

While the angels, all pallid and wan,  
Uprising, unveiling, affirm  
That the play is the tragedy, ' Man ',  
And its hero the Conqueror Worm.

40

## THE HAUNTED PALACE

In the greenest of our valleys  
By good angels tenanted,  
Once a fair and stately palace—  
Radiant palace—reared its head.  
In the monarch Thought's dominion—  
It stood there !  
Never seraph spread a pinion  
Over fabric half so fair !

Banners yellow, glorious, golden,  
On its roof did float and flow,  
(This—all this—was in the olden  
Time long ago,)  
And every gentle air that dallied,  
In that sweet day,  
Along the ramparts plumed and pallid,  
A wingèd odour went away.

10

Wanderers in that happy valley,  
Through two luminous windows, saw  
Spirits moving musically,  
To a lute's well-tuned law,  
Round about a throne where, sitting  
(Porphyrogene !)  
In state his glory well-befitting,  
The ruler of the realm was seen.

20

And all with pearl and ruby glowing  
Was the fair palace door,  
Through which came flowing, flowing, flowing,  
And sparkling evermore,  
A troop of Echoes, whose sweet duty  
Was but to sing,  
In voices of surpassing beauty,  
The wit and wisdom of their king.

30

But evil things, in robes of sorrow,  
Assailed the monarch's high estate.  
(Ah, let us mourn !—for never morrow <sup>1</sup>  
Shall dawn upon him desolate !)  
And round about his home the glory  
That blushed and bloomed,  
Is but a dim-remembered story  
Of the old time entombed.

40

And travellers, now, within that valley,  
Through the red-litten windows see  
Vast forms, that move fantastically  
To a discordant melody,  
While, like a ghastly rapid river,  
Through the pale door  
A hideous throng rush out forever  
And laugh—but smile no more.

<sup>1</sup> The 1845 text has 'sorrow' for morrow. But this is obviously a misprint.—ED.

# **SCENES FROM 'POLITIAN'**

**AN UNPUBLISHED DRAMA**

## DRAMATIS PERSONAE

POLITIAN, Earl of Leicester.

DI BROGLIO, a Roman Duke.

COUNT CASTIGLIONE, his son.

BALDAZZAR, Duke of Surrey,  
Friend to Politian.

A MONK.

LALAGE.

ALESSANDRA, betrothed to Casti-  
glione.

JACINTA, maid to Lalage.

*The Scene lies in Rome.*

## SCENES FROM 'POLITIAN'

## AN UNPUBLISHED DRAMA

## I

ROME.—*A Hall in a Palace.*

ALESSANDRA and CASTIGLIONE.

ALESSANDRA.

Thou art sad, Castiglione.

CASTIGLIONE.

Sad !—not I.

Oh, I'm the happiest, happiest man in Rome !  
 A few days more, thou knowest, my Alessandra,  
 Will make thee mine. Oh, I am very happy !

ALESSANDRA.

Methinks thou hast a singular way of showing  
 Thy happiness !—what ails thee, cousin of mine ?  
 Why didst thou sigh so deeply ?

CASTIGLIONE.

Did I sigh ?

I was not conscious of it. It is a fashion,  
 A silly—a most silly fashion I have  
 When I am *very* happy. Did I sigh ?

9  
(*Sighing.*)

ALESSANDRA.

Thou didst. Thou art not well. Thou hast indulged  
 Too much of late, and I am vexed to see it.  
 Late hours and wine, Castiglione,—these  
 Will ruin thee ! thou art already altered—  
 Thy looks are haggard—nothing so wears away  
 The constitution as late hours and wine.

CASTIGLIONE (*musings*).

Nothing, fair cousin, nothing—not even deep sorrow—  
 Wears it away like evil hours and wine.  
 I will amend.

ALESSANDRA.

Do it ! I would have thee drop  
 Thy riotous company, too—fellows low born—

Ill suit the like with old Di Broglio's heir  
And Alessandra's husband.

CASTIGLIONE.

I will drop them.

ALESSANDRA.

Thou wilt—thou must. Attend thou also more  
To thy dress and equipage—they are over plain  
For thy lofty rank and fashion—much depends  
Upon appearances.

CASTIGLIONE.

I'll see to it.

ALESSANDRA.

Then see to it !—pay more attention, sir,  
To a becoming carriage—much thou wantest  
In dignity.

CASTIGLIONE.

Much, much, oh ! much I want  
In proper dignity.

ALESSANDRA (*haughtily*).

Thou mockest me, sir.

30

CASTIGLIONE (*abstractedly*).

Sweet, gentle Lalage !

ALESSANDRA.

Heard I aright ?

    speak to him—he speaks of Lalage !  
Sir Count ! (*places her hand on his shoulder*) what art thou  
    dreaming ? (*aside*) He's not well !  
What ails thee, sir ?

CASTIGLIONE (*starting*).

Cousin ! fair cousin !—madam !

I crave thy pardon—indeed I am not well—  
Your hand from off my shoulder, if you please.  
This air is most oppressive !—Madam—the Duke !

*Enter DI BROGLIO.*

DI BROGLIO.

My son, I've news for thee !—hey ?—what's the matter ?  
    (*observing Alessandra.*)

I' the pouts ? Kiss her, Castiglione ! kiss her,  
You dog ! and make it up, I say, this minute !

40

I've news for you both. Politian is expected  
Hourly in Rome—Politian, Earl of Leicester !  
We'll have him at the wedding. 'Tis his first visit  
To the imperial city.

ALESSANDRA.

What ! Politian  
Of Britain, Earl of Leicester ?

DI BROGLIO.

The same, my love.  
We'll have him at the wedding. A man quite young  
In years, but grey in fame. I have not seen him,  
But Rumour speaks of him as of a prodigy  
Preëminent in arts and arms, and wealth,  
And high descent. We'll have him at the wedding.

50

ALESSANDRA.

I have heard much of this Politian.  
Gay, volatile and giddy—is he not ?  
And little given to thinking.

DI BROGLIO.

Far from it, love.  
No branch, they say, of all philosophy  
So deep abstruse he has not mastered it.  
Learned as few are learned.

ALESSANDRA.

'Tis very strange !  
I have known men have seen Politian  
And sought his company. They speak of him  
As of one who entered madly into life,  
Drinking the cup of pleasure to the dregs.

60

CASTIGLIONE.

Ridiculous ! Now I have seen Politian  
And know him well—nor learned nor mirthful he.  
He is a dreamer, and a man shut out  
From common passions.

DI BROGLIO.

Children, we disagree.  
Let us go forth and taste the fragrant air  
Of the garden. Did I dream, or did I hear  
Politian was a melancholy man ?

(*Exeunt.*)

## II

ROME.—*A Lady's apartment, with a window open and looking into a garden. LALAGE, in deep mourning, reading at a table on which lie some books and a hand mirror. In the background JACINTA (a servant maid) leans carelessly upon a chair.*

LALAGE.

Jacinta, is it thou ?

JACINTA (*pertly*).

Yes, ma'am, I'm here.

LALAGE.

I did not know, Jacinta, you were in waiting.

Sit down !—let not my presence trouble you—

70

Sit down !—for I am humble, most humble.

JACINTA (*aside*).

'Tis time.

(JACINTA seats herself in a side-long manner upon the chair, resting her elbows upon the back, and regarding her mistress with a contemptuous look. LALAGE continues to read.)

LALAGE.

'It in another climate, so he said,

'Bore a bright golden flower, but not i' this soil !'

(*pauses—turns over some leaves, and resumes.*)

'No lingering winters there, nor snow, nor shower—

'But Ocean ever to refresh mankind

'Breathes the shrill spirit of the western wind.'

O, beautiful !—most beautiful !—how like

To what my fevered soul doth dream of Heaven !

O happy land ! (*pauses.*) She died !—the maiden died ! so

O still more happy maiden who couldst die !

Jacinta !

(JACINTA returns no answer, and LALAGE presently resumes.)

Again !—a similar tale

Told of a beauteous dame beyond the sea !

Thus speaketh one Ferdinand in the words of the play—

'She died full young'—one Bossola answers him—

'I think not so—her infelicity

'Seemed to have years too many'—Ah luckless lady !  
Jacinta ! (*still no answer.*)

Here's a far sterner story,  
But like—oh, very like in its despair— 90  
Of that Egyptian queen, winning so easily  
A thousand hearts—losing at length her own.  
She died. Thus endeth the history—and her maids  
Lean over her and weep—two gentle maids  
With gentle names—Eiros and Charmion !  
Rainbow and Dove !——Jacinta !

JACINTA (*pettishly*).

Madam, what is it ?

LALAGE.

Wilt thou, my good Jacinta, be so kind  
As go down in the library and bring me  
The Holy Evangelists ?

JACINTA.

Pshaw ! (*Exit.*)

LALAGE.

If there be balm 100  
For the wounded spirit in Gilead it is there !  
Dew in the night-time of my bitter trouble  
Will there be found—'dew sweeter far than that  
Which hangs like chains of pearl on Hermon hill.'

(*Re-enter JACINTA, and throws a volume on the table.*)

There, ma'am, 's the book. Indeed she is very trouble-  
some. (*Aside.*)

LALAGE (*astonished*).

What didst thou say, Jacinta ? Have I done aught  
To grieve thee or to vex thee ?—I am sorry.  
For thou hast served me long and ever been  
Trustworthy and respectful. (*resumes her reading.*)

JACINTA (*aside*).

I can't believe  
She has any more jewels—no—no—she gave me all. 110

LALAGE.

What didst thou say, Jacinta ? Now I bethink me  
Thou hast not spoken lately of thy wedding.  
How fares good Ugo ?—and when is it to be ?  
Can I do aught ?—is there no farther aid

Thou needest, Jacinta

JACINTA.

Is there no *farther* aid !

That 's meant for me (*aside*). I'm sure, madam, you need not  
Be always throwing those jewels in my teeth.

LALAGE.

Jewels ! Jacinta,—now indeed, Jacinta,  
I thought not of the jewels.

JACINTA.

Oh ! perhaps not !

But then I might have sworn it. After all, 120  
There 's Ugo says the ring is only paste,  
For he 's sure the Count Castiglione never  
Would have given a real diamond to such as you ;  
And at the best I'm certain, madam, you cannot  
Have use for jewels *now*. But I might have sworn it. (*Exit.*)  
(LALAGE *bursts into tears and leans her head upon*  
*the table—after a short pause raises it.*)

LALAGE.

Poor Lalage !—and is it come to this ?  
Thy servant maid !—but courage !—'tis but a viper  
Whom thou hast cherished to sting thee to the soul !  
(*Taking up the mirror.*)

Ha ! here at least 's a friend—too much a friend  
In earlier days—a friend will not deceive thee. 130  
Fair mirror and true ! now tell me (for thou canst)  
A tale—a pretty tale—and heed thou not  
Though it be rife with woe. It answers me.  
It speaks of sunken eyes, and wasted cheeks,  
And Beauty long deceased—remembers me  
Of Joy departed—Hope, the Seraph Hope,  
Inurned and entombed :—now, in a tone  
Low, sad, and solemn, but most audible,  
Whispers of early grave untimely yawning  
For ruined maid. Fair mirror and true—thou liest not ! 140  
Thou hast no end to gain—no heart to break—  
Castiglione lied who said he loved—  
Thou true—he false !—false !—false !

(*While she speaks, a monk enters her apartment,*  
*and approaches unobserved.*)

MONK.

Refuge thou hast,  
Sweet daughter, in Heaven. Think of eternal things !  
Give up thy soul to penitence, and pray !

LALAGE (*arising hurriedly*).

I cannot pray !—My soul is at war with God !  
The frightful sounds of merriment below  
Disturb my senses—go ! I cannot pray—  
The sweet airs from the garden worry me !  
Thy presence grieves me—go !—thy priestly raiment  
Fills me with dread—thy ebony crucifix  
With horror and awe !

150

MONK.

Think of thy precious soul !

LALAGE.

Think of my early days !—think of my father  
And mother in Heaven ! think of our quiet home,  
And the rivulet that ran before the door !  
Think of my little sisters !—think of them !  
And think of me !—think of my trusting love  
And confidence—his vows—my ruin—think—think  
Of my unspeakable misery !—begone !  
Yet stay ! yet stay !—what was it thou saidst of prayer  
And penitence ? Didst thou not speak of faith  
And vows before the throne ?

160

MONK.

I did.

LALAGE.

'Tis well  
There *is* a vow were fitting should be made—  
A sacred vow, imperative, and urgent,  
A solemn vow !

MONK.

Daughter, this zeal is well

LALAGE.

Father, this zeal is anything but well !  
Hast thou a crucifix fit for this thing ?  
A crucifix whereon to register  
This sacred vow ?

169

(*He hands her his own.*)

Not that—Oh ! no !—no !—no !

(*Shuddering.*)

Not that ! Not that !—I tell thee, holy man,  
Thy raiments and thy ebony cross affright me !  
Stand back ! I have a crucifix myself,—  
I have a crucifix ! Methinks 'twere fitting  
The deed—the vow—the symbol of the deed—  
And the deed's register should tally, father !

(*Draws a cross-handled dagger, and raises it on high.*)

Behold the cross wherewith a vow like mine  
Is written in Heaven !

MONK.

Thy words are madness, daughter,  
And speak a purpose unholy—thy lips are livid— 180  
Thine eyes are wild—tempt not the wrath divine !  
Pause ere too late !—oh, be not—be not rash !  
Swear not the oath—oh, swear it not !

LALAGE.

'Tis sworn !

### III

*An apartment in a Palace.* POLITIAN and BALDAZZAR.

BALDAZZAR.

—Arouse thee now, Politian !  
Thou must not—nay indeed, indeed, thou shalt not  
Give way unto these humours. Be thyself !  
Shake off the idle fancies that beset thee,  
And live, for now thou diest !

POLITIAN.

Not so, Baldazzar

*Surely* I live.

BALDAZZAR.

Politian, it doth grieve me  
To see thee thus.

POLITIAN.

Baldazzar, it doth grieve me 190  
To give thee cause for grief, my honoured friend.  
Command me, sir ! what wouldst thou have me do ?  
At thy behest I will shake off that nature

Which from my forefathers I did inherit,  
Which with my mother's milk I did imbibe,  
And be no more Politian, but some other.  
Command me, sir !

BALDAZZAR.

To the field, then—to the field—  
To the senate or the field.

POLITIAN.

Alas ! alas !

There is an imp would follow me even there !  
There is an imp *hath* followed me even there !  
There is——what voice was that ?

200

BALDAZZAR.

I heard it not.

I heard not any voice except thine own,  
And the echo of thine own.

POLITIAN.

Then I but dreamed.

BALDAZZAR.

Give not thy soul to dreams : the camp—the court,  
Befit thee—Fame awaits thee—Glory calls—  
And her, the trumpet-tongued, thou wilt not hear  
In hearkening to imaginary sounds  
And phantom voices.

POLITIAN.

It *is* a phantom voice !  
Didst thou not hear it *then* ?

BALDAZZAR.

I heard it not.

POLITIAN.

Thou heardest it not !—Baldazzar, speak no more  
To me, Politian, of thy camps and courts.  
Oh ! I am sick, sick, sick, even unto death,  
Of the hollow and high-sounding vanities  
Of the populous Earth ! Bear with me yet awhile !  
We have been boys together—schoolfellows—  
And now are friends—yet shall not be so long—  
For in the eternal city thou shalt do me  
A kind and gentle office, and a Power

210

A Power august, benignant and supreme—  
 Shall then absolve thee of all further duties  
 Unto thy friend.

220

BALDAZZAR.

Thou speakest a fearful riddle  
 I *will* not understand.

POLITIAN.

Yet now as Fate  
 Approaches, and the Hours are breathing low,  
 The sands of Time are changed to golden grains,  
 And dazzle me, Baldazzar. Alas ! alas !  
 I *cannot* die, having within my heart  
 So keen a relish for the beautiful  
 As hath been kindled within it. Methinks the air  
 Is balmier now than it was wont to be—  
 Rich melodies are floating in the winds—  
 A rarer loveliness bedecks the earth—  
 And with a holier lustre the quiet moon  
 Sitteth in Heaven.—Hist ! hist ! thou canst not say  
 Thou hearest not *now*, Baldazzar ?

230

BALDAZZAR.

Indeed I hear not.

POLITIAN.

Not hear it !—listen now !—listen !—the faintest sound  
 And yet the sweetest that ear ever heard !  
 A lady's voice !—and sorrow in the tone !  
 Baldazzar, it oppresses me like a spell !  
 Again !—again !—how solemnly it falls  
 Into my heart of hearts ! that eloquent voice  
 Surely I never heard—yet it were well  
 Had I *but* heard it with its thrilling tones  
 In earlier days !

240

BALDAZZAR.

I myself hear it now.  
 Be still !—the voice, if I mistake not greatly,  
 Proceeds from yonder lattice—which you may see  
 Very plainly through the window—it belongs,  
 Does it not ? unto this palace of the Duke ?  
 The singer is undoubtedly beneath  
 The roof of his Excellency—and perhaps

Is even that Alessandra of whom he spoke                                250  
As the betrothed of Castiglione,  
His son and heir.

**POLITIAN.**

Be still !—it comes again !

VOICE (*very faintly*).

'And is thy heart so strong  
As for to leave me thus  
Who hath loved thee so long  
In wealth and woe among?  
And is thy heart so strong  
As for to leave me thus?

Say nay—say nay ! ' 260

**BALDAZZAR.**

The song is English, and I oft have heard it  
In merry England—never so plaintively—  
Hist ! hist ! it comes again !

**VOICE** (*more loudly*).

‘ Is it so strong  
As for to leave me thus  
Who hath loved thee so long  
In wealth and woe among ?  
And is thy heart so strong  
As for to leave me thus ?

Say nay—say nay ! ' 270

**BALDAZZAR.**

'Tis hushed and all is still !

**POLITIAN.**

**All is not still !**

**BALDAZZAR.**

Let us go down.

POLITIAN.

Go down, Baldazzar, go !

**BALDAZZAR.**

The hour is growing late—the Duke awaits us,—  
Thy presence is expected in the hall  
Below. What ails thee, Earl Politian ?

VOICE (*distinctly*).

'Who hath loved thee so long  
In wealth and woe among,  
And is thy heart so strong?  
Say nay—say nay!'

BALDAZZAR.

Let us descend!—'tis time. Politian, give 280  
These fancies to the wind. Remember, pray,  
Your bearing lately savoured much of rudeness  
Unto the Duke. Arouse thee! and remember!

POLITIAN.

Remember? I do. Lead on! I *do* remember. (*Going.*)

Let us descend. Believe me I would give,  
Freely would give the broad lands of my earldom  
To look upon the face hidden by yon lattice—  
'To gaze upon that veiled face, and hear  
Once more that silent tongue.'

BALDAZZAR.

Let me beg you, sir,  
Descend with me—the Duke may be offended. 290  
Let us go down, I pray you.

VOICE (*loudly*).

Say nay!—say nay!

POLITIAN (*aside*).

'Tis strange!—'tis very strange—methought the voice  
Chimed in with my desires, and bade me stay!  
(*Approaching the window.*)

Sweet voice! I heed thee, and will surely stay.  
Now be this Fancy, by Heaven! or be it Fate,  
Still will I not descend. Baldazzar make  
Apology unto the Duke for me;  
I go not down to-night.

BALDAZZAR.

Your lordship's pleasure  
Shall be attended to. Good-night, Politian.

POLITIAN.

Good-night, my friend, good-night. 300

## IV

*The gardens of a Palace—Moonlight.*

LALAGE and POLITIAN.

LALAGE.

And dost thou speak of love  
 To *me*, Politian ?—dost thou speak of love  
 To Lalage ?—ah, woe—ah, woe is me !  
 This mockery is most cruel—most cruel indeed !

POLITIAN.

Weep not ! oh, sob not thus !—thy bitter tears  
 Will madden me. Oh, mourn not, Lalage—  
 Be comforted ! I know—I know it all,  
 And *still* I speak of love. Look at me, brightest  
 And beautiful Lalage !—turn here thine eyes !  
 Thou askest me if I could speak of love, 310  
 Knowing what I know, and seeing what I have seen.  
 Thou askest me that—and thus I answer thee—  
 Thus on my bended knee I answer thee. (*Kneeling.*)  
 Sweet Lalage, *I love thee—love thee—love thee ;*  
 Thro' good and ill—thro' weal and woe I *love thee*.  
 Not mother, with her first-born on her knee,  
 Thrills with intenser love than I for thee.  
 Not on God's altar, in any time or clime,  
 Burned there a holier fire than burneth now  
 Within my spirit for *thee*. And do I love ? 320  
 (*Arising.*)

Even for thy woes I love thee—even for thy woes—  
 Thy beauty and thy woes.

LALAGE.

Alas, proud Earl,  
 Thou dost forget thyself, remembering me !  
 How, in thy father's halls, among the maidens  
 Pure and reproachless of thy princely line,  
 Could the dishonoured Lalage abide ?  
 Thy wife, and with a tainted memory—  
 My seared and blighted name, how would it tally  
 With the ancestral honours of thy house,  
 And with thy glory ?

POLITIAN.

Speak not to me of glory !

330

I hate—I loathe the name ; I do abhor  
 The unsatisfactory and ideal thing.  
 Art thou not Lalage and I Politian ?  
 Do I not love—art thou not beautiful—  
 What need we more ? Ha ! glory !—now speak not of it.  
 By all I hold most sacred and most solemn—  
 By all my wishes now—my fears hereafter—  
 By all I scorn on earth and hope in heaven—  
 There is no deed I would more glory in,  
 Than in thy cause to scoff at this same glory  
 And trample it under foot. What matters it—  
 What matters it, my fairest, and my best,  
 That we go down unhonoured and forgotten  
 Into the dust—so we descend together.  
 Descend together—and then—and then, perchance—

340

LALAGE.

Why dost thou pause, Politian ?

POLITIAN.

And then, perchance

Arise together, Lalage, and roam  
 The starry and quiet dwellings of the blest,  
 And still——

LALAGE.

Why dost thou pause, Politian ?

POLITIAN.

And still *together—together.*

LALAGE.

Now Earl of Leicester !

350

Thou *lovest* me, and in my heart of hearts  
 I feel thou *lovest* me truly.

POLITIAN.

Oh, Lalage !

*(Throwing himself upon his knee.)*And *lovest* thou *me* ?

LALAGE.

Hist ! hush ! within the gloom

Of yonder trees methought a figure past—

A spectral figure, solemn, and slow, and noiseless—

Like the grim shadow Conscience, solemn and noiseless.

*(Walks across and returns.)*

I was mistaken—'twas but a giant bough  
Stirred by the autumn wind. Politian !

POLITIAN.

My Lalage—my love ! why art thou moved ?  
Why dost thou turn so pale ? Not Conscience' self, 360  
Far less a shadow which thou likenest to it,  
Should shake the firm spirit thus. But the night wind  
Is chilly—and these melancholy boughs  
Throw over all things a gloom.

LALAGE.

Politian !

Thou speakest to me of love. Knowest thou the land  
With which all tongues are busy—a land new found—  
Miraculously found by one of Genoa—  
A thousand leagues within the golden west ?  
A fairy land of flowers, and fruit, and sunshine,  
And crystal lakes, and over-arching forests, 370  
And mountains, around whose towering summits the winds  
Of Heaven untrammelled flow—which air to breathe  
Is Happiness now, and will be Freedom hereafter  
In days that are to come ?

POLITIAN.

O, wilt thou—wilt thou

Fly to that Paradise—my Lalage, wilt thou  
Fly thither with me ? There Care shall be forgotten,  
And Sorrow shall be no more, and Eros be all.  
And life shall then be mine, for I will live  
For thee, and in thine eyes—and thou shalt be  
No more a mourner—but the radiant Joys 380  
Shall wait upon thee, and the angel Hope  
Attend thee ever ; and I will kneel to thee  
And worship thee, and call thee my beloved,  
My own, my beautiful, my love, my wife,  
My all ;—oh, wilt thou—wilt thou, Lalage,  
Fly thither with me ?

LALAGE.

A deed is to be done—

Castiglione lives !

POLITIAN.

And he shall die !

*(Exit.)*LALAGE *(after a pause)*.

And—he—shall—die !—alas !

Castiglione die ? Who spoke the words ?

Where am I ?—what was it he said ?—Politian !

390

Thou *art* not gone—thou art not *gone*, Politian !I *feel* thou art not gone—yet dare not look,Lest I behold thee not ; thou *couldst* not go

With those words upon thy lips—O, speak to me !

And let me hear thy voice—one word—one word,

To say thou art not gone,—one little sentence,

To say how thou dost scorn—how thou dost hate

My womanly weakness. Ha ! ha ! thou *art* not gone—O speak to me ! I *knew* thou wouldst not go !I knew thou wouldst not, couldst not, *durst* not go. 400Villain, thou *art* not gone—thou mockest me !

And thus I clutch thee—thus !—He is gone, he is gone—

Gone—gone. Where am I ?—'tis well—'tis very well !

So that the blade be keen—the blow be sure,

'Tis well, 'tis *very* well—alas ! alas !

## V

*The suburbs. POLITIAN alone.*

POLITIAN.

This weakness grows upon me. I am faint,

And much I fear me ill—it will not do

To die ere I have lived !—Stay, stay thy hand,

O Azrael, yet awhile !—Prince of the Powers

Of Darkness and the Tomb, O pity me !

410

O pity me ! let me not perish now,

In the budding of my Paradisal Hope !

Give me to live yet—yet a little while :

'Tis I who pray for life—I who so late

Demanded but to die !—what sayeth the Count ?

*Enter BALDAZZAR.*

BALDAZZAR.

That knowing no cause of quarrel or of feud

Between the Earl Politian and himself,

He doth decline your cartel.

POLITIAN.

*What didst thou say ?*

What answer was it you brought me, good Baldazzar ?  
 With what excessive fragrance the zephyr comes 420  
 Laden from yonder bowers !—a fairer day,  
 Or one more worthy Italy, methinks  
 No mortal eyes have seen !—*what* said the Count ?

BALDAZZAR.

That he, Castiglione, not being aware  
 Of any feud existing, or any cause  
 Of quarrel between your lordship and himself,  
 Cannot accept the challenge.

POLITIAN.

*It is most true—*

All this is very true. When saw you, sir,  
 When saw you now, Baldazzar, in the frigid  
 Ungenial Britain which we left so lately, 430  
 A heaven so calm as this—so utterly free  
 From the evil taint of clouds ?—and he did *say* ?

BALDAZZAR.

No more, my lord, than I have told you, sir :  
 The Count Castiglione will not fight,  
 Having no cause for quarrel.

POLITIAN.

*Now this is true—*

All very true. Thou art my friend, Baldazzar,  
 And I have not forgotten it—thou'lt do me  
 A piece of service ; wilt thou go back and say  
 Unto this man, that I, the Earl of Leicester,  
 Hold him a villain ?—thus much, I prythee, say 440  
 Unto the Count—it is exceeding just  
 He should have cause for quarrel.

BALDAZZAR.

*My lord !—my friend !—*POLITIAN (*aside*).

'Tis he !—he comes himself ? (*aloud*.) Thou reasonest well.  
 I know what thou wouldst say—not send the message—  
 Well !—I will think of it—I will not send it.  
 Now prythee, leave me—hither doth come a person

With whom affairs of a most private nature  
I would adjust.

BALDAZZAR.

I go—to-morrow we meet,  
Do we not ?—at the Vatican.

POLITIAN.

At the Vatican.

(*Exit BALDAZZAR.*)

*Enter CASTIGLIONE.*

CASTIGLIONE.

The Earl of Leicester here !

450

POLITIAN.

I *am* the Earl of Leicester, and thou seest,  
Dost thou not ? that I am here.

CASTIGLIONE.

My lord, some strange,  
Some singular mistake—misunderstanding—  
Hath without doubt arisen : thou hast been urged  
Thereby, in heat of anger, to address  
Some words most unaccountable, in writing,  
To me, Castiglione ; the bearer being  
Baldazzar, Duke of Surrey. I am aware  
Of nothing which might warrant thee in this thing,  
Having given thee no offence. Ha !—am I right ?  
'Twas a mistake ?—undoubtedly—we all  
Do err at times.

460

POLITIAN.

Draw, villain, and prate no more !

CASTIGLIONE.

Ha !—draw ?—and villain ? have at thee then at once,  
Proud Earl !

(*Draws.*)

POLITIAN (*drawing*).

Thus to the expiatory tomb,  
Untimely sepulchre, I do devote thee  
In the name of Lalage !

CASTIGLIONE (*letting fall his sword and recoiling to the  
extremity of the stage*).

Of Lalage !

Hold off—thy sacred hand !—avaunt, I say !  
Avaunt—I will not fight thee—indeed I dare not.

POLITIAN.

Thou wilt not fight with me didst say, Sir Count ?  
 Shall I be baffled thus ?—now this is well ;  
 Didst say thou *darest* not ? Ha !

470

CASTIGLIONE.

I dare not—dare not—  
 Hold off thy hand—with that beloved name  
 So fresh upon thy lips I will not fight thee—  
 I cannot—dare not.

POLITIAN.

Now by my halidom  
 I do believe thee !—coward, I do believe thee !

CASTIGLIONE.

Ha !—coward !—this may not be !  
*(Clutches his sword and staggers towards POLITIAN,  
 but his purpose is changed before reaching him,  
 and he falls upon his knee at the feet of the Earl.)*  
 Alas ! my lord,

It is—it is—most true. In such a cause  
 I am the veriest coward. O pity me !

POLITIAN (*greatly softened*).

Alas !—I do—indeed I pity thee.

CASTIGLIONE.

And Lalage—

POLITIAN.

*Scoundrel !—arise and die !*

480

CASTIGLIONE.

It needeth not be—thus—thus—O let me die  
 Thus on my bended knee. It were most fitting  
 That in this deep humiliation I perish.  
 For in the fight I will not raise a hand  
 Against thee, Earl of Leicester. Strike thou home—  
*(Baring his bosom.)*

Here is no let or hindrance to thy weapon—  
 Strike home. I *will* not fight thee.

POLITIAN.

Now, s' Death and Hell !  
 Am I not—am I not sorely—grievously tempted  
 To take thee at thy word ? But mark me, sir,  
 Think not to fly me thus. Do thou prepare

490

For public insult in the streets—before  
The eyes of the citizens. I'll follow thee—  
Like an avenging spirit I'll follow thee  
Even unto death. Before those whom thou lovest—  
Before all Rome I'll taunt thee, villain,—I'll taunt thee,  
Dost hear ? with *cowardice*—thou *wilt not* fight me ?  
Thou liest ! thou *shalt* ! (Exit.)

CASTIGLIONE.

Now this indeed is just !  
Most righteous, and most just, avenging Heaven !

# **POEMS WRITTEN IN YOUTH**

## POEMS WRITTEN IN YOUTH

[Private reasons—some of which have reference to the sin of plagiarism, and others to the date of Tennyson's first poems—have induced me, after some hesitation, to republish these, the crude compositions of my earliest boyhood. They are printed *verbatim*—without alteration from the original edition—the date of which is too remote to be judiciously acknowledged.—E. A. P.]

## SONNET—TO SCIENCE

SCIENCE ! true daughter of Old Time thou art !  
 Who alterest all things with thy peering eyes.  
 Why preyest thou thus upon the poet's heart,  
 Vulture, whose wings are dull realities ?  
 How should he love thee ? or how deem thee wise,  
 Who wouldst not leave him in his wandering  
 To seek for treasure in the jewelled skies,  
 Albeit he soared with an undaunted wing ?  
 Hast thou not dragged Diana from her car ?  
 And driven the Hamadryad from the wood 10  
 To seek a shelter in some happier star ?  
 Hast thou not torn the Naiad from her flood,  
 The Elfin from the green grass, and from me  
 The summer dream beneath the tamarind tree ?

## AL AARAAF

## PART I

O ! NOTHING earthly save the ray  
 (Thrown back from flowers) of Beauty's eye,  
 As in those gardens where the day  
 Springs from the gems of Circassy—  
 O ! nothing earthly save the thrill  
 Of melody in woodland rill—  
 Or (music of the passion-hearted)  
 Joy's voice so peacefully departed  
 That like the murmur in the shell,  
 Its echo dwelleth and will dwell— 10

Oh, nothing of the dross of ours—  
 Yet all the beauty—all the flowers  
 That list our Love, and deck our bowers—  
 Adorn yon world afar, afar—  
 The wandering star.

'Twas a sweet time for Nesace—for there  
 Her world lay lolling on the golden air,  
 Near four bright suns—a temporary rest—  
 An oasis in desert of the blest.  
 Away—away—'mid seas of rays that roll  
 Empyrean splendour o'er th' unchained soul—  
 The soul that scarce (the billows are so dense)  
 Can struggle to its destin'd eminence,—  
 To distant spheres, from time to time, she rode  
 And late to ours, the favour'd one of God—  
 But, now, the ruler of an anchor'd realm,  
 She throws aside the sceptre—leaves the helm,  
 And, amid incense and high spiritual hymns,  
 Laves in quadruple light her angel limbs.

20

Now happiest, loveliest in yon lovely Earth,  
 Whence sprang the ' Idea of Beauty ' into birth,  
 (Falling in wreaths thro' many a startled star,  
 Like woman's hair 'mid pearls, until, afar,  
 It lit on hills Achaian, and there dwelt)  
 She looked into Infinity—and knelt.  
 Rich clouds, for canopies, about her curled—  
 Fit emblems of the model of her world—  
 Seen but in beauty—not impeding sight  
 Of other beauty glittering thro' the light—  
 A wreath that twined each starry form around,  
 And all the opal'd air in colour bound.

30

40

All hurriedly she knelt upon a bed  
 Of flowers : of lilies such as rear'd the head  
 On the fair Capo Deucato, and sprang  
 So eagerly around about to hang  
 Upon the flying footsteps of—deep pride—  
 Of her who lov'd a mortal—and so died.  
 The Sephalica, budding with young bees,  
 Upcreased its purple stem around her knees :—

And gemmy flower, of Trebizond misnam'd— 50  
 Inmate of highest stars, where erst it sham'd  
 All other loveliness :—its honied dew  
 (The fabled nectar that the heathen knew)  
 Deliriously sweet, was dropp'd from Heaven,  
 And fell on gardens of the unforgiven  
 In Trebizond—and on a sunny flower  
 So like its own above that, to this hour,  
 It still remaineth, torturing the bee  
 With madness, and unwonted reverie :  
 In Heaven, and all its environs, the leaf 60  
 And blossom of the fairy plant in grief  
 Disconsolate linger—grief that hangs her head,  
 Repenting follies that full long have fled,  
 Heaving her white breast to the balmy air,  
 Like guilty beauty, chasten'd and more fair :  
 Nyctanthes too, as sacred as the light  
 She fears to perfume, perfuming the night :  
 And Clytia, pondering between many a sun,  
 While pettish tears adown her petals run :  
 And that aspiring flower that sprang on Earth, 70  
 And died, ere scarce exalted into birth,  
 Bursting its odorous heart in spirit to wing  
 Its way to Heaven, from garden of a king :  
 And Valisnerian lotus, thither flown  
 From struggling with the waters of the Rhone :  
 And thy most lovely purple perfume, Zante !  
 Isola d'oro !—Fior di Levante !  
 And the Nelumbo bud that floats for ever  
 With Indian Cupid down the holy river—  
 Fair flowers, and fairy ! to whose care is given 80  
 To bear the Goddess' song, in odours, up to Heaven :

' Spirit ! that dwellest where,  
 In the deep sky,  
 The terrible and fair,  
 In beauty vie !  
 Beyond the line of blue—  
 The boundary of the star  
 Which turneth at the view  
 Of thy barrier and thy bar—

Of the barrier overgone 90  
 By the comets who were cast  
 From their pride and from their throne  
 To be drudges till the last—  
 To be carriers of fire  
 (The red fire of their heart)  
 With speed that may not tire  
 And with pain that shall not part—  
 Who livest—*that* we know—  
 In Eternity—we feel—  
 But the shadow of whose brow 100  
 What spirit shall reveal ?  
 Tho' the beings whom thy Nesace,  
 Thy messenger hath known  
 Have dream'd for thy Infinity  
 A model of their own—  
 Thy will is done, O God !  
 The star hath ridden high  
 Thro' many a tempest, but she rode  
 Beneath thy burning eye ;  
 And here, in thought, to thee— 110  
 In thought that can alone  
 Ascend thy empire and so be  
 A partner of thy throne—  
 By wingèd Fantasy,  
 My embassy is given,  
 Till secrecy shall knowledge be  
 In the environs of Heaven.'

She ceas'd—and buried then her burning cheek  
 Abash'd, amid the lilies there, to seek  
 A shelter from the fervour of His eye ; 120  
 For the stars trembled at the Deity.  
 She stirr'd not—breath'd not—for a voice was there  
 How solemnly pervading the calm air !  
 A sound of silence on the startled ear  
 Which dreamy poets name ' the music of the sphere ' .  
 Ours is a world of words : Quiet we call  
 ' Silence '—which is the merest word of all.  
 All Nature speaks, and ev'n ideal things  
 Flap shadowy sounds from visionary wings—

But ah ! not so when, thus, in realms on high 130  
 The eternal voice of God is passing by,  
 And the red winds are withering in the sky :—

‘ What tho’ in worlds which sightless cycles run,  
 Linked to a little system, and one sun—  
 Where all my love is folly and the crowd  
 Still think my terrors but the thunder cloud,  
 The storm, the earthquake, and the ocean-wrath—  
 (Ah ! will they cross me in my angrier path ?)  
 What tho’ in worlds which own a single sun  
 The sands of Time grow dimmer as they run, 140  
 Yet thine is my resplendency, so given  
 To bear my secrets thro’ the upper Heaven !  
 Leave tenantless thy crystal home, and fly,  
 With all thy train, athwart the moony sky—  
 Apart—like fire-flies in Sicilian night,  
 And wing to other worlds another light !  
 Divulge the secrets of thy embassy  
 To the proud orbs that twinkle—and so be  
 To ev’ry heart a barrier and a ban  
 Lest the stars totter in the guilt of man ! ’ 150

Up rose the maiden in the yellow night,  
 The single-moonèd eve !—on Earth we plight  
 Our faith to one love—and one moon adore—  
 The birth-place of young Beauty had no more.  
 As sprang that yellow star from downy hours  
 Up rose the maiden from her shrine of flowers,  
 And bent o’er sheeny mountains and dim plain  
 Her way, but left not yet her Therasæan reign.

## PART II

HIGH on a mountain of enamell’d head—  
 Such as the drowsy shepherd on his bed 160  
 Of giant pasturage lying at his ease,  
 Raising his heavy eyelid, starts and sees  
 With many a mutter’d ‘ hope to be forgiven ’  
 What time the moon is quadrated in Heaven—  
 Of rosy head that, towering far away  
 Into the sunlit ether, caught the ray

Of sunken suns at eve—at noon of night,  
 While the moon danc'd with the fair stranger light—  
 Uprear'd upon such height arose a pile  
 Of gorgeous columns on th' unburthen'd air, 170  
 Flashing from Parian marble that twin smile  
 Far down upon the wave that sparkled there,  
 And nursled the young mountain in its lair.  
 Of molten stars their pavement, such as fall  
 Thro' the ebon air, besilvering the pall  
 Of their own dissolution, while they die—  
 Adorning then the dwellings of the sky.  
 A dome, by linkèd light from Heaven let down,  
 Sat gently on these columns as a crown—  
 A window of one circular diamond, there, 180  
 Look'd out above into the purple air,  
 And rays from God shot down that meteor chain  
 And hallow'd all the beauty twice again,  
 Save, when, between th' Empyrean and that ring,  
 Some eager spirit flapp'd his dusky wing.  
 But on the pillars Seraph eyes have seen  
 The dimness of this world : that greyish green  
 That Nature loves the best for Beauty's grave  
 Lurk'd in each cornice, round each architrave—  
 And every sculptur'd cherub thereabout 190  
 That from his marble dwelling peerèd out,  
 Seem'd earthly in the shadow of his niche—  
 Achaian statues in a world so rich !  
 Friezes from Tadmor and Persepolis—  
 From Balbec, and the stilly, clear abyss  
 Of beautiful Gomorrah ! O, the wave  
 Is now upon thee—but too late to save !

Sound loves to revel in a summer night :  
 Witness the murmur of the grey twilight  
 That stole upon the ear, in Eyraco, 200  
 Of many a wild star-gazer long ago—  
 That stealeth ever on the ear of him  
 Who, musing, gazeth on the distance dim,  
 And sees the darkness coming as a cloud—  
 Is not its form—its voice—most palpable and loud ?

But what is this ?—it cometh, and it brings  
A music with it—'tis the rush of wings—  
A pause—and then a sweeping, falling strain  
And Nesace is in her halls again.

From the wild energy of wanton haste

210

Her cheeks were flushing, and her lips apart ;  
And zone that clung around her gentle waist

Had burst beneath the heaving of her heart.  
Within the centre of that hall to breathe,  
She paused and panted, Zanthé ! all beneath,  
The fairy light that kiss'd her golden hair  
And long'd to rest, yet could but sparkle there.

Young flowers were whispering in melody  
To happy flowers that night—and tree to tree ;  
Fountains were gushing music as they fell  
In many a star-lit grove, or moon-lit dell ;  
Yet silence came upon material things—  
Fair flowers, bright waterfalls and angel wings—  
And sound alone that from the spirit sprang  
Bore burthen to the charm the maiden sang :

220

' Neath the blue-bell or streamer—

Or tufted wild spray  
That keeps, from the dreamer,  
The moonbeam away—

Bright beings ! that ponder,

230

With half closing eyes,  
On the stars which your wonder

Hath drawn from the skies,  
Till they glance thro' the shade, and

Come down to your brow  
Like—eyes of the maiden

Who calls on you now—  
Arise ! from your dreaming

In violet bowers,  
To duty beseeching

240

These star-litten hours—  
And shake from your tresses  
Encumber'd with dew

The breath of those kisses  
     That cumber them too—  
 (O ! how, without you, Love !  
     Could angels be blest ?)  
 Those kisses of true Love  
     That lull'd ye to rest !  
 Up !—shake from your wing  
     Each hindering thing : 250  
 The dew of the night—  
     It would weigh down your flight  
 And true love caresses—  
     O, leave them apart !  
 They are light on the tresses,  
     But lead on the heart.

Ligeia ! Ligeia !  
     My beautiful one !  
 Whose harshest idea 260  
     Will to melody run,  
 O ! is it thy will  
     On the breezes to toss ?  
 Or, capriciously still,  
     Like the lone Albatross,  
 Incumbent on night  
     (As she on the air)  
 To keep watch with delight  
     On the harmony there ?

Ligeia ! wherever 270  
     Thy image may be,  
 No magic shall sever  
     Thy music from thee.  
 Thou hast bound many eyes  
     In a dreamy sleep—  
 But the strains still arise  
     Which *thy* vigilance keep—  
 The sound of the rain,  
     Which leaps down to the flower—  
 And dances again 280  
     In the rhythm of the shower—  
 The murmur that springs  
     From the growing of grass

Are the music of things—  
     But are modell'd, alas !—  
 Away, then, my dearest,  
     Oh ! hie thee away  
 To the springs that lie clearest  
     Beneath the moon-ray—  
 To lone lake that smiles, 290  
     In its dream of deep rest,  
 At the many star-isles  
     That enjewel its breast—  
 Where wild flowers, creeping,  
     Have mingled their shade,  
 On its margin is sleeping  
     Full many a maid—  
 Some have left the cool glade, and  
     Have slept with the bee—  
 Arouse them, my maiden, 300  
     On moorland and lea—  
 Go ! breathe on their slumber,  
     All softly in ear,  
 Thy musical number  
     They slumbered to hear—  
 For what can awaken  
     An angel so soon,  
 Whose sleep hath been taken  
     Beneath the cold moon,  
 As the spell which no slumber 310  
     Of witchery may test,  
 The rhythmical number  
     Which lull'd him to rest ? '

Spirits in wing, and angels to the view,  
 A thousand seraphs burst th' Empyrean thro',  
 Young dreams still hovering on their drowsy flight—  
 Seraphs in all but ' Knowledge ', the keen light  
 That fell, refracted, thro' thy bounds, afar,  
 O Death ! from eye of God upon that star :  
 Sweet was that error—sweeter still that death— 320  
 Sweet was that error—even with *us* the breath  
 Of Science dims the mirror of our joy—  
 To them 'twere the Simoom, and would destroy—

For what (to them) availeth it to know  
 That Truth is Falsehood—or that Bliss is Woe ?  
 Sweet was their death—with them to die was rife  
 With the last ecstasy of satiate life—  
 Beyond that death no immortality—  
 But sleep that pondereth and is not ‘ to be ’—  
 And there—oh ! may my weary spirit dwell— 330  
 Apart from Heaven’s Eternity—and yet how far from  
 Hell !

What guilty spirit, in what shrubbery dim,  
 Heard not the stirring summons of that hymn ?  
 But two : they fell : for Heaven no grace imparts  
 To those who hear not for their beating hearts.  
 A maiden-angel and her seraph-lover—  
 O ! where (and ye may seek the wide skies over)  
 Was Love, the blind, near sober Duty known ?  
 Unguided Love hath fallen—’mid ‘ tears of perfect moan ’.

He was a goodly spirit—he who fell : 340  
 A wanderer by moss-y-mantled well—  
 A gazer on the lights that shine above—  
 A dreamer in the moonbeam by his love :  
 What wonder ? for each star is eye-like there,  
 And looks so sweetly down on Beauty’s hair—  
 And they, and ev’ry mossy spring were holy  
 To his love-haunted heart and melancholy.  
 The night had found (to him a night of woe)  
 Upon a mountain crag, young Angelo—  
 Beetling it bends athwart the solemn sky, 350  
 And scowls on starry worlds that down beneath it lie.  
 Here sat he with his love—his dark eye bent  
 With eagle gaze along the firmament :  
 Now turn’d it upon her—but ever then  
 It trembled to the orb of EARTH again.

‘ Ianthe, dearest, see—how dim that ray !  
 How lovely ’tis to look so far away !  
 She seem’d not thus upon that autumn eve  
 I left her gorgeous halls—nor mourn’d to leave.  
 That eve—that eve—I should remember well— 36  
 The sun-ray dropp’d in Lemnos, with a spell

On th' arabesque carving of a gilded hall  
 Wherein I sate, and on the draperied wall—  
 And on my eyelids—O the heavy light !  
 How drowsily it weigh'd them into night !  
 On flowers, before, and mist, and love they ran  
 With Persian Saadi in his Gulistan :  
 But O that light !—I slumber'd—Death, the while,  
 Stole o'er my senses in that lovely isle  
 So softly that no single silken hair  
 Awoke that slept—or knew that he was there.

370

' The last spot of Earth's orb I trod upon  
 Was a proud temple call'd the Parthenon ;  
 More beauty clung around her column'd wall  
 Than ev'n thy glowing bosom beats withal,  
 And when old Time my wing did disenthral  
 Thence sprang I—as the eagle from his tower,  
 And years I left behind me in an hour.  
 What time upon her airy bounds I hung,  
 One half the garden of her globe was flung  
 Unrolling as a chart unto my view—  
 Tenantless cities of the desert too !  
 Ianthe, beauty crowded on me then,  
 And half I wish'd to be again of men.'

380

' My Angelo ! and why of them to be ?  
 A brighter dwelling-place is here for thee—  
 And greener fields than in yon world above,  
 And woman's loveliness—and passionate love.'

' But, list, Ianthe ! when the air so soft  
 Fail'd, as my pennon'd spirit leapt aloft,  
 Perhaps my brain grew dizzy—but the world  
 I left so late was into chaos hurl'd—  
 Sprang from her station, on the winds apart,  
 And roll'd, a flame, the fiery Heaven athwart.  
 Methought, my sweet one, then I ceased to soar  
 And fell—not swiftly as I rose before,  
 But with a downward, tremulous motion thro'  
 Light, brazen rays, this golden star unto !  
 Nor long the measure of my falling hours,  
 For nearest of all stars was thine to ours—

390

400

Dread star ! that came, amid a night of mirth,  
A red Daedalion on the timid Earth.'

' We came—and to thy Earth—but not to us  
Be given our lady's bidding to discuss :  
We came, my love ; around, above, below,  
Gay fire-fly of the night we come and go,  
Nor ask a reason save the angel-nod  
*She* grants to us, as granted by her God—  
But, Angelo, than thine grey Time unfurl'd  
Never his fairy wing o'er fairier world !  
Dim was its little disk, and angel eyes  
Alone could see the phantom in the skies,  
When first Al Aaraaf knew her course to be  
Headlong thitherward o'er the starry sea—  
But when its glory swell'd upon the sky,  
As glowing Beauty's bust beneath man's eye,  
We paused before the heritage of men,  
And thy star trembled—as doth Beauty then ! '

410

Thus, in discourse, the lovers whiled away  
The night that waned and waned and brought no day. 420  
They fell : for Heaven to them no hope imparts  
Who hear not for the beating of their hearts.

## NOTES BY POE TO AL AARAAF

### PART I

*Title]* *Al Aaraaf*. A star was discovered by Tycho Brahe which appeared suddenly in the heavens—attained, in a few days, a brilliancy surpassing that of Jupiter—then as suddenly disappeared, and has never been seen since.

1. 44. *On the fair Capo Deucato*. On Santa Maura—olim Deucadia.

1. 47. *Of her who lov'd a mortal—and so died*. Sappho.

1. 50. *And gemmy flower, of Trebizond misnamed*. This flower is much noticed by Lewenhoeck and Tournefort. The bee, feeding upon its blossom, becomes intoxicated.

1. 68. *And Clytia, pondering between many a sun*. Clytia—the *Chrysanthemum Peruvianum*, or, to employ a better-known term, the turnsol—which turns continually towards the sun, covers itself, like Peru, the country from which it comes, with dewy clouds which cool and refresh its flowers during the most violent heat of the day.—B. DE ST. PIERRE.

1. 70. *And that aspiring flower that sprang on Earth*. There is cultivated in the king's garden at Paris, a species of serpentine aloes without

prickles, whose large and beautiful flower exhales a strong odour of the vanilla, during the time of its expansion, which is very short. It does not blow till towards the month of July—you then perceive it gradually open its petals—expand them—fade and die.—ST. PIERRE.

1. 74. *And Valisnerian lotus, thither flown.* There is found, in the Rhone, a beautiful lily of the Valisnerian kind. Its stem will stretch to the length of three or four feet—thus preserving its head above water in the swellings of the river.

1. 76. *And thy most lovely purple perfume, Zante.* The Hyacinth.  
11. 78-9. *And the Nelumbo bud that floats for ever*

*With Indian Cupid down the holy river—*

It is a fiction of the Indians, that Cupid was first seen floating in one of these down the river Ganges—and that he still loves the cradle of his childhood.

1. 81. *To bear the Goddess' song, in odours, up to Heaven.* And golden vials full of odours, which are the prayers of the saints.—REV. ST. JOHN.

1. 105. *A model of their own.* The Humanitarians held that God was to be understood as having really a human form.—*Vide CLARKE'S Sermons*, vol. i, p. 26, fol. edit.

The drift of Milton's argument leads him to employ language which would appear, at first sight, to verge upon their doctrine; but it would be seen immediately, that he guards himself against the charge of having adopted one of the most ignorant errors of the dark ages of the church.—*Dr. SUMNER'S Notes on Milton's Christian Doctrine.*

This opinion, in spite of many testimonies to the contrary, could never have been very general. Andeus, a Syrian of Mesopotamia, was condemned for the opinion, as heretical. He lived in the beginning of the fourth century. His disciples were called Anthropomorphites.—*Vide DU PIN.*

Among Milton's minor poems are these lines:

'Dicite sacrorum presides nemorum Deae, &c.  
Quis ille primus cujus ex imagine  
Natura solers finxit humanum genus?  
Eternus, incorruptus, aequaevus polo,  
Unusque et universus, exemplar Dei.'

And afterwards—

'Non cui profundum Caecitas lumen dedit  
Dircaeus augur vidit hunc alto sinu,' &c.

1. 114. *By wingèd Fantasy.*

*Fantasy.* Seltsamen Tochter Jovis  
Seinem Schosskinde,  
Der Phantasie.—GOETHE.

1. 133. *What tho' in worlds which sightless cycles run.* Sightless—too small to be seen.—LEGGE.

1. 145. *Apart—like fire-flies in Sicilian night.* I have often noticed a peculiar movement of the fire-flies;—they will collect in a body, and fly off, from a common centre, into innumerable radii.

1. 158. *Her way, but left not yet her Therasaeon reign.* Therasaea, or Therasea, the island mentioned by Seneca, which, in a moment, arose from the sea to the eyes of astonished mariners.

## PART II

11. 174-5. *Of molten stars their pavement, such as fall  
Thro' the ebon air.*

Some star, which from the ruin'd roof  
Of shaked Olympus, by mischance, did fall.—MILTON.

1. 194. *Friezes from Tadmor and Persepolis.* Voltaire, in speaking of Persepolis, says, 'Je connois bien l'admiration qu'inspirent ces ruines—mais un palais érigé au pied d'une chaîne de rochers stériles, peut-il être un chef-d'œuvre des arts ?'

1. 196. *Of beautiful Gomorrah ! O, the wave.* Ula Deguisi is the Turkish appellation ; but, on its own shores, it is called Bahar Loth, or Almotanah. There were undoubtedly more than two cities engulfed in the 'Dead Sea'. In the valley of Siddim were five—Admah, Zeboin, Zoar, Sodom and Gomorrah. Stephen of Byzantium mentions eight, and Strabo thirteen (engulfed)—but the last is out of all reason.

It is said [Tacitus, Strabo, Josephus, Daniel of St. Saba, Nau, Maundrell, Troilo, D'Arvieux] that after an excessive drought, the vestiges of columns, walls, &c., are seen above the surface. At any season, such remains may be discovered by looking down into the transparent lake, and at such distances as would argue the existence of many settlements in the space now usurped by the 'Asphaltites'.

1. 200. *That stole upon the ear, in Eyraco.* Eyraco—Chaldea.

1. 205. *Is not its form—its voice—most palpable and loud ?* I have often thought I could distinctly hear the sound of the darkness as it stole over the horizon.

1. 218. *Young flowers were whispering in melody.* Fairies use flowers for their charactery.—*Merry Wives of Windsor.*

1. 229. *The moonbeam away.* In Scripture is this passage—'The sun shall not harm thee by day, nor the moon by night.' It is perhaps not generally known that the moon, in Egypt, has the effect of producing blindness to those who sleep with the face exposed to its rays, to which circumstance the passage evidently alludes.

1. 265. *Like the lone Albatross.* The albatross is said to sleep on the wing.

1. 282. *The murmur that springs.* I met with this idea in an old English tale, which I am now unable to obtain, and quote from memory :—'The verie essence and, as it were, springehead and origine of all musiche is the verie plesaunte sounde which the trees of the forest do make when they growe.'

1. 299. *Have slept with the bee.* The wild bee will not sleep in the shade if there be moonlight.

The rhyme in this verse, as in one about sixty lines before, has an appearance of affectation. It is, however, imitated from Sir W. Scott, or rather from Claude Halcro—in whose mouth I admired its effect :

'Oh ! were there an island  
Though ever so wild,  
Where woman might smile, and  
No man be beguiled,' &c.

1. 331. *Apart from Heaven's Eternity—and yet how far from Hell !*

With the Arabians there is a medium between Heaven and Hell, where men suffer no punishment, but yet do not attain that tranquil and even happiness which they suppose to be characteristic of heavenly enjoyment.

Un no rompido sueño,  
Un día puro, alegre, libre quiero ; . . .  
Libre de amor, de zelo,  
De odio, de esperanzas, de recelo.

LUIS PONCE DE LEÓN.

Sorrow is not excluded from 'Al Aaraaf', but it is that sorrow which the living love to cherish for the dead, and which, in some minds, resembles the delirium of opium. The passionate excitement of Love and the buoyancy of spirit attendant upon intoxication are its less holy pleasures—the price of which, to those souls who make choice of 'Al Aaraaf' as their residence after life, is final death and annihilation.

1. 339. *Unguided Love hath fallen—'mid 'tears of perfect moan'.*

There be tears of perfect moan  
Wept for thee in Helicon.—MILTON.

1. 373. *Was a proud temple call'd the Parthenon.* It was entire in 1687—the most elevated spot in Athens.

1. 375. *Than ev'n thy glowing bosom beats withal.*

Shadowing more beauty in their airy brows  
Than have the white breasts of the Queen of Love.—MARLOWE.

1. 390. *Fail'd as my pennon'd spirit leapt aloft.* Pennon—for pinion.—MILTON.

## TAMERLANE

### ADVERTISEMENT

[This Poem was printed for publication in Boston, in the year 1827, but suppressed through circumstances of a private nature.—Note to '1829' edition.]

KIND solace in a dying hour !  
Such, father, is not (now) my theme—  
I will not madly deem that power  
Of Earth may shrive me of the sin  
Unearthly pride hath revell'd in—  
I have no time to dote or dream :  
You call it hope—that fire of fire !  
It is but agony of desire :  
If I *can* hope—Oh God ! I can—  
Its fount is holier—more divine—  
I would not call thee fool, old man,  
But such is not a gift of thine.

Know thou the secret of a spirit  
Bow'd from its wild pride into shame.  
O yearning heart ! I did inherit  
Thy withering portion with the fame,  
The searing glory which hath shone  
Amid the jewels of my throne,  
Halo of Hell ! and with a pain  
Not Hell shall make me fear again— 20  
O craving heart, for the lost flowers  
And sunshine of my summer hours !  
The undying voice of that dead time,  
With its interminable chime,  
Rings, in the spirit of a spell,  
Upon thy emptiness—a knell.

I have not always been as now :  
The fever'd diadem on my brow  
I claim'd and won usurpingly—  
Hath not the same fierce heirdom given 30  
Rome to the Caesar—this to me ?  
The heritage of a kingly mind,  
And a proud spirit which hath striven  
Triumphantly with human kind.

On mountain soil I first drew life :  
The mists of the Taglay have shed  
Nightly their dews upon my head,  
And, I believe, the wingèd strife  
And tumult of the headlong air  
Have nestled in my very hair. 40

So late from Heaven—that dew—it fell  
( 'Mid dreams of an unholy night )  
Upon me with the touch of Hell,  
While the red flashing of the light  
From clouds that hung, like banners, o'er,  
Appeared to my half-closing eye  
The pageantry of monarchy,  
And the deep trumpet-thunder's roar  
Came hurriedly upon me, telling  
Of human battle, where my voice, 50

My own voice, silly child !—was swelling  
(O ! how my spirit would rejoice,  
And leap within me at the cry)  
The battle-cry of Victory !

The rain came down upon my head  
Unshelter'd—and the heavy wind  
Rendered me mad and deaf and blind.  
It was but man, I thought, who shed  
Laurels upon me : and the rush—  
The torrent of the chilly air  
Gurgled within my ear the crush  
Of empires—with the captive's prayer—  
The hum of suitors—and the tone  
Of flattery 'round a sovereign's throne.

60

My passions, from that hapless hour,  
Usurp'd a tyranny which men  
Have deem'd, since I have reach'd to power,  
My innate nature—be it so :  
But father, there liv'd one who, then,  
Then—in my boyhood—when their fire  
Burn'd with a still intenser glow,  
(For passion must, with youth, expire)  
E'en *then* who knew this iron heart  
In woman's weakness had a part.

70

I have no words—alas !—to tell  
The loveliness of loving well !  
Nor would I now attempt to trace  
The more than beauty of a face  
Whose lineaments, upon my mind,  
Are—shadows on th' unstable wind :  
Thus I remember having dwelt  
Some page of early lore upon,  
With loitering eye, till I have felt  
The letters—with their meaning—melt  
To fantasies—with none.

80

O, she was worthy of all love !  
Love—as in infancy was mine—  
'Twas such as angel minds above  
Might envy ; her young heart the shrine

On which my every hope and thought 90  
 Were incense—then a goodly gift,  
 For they were childish and upright—  
 Pure—as her young example taught :  
 Why did I leave it, and, adrift,  
 Trust to the fire within, for light ?

We grew in age—and love—together,  
 Roaming the forest, and the wild ;  
 My breast her shield in wintry weather—  
 And when the friendly sunshine smil'd,  
 And she would mark the opening skies, 100  
 I saw no Heaven—but in her eyes.

Young Love's first lesson is—the heart :  
 For 'mid that sunshine, and those smiles,  
 When, from our little cares apart,  
 And laughing at her girlish wiles,  
 I'd throw me on her throbbing breast,  
 And pour my spirit out in tears—  
 There was no need to speak the rest—  
 No need to quiet any fears  
 Of her—who ask'd no reason why, 110  
 But turn'd on me her quiet eye !

Yet *more* than worthy of the love  
 My spirit struggled with, and strove,  
 When, on the mountain peak, alone,  
 Ambition lent it a new tone—  
 I had no being—but in thee :  
 The world, and all it did contain  
 In the earth—the air—the sea—  
 Its joy—its little lot of pain  
 That was new pleasure—the ideal, 120  
 Dim vanities of dreams by night—  
 And dimmer nothings which were real—  
 (Shadows—and a more shadowy light !)  
 Parted upon their misty wings,  
 And, so, confusedly, became  
 Thine image, and—a name—a name !  
 Two separate—yet most intimate things.

I was ambitious—have you known  
The passion, father ? You have not :  
A cottager, I mark'd a throne 130  
Of half the world as all my own,  
And murmur'd at such lowly lot—  
But, just like any other dream,  
Upon the vapour of the dew  
My own had past, did not the beam  
Of beauty which did while it thro'  
The minute—the hour—the day—oppress  
My mind with double loveliness.

We walk'd together on the crown  
Of a high mountain which look'd down 140  
Afar from its proud natural towers  
Of rock and forest, on the hills—  
The dwindled hills ! begirt with bowers,  
And shouting with a thousand rills.

I spoke to her of power and pride,  
But mystically—in such guise  
That she might deem it nought beside  
The moment's converse ; in her eyes  
I read, perhaps too carelessly—  
A mingled feeling with my own— 150  
The flush on her bright cheek, to me  
Seem'd to become a queenly throne  
Too well that I should let it be  
Light in the wilderness alone.

I wrapp'd myself in grandeur then,  
And donn'd a visionary crown—  
Yet it was not that Fantasy  
Had thrown her mantle over me—  
But that, among the rabble—men,  
Lion ambition is chained down— 160  
And crouches to a keeper's hand—  
Not so in deserts where the grand—  
The wild—the terrible conspire  
With their own breath to fan his fire

Look 'round thee now on Samarcand !

Is not she queen of Earth ? her pride  
Above all cities ? in her hand

Their destinies ? in all beside  
Of glory which the world hath known  
Stands she not nobly and alone ?

170

Falling—her veriest stepping-stone  
Shall form the pedestal of a throne—  
And who her sovereign ? Timour—he

Whom the astonished people saw  
Striding o'er empires haughtily  
A diadem'd outlaw !

O, human love ! thou spirit given  
On Earth, of all we hope in Heaven !  
Which fall'st into the soul like rain

Upon the Siroc-wither'd plain,  
And, failing in thy power to bless,  
But leav'st the heart a wilderness !

180

Idea ! which bindest life around  
With music of so strange a sound,  
And beauty of so wild a birth—  
Farewell ! for I have won the Earth.

When Hope, the eagle that tower'd, could see

No cliff beyond him in the sky,  
His pinions were bent droopingly—

And homeward turn'd his soften'd eye.

190

'Twas sunset : when the sun will part

There comes a sullenness of heart

To him who still would look upon

The glory of the summer sun.

That soul will hate the ev'ning mist,

So often lovely, and will list

To the sound of the coming darkness (known

To those whose spirits hearken) as one

Who, in a dream of night, *would* fly

But *cannot* from a danger nigh.

200

What tho' the moon—the white moon

Shed all the splendour of her noon,

*Her* smile is chilly, and *her* beam,

In that time of dreariness, will seem

(So like you gather in your breath)  
A portrait taken after death.  
And boyhood is a summer sun  
Whose waning is the dreariest one—  
For all we live to know is known,  
And all we seek to keep hath flown—  
Let life, then, as the day-flower, fall  
With the noon-day beauty—which is all. 210

I reach'd my home—my home no more  
For all had flown who made it so.  
I pass'd from out its mossy door,  
And, tho' my tread was soft and low,  
A voice came from the threshold stone  
Of one whom I had earlier known—  
O, I defy thee, Hell, to show  
On beds of fire that burn below,  
A humbler heart—a deeper woe. 220

Father, I firmly do believe—  
I *know*—for Death, who comes for me  
From regions of the blest afar,  
Where there is nothing to deceive,  
Hath left his iron gate ajar,  
And rays of truth you cannot see  
Are flashing thro' Eternity—  
I do believe that Eblis hath  
A snare in every human path—  
Else how, when in the holy grove  
I wandered of the idol, Love,  
Who daily scents his snowy wings  
With incense of burnt offerings  
From the most unpolluted things,  
Whose pleasant bowers are yet so riven  
Above with trellis'd rays from Heaven,  
No mote may shun—no tiniest fly—  
The lightning of his eagle eye—  
How was it that Ambition crept,  
Unseen, amid the revels there,  
Till growing bold, he laughed and leapt  
In the tangles of Love's very hair ? 230 240

## A DREAM

IN visions of the dark night  
 I have dreamed of joy departed—  
 But a waking dream of life and light  
 Hath left me broken-hearted.

Ah ! what is not a dream by day  
 To him whose eyes are cast  
 On things around him with a ray  
 Turned back upon the past ?

That holy dream—that holy dream,  
 While all the world were chiding,  
 Hath cheered me as a lovely beam  
 A lonely spirit guiding. 10

What though that light, thro' storm and night,  
 So trembled from afar—  
 What could there be more purely bright  
 In Truth's day-star ?

## ROMANCE

ROMANCE, who loves to nod and sing,  
 With drowsy head and folded wing,  
 Among the green leaves as they shake  
 Far down within some shadowy lake,  
 To me a painted paroquet  
 Hath been—a most familiar bird—  
 Taught me my alphabet to say—  
 To lisp my very earliest word  
 While in the wild wood I did lie,  
 A child—with a most knowing eye. 10

Of late, eternal Condor years  
 So shake the very Heaven on high  
 With tumult as they thunder by,  
 I have no time for idle cares  
 Through gazing on the unquiet sky.  
 And when an hour with calmer wings  
 Its down upon my spirit flings—

That little time with lyre and rhyme  
To while away—forbidden things !  
My heart would feel to be a crime  
Unless it trembled with the strings.

20

## FAIRY-LAND

DIM vales—and shadowy floods—  
And cloudy-looking woods,  
Whose forms we can't discover  
For the tears that drip all over !  
Huge moons there wax and wane—  
Again—again—again—  
Every moment of the night—  
Forever changing places—  
And they put out the star-light  
With the breath from their pale faces.  
About twelve by the moon-dial,  
One more filmy than the rest  
(A kind which, upon trial,  
They have found to be the best)  
Comes down—still down—and down,  
With its centre on the crown  
Of a mountain's eminence,  
While its wide circumference  
In easy drapery falls  
Over hamlets, over halls,  
Wherever they may be—  
O'er the strange woods—o'er the sea—  
Over spirits on the wing—  
Over every drowsy thing—  
And buries them up quite  
In a labyrinth of light—  
And then, how deep !—O, deep !  
Is the passion of their sleep.  
In the morning they arise,  
And their moony covering  
Is soaring in the skies,  
With the tempests as they toss,  
Like—almost anything—  
Or a yellow Albatross.

10

20

30

They use that moon no more  
 For the same end as before—  
 Videlicet, a tent—  
 Which I think extravagant :  
 Its atomies, however,  
 Into a shower dis sever,  
 Of which those butterflies  
 Of Earth, who seek the skies,  
 And so come down again,  
 (Never-contented things !)  
 Have brought a specimen  
 Upon their quivering wings.

40

## TO

THE bowers whereat, in dreams, I see  
 The wantonest singing birds,  
 Are lips—and all thy melody  
 Of lip-begotten words—

Thine eyes, in Heaven of heart enshrined,  
 Then desolately fall,  
 O God ! on my funereal mind  
 Like starlight on a pall—

Thy heart—*thy* heart !—I wake and sigh,  
 And sleep to dream till day  
 Of the truth that gold can never buy—  
 Of the baubles that it may.

10

## TO THE RIVER

FAIR river ! in thy bright, clear flow  
 Of crystal, wandering water,  
 Thou art an emblem of the glow  
 Of beauty—the unhidden heart—  
 The playful mazziness of art  
 In old Alberto's daughter ;

But when within thy wave she looks—  
Which glistens then, and trembles—  
Why, then, the prettiest of brooks  
Her worshipper resembles ;  
For in his heart, as in thy stream,  
Her image deeply lies—  
His heart which trembles at the beam  
Of her soul-searching eyes.

10

## THE LAKE—TO .

In spring of youth it was my lot  
To haunt of the wide world a spot  
The which I could not love the less—  
So lovely was the loneliness  
Of a wild lake, with black rock bound,  
And the tall pines that towered around.

But when the Night had thrown her pall  
Upon that spot, as upon all,  
And the mystic wind went by  
Murmuring in melody—  
Then—ah then I would awake  
To the terror of the lone lake.

10

Yet that terror was not fright,  
But a tremulous delight—  
A feeling not the jewelled mine  
Could teach or bribe me to define—  
Nor Love—although the Love were thine.

Death was in that poisonous wave,  
And in its gulf a fitting grave  
For him who thence could solace bring  
To his lone imagining—  
Whose solitary soul could make  
An Eden of that dim lake.

20

## SONG

I saw thee on thy bridal day—

When a burning blush came o'er thee,  
Though happiness around thee lay,  
The world all love before thee :

And in thine eye a kindling light  
(Whatever it might be)  
Was all on Earth my aching sight  
Of Loveliness could see.

That blush, perhaps, was maiden shame—  
As such it well may pass—  
Though its glow hath raised a fiercer flame  
In the breast of him, alas !

10

Who saw thee on that bridal day,  
When that deep blush *would* come o'er thee,  
Though happiness around thee lay ;  
The world all love before thee.

## TO HELEN

[ ' Helen ' was Mrs. Stannard, whose death also inspired ' Lenore '. ]

HELEN, thy beauty is to me  
Like those Nicean barks of yore,  
That gently, o'er a perfumed sea,  
The weary, wayworn wanderer bore  
To his own native shore.

On desperate seas long wont to roam,  
Thy hyacinth hair, thy classic face,  
Thy Naiad airs have brought me home  
To the glory that was Greece  
And the grandeur that was Rome.

10

Lo ! in yon brilliant window-niche  
How statue-like I see thee stand,  
The agate lamp within thy hand !  
Ah, Psyche, from the regions which  
Are Holy Land !

FROM WORKS OF THE LATE  
EDGAR ALLAN POE  
(GRISWOLD, 1850)  
AND 'ALONE'

## TO M. L. S——

[Mrs. Marie Louise Shew.]

OF all who hail thy presence as the morning—  
 Of all to whom thine absence is the night—  
 The blotting utterly from out high heaven  
 The sacred sun—of all who, weeping, bless thee  
 Hourly for hope—for life—ah! above all,  
 For the resurrection of deep-buried faith  
 In Truth—in Virtue—in Humanity—  
 Of all who, on Despair's unhallowed bed  
 Lying down to die, have suddenly arisen  
 At thy soft-murmured words, 'Let there be light!' 10  
 At the soft-murmured words that were fulfilled  
 In the seraphic glancing of thine eyes—  
 Of all who owe thee most—whose gratitude  
 Nearest resembles worship—oh, remember  
 The truest—the most fervently devoted,  
 And think that these weak lines are written by him—  
 By him who, as he pens them, thrills to think  
 His spirit is communing with an angel's.

## AN ENIGMA

'SELDOM we find,' says Solomon Don Dunce,  
 'Half an idea in the profoundest sonnet.  
 Through all the flimsy things we see at once  
 As easily as through a Naples bonnet—  
 Trash of all trash!—how *can* a lady don it?  
 Yet heavier far than your Petrarchan stuff—  
 Owl-downy nonsense that the faintest puff  
 Twirls into trunk-paper the while you con it.'  
 And, veritably, Sol is right enough.  
 The general tuckermanities are arrant 10  
 Bubbles—ephemeral and *so* transparent—  
 But *this* is, now—you may depend upon it—  
 Stable, opaque, immortal—all by dint  
 Of the dear names that lie concealed within 't.

[To find the name, read the first letter in the first line, the second in the second, and so on—SARAH ANNA LEWIS.]

## A VALENTINE

FOR her this rhyme is penned, whose luminous eyes,  
 Brightly expressive as the twins of Leda,  
 Shall find her own sweet name, that nestling lies  
 Upon the page, enwrapped from every reader.  
 Search narrowly the lines !—they hold a treasure  
 Divine—a talisman—an amulet  
 That must be worn *at heart*. Search well the measure—  
 The words—the syllables ! Do not forget  
 The triviallest point, or you may lose your labour !  
 And yet there is in this no Gordian knot 10  
 Which one might not undo without a sabre,  
 If one could merely comprehend the plot.  
 Enwritten upon the leaf where now are peering  
 Eyes scintillating soul, there lie *perdus*  
 Three eloquent words oft uttered in the hearing  
 Of poets, by poets—as the name is a poet's, too.  
 Its letters, although naturally lying  
 Like the knight Pinto—Mendez Ferdinando—  
 Still form a synonym for Truth.—Cease trying !  
 You will not read the riddle, though you do the best you  
 can do. 20

[To find the name, read the first letter in the first line, the second in the second, and so on—FRANCES SARGENT OSGOOD.]

## ANNABEL LEE

It was many and many a year ago,  
 In a kingdom by the sea,  
 That a maiden there lived whom you may know  
 By the name of ANNABEL LEE ;  
 And this maiden she lived with no other thought  
 Than to love and be loved by me.  
 I was a child and she was a child,  
 In this kingdom by the sea ;  
 But we loved with a love that was more than love—  
 I and my Annabel Lee ; 10  
 With a love that the winged seraphs of heaven  
 Coveted her and me.

And this was the reason that, long ago,  
    In this kingdom by the sea,  
A wind blew out of a cloud, chilling  
    My beautiful Annabel Lee ;  
So that her highborn kinsman came  
    And bore her away from me,  
To shut her up in a sepulchre  
    In this kingdom by the sea. 20

The angels, not half so happy in heaven,  
    Went envying her and me—  
Yes !—that was the reason (as all men know,  
    In this kingdom by the sea)  
That the wind came out of the cloud by night,  
    Chilling and killing my Annabel Lee.

But our love it was stronger by far than the love  
    Of those who were older than we—  
    Of many far wiser than we—  
And neither the angels in heaven above, 30  
    Nor the demons down under the sea,  
Can ever dissever my soul from the soul  
    Of the beautiful Annabel Lee.

For the moon never beams without bringing me dreams  
    Of the beautiful Annabel Lee ;  
And the stars never rise but I feel the bright eyes  
    Of the beautiful Annabel Lee ;  
And so, all the night-tide, I lie down by the side  
Of my darling—my darling—my life and my bride,  
    In the sepulchre there by the sea, 40  
    In her tomb by the sounding sea.

## THE BELLS

## I

HEAR the sledges with the bells—  
    Silver bells !  
What a world of merriment their melody foretells !  
    How they tinkle, tinkle, tinkle,  
    In the icy air of night !

While the stars that oversprinkle  
 All the heavens, seem to twinkle  
     With a crystalline delight ;  
 Keeping time, time, time,  
     In a sort of Runic rhyme, 10  
 To the tintinabulation that so musically wells  
     From the bells, bells, bells, bells,  
         Bells, bells, bells—  
 From the jingling and the tinkling of the bells.

## II

Hear the mellow wedding bells,  
     Golden bells !  
 What a world of happiness their harmony foretells !  
     Through the balmy air of night  
     How they ring out their delight !  
         From the molten-golden notes, 20  
         And all in tune,  
     What a liquid ditty floats  
 To the turtle-dove that listens, while she gloats  
     On the moon !  
     Oh, from out the sounding cells,  
 What a gush of euphony voluminously wells !  
     How it swells !  
     How it dwells  
     On the Future ! how it tells 30  
     Of the rapture that impels  
 To the swinging and the ringing  
     Of the bells, bells, bells,  
     Of the bells, bells, bells, bells,  
         Bells, bells, bells—  
 To the rhyming and the chiming of the bells !

## III

Hear the loud alarum bells—  
     Brazen bells !  
 What a tale of terror, now, their turbulency tells !  
     In the startled ear of night  
     How they scream out their affright ! 40  
     Too much horrified to speak,  
     They can only shriek, shriek,  
         Out of tune,

In a clamorous appealing to the mercy of the fire,  
 In a mad expostulation with the deaf and frantic fire,  
     Leaping higher, higher, higher,  
     With a desperate desire,  
     And a resolute endeavour,  
     Now—now to sit or never,  
 By the side of the pale-faced moon. 50  
     Oh, the bells, bells, bells !  
     What a tale their terror tells  
         Of Despair !  
     How they clang, and clash, and roar !  
     What a horror they outpour  
 On the bosom of the palpitating air !  
     Yet the ear it fully knows,  
         By the twanging,  
         And the clanging,  
     How the danger ebbs and flows : 60  
 Yet the ear distinctly tells,  
         In the jangling,  
         And the wrangling,  
     How the danger sinks and swells,  
 By the sinking or the swelling in the anger of the bells—  
         Of the bells—  
     Of the bells, bells, bells, bells,  
         Bells, bells, bells—  
 In the clamour and the clangour of the bells !

## IV

    Hear the tolling of the bells— 70  
         Iron bells !  
 What a world of solemn thought their monody compels !  
     In the silence of the night,  
     How we shiver with affright  
 At the melancholy menace of their tone !  
     For every sound that floats  
     From the rust within their throats  
         Is a groan.  
     And the people—ah, the people—  
     They that dwell up in the steeple, 80  
         All alone,

And who, tolling, tolling, tolling,  
 In that muffled monotone,  
 Feel a glory in so rolling  
 On the human heart a stone—  
 They are neither man nor woman—  
 They are neither brute nor human—

They are Ghouls :  
 And their king it is who tolls ;  
 And he rolls, rolls, rolls,

90

Rolls

A paean from the bells !  
 And his merry bosom swells  
 With the paean of the bells !  
 And he dances, and he yells ;  
 Keeping time, time, time,  
 In a sort of Runic rhyme,

To the paean of the bells—

Of the bells :

Keeping time, time, time,

100

In a sort of Runic rhyme,

To the throbbing of the bells—

Of the bells, bells, bells—

To the sobbing of the bells ;

Keeping time, time, time,

As he knells, knells knells,

In a happy Runic rhyme,

To the rolling of the bells—

Of the bells, bells, bells :

To the tolling of the bells,

110

Of the bells, bells, bells, bells—

Bells, bells, bells—

To the moaning and the groaning of the bells.

## ELDORADO

GAILY bedight,  
 A gallant knight,  
 In sunshine and in shadow,  
 Had journeyed long,  
 Singing a song,  
 In search of Eldorado.

## ELDORADO

95

But he grew old—  
This knight so bold—  
And o'er his heart a shadow  
Fell as he found  
No spot of ground  
That looked like Eldorado.

10

And, as his strength  
Failed him at length,  
He met a pilgrim shadow—  
'Shadow,' said he,  
'Where can it be—  
This land of Eldorado?'

'Over the Mountains  
Of the Moon,  
Down the Valley of the Shadow,  
Ride, boldly ride,'  
The shade replied—  
'If you seek for Eldorado!'

20

## ULALUME

THE skies they were ashen and sober ;  
The leaves they were crisped and sere—  
The leaves they were withering and sere ;  
It was night in the lonesome October  
Of my most immemorial year ;  
It was hard by the dim lake of Auber,  
In the misty mid region of Weir—  
It was down by the dank tarn of Auber,  
In the ghoul-haunted woodland of Weir.

Here once, through an alley Titanic,  
Of cypress, I roamed with my Soul—  
Of cypress, with Psyche, my Soul.  
These were days when my heart was volcanic  
As the scoriac rivers that roll—  
As the lavas that restlessly roll  
Their sulphurous currents down Yaanek  
In the ultimate climes of the pole—  
That groan as they roll down Mount Yaanek  
In the realms of the boreal pole.

10

Our talk had been serious and sober, 20  
 But our thoughts they were palsied and sere—  
 Our memories were treacherous and sere—  
 For we knew not the month was October,  
 And we marked not the night of the year—  
 (Ah, night of all nights in the year !)  
 We noted not the dim lake of Auber—  
 (Though once we had journeyed down here),  
 Remembered not the dank tarn of Auber,  
 Nor the ghoul-haunted woodland of Weir.

And now, as the night was senescent, 30  
 And star-dials pointed to morn—  
 As the star-dials hinted of morn—  
 At the end of our path a liquescent  
 And nebulous lustre was born,  
 Out of which a miraculous crescent  
 Arose with a duplicate horn—  
 Astarte's bediamonded crescent  
 Distinct with its duplicate horn.

And I said—' She is warmer than Dian :  
 She rolls through an ether of sighs— 40  
 She revels in a region of sighs :  
 She has seen that the tears are not dry on  
 These cheeks, where the worm never dies,  
 And has come past the stars of the Lion,  
 To point us the path to the skies—  
 To the Lethean peace of the skies—  
 Come up, in despite of the Lion,  
 To shine on us with her bright eyes—  
 Come up through the lair of the Lion,  
 With love in her luminous eyes.' 50

But Psyche, uplifting her finger,  
 Said—' Sadly this star I mistrust—  
 Her pallor I strangely mistrust :—  
 Oh, hasten !—oh, let us not linger !  
 Oh, fly !—let us fly !—for we must.'  
 In terror she spoke, letting sink her  
 Wings until they trailed in the dust—

In agony sobbed, letting sink her  
 Plumes till they trailed in the dust—  
 Till they sorrowfully trailed in the dust. 60

I replied—‘ This is nothing but dreaming :  
 Let us on by this tremulous light !  
 Let us bathe in this crystalline light !  
 Its Sybilic splendour is beaming  
 With Hope and in Beauty to-night :—  
 See !—it flickers up the sky through the night !  
 Ah, we safely may trust to its gleaming,  
 And be sure it will lead us aright—  
 We safely may trust to a gleaming  
 That cannot but guide us aright, 70  
 Since it flickers up to Heaven through the night.’

Thus I pacified Psyche and kissed her,  
 And tempted her out of her gloom—  
 And conquered her scruples and gloom ;  
 And we passed to the end of the vista,  
 But were stopped by the door of a tomb—  
 By the door of a legended tomb ;  
 And I said—‘ What is written, sweet sister,  
 On the door of this legended tomb ? ’  
 She replied—‘ Ulalume—Ulalume— 80  
 ’Tis the vault of thy lost Ulalume ! ’

Then my heart it grew ashen and sober  
 As the leaves that were crisped and sere—  
 As the leaves that were withering and sere—  
 And I cried—‘ It was surely October  
 On *this* very night of last year  
 That I journeyed—I journeyed down here—  
 That I brought a dread burden down here—  
 On this night of all nights in the year,  
 Ah, what demon has tempted me here ? 90  
 Well I know, now, this dim lake of Auber—  
 This misty mid region of Weir—  
 Well I know, now, this dank tarn of Auber,  
 This ghoulish-woodland of Weir.’

[Helen was Mrs. Whitman.]

I saw thee once—once only—years ago :  
I must not say *how* many—but *not* many.  
It was a July midnight ; and from out  
A full-orbed moon, that, like thine own soul, soaring,  
Sought a precipitate pathway up through heaven,  
There fell a silvery-silken veil of light,  
With quietude, and sultriness, and slumber,  
Upon the upturned faces of a thousand  
Roses that grew in an enchanted garden,  
Where no wind dared to stir, unless on tiptoe—  
Fell on the upturn'd faces of these roses  
That gave out, in return for the love-light,  
Their odorous souls in an ecstatic death—  
Fell on the upturn'd faces of these roses  
That smiled and died in this parterre, enchanted  
By thee, and by the poetry of thy presence.

Clad all in white, upon a violet bank  
I saw thee half reclining ; while the moon  
Fell on the upturn'd faces of the roses,  
And on thine own, upturn'd—alas, in sorrow !

Was it not Fate, that, on this July midnight—  
Was it not Fate, (whose name is also Sorrow,)  
That bade me pause before that garden-gate,  
To breathe the incense of those slumbering roses ?  
No footstep stirred : the hated world all slept,  
Save only thee and me. (Oh, Heaven !—oh, God !  
How my heart beats in coupling those two words !)  
Save only thee and me. I paused—I looked—  
And in an instant all things disappeared.  
(Ah, bear in mind this garden was enchanted !)

The pearly lustre of the moon went out :  
The mossy banks and the meandering paths,  
The happy flowers and the repining trees,  
Were seen no more : the very roses' odours  
Died in the arms of the adoring airs.  
All—all expired save thee—save less than thou :  
Save only the divine light in thine eyes—  
Save but the soul in thine uplifted eyes.

I saw but them—they were the world to me !  
 I saw but them—saw only them for hours, 40  
 Saw only them until the moon went down.  
 What wild heart-histories seemed to lie enwritten  
 Upon those crystalline, celestial spheres !  
 How dark a woe, yet how sublime a hope !  
 How silently serene a sea of pride !  
 How daring an ambition ; yet how deep—  
 How fathomless a capacity for love !

But now, at length, dear Dian sank from sight,  
 Into a western couch of thunder-cloud ;  
 And thou, a ghost, amid the entombing trees 50  
 Didst glide away. *Only thine eyes remained ;*  
*They would not go—they never yet have gone ;*  
 Lighting my lonely pathway home that night,  
*They* have not left me (as my hopes have) since ;  
 They follow me—they lead me through the years.  
 They are my ministers—yet I their slave.  
 Their office is to illumine and enkindle—  
 My duty, *to be saved* by their bright light,  
 And purified in their electric fire,  
 And sanctified in their elysian fire. 60  
 They fill my soul with Beauty (which is Hope),  
 And are far up in Heaven—the stars I kneel to  
 In the sad, silent watches of my night ;  
 While even in the meridian glare of day  
 I see them still—two sweetly scintillant  
 Venuses, unextinguished by the sun !

## TO ———

[Mrs. Marie Louise Shew.]

Not long ago, the writer of these lines,  
 In the mad pride of intellectuality,  
 Maintained 'the power of words'—denied that ever  
 A thought arose within the human brain  
 Beyond the utterance of the human tongue :  
 And now, as if in mockery of that boast,  
 Two words—two foreign soft dissyllables—  
 Italian tones, made only to be murmured

By angels dreaming in the moonlit 'dew  
 That hangs like chains of pearl on Hermon hill', 1  
 Have stirred from out the abysses of his heart,  
 Unthought-like thoughts that are the souls of thought,  
 Richer, far wilder, far diviner visions  
 Than even seraph harper, Israfil,  
 (Who has 'the sweetest voice of all God's creatures,')  
 Could hope to utter. And I! my spells are broken.  
 The pen falls powerless from my shivering hand.  
 With thy dear name as text, though bidden by thee,  
 I cannot write—I cannot speak or think—  
 Alas, I cannot feel; for 'tis not feeling, 2  
 This standing motionless upon the golden  
 Threshold of the wide-open gate of dreams.  
 Gazing, entranced, adown the gorgeous vista,  
 And thrilling as I see, upon the right,  
 Upon the left, and all the way along,  
 Amid empurpled vapours, far away  
 To where the prospect terminates—*thee only.*

### FOR ANNIE

THANK Heaven! the crisis—  
 The danger is past,  
 And the lingering illness  
 Is over at last—  
 And the fever called 'Living'  
 Is conquered at last.

Sadly, I know  
 I am shorn of my strength,  
 And no muscle I move  
 As I lie at full length—  
 But no matter!—I feel  
 I am better at length.

And I rest so composedly,  
 Now, in my bed,  
 That any beholder  
 Might fancy me dead—  
 Might start at beholding me,  
 Thinking me dead.

The moaning and groaning,  
The sighing and sobbing, 20  
Are quieted now,  
With that horrible throbbing  
At heart :—ah, that horrible,  
Horrible throbbing !  
The sickness—the nausea—  
The pitiless pain—  
Have ceased, with the fever  
That maddened my brain—  
With the fever called ‘ Living ’  
That burned in my brain. 30  
And oh ! of all tortures  
That torture the worst  
Has abated—the terrible  
Torture of thirst  
For the naphthaline river  
Of Passion accurst :—  
I have drunk of a water  
That quenches all thirst :—  
Of a water that flows,  
With a lullaby sound, 40  
From a spring but a very few  
Feet under ground—  
From a cavern not very far  
Down under ground.  
And ah ! let it never  
Be foolishly said  
That my room it is gloomy  
And narrow my bed ;  
For man never slept  
In a different bed— 50  
And, *to sleep*, you must slumber  
In just such a bed.  
My tantalized spirit  
Here blandly reposes,  
Forgetting, or never  
Regretting its roses—  
Its old agitations  
Of myrtles and roses :

For now, while so quietly  
Lying, it fancies 60  
A holier odour  
About it, of pansies—  
A rosemary odour,  
Commingled with pansies—  
With rue and the beautiful  
Puritan pansies.

And so it lies happily,  
Bathing in many  
A dream of the truth  
And the beauty of Annie— 70  
Drowned in a bath  
Of the tresses of Annie.

She tenderly kissed me,  
She fondly caressed,  
And then I fell gently  
To sleep on her breast—  
Deeply to sleep  
From the heaven of her breast.

When the light was extinguished,  
She covered me warm, 80  
And she prayed to the angels  
To keep me from harm—  
To the queen of the angels  
To shield me from harm.

And I lie so composedly,  
Now, in my bed,  
(Knowing her love)  
That you fancy me dead—  
And I rest so contentedly,  
Now, in my bed, 90  
(With her love at my breast)  
That you fancy me dead—  
That you shudder to look at me,  
Thinking me dead.

But my heart it is brighter  
Than all of the many  
Stars in the sky,  
For it sparkles with Annie—  
It glows with the light  
Of the love of my Annie—  
With the thought of the light  
Of the eyes of my Annie.

100

## TO MY MOTHER

[His mother-in-law, Mrs. Clemm.]

BECAUSE I feel that, in the Heavens above,  
The angels, whispering to one another,  
Can find, among their burning terms of love,  
None so devotional as that of 'Mother',  
Therefore by that dear name I long have called you—  
You who are more than mother unto me,  
And fill my heart of hearts, where Death installed you  
In setting my Virginia's spirit free.  
My mother—my own mother, who died early,  
Was but the mother of myself ; but you  
Are mother to the one I loved so dearly,  
And thus are dearer than the mother I knew  
By that infinity with which my wife  
Was dearer to my soul than its soul-life.

10

## A DREAM WITHIN A DREAM

TAKE this kiss upon the brow !  
And, in parting from you now,  
Thus much let me avow—  
You are not wrong, who deem  
That my days have been a dream ;  
Yet if hope has flown away  
In a night, or in a day,  
In a vision, or in none,  
Is it therefore the less *gone* ?  
*All* that we see or seem  
Is but a dream within a dream.

10

I stand amid the roar  
 Of a surf-tormented shore,  
 And I hold within my hand  
 Grains of the golden sand—  
 How few ! yet how they creep  
 Through my fingers to the deep,  
 While I weep—while I weep !  
 O God ! can I not grasp  
 Them with a tighter clasp ?  
 O God ! can I not save  
 One from the pitiless wave ?  
 Is *all* that we see or seem  
 But a dream within a dream ?

20

## ALONE

[*Scribner's Magazine*, September 1875.]

FROM childhood's hour I have not been  
 As others were ; I have not seen  
 As others saw ; I could not bring  
 My passions from a common spring.  
 From the same source I have not taken  
 My sorrow ; I could not awaken  
 My heart to joy at the same tone ;  
 And all I loved, *I* loved alone.  
 Then—in my childhood, in the dawn  
 Of a most stormy life—was drawn  
 From every depth of good and ill  
 The mystery which binds me still :  
 From the torrent, or the fountain,  
 From the red cliff of the mountain,  
 From the sun that round me rolled  
 In its autumn tint of gold,  
 From the lightning in the sky  
 As it passed me flying by,  
 From the thunder and the storm,  
 And the cloud that took the form  
 (When the rest of Heaven was blue)  
 Of a demon in my view.

**OTHER TEXTS FOR SOME OF  
THE POEMS**

## SPIRITS OF THE DEAD

[*Tamerlane and other Poems*, 1827. Here called *Visit of the Dead*.]

THY soul shall find itself alone—  
 Alone of all on earth—unknown  
 The cause—but none are near to pry  
 Into thine hour of secrecy.  
 Be silent in that solitude,  
 Which is not loneliness—for then  
 The spirits of the dead, who stood  
 In life before thee, are again  
 In death around thee, and their will  
 Shall then o'ershadow thee—be still:                   10  
 For the night, tho' clear, shall frown ;  
 And the stars shall look not down  
 From their thrones, in the dark heaven,  
 With light like Hope to mortals given,  
 But their red orbs, without beam,  
 To thy withering heart shall seem  
 As a burning, and a fever  
 Which would cling to thee forever.  
 But 'twill leave thee, as each star  
 In the morning light afar                               20  
 Will fly thee—and vanish :  
 —But its *thought* thou canst not banish.  
 The breath of God will be still ;  
 And the mist upon the hill  
 By that summer breeze unbroken  
 Shall charm thee—as a token,  
 And a symbol which shall be  
 Secrecy in thee.

## THE VALLEY OF UNREST

[*Poems of Edgar A. Poe*, 1831. Here called 'The Valley Nis'.]

FAR away—far away—  
 Far away—as far at least  
 Lies that valley as the day  
 Down within the golden east—  
 All things lovely—are not they  
 Far away—far away ?

It is called the Valley Nis.  
 And a Syriac tale there is  
 Thereabout which Time hath said  
 Shall not be interpreted.  
 Something about Satan's dart—  
 Something about angel wings—  
 Much about a broken heart—  
 All about unhappy things :  
 But ' the Valley Nis ' at best  
 Means ' the valley of unrest '.

10

Once it smil'd, a silent dell  
 Where the people did not dwell,  
 Having gone unto the wars—  
 And the sly, mysterious stars,  
 With a visage full of meaning,  
 O'er the unguarded flowers were leaning :  
 Or the sun ray dripp'd all red  
 Thro' the tulips overhead,  
 Then grew paler as it fell  
 On the quiet Asphodel.

20

Now the *unhappy* shall confess  
 Nothing there is motionless :  
 Helen, like thy human eye  
 There th' uneasy violets lie—  
 There the reedy grass doth wave  
 Over the old forgotten grave—  
 One by one from the treetop  
 There the eternal dews do drop—  
 There the vague and dreamy trees  
 Do roll like seas in northern breeze

30

Around the stormy Hebrides—  
 There the gorgeous clouds do fly,  
 Rustling everlastingly,  
 Through the terror-stricken sky,  
 Rolling like a waterfall  
 O'er th' horizon's fiery wall—  
 There the moon doth shine by night  
 With a most unsteady light—  
 There the sun doth reel by day  
 'Over the hills and far away'.

40

## THE SLEEPER

[*Poems by Edgar A. Poe, 1831. Here called 'Irene'.*]

'Tis now (so sings the soaring moon)  
 Midnight in the sweet month of June,  
 When winged visions love to lie  
 Lazily upon beauty's eye,  
 Or worse—upon her brow to dance  
 In panoply of old romance,  
 Till thoughts and locks are left, alas !  
 A ne'er-to-be untangled mass.

An influence dewy, drowsy, dim,  
 Is dripping from that golden rim ;  
 Grey towers are mouldering into rest,  
 Wrapping their fog around their breast :  
 Looking like Lethe, see ! the lake  
 A conscious slumber seems to take,  
 And would not for the world awake ;  
 The rosemary sleeps upon the grave—  
 The lily lolls upon the wave—  
 And million bright pines to and fro,  
 Are rocking lullabies as they go,  
 To the lone oak that reels with bliss,  
 Nodding above the dim abyss.  
 All beauty sleeps : and lo ! where lies  
 With casement open to the skies,  
 Irene, with her destinies !

10

20

Thus hums the moon within her ear,

‘ O lady sweet ! how camest thou here ?  
 Strange are thine eyelids—strange thy dress !  
 And strange thy glorious length of tress !  
 Sure thou art come o’er far-off seas,  
 A wonder to our desert trees !  
 Some gentle wind hath thought it right  
 To open thy window to the night,  
 And wanton airs from the tree-top,  
 Laughingly thro’ the lattice drop,  
 And wave this crimson canopy,  
 Like a banner o’er thy dreaming eye !  
 Lady, awake ! lady, awake !  
 For the holy Jesus’ sake !  
 For strangely—fearfully in this hall  
 My tinted shadows rise and fall ! ’

30

40

The lady sleeps : the *dead* all sleep—  
 At least as long as Love doth weep :  
 Entranc’d, the spirit loves to lie  
 As long as—tears on Memory’s eye :  
 But when a week or two go by,  
 And the light laughter chokes the sigh,  
 Indignant from the tomb doth take  
 Its way to some remember’d lake,  
 Where oft—in life—with friends—it went  
 To bathe in the pure element,  
 And there, from the untrodden grass,  
 Wreathing for its transparent brow  
 Those flowers that say (ah, hear them now !)  
 To the night-winds as they pass,  
 ‘ Ai ! ai ! alas !—alas ! ’  
 Pores for a moment, ere it go,  
 On the clear waters there that flow,  
 Then sinks within (weigh’d down by woe)  
 Th’ uncertain, shadowy heaven below.

50

The lady sleeps : oh ! may her sleep  
 As it is lasting so be deep—  
 No icy worms about her creep :

60

I pray to God that she may lie  
 For ever with as calm an eye,  
 That chamber chang'd for one more holy—  
 That bed for one more melancholy.

Far in the forest, dim and old,  
 For her may some tall vault unfold,  
 Against whose sounding door she hath thrown,  
 In childhood, many an idle stone—  
 Some tomb, which oft hath flung its black  
 And vampire-wingèd panels back,  
 Flutt'ring triumphant o'er the palls  
 Of her old family funerals.

70

## LENORE

[*Poems by Edgar A. Poe*, 1831. Here called 'A Paean'.]

How shall the burial rite be read ?  
 The solemn song be sung ?  
 The requiem for the loveliest dead,  
 That ever died so young ?

Her friends are gazing on her,  
 And on her gaudy bier,  
 And weep !—oh ! to dishonour  
 Dead beauty with a tear !

They loved her for her wealth—  
 And they hated her for her pride—  
 But she grew in feeble health,  
 And they *love* her—that she died.

10

They tell me (while they speak  
 Of her 'costly-broider'd pall')  
 That my voice is growing weak—  
 That I should not sing at all—

Or that my tone should be  
 Tun'd to such solemn song,  
 So mournfully—so mournfully,  
 That the dead may feel no wrong.

20

But she is gone above,  
 With young Hope at her side,  
 And I am drunk with love  
 Of the dead, who is my bride—

Of the dead—dead who lies  
 All perfum'd there,  
 With the death upon her eyes,  
 And the life upon her hair.

Thus on the coffin loud and long  
 I strike—the murmur sent 30  
 Through the grey chambers to my song,  
 Shall be the accompaniment.

Thou died'st in thy life's June—  
 But thou didst not die too fair :  
 Thou didst not die too soon,  
 Nor with too calm an air.

From more than friends on earth  
 Thy life and love are riven,  
 To join the untainted mirth  
 Of more than thrones in heaven— 40

Therefore, to thee this night  
 I will no requiem raise,  
 But waft thee on thy flight,  
 With a Paean of old days.

### LENORE

[*The Pioneer*, 1843.]

AH, broken is the golden bowl !  
 The Spirit flown forever !  
 Let the bell toll !—A saintly soul  
 Glides down the Stygian river !  
 And let the burial rite be read—  
 The funeral song be sung—  
 A dirge for the most lovely dead  
 That ever died so young !

And, Guy de Vere,  
Hast *thou* no tear ? 10  
    Weep now or never more !  
See, on yon drear  
And rigid bier,  
    Low lies thy love Lenore.

‘ Yon heir, whose cheeks of pallid hue  
    With tears are streaming wet,  
Sees only, through  
Their crocodile dew,  
    A vacant coronet—  
    False friends ! ye lov’d her for her wealth 20  
    And hated her for her pride,  
And, when she fell in feeble health,  
    Ye bless’d her—that she died.  
    How *shall* the ritual, then, be read ?  
    The requiem *how* be sung  
    For her most wrong’d of all the dead  
    That ever died so young ? ’

*Peccavimus !*  
But rave not thus !  
    And let the solemn song 30  
Go up to God so mournfully that *she* may feel no wrong !  
    The sweet Lenore  
    Hath ‘ gone before ’  
    With young Hope at her side,  
    And thou art wild  
    For the dear child  
That should have been thy bride—  
    For her, the fair  
    And debonair,  
    That now so lowly lies— 40  
    The life still there  
    Upon her hair,  
    The death upon her eyes.

‘ Avaunt !—to-night  
My heart is light—  
    No dirge will I upraise,

But waft the angel on her flight  
 With a Paean of old days !  
 Let *no* bell toll !  
 Lest her sweet soul,  
     Amid its hallow'd mirth,  
     Should catch the note  
     As it doth float  
 Up from the damnèd earth—  
     To friends above, from fiends below,  
     Th' indignant ghost is riven—  
     From grief and moan  
     To a gold throne  
     Beside the King of Heaven.'

50

## ISRAFEL

[*Poems by Edgar A. Poe, 1831.*]

IN Heaven a spirit doth dwell  
 Whose heart-strings are a lute ;  
 None sing so wild—so well  
 As the angel Israfel—  
 And the giddy stars are mute.

## II

Tottering above  
 In her highest noon,  
 The enamoured moon  
 Blushes with love—  
 While, to listen, the red levin  
 Pauses in Heaven.

## III

And they say (the starry choir  
 And all the listening things)  
 That Israfeli's fire  
 Is owing to that lyre  
 With those unusual strings.

## IV

But the Heavens that angel trod,  
Where deep thoughts are a duty—  
Where Love is a grown god—  
Where Houri glances are—  
Stay ! turn thine eyes afar !  
Imbued with all the beauty  
Which we worship in yon star.

20

## V

Thou art not, therefore, wrong  
Israfeli, who despisest  
An unimpassion'd song :  
To thee the laurels belong,  
Best bard,—because the wisest.

## VI

The ecstasies above  
With thy burning measures suit—  
Thy grief—if any—thy love  
With the fervour of thy lute—  
Well may the stars be mute !

30

## VII

Yes, Heaven is thine : but this  
Is a world of sweets and sour :  
Our flowers are merely—flowers,  
And the shadow of thy bliss  
Is the sunshine of ours.

## VIII

If I did dwell where Israfel  
Hath dwelt, and he where I,  
He would not sing one half so well—  
One half so passionately,  
While a stormier note than this would swell  
From my lyre within the sky.

40

## THE CITY IN THE SEA

[*Poems by Edgar A. Poe*, 1831. Here called 'The Doomed City'.]

Lo ! Death hath rear'd himself a throne  
In a strange city, all alone,  
Far down within the dim West—  
And the good, and the bad, and the worst, and the best,  
Have gone to their eternal rest.

There shrines, and palaces, and towers  
Are—not like anything of ours—  
O ! no—O ! no—*ours* never loom  
To heaven with that ungodly gloom !  
Time-eaten towers that tremble not !  
Around, by lifting winds forgot,  
Resignedly beneath the sky  
The melancholy waters lie.

10

A heaven that God doth not contemn  
With stars is like a diadem  
We liken our ladies' eyes to them—  
But there ! that everlasting pall !  
It would be mockery to call  
Such dreariness a heaven at all.

Yet tho' no holy rays come down  
On the long night-time of that town,  
Light from the lurid, deep sea  
Streams up the turrets silently—

20

Up thrones—up long-forgotten bowers  
Of sculptured ivy and stone flowers—  
Up domes—up spires—up kingly halls—  
Up fanes—up Babylon-like walls—  
Up many a melancholy shrine,  
Whose entablatures intertwine  
The mask—the viol—and the vine.

30

There open temples—open graves  
Are on a level with the waves—  
But not the riches there that lie  
In each idol's diamond eye,

Not the gaily-jewell'd dead  
Tempt the waters from their bed :  
For no ripples curl, alas !  
Along that wilderness of glass—  
No swellings hint that winds may be  
Upon a far-off happier sea :  
So blend the turrets and shadows there  
That all seem pendulous in air,  
While from the high towers of the town  
Death looks gigantically down.

40

But lo ! a stir is in the air !  
The wave ! there is a ripple there !  
As if the towers had thrown aside,  
In slightly sinking, the dull tide—  
As if the turret-tops had given  
A vacuum in the filmy Heaven :  
The waves have now a redder glow—  
The very hours are breathing low—  
And when, amid no earthly moans,  
Down, down that town shall settle hence,  
Hell, rising from a thousand thrones,  
Shall do it reverence,  
And Death to some more happy clime  
Shall give his undivided time.

50

## TAMERLANE

[*Tamerlane and other Poems*, 1827.]

## I

I HAVE sent for thee, holy friar ;  
But 'twas not with the drunken hope,  
Which is but agony of desire  
To shun the fate, with which to cope  
Is more than crime may dare to dream,  
That I have call'd thee at this hour :  
Such, father, is not my theme—  
Nor am I mad, to deem that power  
Of earth may shrive me of the sin  
Unearthly pride hath revell'd in—

10

I would not call thee fool, old man,  
But hope is not a gift of thine ;  
If I *can* hope (O God ! I can)  
It falls from an eternal shrine.

## II

The gay wall of this gaudy tower  
Grows dim around me—death is near.  
I had not thought, until this hour  
When passing from the earth, that ear  
Of any, were it not the shade  
Of one whom in life I made  
All mystery but a simple name,  
Might know the secret of a spirit  
Bow'd down in sorrow, and in shame.—  
Shame, said'st thou ?

20

Ay, I did inherit  
That hated portion, with the fame,  
The worldly glory, which has shown  
A demon-light around my throne,  
Scorching my sear'd heart with a pain  
Not Hell shall make me fear again.

## III

I have not always been as now—  
The fever'd diadem on my brow  
I claim'd and won usurpingly—  
Ay—the same heritage hath given  
Rome to the Caesar—this to me ;  
The heirdom of a kingly mind—  
And a proud spirit, which hath striven  
Triumphantly with human kind.

30

In mountain air I first drew life ;  
The mists of the Taglay have shed  
Nightly their dews on my young head ;  
And my brain drank their venom then,  
When after day of perilous strife  
With chamois, I would seize his den  
And slumber, in my pride of power,  
The infant monarch of the hour—

40

For, with the mountain dew by night,  
 My soul imbibed unhallow'd feeling ;  
 And I would feel its essence stealing  
 In dreams upon me—while the light  
 Flashing from cloud that hovered o'er, 50  
 Would seem to my half-closing eye  
 The pageantry of monarchy !  
 And the deep thunder's echoing roar  
 Came hurriedly upon me, telling  
 Of war, and tumult, where my voice,  
 My *own* voice, silly child ! was swelling  
 (O how would my wild heart rejoice  
 And leap within me at the cry)  
 The battle-cry of victory !  
 . . . . .

## IV

The rain came down upon my head 60  
 But barely shelter'd—and the wind  
 Pass'd quickly o'er me—but my mind  
 Was maddening—for 'twas man that shed  
 Laurels upon me—and the rush,  
 The torrent of the chilly air  
 Gurgled in my pleased ear the crush  
 Of empires, with the captive's prayer,  
 The hum of suitors, the mix'd tone  
 Of flattery round a sovereign's throne.  
 The storm had ceased—and I awoke— 70  
 Its spirit cradled me to sleep,  
 And as it pass'd me by, there broke  
 Strange light upon me, tho' it were  
 My soul in mystery to steep :  
 For I was not as I had been ;  
 The child of Nature, without care,  
 Or thought, save of the passing scene.—

My passions, from that hapless hour,  
 Usurp'd a tyranny, which men  
 Have deem'd, since I have reach'd to power, 80  
 My innate nature—be it so :

But, father, there lived one who, then—  
 Then, in my boyhood, when their fire  
 Burn'd with a still intenser glow ;  
 (For passion must with youth expire)  
 Even *then*, who deem'd this iron heart  
 In woman's weakness had a part.

I have no word, alas ! to tell  
 The loveliness of loving well !  
 Nor would I dare attempt to trace 90  
 The breathing beauty of a face,  
 Which even to *my* impassion'd mind,  
 Leaves not its memory behind.  
 In spring of life have ye ne'er dwelt  
 Some object of delight upon,  
 With steadfast eye, till ye have felt  
 The earth reel—and the vision gone ?  
 And I have held to memory's eye  
 One object—and but one—until  
 Its very form hath pass'd me by, 100  
 But left its influence with me still.

## VI

'Tis not to thee that I should name—  
 Thou canst not—wouldst not dare to think  
 The magic empire of a flame  
 Which even upon this perilous brink  
 Hath fix'd my soul, tho' unforgiven,  
 By what it lost for passion—Heaven.  
 I loved—and O, how tenderly !  
 Yes ! she [was] worthy of all love !  
 Such as in infancy was mine, 110  
 Tho' then its *passion* could not be :  
 'Twas such as angel minds above  
 Might envy—her young heart the shrine  
 On which my every hope and thought  
 Were incense—then a goodly gift—  
 For they were childish, without sin,  
 Pure as her young example taught ;  
 Why did I leave it and adrift,  
 Trust to the fickle star within ?

## VII

We grew in age and love together 120  
Roaming the forest and the wild ;  
My breast her shield in wintry weather,  
And when the friendly sunshine smiled  
And she would mark the opening skies,  
I saw no Heaven but in her eyes—  
Even childhood knows the human heart ;  
For when, in sunshine and in smiles,  
From all our little cares apart,  
Laughing at her half silly wiles,  
I'd throw me on her throbbing breast, 130  
And pour my spirit out in tears,  
She'd look up in my wilder'd eye—  
There was no need to speak the rest—  
No need to quiet her kind fears—  
She did not ask the reason why.

The hallow'd memory of those years  
Comes o'er me in these lonely hours,  
And, with sweet loveliness, appears  
As perfume of strange summer flowers ;  
Of flowers which we have known before 140  
In infancy, which seen, recall  
To mind—not flowers alone—but more,  
Our earthly life, and love—and all.

## VIII

Yes ! she was worthy of all love !  
Even such as from the accursed time  
My spirit with the tempest strove,  
When on the mountain peak alone,  
Ambition lent it a new tone,  
And bade it first to dream of crime,  
My frenzy to her bosom taught : 150  
We still were young : no purer thought  
Dwelt in a seraph's breast than *thine* ;  
For passionate love is still divine :  
I loved her as an angel might  
With ray of all living light

Which blazes upon Edis' shrine.  
 It is not surely sin to name,  
 With such as mine—that mystic flame,  
 I had no being but in thee !  
 The world with all its train of bright 160  
 And happy beauty (for to me  
 All was an undefined delight),  
 The world—its joy—its share of pain  
 Which I felt not—its bodied forms  
 Of varied being, which contain  
 The bodiless spirits of the storms,  
 The sunshine, and the calm—the ideal  
 And fleeting vanity of dreams,  
 Fearfully beautiful ! the real  
 Nothings of mid day waking life— 170  
 Of an enchanted life, which seems,  
 Now as I look back, the strife  
 Of some ill demon, with a power  
 Which left me in an evil hour,  
 All I that felt, or saw, or thought,  
 Crowding, confused became  
 (With thine unearthly beauty fraught)  
 Thou—and the nothing of a name.

## IX

The passionate spirit which hath known,  
 And deeply felt the silent tone 180  
 Of its own self-supremacy,—  
 (I speak thus openly to thee,  
 'Twere folly *now* to veil a thought  
 With which this aching breast is fraught)  
 The soul which feels its innate right—  
 The mystic empire and high power  
 Given by the energetic might  
 Of Genius, at its natal hour ;  
 Which knows (believe me at this time,  
 When falsehood were a tenfold crime, 190  
 There *is* a power in the high spirit  
 To *know* the fate it will inherit)  
 The soul, which knows such power, will still  
 Find *Pride* the ruler of its will.

Yes ! I was proud—and ye who know  
 The magic of that meaning word,  
 So oft perverted, will bestow  
 Your scorn, perhaps, when ye have heard  
 That the proud spirit had been broken,  
 The proud heart burst in agony 200  
 At one upbraiding word or token  
 Of her that heart's idolatry—  
 I was ambitious—have ye known  
 Its fiery passion ?—ye have not—  
 A cottager, I mark'd a throne  
 Of half the world, as all my own,  
 And murmur'd at such lowly lot !  
 But it hath pass'd me as a dream  
 Which, of light step, flies with the dew,  
 That kindling thought—did not the beam 210  
 Of Beauty, which did guide it through  
 The livelong summer day, oppress  
 My mind with double loveliness—

## X

We walk'd together to the crown  
 Of a high mountain, which look'd down  
 Afar from its proud natural towers  
 Of rock and forest, on the hills—  
 The dwindled hills, whence amid bowers  
 Her own fair hand had rear'd around,  
 Gush'd shoutingly a thousand rills, 220  
 Which as it were, in fairy bound  
 Embraced two hamlets—those our own.—  
 Peacefully happy—yet alone—

I spoke to her of power and pride—  
 But mystically, in such guise,  
 That she might deem it nought beside  
 The moment's converse ; in her eyes  
 I read (perhaps too carelessly)  
 A mingled feeling with my own ;  
 The flush on her bright cheek, to me, 230  
 Seem'd to become a queenly throne  
 Too well, that I should let it be  
 A light in the dark wild, alone.

## XI

There—in that hour—a thought came o'er  
 My mind, it had not known before—  
 To leave her while we both were young,—  
 To follow my high fate among  
 The Strife of nations, and redeem  
 The idle words, which, as a dream  
 Now sounded to her heedless ear— 240  
 I held no doubt—I knew no fear  
 Of peril in my wild career ;  
 To gain an empire, and throw down  
 As nuptial dowry—a queen's crown,  
 The only feeling which possest,  
 With her own image, my fond breast—  
 Who, that had known the secret thought  
 Of a young peasant's bosom then,  
 Had deem'd him, in compassion, aught  
 But one, whom fantasy had led 250  
 Astray from reason—Among men  
 Ambition is chain'd down—nor fed  
 (As in the desert, where the grand,  
 The wild, the beautiful, conspire  
 With their own breath to fan its fire)  
 With thoughts such feeling can command ;  
 Uncheck'd by sarcasm, and scorn  
 Of those, who hardly will conceive  
 That any should become ' great ', born  
 In their own sphere—will not believe 260  
 That they shall stoop in life to one  
 Whom daily they are wont to see  
 Familiarly—whom Fortune's sun  
 Hath ne'er shone dazzlingly upon,  
 Lowly—and of their own degree—

## XII

I pictured to my fancy's eye  
 Her silent, deep astonishment,  
 When, a few fleeting years gone by  
 (For short the time my high hope lent  
 To its most desperate intent,) 270  
 She might recall in him, whom Fame

Had gilded with a conqueror's name  
(With glory—such as might inspire  
Perforce, a passing thought of one,  
Whom she had deem'd in his own fire  
Wither'd and blasted ; who had gone  
A traitor, violate of the truth  
So plighted in his early youth,)  
Her own Alexis, who should plight  
The love he plighted *then*—again, 280  
And raise his infancy's delight,  
The pride and queen of Tamerlane.—

## XIII

One noon of a bright summer's day  
I pass'd from out the matted bower  
Where in a deep, still slumber lay  
My Ada. In that peaceful hour  
A silent gaze was my farewell.  
I had no other solace—then  
To awake her, and a falsehood tell  
Of a feign'd journey, were again 290  
To trust the weakness of my heart  
To her soft thrilling voice : to part  
Thus, haply, while in sleep she dream'd  
Of long delight, nor yet had deem'd  
Awake, that I had held a thought  
Of parting, were with madness fraught ;  
I knew not woman's heart, alas !  
Tho' loved, and loving—let it pass.—

## XIV

I went from out the matted bower,  
And hurried madly on my way : 300  
And felt, with every flying hour,  
That bore me from my home, more gay  
There is of earth an agony  
Which, ideal, still may be  
The worst ill of mortality.  
'Tis bliss, in its own reality,  
Too real, to *his* breast who lives  
Nor within himself but gives

A portion of his willing soul  
 To God, and to the great whole— 310  
 To him, whose loving Spirit will dwell  
 With Nature, in her wild paths : tell  
 Of her wondrous ways, and telling bless  
 Her overpowering loveliness !  
 A more than agony to him  
 Whose failing sight will grow dim  
 With its own living gaze upon  
 That loveliness around : the sun—  
 The blue sky—the misty light  
 Of the pale cloud therein, whose hue 320  
 Is grace to its heavenly bed of blue ;  
 Dim ! tho' looking on all bright !  
 O God ! when the thoughts that may not pass  
 Will burst upon him, and alas !  
 For the flight on Earth to Fancy given,  
 There are no words—unless of Heaven.

## XV

Look round thee now on Samarcand,  
 Is she not queen of earth ? her pride  
 Above all cities ? in her hand  
 Their destinies ? with all beside 330  
 Of glory, which the world hath known ?  
 Stands she not proudly and alone ?  
 And who her Sovereign ? Timur, he  
 Whom the astonish'd earth hath seen,  
 With victory, on victory,  
 Redoubling age ! and more, I ween,  
 The Zinghis' yet re-echoing fame.  
 And now what has he ? what ! a name.  
 The sound of revelry by night  
 Comes o'er me, with the mingled voice 340  
 Of many with a breast as light,  
 As if 'twere not the dying hour  
 Of one, in whom they did rejoice—  
 As in a leader, haply—Power  
 Its venom secretly imparts :  
 Nothing have I with human hearts.

## XVI

When Fortune mark'd me for her own,  
And my proud hopes had reach'd a throne  
(It boots me not, good friar, to tell  
A tale the world but knows too well, 350  
How by what hidden deeds of might,  
I clamber'd to the tottering height,)  
I still was young ; and well I ween  
My spirit what it e'er had been.  
My eyes were still on pomp and power,  
My wilder'd heart was far away  
In valleys of the wild Taglay,  
In mine own Ada's matted bower.  
I dwelt not long in Samarcand  
Ere, in a peasant's lowly guise, 360  
I sought my long-abandon'd land ;  
By sunset did its mountains rise  
In dusky grandeur to my eyes :  
But as I wander'd on the way  
My heart sunk with the sun's ray.  
To him who still would gaze upon  
The glory of the summer sun,  
There comes, when that sun will from him part,  
A sullen hopelessness of heart.  
That soul will hate the evening mist 370  
So often lovely, and will list  
To the sound of the coming darkness (known  
To those whose spirits hearken) as one  
Who in a dream of night *would* fly,  
But cannot, from a danger nigh.  
What though the moon—the silvery moon—  
Shine on his path, in her high noon ;  
*Her* smile is chilly, and *her* beam  
In that time of dreariness will seem 380  
As the portrait of one after death ;  
A likeness taken when the breath  
Of young life, and the fire of the eye,  
*Had* lately been, but had pass'd by.  
'Tis thus when the lovely summer sun  
Of our boyhood his course hath run :

For all we live to know—is known ;  
 And all we seek to keep—hath flown ;  
 With the noonday beauty, which is all.  
 Let life, then, as the day-flower, fall—  
 The transient, passionate day-flower, 390  
 Withering at the evening hour.

## XVII

I reach'd my home—my home no more—  
 For all was flown that made it so—  
 I pass'd from out its mossy door,  
 In vacant idleness of woe.  
 There met me on its threshold stone  
 A mountain hunter, I had known  
 In childhood, but he knew me not.  
 Something he spoke of the old cot :  
 It had seen better days, he said ; 400  
*There* rose a fountain once, and *there*  
 Full many a fair flower raised its head :  
 But she who reared them was long dead,  
 And in such follies had no part,  
 What was there left me *now* ? despair—  
 A kingdom for a broken—heart.

## NOTES ON TAMERLANE

## 1827 TEXT

1. 1. *I have sent for thee, holy friar.* Of the history of Tamerlane little is known ; and with that little I have taken the full liberty of a poet.—That he was descended from the family of Zinghis Khan is more than probable—but he is vulgarly supposed to have been the son of a shepherd, and to have raised himself to the throne by his own address. He died in the year 1405, in the time of Pope Innocent VII.

How I shall account for giving him 'a friar', as a death-bed confessor—I cannot exactly determine. He wanted some one to listen to his tale—and why not a friar ? It does not pass the bounds of possibility—quite sufficient for my purpose—and I have at least good authority for such innovations.

1. 39. *The mists of the Taglay have shed.* The mountains of Belur Taglay are a branch of the Imaus, in the southern part of Independent Tartary. They are celebrated for the singular wildness and beauty of their valleys.

11. 151-2. *No purer thought Dwelt in a seraph's breast than thine.* I must beg the reader's pardon for making Tamerlane, a Tartar of the

fourteenth century, speak in the same language as a Boston gentleman of the nineteenth; but of the Tartar mythology we have little information.

1. 156. *Which blazes upon Edis' shrine.* A deity presiding over virtuous love, upon whose imaginary altar a sacred fire was continually blazing.

11. 258-60. *who hardly will conceive That any should become 'great', born In their own sphere.* Although Tamerlane speaks this, it is not the less true. It is a matter of the greatest difficulty to make the generality of mankind believe that one with whom they are upon terms of intimacy shall be called, in the world, a 'great man'. The reason is evident. There are few great men. Their actions are consequently viewed by the mass of the people through the medium of distance. The prominent parts of their characters are alone noted; and those properties, which are minute and common to every one, not being observed, seem to have no connection with a great character.

Who ever read the private memorials, correspondence, &c., which have become so common in our time, without wondering that 'great men' should act and think 'so abominably'?

1. 279. *Her own Alexis, who should plight.* That Tamerlane acquired his renown under a feigned name is not entirely a fiction.

1. 327. *Look round thee now on Samarcand.* I believe it was after the battle of Angora that Tamerlane made Samarcand his residence. It became for a time the seat of learning and the arts.

1. 333. *And who her sovereign? Timur.* He was called Timur Bek as well as Tamerlane.

1. 337. *The Zinghis' yet re-echoing fame.* The conquests of Tamerlane far exceeded those of Zinghis Khan. He boasted to have two-thirds of the world at his command.

11. 372-3. *the sound of the coming darkness (known To those whose spirits hearken).* I have often fancied that I could distinctly hear the sound of the darkness, as it steals over the horizon—a foolish fancy, perhaps, but not more unintelligible than to see music—

The mind the music breathing from her face.

1. 389. *Let life, then, as the day-flower, fall.* There is a flower (I have never known its botanic name) vulgarly called the day-flower. It blooms beautifully in the daylight, but withers towards evening, and by night its leaves appear totally shrivelled and dead. I have forgotten, however, to mention in the text, that it lives again in the morning. If it will not flourish in Tartary, I must be forgiven for carrying it thither.

## A ROMANCE

[*Poems by Edgar A. Poe*, 1831. Here called 'Introduction'.]

ROMANCE, who loves to nod and sing,  
 With drowsy head and folded wing,  
 Among the green leaves as they shake  
 Far down within some shadowy lake,  
 To me a painted paroquet  
 Hath been—a most familiar bird—  
 Taught me my alphabet to say,—  
 To lisp my very earliest word  
 While in the wild-wood I did lie,  
 A child—with a most knowing eye.

Succeeding years, too wild for song,  
 Then roll'd like tropic storms along,  
 Where, tho' the garish lights that fly  
 Dying along the troubled sky,  
 Lay bare, thro' vistas thunder-riven,  
 The blackness of the general Heaven,  
 That very blackness yet doth fling  
 Light on the lightning's silver wing.

For, being an idle boy lang syne,  
 Who read Anacreon, and drank wine,  
 I early found Anacreon rhymes  
 Were almost passionate sometimes—  
 And by strange alchemy of brain  
 His pleasures always turn'd to pain—  
 His naïveté to wild desire—  
 His wit to love—his wine to fire—  
 And so, being young and dipt in folly,  
 I fell in love with melancholy,  
 And used to throw my earthly rest  
 And quiet all away in jest—  
 I could not love except where Death  
 Was mingling his with Beauty's breath—  
 Or Hymen, Time, and Destiny  
 Were stalking between her and me.

O, then the eternal Condor years  
So shook the very Heavens on high,  
With tumult as they thunder'd by :  
I had no time for idle cares,  
Thro' gazing on the unquiet sky !  
Or if an hour with calmer wing  
Its down did on my spirit fling,  
That little hour with lyre and rhyme  
To while away—forbidden thing !  
My heart half fear'd to be a crime  
Unless it trembled with the string.

40

But *now* my soul hath too much room—  
Gone are the glory and the gloom—  
The black hath mellow'd into grey,  
And all the fires are fading away.

My draught of passion hath been deep—  
I revell'd, and I now would sleep—  
And after-drunkenness of soul  
Succeeds the glories of the bowl—  
An idle longing night and day  
To dream my very life away.

50

But dreams—of those who dream as I,  
Aspiringly, are damned, and die :  
Yet should I swear I mean alone,  
By notes so very shrilly blown,  
To break upon Time's monotone,  
While yet my vapid joy and grief  
Are tintless of the yellow leaf—  
Why not an imp the greybeard hath,  
Will shake his shadow in my path—  
And even the greybeard will o'erlook  
Connivingly my dreaming-book.

60

## FAIRY-LAND

[*Poems by Edgar A. Poe, 1831.*]

SIT down beside me, Isabel,  
*Here*, dearest, where the moonbeam fell  
 Just now so fairy-like and well.  
*Now* thou art dress'd for paradise !  
 I am star-stricken with thine eyes !  
 My soul is lolling on thy sighs !  
 Thy hair is lifted by the moon  
 Like flowers by the low breath of June !  
 Sit down, sit down—how came we here ?  
 Or is it all but a dream, my dear ?

10

You know that most enormous flower—  
 That rose—that what d'ye call it—that hung  
 Up like a dog-star in this bower—  
 To-day (the wind blew, and) it swung  
 So impudently in my face,  
 So like a thing alive you know,  
 I tore it from its pride of place  
 And shook it into pieces—so  
 Be all ingratitude requited.  
 The winds ran off with it delighted,  
 And, thro' the opening left, as soon  
 As she threw off her cloak, yon moon  
 Has sent a ray down with a tune.

20

And this ray is a *fairy* ray—  
 Did you not say so, Isabel ?  
 How fantastically it fell  
 With a spiral twist and swell,  
 And over the wet grass rippled away  
 With a tinkling like a bell !  
 In my own country all the way  
 We can discover a moon ray  
 Which thro' some tattered curtain pries  
 Into the darkness of a room,  
 Is by (the very source of gloom)

30

The moats, and dust, and flies,  
 On which it trembles and lies  
 Like joy upon sorrow !  
 O, *when* will come the morrow ?  
 Isabel ! do you not fear  
 The night and the wonders here ? 40  
 Dim vales ! and shadowy floods !  
 And cloudy-looking woods  
 Whose forms we can't discover  
 For the tears that drip all over !

Huge moons—see ! wax and wane—  
 Again—again—again—  
 Every moment of the night—  
 Forever changing places !  
 How they put out the starlight  
 With the breath from their pale faces ! 50

Lo ! one is coming down  
 With its centre on the crown  
 Of a mountain's eminence !  
 Down—still down—and down—  
 Now deep shall be—O deep !  
 The passion of our sleep !  
 For that wide circumference  
 In easy drapery falls  
 Drowsily over halls—  
 Over ruin'd walls— 60  
 Over waterfalls,  
 O'er the strange words—o'er the sea—  
 Alas ! over the sea !

## THE LAKE

[*Tamerlane and other Poems*, 1827.]

In youth's spring it was my lot  
 To haunt of the wide earth a spot  
 The which I could not love the less ;  
 So lovely was the loneliness  
 Of a wild lake, with black rock bound,  
 And the tall pines that tower'd around.

But when the night had thrown her pall  
 Upon that spot—as upon all,  
 And the wind would pass me by  
 In its stilly melody, 10  
 My infant spirit would awake  
 To the terror of the lone lake.  
 Yet that terror was not fright—  
 But a tremulous delight,  
 And a feeling undefined,  
 Springing from a darken'd mind.  
 Death was in that poison'd wave  
 And in its gulf a fitting grave  
 For him who thence could solace bring  
 To his dark imagining ; 20  
 Whose wildering thought could even make  
 An Eden of that dim lake.

### THE BELLS—A SONG

[First Draft, 1848. Published in *Sartain's Union Magazine*, Dec. 1849.]

THE Bells !—hear the bells !  
 The merry wedding bells !  
 The little silver bells !  
 How fairy-like a melody there swells  
 From the silver tinkling cells  
 Of the bells, bells, bells !  
 Of the bells !

The Bells !—ah, the bells !  
 The heavy iron bells !  
 Hear the tolling of the bells ! 1  
 Hear the knells !  
 How horrible a monody there floats  
 From their throats—  
 From their deep-toned throats !  
 How I shudder at the notes  
 From the melancholy throats  
 Of the bells, bells, bells !  
 Of the bells !

## NOTE

The editor of *Sartain's Union Magazine* published 'The Bells', as we now have it, in November 1849; and the following month printed, as a literary curiosity, this 'First Draft' which, he says, 'came into our possession about a year since'.

'Poe wrote the first rough draft of "The Bells" at Mrs. Shew's residence. "One day he came in," she records,<sup>1</sup> "and said, 'Marie Louise, I have to write a poem: I have no feeling, no sentiment, no inspiration!' " His hostess persuaded him to have some tea. It was served in the conservatory, the windows of which were open, and admitted the sound of neighbouring church bells. Mrs. Shew said, playfully, "Here is paper"; but the poet, declining it, declared, "I so dislike the noise of bells to-night, I cannot write. I have no subject—I am exhausted." The lady then took up the pen, and, pretending to mimic his style, wrote, "The Bells, by E. A. Poe"; and then, in pure sportiveness, "The Bells, the little silver Bells", Poe finishing off the stanza. She then suggested for the next verse, "The heavy iron Bells"; and this Poe also expanded into a stanza. He next copied out the complete poem, and headed it, "By Mrs. M. L. Shew", remarking that it was her poem, as she had suggested and composed so much of it. Mrs. Shew continues, "My brother came in, and I sent him to Mrs. Clemm to tell her that 'her boy would stay in town, and was well'. My brother took Mr. Poe to his own room, where he slept twelve hours, and could hardly recall the evening's work."—*Edgar Allan Poe, his Life, Letters, and Opinions*, by John H. Ingram 1880, vol. ii, pp. 155, 156.

## TO — — —

[Manuscript variation, entitled 'To Marie Louise'.]

Not long ago the writer of these lines,  
 In the mad pride of intellectuality,  
 Maintained 'the power of words'—denied that ever  
 A thought arose within the human brain  
 Beyond the utterance of the human tongue :  
 And now, as if in mockery of that boast  
 Two words—two foreign soft dissyllables—  
 Two gentle sounds made only to be murmured  
 By angels dreaming in the moon-lit dew  
 That hangs like chains of pearl on Hermon-hill      10  
 Have stirred from out the abysses of his heart  
 Unthought-like thoughts—scarcely the shades of thought—

<sup>1</sup> In her 'Diary'.

Bewildering fantasies—far richer visions  
 Than ever the seraph harper, Israfil,  
 Who 'had the sweetest voice of all God's creatures',  
 Would hope to utter. Ah, Marie Louise!  
 In deep humility I own that now  
 All pride—all thought of power—all hope of fame—  
 All wish for Heaven—is merged for evermore  
 Beneath the palpitating tide of passion 20  
 Heaped o'er my soul by thee. Its spells are broken—  
 The pen falls powerless from my shivering hand—  
 With that dear name as text I *cannot* write—  
 I cannot speak—I cannot even think—  
 Alas! I cannot feel; for 'tis *not* feeling—  
 This standing motionless upon the golden  
 Threshold of the wide-open gate of Dreams,  
 Gazing, entranced, adown the gorgeous vista,  
 And thrilling as I see upon the right—  
 Upon the left—and all the way along, 30  
 Amid the clouds of glory: far away  
 To where the prospect terminates—*thee only*.

### A DREAM WITHIN A DREAM

[*Tamerlane and other Poems*, 1827. Here called 'Imitation'.]

A DARK unfathom'd tide  
 Of interminable pride—  
 A mystery, and a dream,  
 Should my early life seem;  
 I say that dream was fraught  
 With a wild, and waking thought  
 Of beings that have been,  
 Which my spirit hath not seen,  
 Had I let them pass me by,  
 With a dreaming eye!  
 Let none of earth inherit  
 That vision on my spirit;  
 Those thoughts I would control,  
 As a spell upon his soul:  
 For that bright hope at last  
 And that light time have past,

And my worldly rest hath gone  
With a sigh as it pass'd on :  
I care not tho' it perish  
With a thought I then did cherish.

20

## A DREAM WITHIN A DREAM

[*Al Aaraaf, Tamerlane, and Minor Poems by Edgar A. Poe, 1829.*  
Here called 'To ——'.]

SHOULD my early life seem  
[As well it might] a dream—  
Yet I build no faith upon  
The king Napoleon—  
I look not up afar  
To my destiny in a star.

In parting from you now  
Thus much I will avow—  
There are beings, and have been  
Whom my spirit had not seen ;  
Had I let them pass me by  
With a dreaming eye—  
If my peace hath fled away  
In a night—or in a day—  
In a vision—or in none—  
Is it therefore the less gone ?

10

I am standing 'mid the roar  
Of a weather-beaten shore,  
And I hold within my hand  
Some particles of sand—  
How few ! and how they creep  
Thro' my fingers to the deep !  
My early hopes ? no—they  
Went gloriously away,  
Like lightning from the sky  
At once—and so will I.

20

So young ? Ah ! no—not now—  
Thou hast not seen my brow ;  
But they tell thee I am proud—  
They lie—they lie aloud—  
My bosom beats with shame  
At the paltriness of name  
With which they dare combine  
A feeling such as mine—  
Nor Stoic ? I am not :  
In the terror of my lot  
I laugh to think how poor  
That pleasure ‘ to endure ! ’  
What ! shade of Zeus !—I !  
Endure !—no—no—defy.

# BIBLIOGRAPHY

POE himself issued four volumes of Poetry :—

A.

TAMERLANE

AND

OTHER POEMS

BY A BOSTONIAN

Young heads are giddy and young hearts are warm  
And make mistakes for manhood to reform.—COWPER.

BOSTON

CALVIN F. S. THOMAS . . . PRINTER

1827

*Preface* :—The greater part of the poems which compose this little volume were written in the year 1821–2, when the author had not completed his fourteenth year. They were of course not intended for publication ; why they are now published concerns no one but himself. Of the smaller pieces very little need be said : they perhaps savour too much of egotism ; but they were written by one too young to have any knowledge of the world but from his own breast. In ‘Tamerlane’ he has endeavoured to expose the folly of even *risking* the best feelings of the heart at the shrine of Ambition. He is conscious that in this there are many faults (besides that of the general character of the poem), which he flatters himself he could, with little trouble, have corrected, but unlike many of his predecessors, has been too fond of his early productions to amend them in his *old age*.

He will not say that he is indifferent as to the success of these Poems—it might stimulate him to other attempts—but he can safely say that failure will not influence him in a resolution already adopted. This is challenging criticism—let it be so. *Nos haec novimus esse nihil.*

Tamerlane.

CONTENTS

Fugitive Pieces.

To ———.

Dreams.

Visit of the Dead.

Evening Star.

Imitation.

Communion with nature.<sup>1</sup>

‘A wilder’d being from my birth.’

‘The happiest day—the happiest hour.’

The Lake.

Author’s Notes [To *Tamerlane*].

<sup>1</sup> Printed in our edition under the title ‘Stanzas’.

This little volume (measuring  $6\frac{3}{8}$  by  $4\frac{1}{8}$  inches) was issued as a pamphlet in yellow covers, and occupied no more than forty pages. Only three copies are known to be extant. It was reprinted, in 1884, with corrections of obvious misprints, by Mr. R. H. Shepherd.

The closing words of the Preface (from Martial) also appeared on the title-page of *Poems by Two Brothers* (now identified as Alfred, Charles, and Frederick Tennyson) which appeared in the same year.

## LETTER TO MR.—

WEST POINT,—1831.

DEAR B—,

Believing only a portion of my former volume to be worthy of a second edition—that small portion I thought it as well to include in the present book as to republish by itself. I have, therefore, herein combined ' Al Aaraaf ' and ' Tamerlane ' with other Poems hitherto unprinted. Nor have I hesitated to insert from the ' Minor Poems ' now omitted whole lines, and even passages, to the end that, being placed in a fairer light, and the trash shaken from them in which they were imbedded, they may have some chance of being seen by posterity.

It has been said, that a good critique on a poem may be written by one who is no poet himself. This, according to *your* idea and *mine* of poetry, I feel to be false—the less poetical the critic, the less

just the critique, and the converse. On this account, and because there are but few B——s in the world, I would be as much ashamed of the world's good opinion as proud of your own. Another than yourself might here observe, 'Shakespeare is in possession of the world's good opinion, and yet Shakespeare is the greatest of poets. It appears then that the world judge correctly; why should you be ashamed of their favourable judgment?' The difficulty lies in the interpretation of the word 'judgment' or 'opinion'. The opinion is the world's, truly, but it may be called theirs as a man would call a book his, having bought it: he did not write the book, but it is his; they did not originate the opinion, but it is theirs. A fool, for example, thinks Shakespeare a great poet—yet the fool has never read Shakespeare. But the fool's neighbour, who is a step higher on the Andes of the mind, whose head (that is to say, his more exalted thought) is too far above the fool to be seen or understood, but whose feet (by which I mean his everyday actions) are sufficiently near to be discerned, and by means of which that superiority is ascertained, which *but* for them would never have been discovered—this neighbour asserts that Shakespeare is a great poet—the fool believes him, and it is henceforward his *opinion*. This neighbour's own opinion has, in like manner, been adopted from one above *him*, and so, ascendingly, to a few gifted individuals, who kneel around the summit, beholding, face to face, the master spirit who stands upon the pinnacle.

You are aware of the great barrier in the path of an American writer. He is read, if at all, in preference to the combined and established wit of the world. I say established: for it is with literature as with law or empire—an established name is an estate in tenure, or a throne in possession. Besides, one might suppose that books, like their authors, improve by travel—their having crossed the sea is, with us, so great a distinction. Our antiquaries abandon time for distance: our very fops glance from the binding to the bottom of the title-page, where the mystic characters which spell London, Paris, or Geneva, are precisely so many letters of recommendation.

I mentioned just now a vulgar error as regards criticism. I think the notion that no poet can form a correct estimate of his own writings is another. I remarked before, that in proportion to the poetical talent would be the justice of a critique upon poetry. Therefore, a bad poet would, I grant, make a false critique, and his self-love would infallibly bias his little judgment in his favour; but a poet, who is indeed a poet, could not, I think, fail of making a just critique. Whatever should be deducted on the score of self-love, might be replaced on account of his intimate acquaintance with the subject; in short, we have more instances of false criticism, than of just, where one's own writings are the test, simply because we have more bad poets than good. There are of course many

objections to what I say : Milton is a great example of the contrary ; but his opinion with respect to the ' Paradise Regained ' is by no means fairly ascertained. By what trivial circumstances men are often led to assert what they do not really believe ! Perhaps an inadvertent word has descended to posterity. But, in fact, the ' Paradise Regained ' is little, if at all, inferior to the ' Paradise Lost ', and is only supposed so to be, because men do not like epics, whatever they may say to the contrary, and reading those of Milton in their natural order, are too much wearied with the first to derive any pleasure from the second.

I dare say Milton preferred ' Comus ' to either—if so, justly.

As I am speaking of poetry, it will not be amiss to touch slightly upon the most singular heresy in its modern history—the heresy of what is called, very foolishly, the ' Lake School '. Some years ago I might have been induced, by an occasion like the present, to attempt a formal refutation of their doctrine ; at present it would be a work of supererogation. The wise must bow to the wisdom of such men as Coleridge and Southey, but being wise, have laughed at poetical theories so prosaically exemplified.

Aristotle, with singular assurance, has declared poetry the most philosophical of all writing<sup>1</sup>—but it required a Wordsworth to pronounce it most metaphysical. He seems to think that the end of poetry is, or should be, instruction—yet it is a truism that the end of our existence is happiness ; if so, the end of every separate part of our existence—everything connected with our existence—should be still happiness. Therefore the end of instruction should be happiness ; and happiness is another name for pleasure ;—therefore the end of instruction should be pleasure ; yet we see the above-mentioned opinion implies precisely the reverse.

To proceed : *Cæteris paribus*, he who pleases is of more importance to his fellow men than he who instructs, since utility is happiness, and pleasure is the end already obtained which instruction is merely the means of obtaining.

I see no reason, then, why our metaphysical poets should plume themselves so much on the utility of their works, unless indeed they refer to instruction with eternity in view : in which case, sincere respect for their piety would not allow me to express my contempt for their judgment ; contempt which it would be difficult to conceal since their writings are professedly to be understood by the few, and it is the many who stand in need of salvation. In such case I should no doubt be tempted to think of the devil in Melmoth, who labours indefatigably through three octavo volumes to accomplish the destruction of one or two souls, while any common devil would have demolished one or two thousand.

Against the subtleties which would make poetry a study—not a passion—it becomes the metaphysician to reason, but the poet

<sup>1</sup> Σπουδαιότατον καὶ φιλοσοφικώτατον γένος.

to protest. Yet Wordsworth and Coleridge are men in years ; the one imbued in contemplation from childhood, the other a giant in intellect and learning. The diffidence, then, with which I venture to dispute their authority would be overwhelming, did not I feel, from the bottom of my heart, that learning has little to do with the imagination—intellect with the passions—or age with poetry.

Trifles, like straws, upon the surface flow ;  
He who would search for pearls must dive below,

are lines which have done much mischief. As regards the greater truths, men oftener err by seeking them at the bottom than at the top ; the depth lies in the huge abysses where wisdom is sought—not in the palpable palaces where she is found. The ancients were not always right in hiding the goddess in a well ; witness the light which Bacon has thrown upon philosophy : witness the principles of our divine faith—that moral mechanism by which the simplicity of a child may overbalance the wisdom of a man.

Poetry, above all things, is a beautiful painting whose tints, to minute inspection, are confusion worse confounded, but start boldly out to the cursory glance of the connoisseur.

We see an instance of Coleridge's liability to err in his ' *Biographia Literaria* '—professedly his literary life and opinions, but, in fact, a treatise *de omni scibili et quibusdam aliis*. He goes wrong by reason of his very profundity, and of his error we have a natural type in the contemplation of a star. He who regards it directly and intensely sees, it is true, the star, but it is the star without a ray—while he who surveys it less inquisitively is conscious of all for which the star is useful to us below—its brilliance and its beauty.

As to Wordsworth, I have no faith in him. That he had, in youth, the feelings of a poet, I believe—for there are glimpses of extreme delicacy in his writings (and delicacy is the poet's own kingdom—his *el dorado*)—but they have the appearance of a better day recollected ; and glimpses, at best, are little evidence of present poetic fire—we know that a few straggling flowers spring up daily in the crevices of the avalanche.

He was to blame in wearing away his youth in contemplation with the end of poetizing in his manhood. With the increase of his judgment, the light which should make it apparent has faded away. His judgment consequently is too correct. This may not be understood, but the old Goths of Germany would have understood it, who used to debate matters of importance to their State twice, once when drunk, and once when sober—sober that they might not be deficient in formality—drunk lest they should be destitute of vigour.

The long wordy discussions by which he tries to reason us into admiration of his poetry, speak very little in his favour. They are full of such assertions as this (I have opened one of his volumes

at random) : ' Of genius the only proof is the act of doing well what is worthy to be done, and what was never done before.' Indeed ! then it follows that in doing what is *unworthy* to be done, or what *has* been done before, no genius can be evinced : yet the picking of pockets is an unworthy act, pockets have been picked time immemorial, and Barrington, the pickpocket, in point of genius would have thought hard of a comparison with William Wordsworth, the poet.

Again—in estimating the merit of certain poems, whether they be Ossian's or M'Pherson's, can surely be of little consequence, yet, in order to prove their worthlessness, Mr. W. has expended many pages in the controversy. *Tantæne animis ?* Can great minds descend to such absurdity ? But worse still : that he may beat down every argument in favour of these poems, he triumphantly drags forward a passage, in his abomination of which he expects the reader to sympathize. It is the beginning of the epic poem, ' Temora '. ' The blue waves of Ullin roll in light ; the green hills are covered with day ; trees shake their dusky heads in the breeze.' And this—this gorgeous, yet simple imagery—where all is alive and panting with immortality—than which earth has nothing more grand, nor paradise more beautiful—this—William Wordsworth, the author of ' Peter Bell', has *selected* to dignify with his supreme contempt. We shall see what better he, in his own person, has to offer. *Imprimis* :

And now she's at the pony's head,  
And now she's at the pony's tail,  
On that side now, and now on this,  
And almost stifled her with bliss—  
A few sad tears does Betty shed,  
She pats the pony, where or when  
She knows not, happy Betty Fry !  
O Johnny, never mind the Doctor !

Secondly :

The dew was falling fast, the—stars began to blink  
I heard a voice, it said—Drink, pretty creature, drink ;  
And looking o'er the edge, be—fore me I espied  
A snow-white mountain lamb with a—maiden at its side.  
No other sheep were near, the lamb was all alone,  
And by a slender cord was—tethered to a stone.

Now, we have no doubt this is all true ; we *will* believe it—indeed we will, Mr. W. Is it sympathy for the sheep you wish to excite ? I love a sheep from the bottom of my heart.

But there *are* occasions, dear B—, there are occasions when even Wordsworth is reasonable. Even Stamboul, it is said, shall have an end, and the most unlucky blunders must come to a conclusion. Here is an extract from his preface :—

'Those who have been accustomed to the phraseology of modern writers, if they persist in reading this book to a conclusion' (*impossible!*) 'will, no doubt, have to struggle with feelings of awkwardness' (ha! ha! ha!); 'they will look round for poetry' (ha! ha! ha! ha!), 'and will be induced to inquire by what species of courtesy these attempts have been permitted to assume that title.' Ha! ha! ha! ha! ha!

Yet let not Mr. W. despair, he has given immortality to a waggon and the bee, Sophocles has eternalized a sore toe, and dignified a tragedy with a chorus of turkeys.

Of Coleridge I cannot speak but with reverence. His towering intellect! his gigantic power! To use an author quoted by himself, 'J'ai trouvé souvent que la plupart des sectes ont raison dans une bonne partie de ce qu'elles avancent, mais non pas en ce qu'elles nient'; and, to employ his own language, he has imprisoned his own conceptions by the barrier he had erected against those of others. It is lamentable to think that such a mind should be buried in metaphysics, and, like the Nyctanthes, waste its perfume upon the night alone. In reading that man's poetry I tremble like one who stands upon a volcano, conscious, from the very darkness bursting from the crater, of the fire and the light that are weltering below.

What is Poetry? Poetry! That Proteus-like idea, with as many appellations as the nine-titled Corcyra! Give me, I demanded of a scholar some time ago, give me a definition of Poetry. 'Très volontiers'—and he proceeded to his library, brought me a Dr. Johnson, and overwhelmed me with a definition. Shade of the immortal Shakespeare! I imagined to myself the scowl of your spiritual eye upon the profanity of that scurrilous Ursa Major. Think of poetry, dear B——, think of poetry, and then think of—Dr. Samuel Johnson! Think of all that is airy and fairy-like, and then of all that is hideous and unwieldy: think of his huge bulk, the Elephant! and then—and then think of the Tempest—the Midsummer Night's Dream—Prospero—Oberon—and Titania!

A poem, in my opinion, is opposed to a work of science by having for its *immediate* object, pleasure, not truth: to romance, by having for its object an *indefinite* instead of a *definite* pleasure, being a poem only so far as this object is attained: romance presenting perceptible images with definite, poetry with *indefinite* sensations, to which end music is an *essential*, since the comprehension of sweet sound is our most indefinite conception. Music, when combined with a pleasurable idea, is poetry: music, without the idea, is simply music: the idea, without the music, is prose from its very definiteness.

What was meant by the invective against 'him who had no music in his soul'?

To sum up this long rigmarole, I have, dear B——, what you no

doubt perceive, for the metaphysical poets, *as* poets, the most sovereign contempt. That they have followers proves nothing—

No Indian prince has to his palace  
More followers than a thief to the gallows.

D.

THE RAVEN

AND

OTHER POEMS

BY

EDGAR A. POE

NEW YORK

WILEY AND PUTNAM, 161 BROADWAY

1845

A duodecimo volume of 91 pages, reprinted below.

For a few of Poe's Poems the magazine issues were apparently the earliest; but for these—and others—we are indebted to the labours of his literary executor R. W. Griswold who, whatever his faults of taste and judgment, did 'secure what Poe in his lifetime could never accomplish,—a tolerably complete collected edition of the tales, reviews, and poems'. It does not, however, include all now known, and printed below.

Its bore title:—

THE WORKS

OF THE LATE

EDGAR A. POE:

WITH

NOTICES OF HIS LIFE AND GENIUS

BY

N. P. WILLIS, J. R. LOWELL, AND R. W. GRISWOLD

IN TWO VOLUMES

NEW YORK

J. S. REDFIELD, CLINTON HALL

1850

[In the same year appeared *The Literati*: Some honest opinions about authorial merits and demerits, with occasional words of Personality. Together with marginalia, suggestions, and essays. By Edgar A. Poe, with a sketch of the author by Rufus Wilmot Griswold—Reprinted as Vol. iii. in a second edition of the *Works*, 1850.]

Griswold's work has formed the basis of the ordinary subsequent editions, and contained the poems on which its author's reputation was permanently established.

Besides the interesting essays by J. R. Lowell and N. P. Willis, with the editor's own spiteful memoir, it contained the following from Poe's step-mother, sufficiently indicating its scope and purpose, how executed we now know:—

### TO THE READER

The late Edgar Allan Poe, who was the husband of my only daughter, the son of my eldest brother, and more than a son to myself, in his long-continued and affectionate observance of every duty to me—under an impression that he might be called suddenly from the world, wrote (just before he left his home in Fordham, for the last time, on the 29th of June, 1849) requests that the Rev. Rufus W. Griswold should act as his literary executor, and superintend the publication of his works; and that N. P. Willis, Esq. should write such observations upon his life and character, as he might deem suitable to address to thinking men, in vindication of his memory.

These requests he made with less hesitation and with confidence that they would be fulfilled, from his knowledge of these gentlemen; and he many times expressed a gratification of such an opportunity of decidedly and unequivocally certifying his respect for the literary judgment and integrity of Mr. Griswold, with whom his personal relations, on account of some unhappy misunderstanding, had for years been interrupted.

In this edition of my son's works, which is published for my benefit, it is a great pleasure for me to thank Mr. Griswold and Mr. Willis for their prompt fulfilment of the wishes of the dying poet, in labours, which demanded much time and attention, and which they have performed without any other recompense than the happiness which rewards acts of duty and kindness. I add to these expressions of gratitude to them, my acknowledgement to J. R. Lowell, Esq. for his notices of Mr. Poe's genius and writings which are here published.

MARIA CLEMM.

*Date of Composition.*

(a) Statement, not supported by contemporary documents, by Dr. William Elliot Griffis in the *Home Journal*, November 5, 1884: That Poe mentioned a poem 'to be called *The Raven*' to a Mrs. Barhyte (herself a contributor to the *New York Mirror*) when he was staying at the Barhyte trout-ponds, Saratoga Springs, New York, in the summer of 1842, and showed that lady a draft of the poem during the following summer.

(b) Statement by Mr. Rosenbach in the *American*, February 26, 1887, referring to the winter of 1843-4: 'I read *The Raven* long before it was published, and was in Mr. George R. Graham's office when the poem was offered to him. Poe said that his wife and Mrs. Clemm were starving, and that he was in very pressing need of the money. I carried him fifteen dollars contributed by Mr. Graham, Mr. Godley, Mr. McMichel, and others, who condemned the poem, but gave the money as a charity.'

(c) Statement by F. G. Fairfield in *Scribner's Magazine*, October, 1875: 'Poe then occupied a cottage at Fordham—a kind of poet's nook, just out of hearing of the busy hum of the city. He had walked all the way from New York that afternoon, and, having taken a cup of tea, went out in the evening and wandered about for an hour or more. His beloved Virginia was sick almost unto death; he was without money to procure the necessary medicines. He was out till about ten o'clock. When he went in he sat at his writing-table and dashed off *The Raven*. He submitted it to Mrs. Clemm for her consideration the same night, and it was printed substantially as it was written.'

'This account of the origin of the poem was communicated to me in the fall of 1865, by a gentleman who professed to be indebted to Mrs. Clemm for the facts as he stated them; and in the course of a saunter in the south, in the summer of 1867, I took occasion to verify his story by an interview with that aged lady.'

'Let me now drop Mrs. Clemm's version for a paragraph to consider another, resting upon the testimony of Colonel du Solle, who was intimate with Poe at this period, and concurred in by other literary contemporaries, who used to meet him of a mid-day for a budget of gossip and a glass of ale at Sandy Welsh's cellar in Ann Street.'

'Du Solle says that the poem was produced stanza by stanza at small intervals, and submitted by Poe piecemeal to the criticism and emendation of his intimates, who suggested various alterations and substitutions. Poe adopted many of them. Du Solle quotes particular instances of phrases that were incorporated at his suggestion, and thus *The Raven* was a kind of joint-stock affair in which many minds held small shares of intellectual capital. At length, when the last stone had been placed in position and passed upon, the structure was voted complete.'

## THE VALLEY OF UNREST. (PAGE 20.)

Reading from *American Whig Review*, April 1845.

1. 19. *uneasily*] unceasingly. Insert after this line:—

They wave; they weep; and the tears as they well  
From the depths of each pallid lily-bell,  
Give a trickle and a tinkle and a knell.

See also *The Valley Nis* and notes thereon.

## BRIDAL BALLAD. (PAGE 20.)

Readings of the *Southern Literary Messenger*, January 1837.

1. 3. Insert after this :—

And many a rood of land.

11. 6, 7. Read :—

He has loved me long and well  
And, when he breathed his vow.

1. 9. *rang as a knell*] were his who fell

1. 10. Omit.

1. 18. Omit.

1. 19. Insert after this :—

And thus they said I plighted  
An irrevocable vow—  
And my friends are all delighted  
That his love I have requited—  
And my mind is much benighted  
If I am not happy now.

Lo ! the ring is on my hand,  
And the wreath is on my brow—  
Satins and jewels grand,  
And many a rood of land,  
Are all at my command,  
And I must be happy now.

11. 20-1. I have spoken, I have spoken  
They have registered the vow.1. 24. *Here is a ring, as*] Behold the golden ; also in ' 1845 '.1. 25. *I am*] *proves* me ; also in ' 1845 '.

## THE SLEEPER. (PAGE 21.)

Readings of the *Saturday Museum*, March 4, 1843, and of ' 1845 '.

1. 16. Insert after this line :—

Her casement open to the skies *S. M.* ; 1845.1. 19. *window*] lattice *S. M.*11. 20-1. Omit *S. M.*1. 44. *pale*] dim *S. M.* ; 1845.See also *Irene* and notes thereon.

## THE COLISEUM. (PAGE 23.)

Readings of the *Southern Literary Messenger*, August 1835.

1. 11. Insert after this line :—Gaunt vestibules and phantom-peopled

1. 20. *gilded*] yellow

1. 21. Insert after this line :—

Here where on ivory couch the Caesar sate  
On bed of moss lies gloating the foul adder.

1. 26. *But stay ! these*] These crumbling  
*ivy-clad*] tottering

- 1. 28. *crumbling*] broken
- 1. 31. *famed*] great
- 1. 36. *melody*] in old days
- 1. 39. *impotent*] desolate

## LENORE. (PAGE 24.)

In the 1845 text, verse 4 (the last) reads :—

Avaunt ! to-night my heart is light. No dirge will I upraise,  
But waft the angel on her flight with a Paean of old days !  
Let no bell toll !—lest her sweet soul, amid its hallowed mirth,  
Should catch the note, as it doth float—up from the damned Earth.  
To friends above, from fiends below, the indignant ghost is riven—  
From Hell unto a high estate far up within the Heaven—  
From grief and groan, to a golden throne, beside the King of Heaven.

## CATHOLIC HYMN. (PAGE 25.)

Readings of *Southern Literary Messenger*, April 1835, and of *Burton's Gentleman's Magazine*, November 1839 :—

Insert before the first line

Sancta Maria ! turn thine eyes  
Upon the sinner's sacrifice  
Of fervent prayer and humble love  
From thy holy throne above.

- 1. 5. *brightly*] gently
- 1. 6. *not a cloud obscured*] no storms were in
- 1. 8. *grace*] love
- 1. 9. *storms*] clouds
- 1. 10. *Darkly*] All

## ISRAFEL. (PAGE 26.)

The motto is taken from *Lalla Rookh*, by Tom Moore, who quotes Sale, *Preliminary Discourse*, iv. 71. Poe interpolated 'whose heart-strings are a lute'.

## DREAMLAND. (PAGE 27.)

The '1845' text has dews for *tears* in line 12. In *Graham's Magazine*, June 1844, the first six lines (with slight variations) are repeated at the end of verses 2 and 3.

- 1. 38. *Earth*] worms *G. M.*

## SONNET—TO ZANTE. (PAGE 29.)

Evidently suggested by Chateaubriand, who writes : ' Je souriais à ses noms d'Isola d'oro, de Fior di Levante. Ce nom de fleur me rappelle que l'hyacinthe étoit originaire de l'île de Zante, et que cette île reçut son nom de la plante qu'elle avoit portée.'

## THE CITY IN THE SEA. (PAGE 29.)

Readings of the *American Whig Review*, April 1845.

- 1. 3. Far off in a region unblest

1. 25. Around the mournful waters lie.  
 11. 28–35. Omit.  
 1. 36. *For no*] No murmuring  
 1. 41. *seas less hideously*] oceans not so sad  
 See also *The Doomed City* and notes thereon.

TO ONE IN PARADISE. (PAGE 31.)

In the *Spectator*, January 1, 1853, a correspondent printed a version of this poem from a manuscript which had been long in his possession. He attributed the poem to Tennyson and accused Poe of plagiarism. But on January 20 Tennyson himself wrote to correct the statement and to clear Poe.

Readings of the *Southern Literary Messenger*, July 1835 (where the poem is called *The Visionary*):—

1. 5. *with fairy fruits and]* around about with  
11. 7, 8. But the dream—it could not last  
And the star of Hope did rise.

1. 15. Ambition—all—is o'er  
1. 21. *days*] hours  
1. 23. *grey*] dark; also in '1845'.  
1. 26. *eternal*] Italian

Insert after this line:—

Alas ! for that accursed Time  
They bore thee o'er the billow,  
From love to titled age and crime  
And an unholy pillow—  
From me, and from our misty clime  
Where weeps the silver willow.

TO F—S S. O—D. (PAGE 32.)

Readings of *Southern Literary Messenger*, September 1835, and of *Burton's Gentleman's Magazine*, August 1839:—

1. 1. Eliza, let thy generous heart *S. L. M.*  
Fair maiden, let thy generous heart *B. G. M.*
1. 6. *grace, thy more than*] unassuming *S. L. M.* ; *B. G. M.*
1. 7. *Shall be an endless*] And truth shall be a *S. L. M.* Thy truth—  
shall be a *B. G. M.*
1. 8. Forever—and love a duty. *S. L. M.* ; *B. G. M.*

TO F—, (PAGE 33.)

Readings of *Southern Literary Messenger*, July 1835, where it is called *To Mary*, and of *Graham's Magazine*, March 1842, where it is called *To one Departed* :—

1. 1. Mary amid the cares—the woes *S. L. M.*  
For 'mid the earnest cares and woes *G. M.*
1. 2. *That crowd*] crowding *S. L. M.*
1. 3. *Drear*] Sad *S. L. M.*; *G. M.*
1. 7. *bland*] sweet *S. L. M.*

1. 8. *And thus*] Seraph *G. M.*  
 1. 11. Some lake beset as lake can be *S. L. M.*  
*throbbing far and free*] vexed as it may be *G. M.*

## SONNET—SILENCE. (PAGE 33.)

Readings of *Burton's Gentleman's Magazine*, April 1840.

1. 2. *which thus is*] life aptly  
 1. 3. *A*] The

## THE CONQUEROR WORM. (PAGE 34.)

Readings of *Graham's Magazine*, January 1843.

1. 3. *An angel*] A mystic  
 1. 13. *formless*] shadowy  
 1. 31. *seraphs*] the angels; and in '1845'.  
 1. 34. *quivering*] dying  
 1. 37. *angels*] seraphs. *pallid*] haggard

## THE HAUNTED PALACE. (PAGE 35.)

Readings of the *Baltimore Museum*, April 1839.

1. 4. *Radiant*] Snow-white  
 1. 17. *Wanderers*] All wanderers  
 1. 24. *ruler*] sovereign

## SCENES FROM POLITIAN. (PAGE 39.)

Readings of *Southern Literary Messenger*, December 1835 and January 1836 :—

1. 170. *This sacred*] A vow—a  
 1. 189. *Surely*] I live  
 1. 240. *eloquent*] voice—that  
 1. 246. *it*] that lattice  
 1. 285. *Believe me*] Baldazzar! Oh!  
 1. 305. *sob*] weep  
 1. 306. *mourn*] weep  
 1. 309. *turn here thine eyes*] and listen to me  
 1. 412. *Paradisal Hope*] hopes—give me to live  
 1. 449. *At the Vatican*] Insert after this line :—  
     If that we meet at all it were as well  
     That I should meet him in the Vatican—  
     In the Vatican—with the holy walls  
     Of the Vatican.  
 1. 463. *then at once*]—have at thee then  
 1. 467. *thy sacred*] hold off thy  
 1. 468. *indeed, I dare not*] I dare not, dare not  
 1. 470. Insert after this line :—

Exceeding well! thou dardest not fight with me.

1. 475. Insert after this line :—Thou dardest not.  
 1. 476. *my lord*] alas

1. 478. *the veriest*]—I am—a

1. 497. *thou liest*] By God  
indeed] now this

SONNET—TO SCIENCE. (PAGE 61.)

Readings of '1829' and of '1831':—

1. 1. *true*] meet 1829 ; 1831

1. 12. The gentle Naiad from her fountain flood, 1829

1. 14. *tamarind tree*] shrubbery 1831

AL AARAAF. (PAGE 61.)

In the 1831 text, the first fifteen lines are replaced by—

Mysterious star !  
Thou wert my dream  
All a long summer night—  
Be now my theme !  
By this clear stream,  
Of thee will I write ;  
Meantime from afar  
Bathe me in light !

Thy world has not the dross of ours,  
Yet all the beauty—all the flowers  
That list our love, or deck our bowers  
In dreamy gardens, where do lie  
Dreamy maidens all the day,  
While the silver wings of Circassy  
On violet couches faint away.

Little—oh ! little dwells in thee  
Like unto what on Earth we see :  
Beauty's eye is here the bluest  
In the falsest and untruest—  
On the sweetest air doth float  
The most sad and solemn note—  
If with thee be broken hearts,  
Joy so peacefully departs,  
That its echo still doth dwell,  
Like the murmur in the shell.  
Thou ! thy truest type of grief  
Is the gently falling leaf—  
Thou ! thy framing is so holy  
Sorrow is not melancholy.

Other Readings of '1829' and '1831':—

1. 11. *Oh,*] With 1829

1. 19. *An oasis*] A garden-spot 1829 ; 1831

1. 43. *reared*] rear 1831

1. 95. Omit *red* 1831

1. 128. *All*] Here 1829 ; 1831

1. 191. *peerèd*] ventured 1829

1. 257. *lead*] *hang* 1829 ; 1831

1. 355. *the orb of Earth*] one constant star 1829 ; 1831

1. 371. *he*] *it* 1829 ; 1831

### TAMERLANE. (PAGE 75.)

Poe's 'Notes' to the Poem not reprinted in 1845 are given below with '1827' text.

Readings of 1831 :—

1. 3. *deem*] *think*

1. 26. Insert after this line :—

Despair, the fabled vampire-bat,  
Hath long upon my bosom sat,  
And I would rave, but that he flings  
A calm from his unearthly wings.

1. 30. Omit *fierce*

1. 57. Was giant-like—so thou my mind

1. 73. *this iron heart*] that as infinite

1. 74. My soul—so was the weakness in it.

Insert after the above line :—

For in those days it was my lot  
To haunt of the wide world a spot  
The which I could not love the less.  
So lovely was the loneliness  
Of a wild lake with black rock bound,  
And the sultan-like pines that tower'd around !  
But when the night had thrown her pall  
Upon that spot as upon all,  
And the black wind murmur'd by,  
In a dirge of melody ;  
My infant spirit would awake  
To the terror of that lone lake.  
Yet that terror was not fright—  
But a tremulous delight—  
A feeling not the jewell'd mine  
Could ever bribe me to define,  
Nor love, Ada ! tho' it were thine.  
How could I from that water bring  
Solace to my imagining ?  
My solitary soul—how make  
An Eden of that dim lake ?

But then a gentler, calmer spell  
Like moonlight on my spirit fell,  
But O ! I have no words to tell.

1. 106. *throw me on her throbbing*] lean upon her gentle

11. 112–15. Omit these lines.

1. 119. *its joy—its little lot*] of pleasure or

1. 120. *That was new pleasure*] The good, the bad

11. 128–38. Omit these lines.

1. 151. *on her bright*] upon her

1. 152. *to become*] fitted for

11. 166-77. Say, holy father, breathes there yet  
A rebel or a Bajazet ?  
How now ! Why tremble, man of gloom,  
As if my words were the Simoom !  
Why do the people bow the knee,  
To the young Tamerlane—to me!

1. 202. *splendour*] beauty

11. 213-21. I reached my home—what home ? above  
My home, my hope—my early love  
Lonely, like me, the desert rose,  
Bow'd down with its own glory grows.

1. 235. *unpolluted*] undefiled

1. 243. Insert after this line :—

If my peace hath flown away  
In a night—or in a day—  
In a vision—or in none—  
Is it therefore, the less gone ?  
I was standing 'mid the roar  
Of a wind-beaten shore,  
And I held within my hand  
Some particles of sand—  
How bright ! and yet to creep  
Thro' my fingers to the deep !  
My early hopes ? no—they  
Went gloriously away,  
Like lightning from the sky—  
Why in the battle did not I ?

See also 1827 text and notes thereon.

#### A DREAM. (PAGE 82.)

Readings of ' 1827 ' :—

Insert before line 1 :—

A wilder'd being from my birth,  
My spirit spurn'd control,  
But now, abroad on the wide earth,  
Where wanderest thou, my soul ?

1. 13. *storm and*] misty

1. 14. *trembled from*] dimly shone

#### ROMANCE. (PAGE 82.)

In the Philadelphia *Saturday Museum*, March 4, 1843, line 14 reads :—

I scarcely have had time for cares.

See also *Introduction* and notes thereon.

#### FAIRY-LAND. (PAGE 83.)

See text of 1831 and notes thereon.

- 1. 12. *baubles*] trifles

## TO THE RIVER——. (PAGE 84.)

Readings of '1829', and of the Wilmer MS.:—

- 1. 2. *crystal, wandering*] labyrinth like 1829; *MS*
- 1. 10. *Her worshipper*] Thy pretty self *MS*.
- 1. 12. *deeply*] lightly *MS*.
- 1. 14. *Of her soul-searching*] The scrutiny of her, 1829; *MS*.

## THE LAKE—TO——. (PAGE 85.)

Compare *Tamerlane*, '1831'; and see also 1827 text and notes thereon.

## SONG. (PAGE 86.)

Readings of '1827', of '1829', and of the Wilmer MS.:—

- 1. 6. Of young passion free 1827
- 1. 7. *aching*] chained 1827: fetter'd 1829
- 1. 8. *could*] might 1827
- 11. 5-8. Omit these lines *MS*.
- 1. 9. *perhaps*] I ween 1827

## TO HELEN. (PAGE 86.)

Readings of '1831' and of *Southern Literary Messenger*, March 1836:—

- 1. 9. *glory that was*] beauty of fair
- 1. 10. *that was*] of old
- 1. 11. *yon brilliant*] that little
- 1. 13. *agate lamp*] folded scroll

## ANNABEL LEE. (PAGE 90.)

The *Southern Literary Messenger*, November 1849, has 'side of the' for *sounding*, line 41.

## THE BELLS. (PAGE 91.)

See *The Bells* 'First Draft' and notes thereon.

## ULALUME. (PAGE 95.)

The *American Whig Review*, December 1847, prints this, with some very slight variations, and an additional (tenth) verse:—

Said *we*, then—the two, then—'Ah, can it  
 Have been that the woodlandish ghouls  
 The pitiful, the merciless ghouls—  
 To bar up our way and to ban it  
 From the secret that lies in the wolds—  
 From the thing that lies hidden in those wolds—

Had drawn up the spectre of a planet  
 From the limbo of lunar souls  
 This sinfully scintillant planet  
 From the Hell of the planetary souls.'

TO HELEN. (PAGE 98.)

The *Union Magazine*, Nov. 1848, omits *O Heaven! . . . thee and me.*  
 11. 26-8.

TO ———. (PAGE 99.)

See *To Marie Louise*, p. 135.

A DREAM WITHIN A DREAM. (PAGE 103.)

See versions of 1827 and 1829, pp. 136-7.

SPIRITS OF THE DEAD: VISIT OF THE DEAD. (PAGE 107.)

1. 17. *fever*] Emendation by Mr. Shepherd, original has 'ferver'.

1. 24. *mist*] Mr. Ingram's substitution for 'wish'.

THE VALLEY OF UNREST: THE VALLEY NIS. (PAGE 108.)

Readings of *Southern Literary Messenger*, February 1836:—

1. 6. *Far away*] One and all, too

1. 24. *the*] tall

11. 27-46. Now each visitor shall confess  
 Nothing there is motionless:  
 Nothing save the airs that brood  
 O'er the enchanted solitude,  
 Save the airs with pinions furled  
 That slumber o'er that valley-world.  
 No wind in Heaven, and lo! the trees  
 Do roll like seas, in Northern breeze,  
 Around the stormy Hebrides—  
 No wind in Heaven, and clouds do fly,  
 Rustling everlastingly,  
 Through the terror-stricken sky,  
 Rolling, like a waterfall,  
 O'er the horizon's fiery wall—  
 And Helen, like thy human eye,  
 Low crouched on earth, some violets lie,  
 And, nearer Heaven, some lilies wave  
 All banner like, above a *grave*.  
 And one by one, from out their tops  
 Eternal dews come down in drops,  
 Ah, one by one, from off their stems  
 Eternal dews come down in gems!

THE SLEEPER: IRENE. (PAGE 109.)

Readings of the *Southern Literary Messenger*, May 1836:—

11. 1-2. I stand beneath the soaring moon  
 At midnight in the month of June.

11. 3-8. Omit.

1. 18. *bright pines*] cedars

1. 20. *reels with bliss*] nodding hangs

1. 21. Above yon cataract of Serangs.

1. 25.           And hark the sounds so low yet clear  
                  (Like music of another sphere)  
                  Which steal within the slumberer's ear  
                  Or so appear—or so appear !

11. 37-40.    That o'er the floor, and down the wall,  
                  Like ghosts the shadows rise and fall—  
                  Then for thine own all radiant sake,  
                  Lady, awake ! awake ! awake

11. 41-59. Omit.

#### LENORE : A PAEAN. (PAGE 111.)

Readings of *Southern Literary Messenger*, January 1836 :—

1. 8. *Dead*] Her

1. 26. *perfum'd there*] motionless

1. 28. *her hair*] each tress

11. 29-32. Omit these lines.

11. 33-4.           In June she died—in June  
                           Of life—beloved, and fair

1. 38. *Thy life and love are*] Helen, thy soul is

1. 39. *untainted*] all-hallowed

#### ISRAFEL : 1831 TEXT. (PAGE 114.)

Readings of *Southern Literary Messenger*, August 1836, and of *Graham's Magazine*, October 1841 :—

1. 15. *owing to*] due unto *G. M.*

1. 21. Omit *S. L. M.* ; *G. M.*

1. 43. *While a stormier*] And a loftier *S. L. M.* ; *G. M.*

#### THE CITY IN THE SEA : THE DOOMED CITY. (PAGE 116.)

Readings of *Southern Literary Messenger*, August 1836 :—

The poem is here called 'The City of Sin'.

11. 14-19. Omit.

1. 20. No holy rays from heaven come down

1. 22. But light from out the lurid sea

1. 55. *Hell, rising*] All Hades

#### TAMERLANE : 1827 TEXT. (PAGE 117.)

Readings of the original text, treated as errata in 1884 reprint :—

1. 25. *hated*] hatred

1. 71. *sleep*] steep

1. 152. *Dwelt*] Dwell

1. 190. *were*] wore. Mr. Ingram.

1. 350. *too well*] to well. Mr. Ingram.

1. 371. *list*] lisp

Readings of Wilmer MS. :—

- l. 91. *breathing*] more than
  - l. 144. Such as I taught her from the time
  - ll. 150-2. There were no holier thoughts than thine
  - l. 164. *Which I felt not*] Unheeded then
  - ll. 182-8. Omit.
  - l. 189. *me at this time*] for now on me
  - l. 190. Truth flashes thro' eternity
  - l. 193. *knows*] feels
  - l. 219. *own fair*] magic
  - ll. 221-3.     Encircling with a glittering bound  
                  Of diamond sunshine and sweet spray  
                  Two mossy huts of the Taglay.
  - ll. 245-6.     The undying hope which now opprest  
                  A spirit ne'er to be at rest.
  - l. 247. *secret*] silent
  - l. 250. *led*] thrown
  - l. 251. *Astray from reason*] Her mantle over
  - l. 252. *Ambition*] Lion Ambition : omit *nor fed*
- Insert after this line :—

And crouches to a keeper's hand.

- l. 254. *beautiful*] terrible
- l. 332. *proudly*] nobly
- l. 334. *earth hath seen*] people saw
- ll. 335-7. Striding o'er empires haughtily,  
                  A diademed outlaw  
                  More than the Zinghis in his fame.
- l. 338. *what*] even
- l. 342. *the dying*] their parting
- l. 346. *Nothing have I*] And I have naught

#### A ROMANCE : INTRODUCTION. (PAGE 130.)

Readings of '1829' :—

- ll. 11-34. Omit.

          One, more *filmy* than the rest  
          [A sort which, upon trial,  
          They have found to be the best]  
          Comes down—still down—and down.

11. 54-63. While its wide circumference  
 In easy drapery falls  
 Over hamlets, and rich halls,  
 Wherever they may be—  
 O'er the strange woods—o'er the sea  
 Over spirits on the wing—  
 Over every drowsy thing—  
 And buries them up quite  
 In a labyrinth of light—  
 And then, how deep! O! deep!  
 Is the passion of their sleep!  
 In the morning they arise,  
 And their moony covering  
 Is soaring in the skies,  
 With the tempests as they toss,  
 Like—almost anything—  
 Or a yellow Albatross.

They use that moon no more  
 For the same end as before—  
 Videlicet a tent—  
 Which I think extravagant:  
 Its atomies, however,  
 Into a shower dis sever,  
 Of which those butterflies,  
 Of Earth, who seek the skies  
 And so come down again  
 [The unbelieving things!]  
 Have brought a specimen  
 Upon their quivering wings.

Thou art sad, Castiglione . . . . .	39
Thou wast all that to me, love . . . . .	31
Thou wouldst be loved ?—then let thy heart . . . . .	32
Thy soul shall find itself alone . . . . .	9, 107
'Tis now (so sings the soaring moon) . . . . .	109
'Twas noontide of summer . . . . .	7
Type of the antique Rome ! Rich reliquary . . . . .	23

# **THE POETIC PRINCIPLE**

## THE POETIC PRINCIPLE

IN speaking of the Poetic Principle, I have no design to be either thorough or profound. While discussing, very much at random, the essentiality of what we call Poetry, my principal purpose will be to cite for consideration, some few of those minor English or American poems which best suit my own taste, or which, upon my own fancy, have left the most definite impression. By 'minor poems' I mean, of course, poems of little length. And here, in the beginning, permit me to say a few words in regard to a somewhat peculiar principle, which, whether rightfully or wrongfully, has always had its influence in my own critical estimate of the poem. I hold that a long poem does not exist. I maintain that the phrase, 'a long poem', is simply a flat contradiction in terms.

I need scarcely observe that a poem deserves its title only inasmuch as it excites, by elevating the soul. The value of the poem is in the ratio of this elevating excitement. But all excitements are, through a psychal necessity, transient. That degree of excitement which would entitle a poem to be so called at all, cannot be sustained throughout a composition of any great length. After the lapse of half an hour, at the very utmost, it flags—fails—a revulsion ensues—and then the poem is, in effect, and in fact, no longer such.

There are, no doubt, many who have found difficulty in reconciling the critical dictum that the 'Paradise Lost' is to be devoutly admired throughout, with the absolute impossibility of maintaining for it, during perusal, the amount of enthusiasm which that critical dictum would demand. This great work, in fact, is to be regarded as poetical, only when, losing sight of that vital requisite in all works of Art, Unity, we view it merely as a series of minor poems. If, to preserve its Unity—its totality of effect or impression—we read it (as would be necessary) at a single sitting, the result is but a constant alternation of excitement and depression. After a passage of what

we feel to be true poetry, there follows, inevitably, a passage of platitude which no critical prejudgment can force us to admire ; but if, upon completing the work, we read it again ; omitting the first book—that is to say, commencing with the second—we shall be surprised at now finding that admirable which we before condemned—that damnable which we had previously so much admired. It follows from all this that the ultimate, aggregate, or absolute effect of even the best epic under the sun, is a nullity :—and this is precisely the fact.

In regard to the *Iliad*, we have, if not positive proof, at least very good reason, for believing it intended as a series of lyrics ; but, granting the epic intention, I can say only that the work is based in an imperfect sense of Art. The modern epic is of the supposititious ancient model, but an inconsiderate and blindfold imitation. But the day of these artistic anomalies is over. If, at any time, any very long poem *were* popular in reality—which I doubt—it is at least clear that no very long poem will ever be popular again.

That the extent of a poetical work is, *ceteris paribus*, the measure of its merit, seems undoubtedly, when we thus state it, a proposition sufficiently absurd—yet we are indebted for it to the quarterly Reviews. Surely there can be nothing in mere *size*, abstractly considered—there can be nothing in mere *bulk*, so far as a volume is concerned, which has so continuously elicited admiration from these saturnine pamphlets ! A mountain, to be sure, by the mere sentiment of physical magnitude which it conveys *does* impress us with a sense of the sublime—but no man is impressed after *this* fashion by the material grandeur of even ‘The Columbiad’. Even the Quarterlies have not instructed us to be so impressed by it. *As yet*, they have not *insisted* on our estimating Lamartine by the cubic foot, or Pollock by the pound—but what else are we to *infer* from their continual prating about ‘sustained effort’ ? If, by ‘sustained effort’, any little gentleman has accomplished an epic, let us frankly commend him for the effort—if this indeed be a thing commendable,—but let us forbear praising the epic on the effort’s account. It is to be hoped that common-sense, in the time to come, will prefer deciding

upon a work of Art, rather by the impression it makes—by the effect it produces—than by the time it took to impress the effect, or by the amount of ‘sustained effort’ which had been found necessary in effecting the impression. The fact is, that perseverance is one thing and genius quite another—nor can all the Quarterlies in Christendom confound them. By-and-by, this proposition, with many which I have been just urging, will be received as self-evident. In the meantime, by being generally condemned as falsities, they will not be essentially damaged as truths.

On the other hand, it is clear that a poem may be improperly brief. Undue brevity degenerates into mere epigrammatism. A *very* short poem, while now and then producing a brilliant or vivid, never produces a profound or enduring, effect. There must be the steady pressing down of the stamp upon the wax. De Béranger has wrought innumerable things, pungent and spirit-stirring; but, in general, they have been too imponderous to stamp themselves deeply into the public attention; and thus, as so many feathers of fancy, have been blown aloft only to be whistled down the wind.

A remarkable instance of the effect of undue brevity in depressing a poem—in keeping it out of the popular view—is afforded by the following exquisite little Serenade :

I arise from dreams of thee  
In the first sweet sleep of night,  
When the winds are breathing low,  
And the stars are shining bright.  
I arise from dreams of thee,  
And a spirit in my feet  
Has led me—who knows how?—  
To thy chamber-window, sweet  
The wandering airs they faint  
On the dark, the silent stream—  
The champak odours fail  
Like sweet thoughts in a dream;  
The nightingale’s complaint,  
It dies upon her heart,  
As I must die on thine,  
Oh, beloved as thou art!  
Oh, lift me from the grass!  
I die, I faint, I fail!  
Let thy love in kisses rain  
On my lips and eyelids pale.

My cheek is cold and white, alas !  
 My heart beats loud and fast ;  
 Oh, press it close to thine again,  
 Where it will break at last !

Very few, perhaps, are familiar with these lines—yet no less a poet than Shelley is their author. Their warm, yet delicate and ethereal imagination will be appreciated by all—but by none so thoroughly as by him who has himself arisen from sweet dreams of one beloved, to bathe in the aromatic air of a southern midsummer night.

One of the finest poems by Willis—the very best, in my opinion, which he has ever written—has, no doubt, through this same defect of undue brevity, been kept back from its proper position, not less in the critical than in the popular view.

The shadows lay along Broadway,  
 'T was near the twilight-tide—  
 And slowly there a lady fair  
 Was walking in her pride.  
 Alone walk'd she ; but, viewlessly,  
 Walk'd spirits at her side.

Peace charm'd the street beneath her feet,  
 And Honour charm'd the air ;  
 And all astir looked kind on her,  
 And call'd her good as fair—  
 For all God ever gave to her,  
 She kept with chary care.

She kept with care her beauties rare  
 From lovers warm and true—  
 For her heart was cold to all but gold,  
 And the rich came not to woo—  
 But honoured well are charms to sell  
 If priests the selling do.

Now walking there was one more fair—  
 A slight girl, lily-pale ;  
 And she had unseen company  
 To make the spirit quail—  
 'Twixt Want and Scorn she walk'd forlorn.  
 And nothing could avail.

No mercy now can clear her brow  
 For this world's peace to pray ;  
 For, as love's wild prayer dissolved in air,  
 Her woman's heart gave way !—  
 But the sin forgiven by Christ in Heaven  
 By man is cursed away !

In this composition we find it difficult to recognize the Willis who has written so many mere 'verses of society'. The lines are not only richly ideal, but full of energy; while they breathe an earnestness—an evident sincerity of sentiment—for which we look in vain throughout all the other works of this author.

While the epic mania—while the idea that, to merit in poetry, prolixity is indispensable—has, for some years past, been gradually dying out of the public mind, by mere dint of its own absurdity, we find it succeeded by a heresy too palpably false to be long tolerated, but one which, in the brief period it has already endured, may be said to have accomplished more in the corruption of our Poetical Literature than all its other enemies combined. I allude to the heresy of 'The Didactic'. It has been assumed, tacitly and avowedly, directly and indirectly, that the ultimate object of all Poetry is Truth. Every poem, it is said, should inculcate a moral; and by this moral is the poetical merit of the work to be adjudged. We Americans especially have patronized this happy idea; and we Bostonians, very especially, have developed it in full. We have taken it into our heads that to write a poem simply for the poem's sake, and to acknowledge such to have been our design, would be to confess ourselves radically wanting in the true Poetic dignity and force:—but the simple fact is, that, would we but permit ourselves to look into our own souls, we should immediately there discover that under the sun there neither exists nor *can* exist any work more thoroughly dignified—more supremely noble than this very poem—this poem *per se*—this poem which is a poem and nothing more—this poem written solely for the poem's sake.

With as deep a reverence for the True as ever inspired the bosom of man, I would, nevertheless, limit, in some measure, its modes of inculcation. I would limit to enforce them. I would not enfeeble them by dissipation. The demands of Truth are severe. She has no sympathy with the myrtles. All *that* which is so indispensable in Song, is precisely all *that* with which *she* has nothing whatever to do. It is but making her a flaunting paradox, to wreath her in gems and flowers. In enforcing a truth, we need

severity rather than efflorescence of language. We must be simple, precise, terse. We must be cool, calm, unimpassioned. In a word, we must be in that mood which, as nearly as possible, is the exact converse of the poetical. *He* must be blind indeed who does not perceive the radical and chasmal differences between the truthful and the poetical modes of inculcation. He must be theory-mad beyond redemption who, in spite of these differences, shall still persist in attempting to reconcile the obstinate oils and waters of Poetry and Truth.

Dividing the world of mind into its three most immediately obvious distinctions, we have the Pure Intellect, Taste, and the Moral Sense. I place Taste in the middle, because it is just this position which, in the mind, it occupies. It holds intimate relations with either extreme; but from the Moral Sense is separated by so faint a difference that Aristotle has not hesitated to place some of its operations among the virtues themselves. Nevertheless, we find the *offices* of the trio marked with a sufficient distinction. Just as the intellect concerns itself with Truth, so Taste informs us of the Beautiful, while the Moral Sense is regardful of Duty. Of this latter, while Conscience teaches the obligation, and Reason the expediency, Taste contents herself with displaying the charms:—waging war upon Vice solely on the ground of her deformity—her disproportion—her animosity to the fitting, to the appropriate, to the harmonious—in a word, to Beauty.

An immortal instinct, deep within the spirit of man, is thus, plainly, a sense of the Beautiful. This it is which administers to his delight in the manifold forms, and sounds, and odours, and sentiments amid which he exists. And just as the lily is repeated in the lake, or the eyes of Amaryllis in the mirror, so is the mere oral or written repetition of these forms, and sounds, and colours, and odours, and sentiments, a duplicate source of delight. But this mere repetition is not poetry. He who shall simply sing, with however glowing enthusiasm, or with however vivid a truth of description, of the sights, and sounds, and odours, and colours, and sentiments, which greet *him* in common with all mankind—he, I say, has yet failed to prove his divine title. There is still a something in the

distance which he has been unable to attain. We have still a thirst unquenchable, to allay which he has not shown us the crystal springs. This thirst belongs to the immortality of Man. It is at once a consequence and an indication of his perennial existence. It is the desire of the moth for the star. It is no mere appreciation of the Beauty before us—but a wild effort to reach the Beauty above. Inspired by an ecstatic prescience of the glories beyond the grave, we struggle, by multiform combinations among the things and thoughts of Time, to attain a portion of that Loveliness whose very elements, perhaps, appertain to eternity alone. And thus when by Poetry—or when by Music, the most entrancing of the Poetic moods—we find ourselves melted into tears—we weep then—not as the Abbaté Gravia supposes—through excess of pleasure, but through a certain petulant, impatient sorrow at our inability to grasp *now*, wholly, here on earth, at once and forever, those divine and rapturous joys, of which *through* the poem, or *through* the music, we attain to but brief and indeterminate glimpses.

The struggle to apprehend the supernal Loveliness—this struggle, on the part of souls fittingly constituted—has given to the world all *that* which it (the world) has ever been enabled at once to understand and *to feel* as poetic.

The Poetic Sentiment, of course, may develop itself in various modes—in Painting, in Sculpture, in Architecture, in the Dance—very especially in Music,—and very peculiarly, and with a wide field, in the composition of the Landscape Garden. Our present theme, however, has regard only to its manifestation in words. And here let me speak briefly on the topic of rhythm. Contenting myself with the certainty that Music, in its various modes of metre, rhythm, and rhyme, is of so vast a moment in Poetry as never to be wisely rejected—is so vitally important an adjunct, that he is simply silly who declines its assistance, I will not now pause to maintain its absolute essentiality. It is in Music, perhaps, that the soul most nearly attains the great end for which, when inspired by the Poetic Sentiment, it struggles—the creation of supernal Beauty. It *may* be, indeed, that here this sublime end is,

now and then, attained *in fact*. We are often made to feel, with a shivering delight, that from an earthly harp are stricken notes which *cannot* have been unfamiliar to the angels. And thus there can be little doubt that in the union of Poetry with Music in its popular sense, we shall find the widest field for the Poetic development. The old Bards and Minnesingers had advantages which we do not possess—and Thomas Moore, singing his own songs, was, in the most legitimate manner, perfecting them as poems.

To recapitulate, then :—I would define, in brief, the Poetry of words as *The Rhythmical Creation of Beauty*. Its sole arbiter is Taste. With the Intellect or with the Conscience, it has only collateral relations. Unless incidentally, it has no concern whatever either with Duty or with Truth.

A few words, however, in explanation. *That* pleasure which is at once the most pure, the most elevating, and the most intense, is derived, I maintain, from the contemplation of the Beautiful. In the contemplation of Beauty we alone find it possible to attain that pleasurable elevation, or excitement, *of the soul*, which we recognize as the Poetic Sentiment, and which is so easily distinguished from Truth, which is the satisfaction of the Reason, or from Passion, which is the excitement of the Heart. I make Beauty, therefore,—using the word as inclusive of the sublime,—I make Beauty the province of the poem, simply because it is an obvious rule of Art that effects should be made to spring as directly as possible from their causes :—no one as yet having been weak enough to deny that the peculiar elevation in question is at least *most readily* attainable in the poem. It by no means follows, however, that the incitements of Passion, or the precepts of Duty, or even the lessons of Truth, may not be introduced into a poem, and with advantage ; for they may subserve, incidentally, in various ways, the general purposes of the work :—but the true artist will always contrive to tone them down in proper subjection to that *Beauty* which is the atmosphere and the real essence of the poem.

I cannot better introduce the few poems which I shall

present for your consideration, than by the citation of the Proem to Mr. Longfellow's 'Waif':

The day is done, and the darkness  
Falls from the wings of Night,  
As a feather is wafted downward  
From an Eagle in his flight.

I see the lights of the village  
Gleam through the rain and the mist,  
And a feeling of sadness comes o'er me,  
That my soul cannot resist ;

A feeling of sadness and longing,  
That is not akin to pain,  
And resembles sorrow only  
As the mist resembles the rain.

Come, read to me some poem,  
Some simple and heartfelt lay,  
That shall soothe this restless feeling,  
And banish the thoughts of day.

Not from the grand old masters,  
Not from the bards sublime,  
Whose distant footsteps echo  
Through the corridors of time.

For, like strains of martial music,  
Their mighty thoughts suggest  
Life's endless toil and endeavour ;  
And to-night I long for rest.

Read from some humbler poet,  
Whose songs gushed from his heart,  
As showers from the clouds of summer,  
Or tears from the eyelids start ;

Who through long days of labour,  
And nights devoid of ease,  
Still heard in his soul the music  
Of wonderful melodies.

Such songs have power to quiet  
The restless pulse of care,  
And come like the benediction  
That follows after prayer.

Then read from the treasured volume  
The poem of thy choice,  
And lend to the rhyme of the poet  
The beauty of thy voice.

And the night shall be filled with music,  
 And the cares, that infest the day,  
 Shall fold their tents, like the Arabs,  
 And as silently steal away.

With no great range of imagination, these lines have been justly admired for their delicacy of expression. Some of the images are very effective. Nothing can be better than—

- the bards sublime,  
 Whose distant footsteps echo  
 Through the corridors of time.

The idea of the last quatrain is also very effective. The poem, on the whole, however, is chiefly to be admired for the graceful *insouciance* of its metre, so well in accordance with the character of the sentiments, and especially for the *ease* of the general manner. This 'ease', or naturalness, in a literary style, it has long been the fashion to regard as ease in appearance alone—as a point of really difficult attainment. But not so—a natural manner is difficult only to him who should never meddle with it—to the unnatural. It is but the result of writing with the understanding, or with the instinct, that *the tone*, in composition, should always be that which the mass of mankind would adopt—and must perpetually vary, of course, with the occasion. The author who, after the fashion of the *North American Review*, should be, upon *all* occasions, merely 'quiet', must necessarily, upon *many* occasions, be simply silly, or stupid; and has no more right to be considered 'easy', or 'natural', than a Cockney exquisite, or than the sleeping Beauty in the wax-works.

Among the minor poems of Bryant, none has so much impressed me as the one which he entitles 'June'. I quote only a portion of it :

There, through the long, long summer hours,  
 The golden light should lie,  
 And thick, young herbs and groups of flowers  
 Stand in their beauty by.  
 The oriole should build and tell  
 The love-tale, close beside my cell;  
 The idle butterfly  
 Should rest him there, and there be heard  
 The housewife-bee and humming-bird.

And what, if cheerful shouts, at noon,  
Come, from the village sent,  
Or songs of maids, beneath the moon,  
With fairy laughter blent ?  
And what if, in the evening light,  
Betrothed lovers walk in sight  
Of my low monument ?  
I would the lovely scene around  
Might know no sadder sight nor sound.

I know that I no more should see  
The season's glorious show,  
Nor would its brightness shine for me,  
Nor its wild music flow ;  
But if, around my place of sleep,  
The friends I love should come to weep,  
They might not haste to go.  
Soft airs, and song, and light, and bloom  
Should keep them lingering by my tomb.

These to their soften'd hearts should bear  
The thought of what has been,  
And speak of one who cannot share  
The gladness of the scene ;  
Whose part in all the pomp that fills  
The circuit of the summer hills,  
Is—that his grave is green ;  
And deeply would their hearts rejoice  
To hear again his living voice.

The rhythmical flow, here, is even voluptuous—nothing could be more melodious. The poem has always affected me in a remarkable manner. The intense melancholy which seems to well up, perforce, to the surface of all the poet's cheerful sayings about his grave, we find thrilling us to the soul—while there is the truest poetic elevation in the thrill. The impression left is one of a pleasurable sadness. And if, in the remaining compositions which I shall introduce to you, there be more or less of a similar tone always apparent, let me remind you that (how or why we know not) this certain taint of sadness is inseparably connected with all the higher manifestations of true Beauty. It is, nevertheless,

A feeling of sadness and longing,  
That is not akin to pain,  
And resembles sorrow only  
As the mist resembles the rain.

The taint of which I speak is clearly perceptible even in a poem so full of brilliancy and spirit as the 'Health' of Edward C. Pinkney :

I fill this cup to one made up  
Of loveliness alone,  
A woman, of her gentle sex  
The seeming paragon ;  
To whom the better elements  
And kindly stars have given  
A form so fair, that, like the air,  
'T is less of earth than heaven.

Her every tone is music's own,  
Like those of morning birds,  
And something more than melody  
Dwells ever in her words :  
The coinage of her heart are they,  
And from her lips each flows  
As one may see the burden'd bee  
Forth issue from the rose.

Affections are as thoughts to her,  
The measures of her hours ;  
Her feelings have the fragrancy,  
The freshness of young flowers ;  
And lovely passions, changing oft,  
So fill her, she appears  
The image of themselves by turns,—  
The idol of past years !

Of her bright face one glance will trace  
A picture on the brain,  
And of her voice in echoing hearts  
A sound must long remain ;  
But memory, such as mine of her,  
So very much endears,

Will not be life's, but hers.

I fill this cup to one made up  
Of loveliness alone,  
A woman, of her gentle sex  
The seeming paragon—  
Her health ! and would on earth there stood  
Some more of such a frame,  
That life might be all poetry,  
And weariness a name.

It was the misfortune of Mr. Pinkney to have been born too far south. Had he been a New Englander, it is probable

that he would have been ranked as the first of American lyrists, by that magnanimous cabal which has so long controlled the destinies of American Letters, in conducting the thing called the *North American Review*. The poem just cited is especially beautiful ; but the poetic elevation which it induces, we must refer chiefly to our sympathy in the poet's enthusiasm. We pardon his hyperboles for the evident earnestness with which they are uttered.

It is by no means my design, however, to expatiate upon the *merits* of what I should read you. These will necessarily speak for themselves. Boccacini, in his 'Advertisements from Parnassus', tells us that Zoilus once presented Apollo a very caustic criticism upon a very admirable book—whereupon the god asked him for the beauties of the work. He replied that he only busied himself about the errors. On hearing this, Apollo, handing him a sack of unwinnowed wheat, bade him pick out *all the chaff* for his reward.

Now that fable answers very well as a hit at the critics—but I am by no means sure that the god was in the right. I am by no means certain that the true limits of the critical duty are not grossly misunderstood. Excellence, in a poem especially, may be considered in the light of an axiom, which need only be properly *put* to become self-evident. It is *not* excellence if it requires to be demonstrated as such :—and thus, to point out too particularly the merits of a work of Art, is to admit that they are *not* merits altogether.

Among the 'Melodies' of Thomas Moore, is one whose distinguished character as a poem proper seems to have been singularly left out of view. I allude to his lines beginning : 'Come, rest in this bosom.' The intense energy of their expression is not surpassed by anything in Byron. There are two of the lines in which a sentiment is conveyed that embodies the *all in all* of the divine passion of Love—a sentiment which, perhaps, has found its echo in more, and in more passionate, human hearts than any other single sentiment ever embodied in words :

Come, rest in this bosom, my own stricken deer,  
Though the herd have fled from thee, thy home is still here ;  
Here still is the smile that no cloud can o'ercast,  
And a heart and a hand all thy own to the last.

Oh ! what was love made for, if 't is not the same  
 Through joy and through torment, through glory and shame ?  
 I know not, I ask not, if guilt 's in that heart,  
 I but know that I love thee, whatever thou art.

Thou hast call'd me thy Angel in moments of bliss,  
 And thy Angel I 'll be, 'mid the horrors of this,—  
 Through the furnace, unshrinking, thy steps to pursue,  
 And shield thee, and save thee,—or perish there too !

It has been the fashion, of late days, to deny Moore Imagination, while granting him Fancy—a distinction originating with Coleridge—than whom no man more fully comprehended the great powers of Moore. The fact is, that the fancy of this poet so far predominates over all his other faculties, and over the fancy of all other men, as to have induced, very naturally, the idea that he is fanciful *only*. But never was there a greater mistake. Never was a grosser wrong done the fame of a true poet. In the compass of the English language I can call to mind no poem more profoundly, more weirdly *imaginative*, in the best sense, than the lines commencing : ' I would I were by that dim lake ', which are the composition of Thomas Moore. I regret that I am unable to remember them.

One of the noblest—and, speaking of Fancy, one of the most singularly fanciful—of modern poets, was Thomas Hood. His ' Fair Ines ' had always, for me, an inexpressible charm :—

Oh ! saw ye not fair Ines ?  
 She 's gone into the West,  
 To dazzle when the sun is down,  
 And rob the world of rest :  
 She took our daylight with her,  
 The smiles that we love best,  
 With morning blushes on her cheek,  
 And pearls upon her breast.

Oh ! turn again, fair Ines,  
 Before the fall of night,  
 For fear the moon should shine alone,  
 And stars unrivall'd bright ;  
 And blessed will the lover be  
 That walks beneath their light,  
 And breathes the love against thy cheek  
 I dare not even write !

Would I had been, fair Ines,  
That gallant cavalier,  
Who rode so gaily by thy side,  
And whisper'd thee so near !  
Were there no bonny dames at home,  
Or no true lovers here,  
That he should cross the seas to win  
The dearest of the dear ?

I saw thee, lovely Ines,  
Descend along the shore,  
With bands of noble gentlemen,  
And banners waved before ;  
And gentle youth and maidens gay,  
And snowy plumes they wore ;  
It would have been a beauteous dream,  
—If it had been no more !

Alas, alas, fair Ines !  
She went away with song,  
With Music waiting on her steps,  
And shoutings of the throng ;  
But some were sad and felt no mirth,  
But only Music's wrong,  
In sounds that sang Farewell, Farewell,  
To her you 've loved so long.

Farewell, farewell, fair Ines,  
That vessel never bore  
So fair a lady on its deck,  
Nor danced so light before.  
Alas for pleasure on the sea,  
And sorrow on the shore !  
The smile that blessed one lover's heart  
Has broken many more.

'The Haunted House', by the same author, is one of the truest poems ever written—one of the *truest*—one of the most unexceptionable—one of the most thoroughly artistic, both in its theme and in its execution. It is, moreover, powerfully ideal—imaginative. I regret that its length renders it unsuitable for the purposes of this Lecture. In place of it, permit me to offer the universally appreciated 'Bridge of Sighs'.

One more unfortunate,  
Weary of breath,  
Rashly importunate,  
Gone to her death !

Take her up tenderly,  
Lift her with care ;  
Fashion'd so slenderly,  
Young, and so fair !

Look at her garments  
Clinging like cerements ;  
Whilst the wave constantly  
Drips from her clothing ;  
Take her up instantly,  
Loving, not loathing.—

Touch her not scornfully ;  
Think of her mournfully,  
Gently and humanly ;  
Not of the stains of her,  
All that remains of her  
Now, is pure womanly.

Make no deep scrutiny  
Into her mutiny  
Rash and undutiful :  
Past all dishonour,  
Death has left on her  
Only the beautiful.

Still, for all slips of hers,  
One of Eve's family—  
Wipe those poor lips of hers  
Oozing so clammily.

Loop up her tresses  
Escaped from the comb,  
Her fair auburn tresses ;  
Whilst wonderment guesses  
Where was her home ?

Who was her father ?  
Who was her mother ?  
Had she a sister ?  
Had she a brother ?  
Or was there a dearer one  
Still, and a nearer one  
Yet, than all other ?

Alas ! for the rarity  
Of Christian charity  
Under the sun !  
Oh, it was pitiful !  
Near a whole city full,  
Home she had none.

Sisterly, brotherly,  
Fatherly, motherly  
Feelings had changed :  
Love, by harsh evidence  
Thrown from its eminence ;  
Even God's providence  
Seeming estranged.

Where the lamps quiver  
So far in the river,  
With many a light  
From window and casement,  
From garret to basement,  
She stood, with amazement,  
Houseless by night.

The bleak wind of March  
Made her tremble and shiver ;  
But not the dark arch,  
Or the black flowing river :  
Mad from life's history,  
Glad to death's mystery,  
Swift to be hurl'd—  
Anywhere, anywhere  
Out of the world !

In she plunged boldly,  
No matter how coldly  
The rough river ran,—  
Over the brink of it,  
Picture it—think of it,  
Dissolute man !  
Lave in it, drink of it  
Then, if you can !

Take her up tenderly,  
Lift her with care ;  
Fashion'd so slenderly,  
Young, and so fair !

Ere her limbs frigidly  
Stiffen too rigidly,  
Decently,—kindly,—  
Smooth, and compose them  
And her eyes, close them,  
Staring so blindly !

Dreadfully staring  
Through muddy impurity,  
As when with the daring  
Last look of despairing  
Fixed on futurity.

Perishing gloomily,  
 Spurred by contumely,  
 Cold inhumanity,  
 Burning insanity,  
 Into her rest.—  
 Cross her hands humbly,  
 As if praying dumbly,  
 Over her breast !

Owning her weakness,  
 Her evil behaviour,  
 And leaving, with meekness,  
 Her sins to her Saviour !

The vigour of this poem is no less remarkable than its pathos. The versification, although carrying the fanciful to the very verge of the fantastic, is nevertheless admirably adapted to the wild insanity which is the thesis of the poem.

Among the minor poems of Lord Byron, is one which has never received from the critics the praise which it undoubtedly deserves :

Though the day of my destiny's over,  
 And the star of my fate hath declined,  
 Thy soft heart refused to discover  
 The faults which so many could find ;  
 Though thy soul with my grief was acquainted  
 It shrunk not to share it with me,  
 And the love which my spirit hath painted  
 It never hath found but in *thee*.

Then when nature around me is smiling,  
 The last smile which answers to mine,  
 I do not believe it beguiling,  
 Because it reminds me of thine ;  
 And when winds are at war with the ocean,  
 As the breasts I believed in with me,  
 If their billows excite an emotion,  
 It is that they bear me from *thee*.

Though the rock of my last hope shivered,  
 And its fragments are sunk in the wave,  
 Though I feel that my soul is delivered  
 To pain—it shall not be its slave.  
 There is many a pang to pursue me ;  
 They may crush, but they shall not contemn ;  
 They may torture, but shall not subdue me ;  
 'T is of *thee* that I think—not of them.

Though human, thou didst not deceive me ;  
 Though woman, thou didst not forsake ;  
 Though loved, thou forebores to grieve me ;  
 Though slandered, thou never couldst shake  
 Though trusted, thou didst not disclaim me ;  
 Though parted, it was not to fly ;  
 Though watchful, 't was not to defame me  
 Nor mute, that the world might belie.  
 Yet I blame not the world, nor despise it,  
 Nor the war of the many with one—  
 If my soul was not fitted to prize it,  
 'T was folly not sooner to shun :  
 And if dearly that error hath cost me,  
 And more than I once could foresee,  
 I have found that whatever it lost me,  
 It could not deprive me of *thee*.  
 From the wreck of the past, which hath perished,  
 Thus much I at least may recall :  
 It hath taught me that which I most cherished  
 Deserved to be dearest of all.  
 In the desert a fountain is springing,  
 In the wide waste there still is a tree,  
 And a bird in the solitude singing,  
 Which speaks to my spirit of *thee*.

Although the rhythm, here, is one of the most difficult, the versification could scarcely be improved. No nobler *theme* ever engaged the pen of poet. It is the soul-elevating idea, that no man can consider himself entitled to complain of Fate while, in his adversity, he still retains the unwavering love of woman.

From Alfred Tennyson—although in perfect sincerity I regard him as the noblest poet that ever lived—I have left myself time to cite only a very brief specimen. I call him, and *think* him the noblest of poets—not because the impressions he produces are, at *all* times, the most profound—not because the poetical excitement which he induces is, at *all* times, the most intense—but because it *is*, at all times, the most ethereal—in other words, the most elevating and the most pure. No poet is so little of the earth, earthy. What I am about to read is from his last long poem, 'The Princess' :

Tears, idle tears, I know not what they mean,  
 Tears from the depth of some divine despair  
 Rise in the heart, and gather to the eyes,  
 In looking on the happy autumn-fields,  
 And thinking of the days that are no more.

Fresh as the first beam glittering on a sail  
 That brings our friends up from the underworld,  
 Sad as the last which reddens over one  
 That sinks with all we love below the verge ;  
 So sad, so fresh, the days that are no more.

Ah, sad and strange as in dark summer dawns  
 The earliest pipe of half-awaken'd birds  
 To dying ears, when unto dying eyes  
 The casement slowly grows a glimmering square ;  
 So sad, so strange, the days that are no more.

Dear as remember'd kisses after death,  
 And sweet as those by hopeless fancy feign'd  
 On lips that are for others ; deep as love,  
 Deep as first love, and wild with all regret ;  
 O Death in Life, the days that are no more !

Thus, although in a very cursory and imperfect manner, I have endeavoured to convey to you my conception of the Poetic Principle. It has been my purpose to suggest that, while this Principle itself is, strictly and simply, the Human Aspiration for Supernal Beauty, the manifestation of the Principle is always found in *an elevating excitement of the Soul*—quite independent of that passion which is the intoxication of the Heart—or of that Truth which is the satisfaction of the Reason. For, in regard to Passion, alas ! its tendency is to degrade, rather than to elevate the Soul. Love, on the contrary—Love—the true, the divine Eros—the Uranian, as distinguished from the Dionæan Venus—is unquestionably the purest and truest of all poetical themes. And in regard to Truth—if, to be sure, through the attainment of a truth, we are led to perceive a harmony where none was apparent before, we experience, at once, the true poetical effect—but this effect is referable to the harmony alone, and not in the least degree to the truth which merely served to render the harmony manifest.

We shall reach, however, more immediately a distinct conception of what the true Poetry is, by mere reference to a few of the simple elements which induce in the Poet himself the true poetical effect. He recognizes the ambrosia which nourishes his soul, in the bright orbs that shine in Heaven—in the volutes of the flower—in the clustering of low shrubberies—in the waving of the grain-fields—in the slanting of tall, Eastern trees—in the blue distance

of mountains—in the grouping of clouds—in the twinkling of half-hidden brooks—in the gleaming of silver rivers—in the repose of sequestered lakes—in the star-mirroring depths of lonely wells. He perceives it in the songs of birds—in the harp of Æolus—in the sighing of the night-wind—in the repining voice of the forest—in the surf that complains to the shore—in the fresh breath of the woods—in the scent of the violet—in the voluptuous perfume of the hyacinth—in the suggestive odour that comes to him, at eventide, from far-distant, undiscovered islands, over dim oceans, illimitable and unexplored. He owns it in all noble thoughts—in all unworldly motives—in all holy impulses—in all chivalrous, generous, and self-sacrificing deeds. He feels it in the beauty of woman—in the grace of her step—in the lustre of her eye—in the melody of her voice—in her soft laughter—in her sigh—in the harmony of the rustling of her robes. He deeply feels it in her winning endearments—in her burning enthusiasms—in her gentle charities—in her meek and devotional endurances—but above all—ah, far above all—he kneels to it—he worships it in the faith, in the purity, in the strength, in the altogether divine majesty—of her *love*.

Let me conclude by the recitation of yet another brief poem—one very different in character from any that I have before quoted. It is by Motherwell, and is called 'The Song of the Cavalier'. With our modern and altogether rational ideas of the absurdity and impiety of warfare, we are not precisely in that frame of mind best adapted to sympathize with the sentiments, and thus to appreciate the real excellence, of the poem. To do this fully, we must identify ourselves, in fancy, with the soul of the old cavalier.

Then mounte ! then mounte, brave gallants, all,  
 And don your helmes amaine :  
 Deathe's couriers, Fame and Honour, call  
 Us to the field againe.

No shrewish teares shall fill our eye  
 When the sword-hilt 's in our hand ;  
 Heart-whole we'll part and no whit sighe  
 For the fayrest of the land ;  
 Let piping swaine, and craven wight,  
 Thus weepe and puling crye,  
 Our business is like men to fight,  
 And hero-like to die !

**THE  
PHILOSOPHY OF COMPOSITION**

## THE PHILOSOPHY OF COMPOSITION

CHARLES DICKENS, in a note now lying before me, alluding to an examination I once made of the mechanism of 'Barnaby Rudge', says: 'By the way, are you aware that Godwin wrote his "Caleb Williams" backward? He first involved his hero in a web of difficulties, forming the second volume, and then, for the first, cast about him for some mode of accounting for what had been done.'

I cannot think this the *precise* mode of procedure on the part of Godwin—and indeed what he himself acknowledges is not altogether in accordance with Mr. Dickens' idea; but the author of 'Caleb Williams' was too good an artist not to perceive the advantage derivable from at least a somewhat similar process. Nothing is more clear than that every plot, worth the name, must be elaborated to its *dénouement* before anything be attempted with the pen. It is only with the *dénouement* constantly in view that we can give a plot its indispensable air of consequence, or causation, by making the incidents, and especially the tone at all points, tend to the development of the intention.

There is a radical error, I think, in the usual mode of constructing a story. Either history affords a thesis—or one is suggested by an incident of the day—or, at best, the author sets himself to work in the combination of striking events to form merely the basis of his narrative—designing, generally, to fill in with description, dialogue, or authorial comment, whatever crevices of fact, or action, may, from page to page, render themselves apparent.

I prefer commencing with the consideration of an *effect*. Keeping originality *always* in view—for he is false to himself who ventures to dispense with so obvious and so easily attainable a source of interest—I say to myself, in the first place: 'Of the innumerable effects, or impressions, of which the heart, the intellect, or (more generally) the soul is susceptible, what one shall I, on the present occasion, select?' Having chosen a novel, first, and secondly a

vivid effect, I consider whether it can be best wrought by incident or tone—whether by ordinary incidents and peculiar tone, or the converse, or by peculiarity both of incident and tone—afterward looking about me (or rather within) for such combinations of event, or tone, as shall best aid me in the construction of the effect.

I have often thought how interesting a magazine paper might be written by any author who would—that is to say, who could—detail, step by step, the processes by which any one of his compositions attained its ultimate point of completion. Why such a paper has never been given to the world, I am much at a loss to say—but, perhaps, the authorial vanity has had more to do with the omission than any one other cause. Most writers—poets in especial—prefer having it understood that they compose by a species of fine frenzy—an ecstatic intuition—and would positively shudder at letting the public take a peep behind the scenes, at the elaborate and vacillating crudities of thought—at the true purposes seized only at the last moment—at the innumerable glimpses of idea that arrived not at the maturity of full view—at the fully matured fancies discarded in despair as unmanageable—at the cautious selections and rejections—at the painful erasures and interpolations—in a word, at the wheels and pinions—the tackle for scene-shifting—the step-ladders and demon-traps, the cock's feathers, the red paint and the black patches, which, in ninety-nine cases out of the hundred, constitute the properties of the literary *histrion*.

I am aware, on the other hand, that the case is by no means common, in which an author is at all in condition to retrace the steps by which his conclusions have been attained. In general, suggestions, having arisen pell-mell, are pursued and forgotten in a similar manner.

For my own part, I have neither sympathy with the repugnance alluded to, nor, at any time, the least difficulty in recalling to mind the progressive steps of any of my compositions; and, since the interest of an analysis, or reconstruction, such as I have considered a *desideratum*, is quite independent of any real or fancied interest in the thing analysed, it will not be regarded as a breach of decorum on my part to show the *modus operandi* by which

some one of my own works was put together. I select 'The Raven' as most generally known. It is my design to render it manifest that no one point in its composition is referable either to accident or intuition—that the work proceeded, step by step, to its completion with the precision and rigid consequence of a mathematical problem.

Let us dismiss, as irrelevant to the poem *per se*, the circumstance—or say the necessity—which, in the first place, gave rise to the intention of composing a poem that should suit at once the popular and the critical taste.

We commence, then, with this intention.

The initial consideration was that of extent. If any literary work is too long to be read at one sitting, we must be content to dispense with the immensely important effect derivable from unity of impression—for, if two sittings be required, the affairs of the world interfere, and everything like totality is at once destroyed. But since, *ceteris paribus*, no poet can afford to dispense with *anything* that may advance his design, it but remains to be seen whether there is, in extent, any advantage to counterbalance the loss of unity which attends it. Here I say no, at once. What we term a long poem is, in fact, merely a succession of brief ones—that is to say, of brief poetical effects. It is needless to demonstrate that a poem is such, only inasmuch as it intensely excites, by elevating, the soul; and all intense excitements are, through a physical necessity, brief. For this reason, at least one-half of the 'Paradise Lost' is essentially prose—a succession of poetical excitements interspersed, *inevitably*, with corresponding depressions—the whole being deprived, through the extremeness of its length, of the vastly important artistic element, totality, or unity, of effect.

It appears evident, then, that there is a distinct limit, as regards length, to all works of literary art—the limit of a single sitting—and that, although in certain classes of prose composition, such as 'Robinson Crusoe' (demanding no unity), this limit may be advantageously overpassed, it can never properly be overpassed in a poem. Within this limit, the extent of a poem may be made to bear mathematical relation to its merit—in other words, to the excitement or elevation—again, in other words, to the degree

of the true poetical effect which it is capable of inducing ; for it is clear that the brevity must be in direct ratio of the intensity of the intended effect :—this, with one proviso—that a certain degree of duration is absolutely requisite for the production of any effect at all.

Holding in view these considerations, as well as that degree of excitement which I deemed not above the popular, while not below the critical, taste, I reached at once what I conceived the proper *length* for my intended poem, a length of about one hundred lines. It is, in fact, a hundred and eight.

My next thought concerned the choice of an impression, or effect, to be conveyed ; and here I may as well observe that, throughout the construction, I kept steadily in view the design of rendering the work *universally* appreciable. I should be carried too far out of my immediate topic were I to demonstrate a point upon which I have repeatedly insisted, and which, with the poetical, stands not in the slightest need of demonstration—the point, I mean, that Beauty is the sole legitimate province of the poem. A few words, however, in elucidation of my real meaning, which some of my friends have evinced a disposition to misrepresent. That pleasure which is at once the most intense, the most elevating, and the most pure, is, I believe, found in the contemplation of the beautiful. When, indeed, men speak of Beauty, they mean, precisely, not a quality, as is supposed, but an effect—they refer, in short, just to that intense and pure elevation of *soul*—*not* of intellect, or of heart—upon which I have commented, and which is experienced in consequence of contemplating ‘the beautiful’. Now I designate Beauty as the province of the poem, merely because it is an obvious rule of Art that effects should be made to spring from direct causes—that objects should be attained through means best adapted for their attainment—no one as yet having been weak enough to deny that the peculiar elevation alluded to, is *most readily* attained in the poem. Now the object, Truth, or the satisfaction of the intellect, and the object Passion, or the excitement of the heart, are, although attainable, to a certain extent, in poetry, far more readily attainable in prose. Truth, in fact, demands a precision, and Passion

a *homeliness* (the truly passionate will comprehend me), which are absolutely antagonistic to that Beauty which, I maintain, is the excitement, or pleasurable elevation, of the soul. It by no means follows from anything here said, that passion, or even truth, may not be introduced, and even profitably introduced, into a poem—for they may serve in elucidation, or aid the general effect, as do discords in music, by contrast—but the true artist will always contrive, first, to tone them into proper subservience to the predominant aim, and, secondly, to enveil them, as far as possible, in that Beauty which is the atmosphere and the essence of the poem.

Regarding, then, Beauty as my province, my next question referred to the *tone* of its highest manifestation—and all experience has shown that this tone is one of *sadness*. Beauty of whatever kind, in its supreme development, invariably excites the sensitive soul to tears. Melancholy is thus the most legitimate of all the poetical tones.

The length, the province, and the tone, being thus determined, I betook myself to ordinary induction, with the view of obtaining some artistic piquancy which might serve me as a key-note in the construction of the poem—some pivot upon which the whole structure might turn. In carefully thinking over all the usual artistic effects—or more properly *points*, in the theatrical sense—I did not fail to perceive immediately that no one had been so universally employed as that of the *refrain*. The universality of its employment sufficed to assure me of its intrinsic value, and spared me the necessity of submitting it to analysis. I considered it, however, with regard to its susceptibility of improvement, and soon saw it to be in a primitive condition. As commonly used, the *refrain*, or burden, not only is limited to lyric verse, but depends for its impression upon the force of monotone—both in sound and thought. The pleasure is deduced solely from the sense of identity—of repetition. I resolved to diversify, and so heighten, the effect, by adhering, in general, to the monotone of sound, while I continually varied that of thought: that is to say, I determined to produce continuously novel effects, by the variation of *the application*

of the *refrain*—the *refrain* itself remaining, for the most part, unvaried.

These points being settled, I next bethought me of the *nature* of my *refrain*. Since its application was to be repeatedly varied, it was clear that the *refrain* itself must be brief, for there would have been an insurmountable difficulty in frequent variations of application in any sentence of length. In proportion to the brevity of the sentence, would, of course, be the facility of the variation. This led me at once to a single word as the best *refrain*.

The question now arose as to the *character* of the word. Having made up my mind to a *refrain*, the division of the poem into stanzas was, of course, a corollary: the *refrain* forming the close to each stanza. That such a close, to have force, must be sonorous and susceptible of protracted emphasis, admitted no doubt; and these considerations inevitably led me to the long *o* as the most sonorous vowel, in connection with *r* as the most producible consonant.

The sound of the *refrain* being thus determined, it became necessary to select a word embodying this sound, and at the same time in the fullest possible keeping with that melancholy which I had predetermined as the tone of the poem. In such a search it would have been absolutely impossible to overlook the word 'Nevermore'. In fact, it was the very first which presented itself.

The next *desideratum* was a pretext for the continuous use of the one word 'Nevermore'. In observing the difficulty which I at once found in inventing a sufficiently plausible reason for its continuous repetition, I did not fail to perceive that this difficulty arose solely from the pre-assumption that the word was to be so continuously or monotonously spoken by a *human* being—I did not fail to perceive, in short, that the difficulty lay in the reconciliation of this monotony with the exercise of reason on the part of the creature repeating the word. Here, then, immediately arose the idea of a *non*-reasoning creature capable of speech; and, very naturally, a parrot, in the first instance, suggested itself, but was superseded forthwith by a Raven, as equally capable of speech, and infinitely more in keeping with the intended *tone*.

I had now gone so far as the conception of a Raven—the

bird of ill omen—monotonously repeating the one word, 'Nevermore', at the conclusion of each stanza, in a poem of melancholy tone, and in length about one hundred lines. Now, never losing sight of the object *supremeness*, or perfection, at all points, I asked myself: 'Of all melancholy topics, what, according to the *universal* understanding of mankind, is the *most* melancholy?' Death—was the obvious reply. 'And when', I said, 'is this most melancholy of topics most poetical?' From what I have already explained at some length, the answer, here also, is obvious—'When it most closely allies itself to *Beauty*: the death, then, of a beautiful woman is, unquestionably, the most poetical topic in the world—and equally is it beyond doubt that the lips best suited for such topic are those of a bereaved lover.'

I had now to combine the two ideas, of a lover lamenting his deceased mistress and a Raven continuously repeating the word 'Nevermore'. I had to combine these, bearing in mind my design of varying, at every turn, the *application* of the word repeated; but the only intelligible mode of such combination is that of imagining the Raven employing the word in answer to the queries of the lover. And here it was that I saw at once the opportunity afforded for the effect on which I had been depending—that is to say, the effect of the *variation of application*. I saw that I could make the first query propounded by the lover—the first query to which the Raven should reply 'Nevermore'—that I could make this first query a commonplace one—the second less so—the third still less, and so on—until at length the lover, startled from his original *nonchalance* by the melancholy character of the word itself—by its frequent repetition—and by a consideration of the ominous reputation of the fowl that uttered it—is at length excited to superstition, and wildly propounds queries of a far different character—queries whose solution he has passionately at heart—propounds them half in superstition and half in that species of despair which delights in self-torture—propounds them not altogether because he believes in the prophetic or demoniac character of the bird (which, reason assures him, is merely repeating a lesson learned by rote), but because he experiences a

frenzied pleasure in so modelling his questions as to receive from the *expected* 'Nevermore' the most delicious, because the most intolerable, of sorrow. Perceiving the opportunity thus afforded me—or, more strictly, thus forced upon me in the progress of the construction—I first established in mind the climax, or concluding query—that query to which 'Nevermore' should be in the last place an answer—that query in reply to which this word 'Nevermore' should involve the utmost conceivable amount of sorrow and despair.

Here, then, the poem may be said to have its beginning—at the end, where all works of art should begin—for it was here, at this point of my preconsiderations, that I first put pen to paper in the composition of the stanza :

'Prophet,' said I, 'thing of evil! prophet still if bird or devil!  
By that heaven that bends above us—by that God we both adore,  
Tell this soul with sorrow laden, if within the distant Aidenn,  
It shall clasp a sainted maiden whom the angels name Lenore—  
Clasp a rare and radiant maiden whom the angels name Lenore.'  
Quoth the raven 'Nevermore'.

I composed this stanza, at this point, first that, by establishing the climax, I might the better vary and graduate, as regards seriousness and importance, the preceding queries of the lover—and, secondly, that I might definitely settle the rhythm, the metre, and the length and general arrangement of the stanza—as well as graduate the stanzas which were to precede, so that none of them might surpass this in rhythmical effect. Had I been able, in the subsequent composition, to construct more vigorous stanzas, I should, without scruple, have purposely enfeebled them, so as not to interfere with the climacteric effect.

And here I may as well say a few words of the versification. My first object (as usual) was originality. The extent to which this has been neglected, in versification, is one of the most unaccountable things in the world. Admitting that there is little possibility of variety in mere *rhythm*, it is still clear that the possible varieties of metre and stanza are absolutely infinite—and yet, *for centuries, no man, in verse, has ever done, or ever seemed to think of doing, an original thing.* The fact is, that originality (unless in

minds of very unusual force) is by no means a matter, as some suppose, of impulse or intuition. In general, to be found, it must be elaborately sought, and although a positive merit of the highest class, demands in its attainment less of invention than negation.

Of course, I pretend to no originality in either the rhythm or metre of 'the Raven'. The former is trochaic—the latter is octameter acatalectic, alternating with heptameter catalectic repeated in the *refrain* of the fifth verse, and terminating with tetrameter catalectic. Less pedantically—the feet employed throughout (trochees) consist of a long syllable followed by a short: the first line of the stanza consists of eight of these feet—the second of seven and a half (in effect two-thirds)—the third of eight—the fourth of seven and a half—the fifth the same—the sixth three and a half. Now, each of these lines, taken individually, has been employed before, and what originality the 'Raven' has, is in their *combination into stanza*; nothing even remotely approaching this combination has ever been attempted. The effect of this originality of combination is aided by other unusual, and some altogether novel effects, arising from an extension of the application of the principles of rhyme and alliteration.

The next point to be considered was the mode of bringing together the lover and the Raven—and the first branch of this consideration was the *locale*. For this the most natural suggestion might seem to be a forest, or the fields—but it has always appeared to me that a close *circumscription of space* is absolutely necessary to the effect of insulated incident:—it has the force of a frame to a picture. It has an indisputable moral power in keeping concentrated the attention, and, of course, must not be confounded with mere unity of place.

I determined, then, to place the lover in his chamber—in a chamber rendered sacred to him by memories of her who had frequented it. The room is represented as richly furnished—this in mere pursuance of the ideas I have already explained on the subject of Beauty, as the sole true poetical thesis.

The *locale* being thus determined, I had now to introduce the bird—and the thought of introducing him through

the window, was inevitable. The idea of making the lover suppose, in the first instance, that the flapping of the wings of the bird against the shutter, is a 'tapping' at the door, originated in a wish to increase, by prolonging, the reader's curiosity, and in a desire to admit the incidental effect arising from the lover's throwing open the door, finding all dark, and thence adopting the half-fancy that it was the spirit of his mistress that knocked.

I made the night tempestuous, first, to account for the Raven's seeking admission, and secondly, for the effect of contrast with the (physical) serenity within the chamber.

I made the bird alight on the bust of Pallas, also for the effect of contrast between the marble and the plumage—it being understood that the bust was absolutely *suggested* by the bird—the bust of *Pallas* being chosen, first, as most in keeping with the scholarship of the lover, and, secondly, for the sonorousness of the word, Pallas, itself.

About the middle of the poem, also, I have availed myself of the force of contrast, with a view of deepening the ultimate impression. For example, an air of the fantastic—approaching as nearly to the ludicrous as was admissible—is given to the Raven's entrance. He comes in 'with many a flirt and flutter'.

Not the least obeisance made he—not a moment stopped or stayed he,  
But with mien of lord or lady, perched above my chamber door.

In the two stanzas which follow, the design is more obviously carried out :—

Then this ebony bird beguiling my sad fancy into smiling  
By the grave and stern decorum of the countenance it wore,  
'Though thy crest be shorn and shaven, thou,' I said, 'art sure no craven,  
Ghastly grim and ancient Raven wandering from the nightly shore—  
Tell me what thy lordly name is on the Night's Plutonian shore ?'  
Quoth the Raven 'Nevermore'.

Much I marvelled *this ungainly fowl* to hear discourse so plainly,  
Though its answer little meaning—little relevancy bore ;  
For we cannot help agreeing that no living human being  
*Ever yet was blest with seeing bird above his chamber door—  
Bird or beast upon the sculptured bust above his chamber door,  
With such name as 'Nevermore'.*

The effect of the *dénouement* being thus provided for, I immediately drop the fantastic for a tone of the most

profound seriousness:—this tone commencing in the stanza directly following the one last quoted, with the line,

But the Raven, sitting lonely on that placid bust, spoke only, etc.

From this epoch the lover no longer jests—no longer sees anything even of the fantastic in the Raven's demeanour. He speaks of him as a 'grim, ungainly, ghastly, gaunt, and ominous bird of yore', and feels the 'fiery eyes' burning into his 'bosom's core'. This revolution of thought, or fancy, on the lover's part, is intended to induce a similar one on the part of the reader—to bring the mind into a proper frame for the *dénouement* which is now brought about as rapidly and as *directly* as possible.

With the *dénouement* proper—with the Raven's reply, 'Nevermore', to the lover's final demand if he shall meet his mistress in another world—the poem, in its obvious phase, that of a simple narrative, may be said to have its completion. So far, everything is within the limits of the accountable—of the real. A raven, having learned by rote the single word 'Nevermore', and having escaped from the custody of its owner, is driven at midnight, through the violence of a storm, to seek admission at a window from which a light still gleams—the chamber-window of a student, occupied half in poring over a volume, half in dreaming of a beloved mistress deceased. The casement being thrown open at the fluttering of a bird's wings, the bird itself perches on the most convenient seat out of the immediate reach of the student, who, amused by the incident and the oddity of the visitor's demeanour, demands of it, in jest and without looking for a reply, its name. The raven, addressed, answers with its customary word, 'Nevermore'—a word which finds immediate echo in the melancholy heart of the student, who, giving utterance aloud to certain thoughts suggested by the occasion, is again startled by the fowl's repetition of 'Nevermore'. The student now guesses the state of the case, but is impelled, as I have before explained, by the human thirst for self-torture, and in part by superstition, to propound such queries to the bird as will bring him, the lover, the most of the luxury of sorrow, through the anticipated answer 'Nevermore'. With the indulgence, to the extreme, of

this self-torture, the narration, in what I have termed its first or obvious phase, has a natural termination, and so far there has been no overstepping of the limits of the real.

But in subjects so handled, however skilfully, or with however vivid an array of incident, there is always a certain hardness or nakedness, which repels the artistical eye. Two things are invariably required—first, some amount of complexity, or more properly, adaptation; and, secondly, some amount of suggestiveness—some under-current, however indefinite, of meaning. It is this latter, in especial, which imparts to a work of art so much of that *richness* (to borrow from colloquy a forcible term) which we are too fond of confounding with *the ideal*. It is the *excess* of the suggested meaning—it is the rendering this the upper instead of the under-current of the theme—which turns into prose (and that of the very flattest kind) the so-called poetry of the so-called transcendentalists.

Holding these opinions, I added the two concluding stanzas of the poem—their suggestiveness being thus made to pervade all the narrative which has preceded them. The under-current of meaning is rendered first apparent in the lines—

‘Take thy beak from out *my heart*, and take thy form from off my door!’  
Quoth the Raven ‘Nevermore!’

It will be observed that the words, ‘from out my heart’, involve the first metaphorical expression in the poem. They, with answer, ‘Nevermore’, dispose the mind to seek a moral in all that has been previously narrated. The reader begins now to regard the Raven as emblematical—but it is not until the very last line of the very last stanza, that the intention of making him emblematical of *Mournful and Never-ending Remembrance* is permitted distinctly to be seen :

And the Raven, never flitting, still is sitting, still is sitting,  
On the pallid bust of Pallas just above my chamber door;  
And his eyes have all the seeming of a demon’s that is dreaming,  
And the lamplight o’er him streaming throws his shadow on the floor;  
And my soul from out *that shadow* that lies floating on the floor,  
Shall be lifted—nevermore.

# THE RATIONALE OF VERSE

## THE RATIONALE OF VERSE

THE word 'Verse' is here used not in its strict or primitive sense, but as the term most convenient for expressing generally and without pedantry all that is involved in the consideration of rhythm, rhyme, metre, and versification.

There is, perhaps, no topic in polite literature which has been more pertinaciously discussed, and there is certainly not one about which so much inaccuracy, confusion, misconception, misrepresentation, mystification, and downright ignorance on all sides, can be fairly said to exist. Were the topic really difficult, or did it lie, even, in the cloud-land of metaphysics, where the doubt-vapours may be made to assume any and every shape at the will or at the fancy of the gazer, we should have less reason to wonder at all this contradiction and perplexity; but in fact the subject is exceedingly simple; one-tenth of it, possibly, may be called ethical; nine-tenths, however, appertain to mathematics; and the whole is included within the limits of the commonest common-sense.

'But, if this is the case, how,' it will be asked, 'can so much misunderstanding have arisen? Is it conceivable that a thousand profound scholars, investigating so very simple a matter for centuries, have not been able to place it in the fullest light, at least, of which it is susceptible?' These queries, I confess, are not easily answered:—at all events, a satisfactory reply to them might cost more trouble, than would, if properly considered, the whole *vexata quaestio* to which they have reference. Nevertheless, there is little difficulty or danger in suggesting that the 'thousand profound scholars' *may* have failed, first, because they were scholars, secondly, because they were profound, and thirdly, because they were a thousand—the impotency of the scholarship and profundity having been thus multiplied a thousand-fold. I am serious in these suggestions; for, first again, there is something in 'scholarship' which seduces us into blind worship of

Bacon's *Idol of the Theatre*—into irrational deference to antiquity; secondly, the proper 'profundity' is rarely profound—it is the nature of truth in general, as of some ores in particular, to be richest when most superficial; thirdly, the clearest subject may be overclouded by mere superabundance of talk. In chemistry, the best way of separating two bodies is to add a third; in speculation, fact often agrees with fact and argument with argument, until an additional well-meaning fact or argument sets everything by the ears. In one case out of a hundred a point is excessively discussed because it is obscure; in the ninety-nine remaining it is obscure because excessively discussed. When a topic is thus circumstanced, the readiest mode of investigating it is to forget that any previous investigation has been attempted.

But, in fact, while much has been written on the Greek and Latin rhythms, and even on the Hebrew, little effort has been made at examining that of any of the modern tongues. As regards the English, comparatively nothing has been done. It may be said, indeed, that we are without a treatise on our own verse. In our ordinary grammars and in our works, on rhetoric or prosody in general, may be found occasional chapters, it is true, which have the heading 'Versification', but these are, in all instances, exceedingly meagre. They pretend to no analysis; they propose nothing like system; they make no attempt at even rule; everything depends upon 'authority'. They are confined, in fact, to mere exemplification of the supposed varieties of English feet and English lines;—although in no work with which I am acquainted are these feet correctly given or these lines detailed in anything like their full extent. Yet what has been mentioned is all—if we except the occasional introduction of some pedagogism, such as this, borrowed from the Greek Prosodies: 'When a syllable is wanting, the verse is said to be catalectic; when the measure is exact, the line is acatalectic; when there is a redundant syllable it forms hypermeter.' Now whether a line be termed catalectic or acatalectic is, perhaps, a point of no vital importance; it is even possible that the student may be able to decide, promptly, when the *a* should be employed and when omitted, yet be incognizant, at

the same time, of *all* that is worth knowing in regard to the structure of verse.

A leading defect in each of our treatises (if treatises they can be called), is the confining the subject to mere *Versification*, while *Verse* in general, with the understanding given to the term in the heading of this paper, is the real question at issue. Nor am I aware of even one of our grammars which so much as properly defines the word versification itself. 'Versification', says a work now before me, of which the accuracy is far more than usual—the 'English Grammar' of Gould Brown,—'Versification is the art of arranging words into lines of correspondent length, so as to produce harmony by the regular alternation of syllables differing in quantity.' The commencement of this definition might apply, indeed, to the *art* of versification, but not versification itself. Versification is not the art of arranging, &c., but the actual arranging—a distinction too obvious to need comment. The error here is identical with one which has been too long permitted to disgrace the initial page of every one of our school grammars. I allude to the definitions of English grammar itself. 'English grammar', it is said, 'is the art of speaking and writing the English language correctly.' This phraseology, or something essentially similar, is employed, I believe, by Bacon, Miller, Fisk, Greenleaf, Ingersoll, Kirkland, Cooper, Flint, Pue, Comly, and many others. These gentlemen, it is presumed, adopted it without examination from Murray, who derived it from Lily (whose work was '*quam solam Regia Majestas in omnibus scholis docendam præcipit*'), and who appropriated it without acknowledgment, but with some unimportant modification, from the Latin Grammar of Leonicensus. It may be shown, however, that this definition, so complacently received, is not, and cannot be, a proper definition of English grammar. A definition is that which so describes its object as to distinguish it from all others; it is no definition of any one thing if its terms are applicable to any one other. But if it be asked: 'What is the design—the end—the aim of English grammar?' our obvious answer is: 'The art of speaking and writing the English language correctly,'—that is to say, we must use the precise words employed as the

definition of English grammar itself. But the object to be attained by any means is, assuredly, not the means. English grammar and the end contemplated by English grammar are two matters sufficiently distinct; nor can the one be more reasonably regarded as the other than a fishing-hook as a fish. The definition, therefore, which is applicable in the latter instance, *cannot*, in the former, be true. Grammar in general is the analysis of language; English Grammar of the English.

But to return to Versification as defined in our extract above. 'It is the art', says the extract, 'of arranging words into lines of *correspondent length*.' Not so; a correspondence in the length of lines is by no means essential. Pindaric odes are, surely, instances of versification, yet these compositions are noted for extreme diversity in the length of their lines.

The arrangement is, moreover, said to be for the purpose of producing '*harmony* by the regular alternation', &c. But *harmony* is not the sole aim—not even the principal one. In the construction of verse, *melody* should never be left out of view; yet this is a point which all our prosodies have most unaccountably forborne to touch. Reasoned rules on this topic should form a portion of all systems of rhythm.

'So as to produce harmony', says the definition, 'by the *regular alternation*,' &c. A *regular alternation*, as described, forms no part of any principle of versification. The arrangement of spondees and dactyls, for example, in the Greek hexameter, is an arrangement which may be termed *at random*. At least it is arbitrary. Without interference with the line as a whole, a dactyl may be substituted for a spondee, or the converse, at any point other than the ultimate and penultimate feet, of which the former is always a spondee, the latter nearly always a dactyl. Here, it is clear, we have no '*regular alternation* of syllables differing in quantity'.

'So as to produce harmony', proceeds the definition, 'by the regular alternation of *syllables differing in quantity*,'—in other words, by the alternation of long and short syllables; for in rhythm all syllables are necessarily either short or long. But not only do I deny the necessity of

any *regularity* in the succession of feet and, by consequence, of syllables, but dispute the essentiality of any *alternation*, regular or irregular, of syllables long and short. Our author, observe, is now engaged in a definition of versification in general, not of English versification in particular. But the Greek and Latin metres abound in the spondee and pyrrhic—the former consisting of two long syllables, the latter of two short; and there are innumerable instances of the immediate succession of many spondees and many pyrrhics.

Here is a passage from Silius Italicus :

Fallis te, mensas inter quod credis inermem  
Tot bellis quæsitâ viro, tot caedibus armat  
Majestas eterna ducem : si admoveris ora  
Cannas, et Trebium ante oculos, Trasymenæque busta,  
Et Pauli stare ingentem miraberis umbram.

Making the elisions demanded by the classic prosodies, we should scan these hexameters thus :

Fállis | tē mēn | sās in | tēr quōd | crēdis in | ērmēm |  
Tōt bēl | līs quæ | sītā vī | rō tōt | caedibūs | ārmāt |  
Mājēs | tās ē | tērnā dū | cēm s'ād | mōvēris | ōrā |  
Cānnās | ēt Trēbī' | ānt' ōcū | lōs Trāsý | mēnāquē | būstā |  
Et Pāu | lī stā | r' ingēn | tēm mī | rābēris | ūmrām |

It will be seen that, in the first and last of these lines, we have only two short syllables in thirteen, with an uninterrupted succession of no less than *nine* long syllables. But how are we to reconcile all this with a definition of versification which describes it as 'the art of arranging words into lines of correspondent length so as to produce harmony by the *regular alternation of syllables differing in quantity*' ?

It may be urged, however, that our prosodist's *intention* was to speak of the English metres alone, and that, by omitting all mention of the spondee and pyrrhic, he has virtually avowed their exclusion from our rhythms. A grammarian is never excusable on the ground of good intentions. We demand from him, if from any one, rigorous precision of style. But grant the design. Let us admit that our author, following the example of all authors on English Prosody, has, in defining versification at large, intended a definition merely of the English. All these

prosodists, we will say, reject the spondee and pyrrhic. Still all admit the iambus, which consists of a short syllable followed by a long; the trochee, which is the converse of the iambus; the dactyl, formed of one long syllable followed by two short; and the anapaest—two short succeeded by a long. The spondee is improperly rejected, as I shall presently show. The pyrrhic is rightfully dismissed. Its existence in either ancient or modern rhythm is purely chimerical, and the insisting on so perplexing a nonentity as a foot of *two short* syllables, affords, perhaps, the best evidence of the gross irrationality and subservience to authority which characterize our Prosody. In the meantime the acknowledged dactyl and anapaest are enough to sustain my proposition about the ‘alternation’, &c., without reference to feet which are assumed to exist in the Greek and Latin metres alone: for an anapaest and a dactyl may meet in the same line; when, of course, we shall have an uninterrupted succession of four short syllables. The meeting of these two feet, to be sure, is an accident not contemplated in the definition now discussed; for this definition, in demanding a ‘regular alternation of syllables differing in quantity’, insists on a regular succession of similar *feet*. But here is an example:

Sing tō mē | Isābēlle.

This is the opening line of a little ballad now before me, which proceeds in the same rhythm—a peculiarly beautiful one. More than all this: English lines are often well composed, entirely, of a regular succession of syllables *all of the same quantity*—the first lines, for instance, of the following quatrain by Arthur C. Coxe:

*March ! march ! march !*  
 Making sounds as they tread.  
 Ho ! ho ! how they step,  
 Going down to the dead !

The line italicized is formed of three caesuras. The caesura, of which I have much to say hereafter, is rejected by the English Prosodies and grossly misrepresented in the classic. It is a perfect foot—the most important in all verse—and consists of a single *long* syllable; *but the length of this syllable varies.*

It has thus been made evident that there is *not one* point of the definition in question which does not involve an error. And for anything more satisfactory or more intelligible we shall look in vain to any published treatise on the topic.

So general and so total a failure can be referred only to radical misconception. In fact the English Prosodists have blindly followed the pedants. These latter, like *les moutons de Panurge*, have been occupied in incessant tumbling into ditches, for the excellent reason that their leaders have so tumbled before. The *Iliad*, being taken as a starting-point, was made to stand instead of Nature and common-sense. Upon this poem, in place of facts and deduction from fact, or from natural law, were built systems of feet, metres, rhythms, rules,—rules that contradict each other every five minutes, and for nearly all of which there may be found twice as many exceptions as examples. If any one has a fancy to be thoroughly confounded—to see how far the infatuation of what is termed ‘classical scholarship’ can lead a book-worm in the manufacture of darkness out of sunshine, let him turn over, for a few moments, any of the German Greek prosodies. The only thing clearly made out in them is a very magnificent contempt for Liebnitz’ principle of ‘a sufficient reason’.

To divert attention from the real matter in hand by any farther reference to these works, is unnecessary, and would be weak. I cannot call to mind, at this moment, one essential particular of information that is to be gleaned from them; and I will drop them here with merely this one observation: that, employing from among the numerous ‘ancient’ feet the spondee, the trochee, the iambus, the anapaest, the dactyl, and the caesura alone, I will engage to scan *correctly* any of the Horatian rhythms, or any true rhythm that human ingenuity can conceive. And this excess of chimerical feet is, perhaps, the very least of the scholastic supererogations. *Ex uno disce omnia*. The fact is that *Quantity* is a point in whose investigation the lumber of mere learning may be dispensed with, if ever in any. Its appreciation is universal. It appertains to no region, nor race, nor era in especial. To melody and to harmony the Greeks hearkened with ears precisely similar to those which we employ for similar purposes at

present ; and I should not be condemned for heresy in asserting that a pendulum at Athens would have vibrated much after the same fashion as does a pendulum in the city of Penn.

*Verse* originates in the human enjoyment of equality, fitness. To this enjoyment, also, all the moods of verse—rhythm, metre, stanza, rhyme, alliteration, the *refrain*, and other analogous effects—are to be referred. As there are some readers who habitually confound rhythm and metre, it may be as well here to say that the former concerns the *character* of feet (that is, the arrangements of syllables) while the latter has to do with the *number* of these feet. Thus, by ‘a dactylic *rhythm*’ we express a sequence of dactyls. By ‘a dactylic *hexameter*’ we imply a line or measure consisting of six of these dactyls.

To return to *equality*. Its idea embraces those of similarity, proportion, identity, repetition, and adaptation or fitness. It might not be very difficult to go even behind the idea of equality, and show both how and why it is that the human nature takes pleasure in it, but such an investigation would, for any purpose now in view, be supererogatory. It is sufficient that the *fact* is undeniable—the fact that man derives enjoyment from his perception of equality. Let us examine a crystal. We are at once interested by the equality between the sides and between the angles of one of its faces : the equality of the sides pleases us ; that of the angles doubles the pleasure. On bringing to view a second face in all respects similar to the first, this pleasure seems to be squared ; on bringing to view a third, it appears to be cubed, and so on. I have no doubt, indeed, that the delight experienced, if measurable, would be found to have exact mathematical relations such as I suggest ; that is to say, as far as a certain point, beyond which there would be a decrease in similar relations.

The perception of pleasure in the equality of *sounds* is the principle of *Music*. Unpractised ears can appreciate only simple equalities, such as are found in ballad airs. While comparing one simple sound with another they are too much occupied to be capable of comparing the equality subsisting between these two simple sounds, taken conjointly, and two other similar simple sounds, taken con-

jointly. Practised ears, on the other hand, appreciate both equalities at the same instant—although it is absurd to suppose that both are *heard* at the same instant. One is heard and appreciated from itself: the other is heard by the memory; and the instant glides into and is confounded with the secondary, appreciation. Highly cultivated musical taste in this manner enjoys not only these double equalities, all appreciated at once, but takes pleasurable cognizance, through memory, of equalities the members of which occur at intervals so great that the uncultivated taste loses them altogether. That this latter can properly estimate or decide on the merits of what is called scientific music, is of course impossible. But scientific music has no claim to intrinsic excellence—it is fit for scientific ears alone. In its excess it is the triumph of the *physique* over the *morale* of music. The sentiment is overwhelmed by the sense. On the whole, the advocates of the simpler melody and harmony have infinitely the best of the argument; although there has been very little of real argument on the subject.

In *verse*, which cannot be better designated than as an inferior or less capable Music, there is, happily, little chance for perplexity. Its rigidly simple character not even Science—not even Pedantry can greatly pervert.

The rudiment of verse may, possibly, be found in the *spondee*. The very germ of a thought seeking satisfaction in equality of sound would result in the construction of words of two syllables, equally accented. In corroboration of this idea we find that spondees most abound in the most ancient tongues. The second step we can easily suppose to be the comparison, that is to say, the collocation, of two spondees—of two words composed each of a spondee. The third step would be the juxtaposition of three of these words. By this time the perception of monotone would induce farther consideration: and thus arises what Leigh Hunt so flounders in discussing under the title of ‘The Principle of Variety in Uniformity’. Of course there is no principle in the case—nor in maintaining it. The ‘Uniformity’ is the principle; the ‘Variety’ is but the principle’s natural safeguard from self-destruction by excess of self. ‘Uniformity,’ besides, is the very worst word that

could have been chosen for the expression of the *general* idea at which it aims.

The perception of monotone having given rise to an attempt at its relief, the first thought in this new direction would be that of collating two or more words formed each of two syllables differently accented (that is to say, short and long) but having the same order in each word,—in other terms, of collating two or more iambytes, or two or more trochees. And here let me pause to assert that more pitiable nonsense has been written on the topic of *long* and *short* syllables than on any other subject under the sun. In general, a syllable is long or short, just as it is difficult or easy of enunciation. The *natural* long syllables are those encumbered—the *natural* short syllables are those unencumbered, with consonants; all the rest is mere artificiality and jargon. The Latin Prosodies have a rule that ‘a vowel before two consonants is long’. This rule is deduced from ‘authority’—that is, from the observation that vowels so circumstanced, in the ancient poems, are always in syllables long by the laws of scansion. The philosophy of the rule is untouched, and lies simply in the physical difficulty of giving voice to such syllables—of performing the lingual evolutions necessary for their utterance. Of course, it is not the *vowel* that is long (although the rule says so), but the syllable of which the vowel is a part. It will be seen that the length of a syllable, depending on the facility or difficulty of its enunciation, must have great variation in various syllables; but for the purposes of verse we suppose a long syllable equal to two short ones:—and the natural deviation from this relativeness we correct in perusal. The more closely our long syllables approach this relation with our short ones, the better, *ceteris paribus*, will be our verse: but if the relation does not exist of itself, we force it by emphasis, which can, of course, make any syllable as long as desired;—or, by an effort we can pronounce with unnatural brevity a syllable that is naturally too long. *Accented* syllables are of course always long—but, where *unencumbered* with consonants, must be classed among the *unnaturally* long. Mere custom has declared that we shall accent them—that is to say, dwell upon them; but no inevitable lingual

difficulty forces us to do so. In fine, every long syllable must of its own accord occupy in its utterance, or must be *made* to occupy, precisely the time demanded for two short ones. The only exception to this rule is found in the caesura—of which more anon.

The success of the experiment with the trochees or iambuses (the one would have suggested the other) must have led to a trial of dactyls or anapaests—natural dactyls or anapaests—dactylic or anapaestic *words*. And now some degree of complexity has been attained. There is an appreciation, first, of the equality between the several dactyls, or anapaests, and, secondly, of that between the long syllable and the two short conjointly. But here it may be said that step after step would have been taken, in continuation of this routine, until all the feet of the Greek Prosodies became exhausted. Not so; these remaining feet have no existence except in the brains of the scholiasts. It is needless to imagine men inventing these things, and folly to explain how and why they invented them, until it shall be first shown that they are actually invented. All other ‘feet’ than those which I have specified, are, if not impossible at first view, merely combinations of the specified; and, although this assertion is rigidly true, I will, to avoid misunderstanding, put it in a somewhat different shape. I will say, then, that at present I am aware of no *rhythm*—nor do I believe that any one can be constructed—which, in its last analysis, will not be found to consist altogether of the feet I have mentioned, either existing in their individual and obvious condition, or interwoven with each other in accordance with simple natural laws which I will endeavour to point out hereafter.

We have now gone so far as to suppose men constructing indefinite sequences of spondaic, iambic, trochaic, dactylic, or anapaestic words. In *extending* these sequences, they would be again arrested by the sense of monotone. A succession of spondees would *immediately* have displeased; one of iambuses or of trochees, on account of the variety included within the foot itself, would have taken longer to displease; one of dactyls or anapaests, still longer; but even the last, if extended very far, must have become

wearisome. The idea, first, of curtailing, and, secondly, of defining the length of, a sequence, would thus at once have arisen. Here then is the *line*, or verse proper.<sup>1</sup> The principle of equality being constantly at the bottom of the whole process, lines would naturally be made, in the first instance, equal in the number of their feet; in the second instance, there would be variation in the mere number: one line would be twice as long as another; then one would be some less obvious multiple of another; then still less obvious proportions would be adopted;—nevertheless there would be *proportion*, that is to say, a phase of equality, still.

Lines being once introduced, the necessity of distinctly defining these lines *to the ear*, (as yet written verse does not exist,) would lead to a scrutiny of their capabilities *at their terminations*:—and now would spring up the idea of equality in sound between the final syllables—in other words, of *rhyme*. First, it would be used only in the iambic, anapaestic, and spondaic rhythms (granting that the latter had not been thrown aside, long since, on account of its tameness), because in these rhythms, the concluding syllable being long, could best sustain the necessary protraction of the voice. No great while could elapse, however, before the effect, found pleasant as well as useful, would be applied to the two remaining rhythms. But as the chief force of rhyme must lie in the accented syllable, the attempt to create rhyme at all in these two remaining rhythms, the trochaic and dactylic, would necessarily result in double and triple rhymes, such as *beauty* with *duty* (trochaic) and *beautiful* with *dutiful* (dactylic).

It must be observed, that in suggesting these processes, I assign them no date; nor do I even insist upon their order. Rhyme is supposed to be of modern origin, and were this proved, my positions remain untouched. I may say, however, in passing, that several instances of rhyme occur in the 'Clouds' of Aristophanes, and that the

<sup>1</sup> Verse, from the Latin *vertere*, to turn, is so called on account of the turning or re-commencement of the series of feet. Thus a verse, strictly speaking, is a line. In this sense, however, I have preferred using the latter word alone; employing the former in the general acceptance given it in the heading of this paper.

Roman poets occasionally employ it. There is an effective species of ancient rhyming which has never descended to the moderns : that in which the ultimate and penultimate syllables rhyme with each other. For example :

Parturiunt montes ; nascetur ridiculus mus.

And again :

Litoreis ingens inventa sub ilicibus sus.

The terminations of Hebrew verse (as far as understood) show no signs of rhyme ; but what thinking person can doubt that it did actually exist ? That men have so obstinately and blindly insisted, *in general*, even up to the present day, in confining rhyme to the *ends* of lines, when its effect is even better applicable elsewhere, intimates, in my opinion, the sense of some *necessity* in the connection of the end with the rhyme,—hints that the origin of rhyme lay in a necessity which connected it with the end,—shows that neither mere accident nor mere fancy gave rise to the connection,—points, in a word, at the very necessity which I have suggested (that of some mode of defining lines *to the ear*) as the true origin of rhyme. Admit this, and we throw the origin far back in the night of Time—beyond the origin of written verse.

But, to resume. The amount of complexity I have now supposed to be attained is very considerable. Various systems of equalization are appreciated at once (or nearly so) in their respective values and in the value of each system with reference to all the others. As our present *ultimatum* of complexity, we have arrived at triple-rhymed, natural-dactylic lines, existing proportionally as well as equally with regard to other triple-rhymed, natural-dactylic lines. For example :

Virginal Lilian, rigidly, humbly dutiful;  
                                   Saintlily, lowlily,  
                                   Thrillingly, holily  
 Beautiful !

Here we appreciate, first, the absolute equality between the long syllable of each dactyl and the two short conjointly ; secondly, the absolute equality between each dactyl and any other dactyl—in other words, among all the dactyls ; thirdly, the absolute equality between the

two middle lines ; fourthly, the absolute equality between the first line and the three others taken conjointly ; fifthly, the absolute equality between the last two syllables of the respective words 'dutiful' and 'beautiful' ; sixthly, the absolute equality between the two last syllables of the respective words 'lowlily' and 'holily' ; seventhly, the proximate equality between the first syllable of 'dutiful' and the first syllable of 'beautiful' ; eighthly, the proximate equality between the first syllable of 'lowlily' and that of 'holily' ; ninthly, the proportional equality (that of five to one) between the first line and each of its members, the dactyls ; tenthly, the proportional equality (that of two to one,) between each of the middle lines and its members, the dactyls ; eleventhly, the proportional equality between the first line and each of the two middle—that of five to two ; twelfthly, the proportional equality between the first line and the last—that of five to one ; thirteenthly, the proportional equality between each of the middle lines and the last—that of two to one ; lastly, the proportional equality, as concerns number, between all the lines, taken collectively, and any individual line—that of four to one.

The consideration of this last equality would give birth immediately to the idea of *stanza*<sup>1</sup>—that is to say, the insulation of lines into equal or obviously proportional masses. In its primitive (which was also its best) form, the stanza would most probably have had absolute unity. In other words, the removal of any one of its lines would have rendered it imperfect ; as in the case above, where, if the last line, for example, be taken away, there is left no rhyme to the 'dutiful' of the first. Modern stanza is excessively loose—and where so, ineffective, as a matter of course.

Now, although in the deliberate written statement which I have here given of these various systems of equalities, there seems to be an infinity of complexity—so much that it is hard to conceive the mind taking cognizance of them all in the brief period occupied by the perusal or recital of the stanza—yet the difficulty is in fact apparent

<sup>1</sup> A stanza is often vulgarly, and with gross impropriety, called a *verse*.

only when we will it to become so. Any one fond of mental experiment may satisfy himself, by trial, that, in listening to the lines, he does actually (although with a seeming unconsciousness, on account of the rapid evolutions of sensation) recognize and instantaneously appreciate (more or less intensely as his ear is cultivated) each and all of the equalizations detailed. The pleasure received, or receivable, has very much such progressive increase, and in very nearly such mathematical relations, as those which I have suggested in the case of the crystal.

It will be observed that I speak of merely a proximate equality between the first syllable of 'dutiful' and that of 'beautiful'; and it may be asked why we cannot imagine the earliest rhymes to have had absolute instead of proximate equality of sound. But absolute equality would have involved the use of identical words; and it is the duplicate sameness or monotony—that of sense as well as that of sound—which would have caused these rhymes to be rejected in the very first instance.

The narrowness of the limits within which verse composed of natural feet alone must necessarily have been confined, would have led, after a *very* brief interval, to the trial and immediate adoption of artificial feet—that is to say, of feet *not* constituted each of a single word, but two or even three words; or of parts of words. These feet would be intermingled with natural ones. For example:

ă brēath | cǎn mǎke | thēm ās | ă brēath | hās mǎde.

This is an iambic line in which each iambus is formed of two words. Again:

Thē ūn | ĭmā | gĭnā | blē might | ǒf Jōve.

This is an iambic line in which the first foot is formed of a word and a part of a word; the second and third, of parts taken from the body or interior of a word; the fourth, of a part and a whole; the fifth, of two complete words. There are no *natural* feet in either lines. Again:

Cǎn ĭt bē | fānciēd thāt | Dēity | ēvēr vĭn | dīctively  
Mǎde ĭn hĭs | ĭmāge ă | mǎnnikĭn | mērely tǒ | mǎddēn ĭt ?

These are two dactylic lines in which we find natural feet ('Deity', 'mannikin'), feet composed of two words ('fancied that', 'image a', 'merely to', 'madden it'), feet composed of three words ('can it be', 'made in his'), a foot composed of a part of a word ('dictively'), and a foot composed of a word and a part of a word ('ever vin').

And now, in our supposititious progress, we have gone so far as to exhaust all the *essentialities* of verse. What follows may, strictly speaking, be regarded as embellishment merely—but even in this embellishment, the rudimental sense of *equality* would have been the never-ceasing impulse. It would, for example, be simply in seeking farther administration to this sense that men would come, in time, to think of the *refrain*, or burden, where, at the closes of the several stanzas of a poem, one word or phrase is *repeated*; and of alliteration, in whose simplest form a consonant is *repeated* in the commencements of various words. This effect would be extended so as to embrace repetitions both of vowels and of consonants, in the bodies as well as in the beginnings of words; and, at a later period would be made to infringe on the province of rhyme, by the introduction of general similarity of sound between whole feet occurring in the body of a line:—all of which modifications I have exemplified in the line above,

*Made in his image a mannikin merely to madden it.*

Farther cultivation would improve also the *refrain* by relieving its monotone in slightly varying the phrase at each repetition, or (as I have attempted to do in 'The Raven') in retaining the phrase and varying its application—although this latter point is not strictly a rhythmical effect *alone*. Finally, poets when fairly wearied with following precedent—following it the more closely the less they perceived it in company with Reason—would adventure so far as to indulge in positive rhyme at other points than the ends of lines. First, they would put it in the middle of the line; then at some point where the multiple would be less obvious; then, alarmed at their own audacity, they would undo all their work by cutting these lines in two. And here is the fruitful source of the infinity of 'short metre', by which modern poetry, if not distinguished,

is at least disgraced. It would require a high degree, indeed, both of cultivation and of courage, on the part of any versifier, to enable him to place his rhymes—and let them remain—at unquestionably their best position, that of unusual and *unanticipated* intervals.

On account of the stupidity of some people, or (if talent be a more respectable word), on account of their talent for misconception—I think it necessary to add here, first, that I believe the ‘processes’ above detailed to be nearly if not accurately those which *did* occur in the gradual creation of what we now call verse; secondly, that, although I so believe, I yet urge neither the assumed fact nor my belief in it, as a part of the true propositions of this paper; thirdly, that in regard to the aim of this paper, it is of no consequence whether these processes did occur either in the order I have assigned them, or at all; my design being simply, in presenting a general type of what such processes *might* have been, and *must* have resembled, to help *them*, the ‘some people’, to an easy understanding of what I have farther to say on the topic of Verse.

There is one point which, in my summary of the processes, I have purposely forborne to touch; because this point, being the most important of all, on account of the immensity of error usually involved in its consideration, would have led me into a series of detail inconsistent with the object of a summary.

Every reader of verse must have observed how seldom it happens that even any one line proceeds uniformly with a succession, such as I have supposed, of absolutely equal feet; that is to say, with a succession of iambs only, or of trochees only, or of dactyls only, or of anapaests only, or of spondees only. Even in the most musical lines we find the succession interrupted. The iambic pentameters of Pope, for example, will be found, on examination, frequently varied by trochees in the beginning, or by (what seem to be) anapaests in the body, of the line.

Oh thoū | whătē | vēr tī | tlē plēase | thīne ēar |  
 Déan Drā | piēr Bick | ěrstăff | őr Gŭl | ivēr |  
 Whēthēr | thōū choōse | Cěrvān | tēs' sē | riōūs air |  
 Őr laūgh | ānd shāke | in Rāb | ělāis' ēa | sy chāir. |

Were any one weak enough to refer to the prosodies

for the solution of the difficulty here, he would find it *solved* as usual by a *rule*, stating the fact (or what it, the rule, supposes to be the fact), but without the slightest attempt at the *rationale*. 'By a *synaeresis* of the two short syllables,' say the books, 'an anapaest may sometimes be employed for an iambus, or a dactyl for a trochee. . . . In the beginning of a line a trochee is often used for an iambus.'

*Blending* is the plain English for *synaeresis*—but there should be *no* blending; neither is an anapaest *ever* employed for an iambus, or a dactyl for a trochee. These feet differ in time; and *no* feet so differing can ever be legitimately used in the same line. An anapaest is equal to four short syllables—an iambus only to three. Dactyls and trochees hold the same relation. The principle of *equality*, in verse, admits, it is true, of variation at certain points, for the relief of monotone, as I have already shown, but the point of *time* is that point which, being the rudimental one, must never be tampered with at all.

To explain:—In farther efforts for the relief of monotone than those to which I have alluded in the summary, men soon came to see that there was no absolute necessity for adhering to the precise number of syllables, provided the time required for the whole foot was preserved inviolate. They saw, for instance, that in such a line as

Ör laūgh | ānd shāke | īn Rāb | ēlāis' ēa | sy chāir, |

the equalization of the three syllables *elais'* *ea* with the two syllables composing any of the other feet, could be readily effected by pronouncing the two syllables *elais'* in double quick time. By pronouncing each of the syllables *e* and *lais'* twice as rapidly as the syllable *sy*, or the syllable *in*, or any other syllable, they could bring the two of them, taken together, to the length, that is to say, to the time, of any one short syllable. This consideration enabled them to affect the agreeable variation of three syllables in place of the uniform two. And variation was the object—variation to the ear. What sense is there, then, in supposing this object rendered null by the *blending* of the two syllables so as to render them, in absolute effect, one? Of course, there must be *no* blending. Each syllable must be pro-

nounced as distinctly as possible (or the variation is lost), but with twice the rapidity in which the ordinary syllable is enunciated. That the syllables *elais'* *ea* do not compose an *anapaest* is evident, and the signs (ä ä ä) of their accentuation are erroneous. The foot might be written thus (xxx), the inverted crescents expressing double quick time; and might be called a bastard iambus.

Here is a trochaic line :

Sêe thê | dêlicâte | fôotêd | rôin-deêr. |

The prosodies—that is to say, the most considerate of them—would here decide that '*delicate*' is a dactyl used in place of a trochee, and would refer to what they call their 'rule', for justification. Others, varying the stupidity, would insist upon a Procrustean adjustment thus (del'cate)—an adjustment recommended to all such words as *silvery*, *murmuring*, &c., which, it is said, should be not only pronounced, but written *silv'ry*, *murm'ring*, and so on, whenever they find themselves in trochaic predicament. I have only to say that '*delicate*', when circumstanced as above, is neither a dactyl nor a dactyl's equivalent; that I would suggest for it this (xxx) accentuation; that I think it as well to call it a bastard trochee; and that all words, at all events, should be written and pronounced *in full*, and as nearly as possible as nature intended them.

About eleven years ago, there appeared in the *American Monthly Magazine* (then edited, I believe, by Messrs. Hoffman and Benjamin) a review of Mr. Willis' Poems; the critic putting forth his strength or his weakness, in an endeavour to show that the poet was either absurdly affected, or grossly ignorant of the laws of verse; the accusation being based altogether on the fact that Mr. W. made occasional use of this very word '*delicate*', and other similar words, in 'the Heroic measure, which every one knew consisted of feet of two syllables'. Mr. W. has often, for example, such lines as

That binds him to a woman's *delicate* love—  
In the gay sunshine, *reverent* in the storm—  
With its *invisible* fingers my loose hair.

Here, of course, the feet *licate love*, *verent in*, and *sible fin*,

are bastard iamboes; are *not* anapaests; and are *not* improperly used. Their employment, on the contrary, by Mr. Willis, is but one of the innumerable instances he has given of keen sensibility in all those matters of taste which may be classed under the general head of *fanciful embellishment*.

It is also about eleven years ago, if I am not mistaken, since Mr. Horne (of England), the author of 'Orion', one of the noblest epics in any language, thought it necessary to preface his 'Chaucer Modernized' by a very long and evidently a very elaborate essay, of which the greater portion was occupied in a discussion of the seemingly anomalous foot of which we have been speaking. Mr. Horne upholds Chaucer in its frequent use; maintains his superiority, *on account* of his so frequently using it, over all English versifiers; and, indignantly repelling the common idea of those who make verse on their fingers, that the superfluous syllable is a roughness and an error, very chivalrously makes battle for it as 'a grace'. That a grace it is, there can be no doubt; and what I complain of is, that the author of the most happily versified long poem in existence, should have been under the necessity of discussing this grace merely *as a grace*, through forty or fifty vague pages, solely because of his inability to show *how* and *why* it is a grace—by which showing the question would have been settled in an instant.

About the trochee used for an iambus, as we see in the beginning of the line,

Whethër thou choose Cervantes' serious air,

there is little that need be said. It brings me to the general proposition that in all rhythms, the prevalent or distinctive feet may be varied at will, and nearly at random, by the *occasional* introduction of equivalent feet—that is to say, feet the sum of whose syllabic times is equal to the sum of the syllabic times of the distinctive feet. Thus the trochee *whethër*, is equal in the sum of the times of its syllables, to the iambus, *thou chöose*, in the sum of the times of *its* syllables; each foot being, in time, equal to three short syllables. Good versifiers, who happen to be, also, good poets, contrive to relieve the monotone of a series

of feet, by the use of equivalent feet only at rare intervals, and at such points of their subject as seem in accordance with the *startling* character of the variation. Nothing of this care is seen in the line quoted above—although Pope has some fine instances of the duplicate effect. Where vehemence is to be strongly expressed, I am not sure that we should be wrong in venturing on *two consecutive equivalent feet*—although I cannot say that I have ever known the adventure made, except in the following passage, which occurs in ‘Al Aaraaf’, a boyish poem, written by myself when a boy. I am referring to the sudden and rapid advent of a star :

Dim was its little disk, and angel eyes  
Alone could see the phantom in the skies,  
Whén first thê phântóm's cōurse wás found tō bē  
*Hēadlōng* hithérward o'er the starry sea.

In the ‘general proposition’ above, I speak of the *occasional* introduction of equivalent feet. It sometimes happens that unskilful versifiers, without knowing what they do, or why they do it, introduce so many ‘variations’ as to exceed in number the ‘distinctive’ feet; when the ear becomes at once balked by the *bouleversement* of the rhythm. Too many trochees, for example, inserted in an iambic rhythm, would convert the latter to a trochaic. I may note here, that, in all cases, the rhythm designed should be commenced and continued, *without* variation, until the ear has had full time to comprehend what *is* the rhythm. In violation of a rule so obviously founded in common-sense, many even of our best poets, do not scruple to begin an iambic rhythm with a trochee, or the converse; or a dactylic with an anapaest, or the converse; and so on.

A somewhat less objectionable error, although still a decided one, is that of commencing a rhythm, not with a different equivalent foot, but with a ‘bastard’ foot of the rhythm intended. For example :

Māny ā | thōught will | cōme tō | mēmōry. |

Here *many a* is what I have explained to be a bastard trochee, and to be understood should be accented with inverted crescents. It is objectionable solely on account of its position as the *opening* foot of a trochaic rhythm.

*Memory*, similarly accented, is also a bastard trochee, but unobjectionable, although by no means demanded.

The farther illustration of this point will enable me to take an important step.

One of the finest poets, Mr. Christopher Pease Cranch, begins a very beautiful poem thus :

Many are the thoughts that come to me  
In my lonely musing ;  
And they drift so strange and swift  
There's no time for choosing  
Which to follow ; for to leave  
Any, seems a losing.

'A losing' to Mr. Cranch, of course—but this *en passant*. It will be seen here that the intention is trochaic, although we do *not* see this intention by the opening foot, as we should do—or even by the opening line. Reading the whole stanza, however, we perceive the trochaic rhythm as the general design, and so, after some reflection, we divide the first line thus :

Many are the | thoughts thăt | cōme tō mē. |

Thus scanned, the line will seem musical. It *is*—highly so. And it is because there is no end to instances of just such lines of apparently incomprehensible music, that Coleridge thought proper to invent his nonsensical *system* of what he calls 'scanning by accents'—as if 'scanning by accents' were anything more than a phrase. Wherever 'Christabel' is really *not rough*, it can be as readily scanned by the true *laws* (not the supposititious *rules*) of verse as can the simplest pentameter of Pope ; and where it *is* rough (*passim*), these same laws will enable any one of common-sense to show *why* it is rough, and to point out, instantaneously, the remedy for the roughness.

*A* reads and re-reads a certain line, and pronounces it false in rhythm—unmusical. *B*, however, reads it to *A*, and *A* is at once struck with the perfection of the rhythm, and wonders at his dulness in not 'catching' it before. Henceforward he admits the line to be musical. *B*, triumphant, asserts that, to be sure, the line is musical—for it is the work of Coleridge,—and that it is *A* who is *not* ; the fault being in *A*'s false reading. Now here *A* is

right and *B* wrong. *That* rhythm is erroneous (at some point or other more or less obvious) which *any* ordinary reader *can*, without design, read improperly. It is the business of the poet so to construct his line that the intention *must* be caught *at once*. Even when these men have precisely the same understanding of a sentence, they differ, and often widely, in their modes of enunciating it. Any one who has taken the trouble to examine the topic of emphasis (by which I here mean not *accent* of particular syllables, but the dwelling on entire words), must have seen that men emphasize in the most singularly arbitrary manner. There are certain large classes of people, for example, who persist in emphasizing their monosyllables. Little uniformity of emphasis prevails; because the thing itself—the idea, emphasis—is referable to no natural, at least to no well-comprehended, and therefore uniform, law. Beyond a very narrow and vague limit the whole matter is conventionality. And if we differ in emphasis even when we agree in comprehension, how much more so in the former when in the latter too! Apart, however, from the consideration of natural disagreement, is it not clear that, by tripping here and mouthing there, any sequence of words may be twisted into any species of rhythm? But are we thence to deduce that all sequences of words are rhythmical in a rational understanding of the term?—for this is the deduction, precisely, to which the *reductio ad absurdum* will, in the end, bring all the propositions of Coleridge. Out of a hundred readers of ‘Christabel’, fifty will be able to make nothing of its rhythm, while forty-nine of the remaining fifty will, with some ado, fancy they comprehend it, after the fourth or fifth perusal. The one out of the whole hundred who shall both comprehend and admire it at first sight must be an unaccountably clever person—and I am by far too modest to assume, for a moment, that that very clever person is myself.

In illustration of what is here advanced I cannot do better than quote a poem:

Pease porridge hot—pease porridge cold—  
Pease porridge in the pot—nine days old.

Now those of my readers who have never *heard* this poem

pronounced according to the nursery conventionality, will find its rhythm as obscure as an explanatory note ; while those who *have* heard it, will divide it thus, declare it musical, and wonder how there can be any doubt about it.

Pease | porridge | hot | pease | porridge | cold |  
 Pease | porridge | in the | pot | nine | days | old. |

The chief thing in the way of this species of rhythm, is the necessity which it imposes upon the poet of travelling in constant company with his compositions, so as to be ready, at a moment's notice, to avail himself of a well-understood poetical license—that of reading aloud one's own doggerel.

In Mr. Cranch's line,

Many are the | thoughts that | come to | me, |

the general error of which I speak is, of course, very partially exemplified, and the purpose for which, chiefly, I cite it, lies yet farther on in our topic.

The two divisions, '*thoughts that*' and '*come to*', are ordinary trochees. Of the last division, '*me*', we will talk hereafter. The first division, '*many are the*', would be thus accented by the Greek Prosodies, '*māny āre thē*', and would be called by them ἀστρολόγος. The Latin books would style the foot *Pæon Primus*, and both Greek and Latin would swear that it was composed of a trochee and what they term a pyrrhic—that is to say, a foot of two short syllables—a thing that *cannot be*, as I shall presently show.

But now, there is an obvious difficulty. The *astrologos*, according to the Prosodies' own showing, is equal to *five* short syllables, and the trochee to *three*—yet, in the line quoted, these two feet are equal. They occupy *precisely* the same time. In fact, the whole music of the line depends upon their being *made* to occupy the same time. The Prosodies then, have demonstrated what all mathematicians have stupidly failed in demonstrating—that three and five are one and the same thing.

After what I have already said, however, about the bastard trochee and the bastard iambus, no one can have any trouble in understanding that *many are the* is of similar character. It is merely a bolder variation than usual from the routine of trochees, and introduces to the bastard

trochee one additional syllable. But this syllable is not *short*. That is, it is not short in the sense of 'short' as applied to the final syllable of the ordinary trochee, where the word means merely *the half of long*.

In this case (that of the additional syllable), 'short', if used at all, must be used in the sense of *the sixth of long*. And all the three final syllables can be called *short* only with the same understanding of the term. The three together are equal only to the one short syllable (whose place they supply) of the ordinary trochee. It follows that there is no sense in thus (˘) accenting these syllables. We must devise for them some new character which shall denote the sixth of long. Let it be (◌) —the crescent placed with the curve to the left. The whole foot (māny are thē) might be called a *quick trochee*.

We come now to the final division, 'me', of Mr. Cranch's line. It is clear that this foot, short as it appears, is fully equal in time to each of the preceding. It is in fact the caesura—the foot which, in the beginning of this paper, I called the most important in all verse. Its chief office is that of pause or termination; and here—at the end of a line—its use is easy, because there is no danger of misapprehending its value. We pause on it, by a seeming necessity, just as long as it has taken us to pronounce the preceding feet, whether iambuses, trochees, dactyls, or anapaests. It is thus a *variable foot*, and, with some care, may be well introduced into the body of a line, as in a little poem of great beauty by Mrs. Welby:

I have | a lit | tle step | son | of on | ly three | years old. |

Here we dwell on the caesura, *son*, just as long as it requires us to pronounce either of the preceding or succeeding iambuses. Its value, therefore, in this line, is that of three short syllables. In the following dactylic line its value is that of four short syllables.

Pale as a | lily was | Emily | Gray.

I have accented the caesura with a dotted line (.....) by way of expressing this variability of value.

I observed just now that there could be no such foot as one of two short syllables. What we start from in the

very beginning of all idea on the topic of verse, is quantity, *length*. Thus when we enunciate an independent syllable it is long, as a matter of course. If we enunciate two, dwelling on both equally, we express equality in the enumeration, or length, and have a right to call them two long syllables. If we dwell on one more than the other, we have also a right to call one short, because it is short in relation to the other. But if we dwell on both equally and with a tripping voice, saying to ourselves here are two short syllables, the query might well be asked of us—‘in relation to what are they short?’ Shortness is but the negation of length. To say, then, that two syllables, placed independently of any other syllable, are short, is merely to say that they have no positive length, or enunciation—in other words that they are no syllables—that they do not exist at all. And if, persisting, we add anything about their equality, we are merely floundering in the idea of an identical equation, where,  $x$  being equal to  $x$ , nothing is shown to be equal to zero. In a word, we can form no conception of a pyrrhic as of an independent foot. It is a mere chimera bred in the mad fancy of a pedant.

From what I have said about the equalization of the several feet of a *line*, it must not be deduced that any *necessity* for equality in time exists between the rhythm of *several* lines. A poem, or even a stanza, may begin with iambuses, in the first line, and proceed with anapaests in the second, or even with the less accordant dactyls, as in the opening of quite a pretty specimen of verse by Miss Mary A. S. Aldrich.

The wa | ter li | ly sleeps | in pride | .....  
Dōwn in thē | dēpths ōf thē | āzure | lake. |

Here *azure* is a spondee, equivalent to a dactyl; *lake*, a caesura.

I shall now best proceed in quoting the initial lines of Byron's ‘Bride of Abydos’:

Know ye the land where the cypress and myrtle  
Are emblems of deeds that are done in their clime—  
Where the rage of the vulture, the love of the turtle  
Now melt into softness, now madden to crime?  
Know ye the land of the cedar and vine,  
Where the flowers ever blossom, the beams ever shine,

And the light wings of Zephyr, oppressed with perfume,  
 Wax faint o'er the gardens of Gul in their bloom ?  
 Where the citron and olive are fairest of fruit  
 And the voice of the nightingale never is mute ;

Where the virgins are soft as the roses they twine,  
 And all save the spirit of man is divine ?  
 'Tis the land of the East—'tis the clime of the Sun—  
 Can he smile on such deeds as his children have done ?  
 Oh, wild as the accents of lovers' farewell  
 Are the hearts that they bear and the tales that they tell !

Now the flow of these lines (as times go) is very sweet and musical. They have been often admired, and justly—as times go,—that is to say, it is a rare thing to find better versification of its kind. And where verse is pleasant to the ear, it is silly to find fault with it because it refuses to be scanned. Yet I have heard men, professing to be scholars, who made no scruple of abusing these lines of Byron's on the ground that they were musical in spite of *all law*. Other gentlemen, *not* scholars, abused 'all law' for the same reason ; and it occurred neither to the one party nor to the other that the law about which they were disputing might possibly be no law at all—an ass of a law in the skin of a lion.

The grammars said something about dactylic lines, and it was easily seen that *these* lines were at least meant for dactylic. The first one was, therefore, thus divided :

Knōw yě thě | lānd whěre thě | cyprēs ānd | myrtlē. |

The concluding foot was a mystery ; but the Prosodies said something about the dactylic 'measure' calling now and then for a double rhyme ; and the court of inquiry were content to rest in the double rhyme, without exactly perceiving what a double rhyme had to do with the question of an irregular foot. Quitting the first line, the second was thus scanned :

Arē ēmblēms | of dēeds thāt | āre dōne in | thěir clīme. |

It was immediately seen, however, that *this* would not do,—it was at war with the whole emphasis of the reading. It could not be supposed that Byron, or any one in his senses, intended to place stress upon such monosyllables as 'are', 'of', and 'their', nor could 'their clime',

collated with 'to crime', in the corresponding line below, be fairly twisted into anything like a 'double rhyme', so as to bring everything within the category of the grammars. But farther these grammars spoke not. The inquirers, therefore, in spite of their sense of harmony in the lines, when considered without reference to scansion, fell back upon the idea that the 'Are' was a blunder,—an excess for which the poet should be sent to Coventry,—and, striking it out, they scanned the remainder of the line as follows :

— emblems of | deeds that are | done in their | clime. |

This answered pretty well ; but the grammars admitted no such foot as a foot of one syllable ; and besides the rhythm was dactylic. In despair, the books are well searched, however, and at last the investigators are gratified by a full solution of the riddle in the profound 'Observation' quoted in the beginning of this article :—'When a syllable is wanting, the verse is said to be catalectic ; when the measure is exact, the line is acatalectic ; when there is a redundant syllable it forms hypermeter.' This is enough. The anomalous line is pronounced to be catalectic at the head and to form hypermeter at the tail,—and so on, and so on ; it being soon discovered that nearly all the remaining lines are in a similar predicament, and that what flows so smoothly to the ear, although so roughly to the eye, is, after all, a mere jumble of catalecticism, acatalecticism, and hypermeter—not to say worse.

Now, had this court of inquiry been in possession of even the shadow of the *philosophy* of verse, they would have had no trouble in reconciling this oil and water of the eye and ear, by merely scanning the passage without reference to lines, and, continuously, thus :

Know ye the | land where the | cypress and | myrtle Are | emblems  
of | deeds that are | done in their | clime Where the | rage of the |  
vulture the | love of the | turtle Now | melt into | softness now |  
madden to | crime | Know ye the | land of the | cedar and | vine  
Where the | flowers ever | blossom the | beams ever | shine Where  
the | light wings of | Zephyr op | pressed with per | fume Wax |  
faint o'er the | gardens of | Gul in their | bloom Where the | citron  
and | olive are | fairest of | fruit And the | voice of the | nightingale |  
never is | mute Where the | virgins are | soft as the | roses they |

*twine And* | all save the | spirit of | man is di | vine 'Tis the | land of  
the | East 'tis the | clime of the | Sun Can he | smile on such | deeds  
as his | children have | *done Oh* | wild as the | accents of | lovers'  
fare | well Are the | hearts that they | bear and the | tales that  
they | tell.

Here 'crime' and 'tell' (italicized) are caesuras, each having the value of a dactyl, four short syllables; while '*fume Wax*', '*twine And*', and '*done Oh*', are spondees, which, of course, being composed of two long syllables, are also equal to four short, and are the dactyl's natural equivalent. The nicety of Byron's ear has led him into a succession of feet which, with two trivial exceptions as regards melody, are absolutely accurate—a very rare occurrence this in dactylic or anapaestic rhythms. The exceptions are found in the spondee '*twine And*', and the dactyl, '*smile on such*'. Both feet are false in point of melody. In '*twine And*', to make out the rhythm, we must force '*And*' into a length which it will not naturally bear. We are called on to sacrifice either the proper length of the syllable as demanded by its position as a member of a spondee, or the customary accentuation of the word in conversation. There is no hesitation, and should be none. We at once give up the sound for the sense; and the rhythm is imperfect. In this instance it is *very* slightly so;—not one person in ten thousand could, by ear, detect the inaccuracy. But the *perfection* of verse, as regards melody, consists in its *never* demanding any such sacrifice as is here demanded. The rhythmical must agree, *thoroughly*, with the reading flow. This perfection has in no instance been attained—but is unquestionably attainable. '*Smile on such*', the dactyl, is incorrect, because '*such*', from the character of the two consonants *ch*, cannot *easily* be enunciated in the ordinary time of a short syllable, which its position declares that it is. Almost every reader will be able to appreciate the slight difficulty here; and yet the error is by no means so important as that of the '*And*' in the spondee. By dexterity we *may* pronounce '*such*' in the true time; but the attempt to remedy the rhythmical deficiency of the '*And*' by drawing it out, merely aggravates the offence against natural enunciation, by directing attention to the offence.

My main object, however, in quoting these lines, is to show that, in spite of the Prosodies, the length of a line is entirely an arbitrary matter. We might divide the commencement of Byron's poem thus :

Know ye the | land where the |

or thus :

Know ye the | land where the | cypress and |

or thus :

Know ye the | land where the | cypress and | myrtle are |

or thus :

Know ye the | land where the | cypress and | myrtle are | emblems of |

In short, we may give it any division we please, and the lines will be good—provided we have at least *two* feet in a line. As in mathematics two units are required to form number, so rhythm (from the Greek ἀριθμός, number) demands for its formation at least two feet. Beyond doubt, we often see such lines as

Know ye the—  
Land where the—

lines of one foot ; and our Prosodies admit such ; but with impropriety : for common-sense would dictate that every so obvious division of a poem as is made by a line, should include within itself all that is necessary for its own comprehension ; but in a line of one foot we can have no appreciation of *rhythm*, which depends upon the equality between *two* or more pulsations. The false lines, consisting sometimes of a single caesura, which are seen in mock Pindaric odes, are of course 'rhythmical' only in connection with some other line ; and it is this want of independent rhythm which adapts them to the purposes of burlesque alone. Their effect is that of incongruity (the principle of mirth), for they include the blankness of prose amid the harmony of verse.

My second object in quoting Byron's lines, was that of showing how absurd it often is to cite a single line from amid the body of a poem, for the purpose of instancing the perfection or imperfection of the line's rhythm. Were we to see by itself

Know ye the land where the cypress and myrtle,

we might justly condemn it as defective in the final foot, which is equal to only three, instead of being equal to four, short syllables.

In the foot '*flowers ever*' we shall find a further exemplification of the principle of the bastard iambus, bastard trochee, and quick trochee, as I have been at some pains in describing these feet above. All the Prosodies on English verse would insist upon making an elision in '*flowers*', thus '*flow'rs*', but this is nonsense. In the quick trochee '*māny are the*' occurring in Mr. Cranch's *trochaic* line, we had to equalize the time of the three syllables '*any, are, the*' to that of the one *short* syllable whose position they usurp. Accordingly each of these syllables is equal to the third of a short syllable—that is to say, the *sixth of a long*. But in Byron's *dactylic* rhythm, we have to equalize the time of the three syllables '*ers, ev, er*' to that of the one *long* syllable whose position they usurp, or (which is the same thing) of the *two short*. Therefore, the value of each of the syllables '*ers, ev, and er*' is the *third of a long*. We enunciate them with only half the rapidity we employ in enunciating the three final syllables of the quick trochee—which latter is a rare foot. The '*flowers ever*', on the contrary, is as common in the dactylic rhythm as is the *bastard* trochee in the trochaic, or the bastard iambus in the iambic. We may as well accent it with the curve of the crescent to the right, and call it a *bastard dactyl*. A *bastard anapaest*, whose nature I now need be at no trouble in explaining, will of course occur, now and then, in an anapaestic rhythm.

In order to avoid any chance of that confusion which is apt to be introduced in an essay of this kind by too sudden and radical an alteration of the conventionalities to which the reader has been accustomed, I have thought it right to suggest for the accent marks of the bastard trochee, bastard iambus, &c., &c., certain characters which, in merely varying the direction of the ordinary short accent (˘), should imply, what is the fact, that the feet themselves are not *new* feet, in any proper sense, but simply modifications of the feet, respectively, from which they derive their names. Thus a bastard iambus is, in its essentiality, —that is to say, in its time,—an iambus. The variation

lies only in the *distribution* of this time. The time, for example, occupied by the one short (or *half of long*) syllable, in the ordinary iambus, is, in the bastard, spread equally over two syllables, which are accordingly the *fourth of long*.

But this fact—the fact of the essentiality, or whole time, of the foot being unchanged—is now so fully before the reader that I may venture to propose, finally, an accentuation which shall answer the real purpose—that is to say, what should be the real purpose—of all accentuation: the purpose of expressing to the eye the exact relative value of every syllable employed in Verse.

I have already shown that enunciation, or *length*, is the point from which we start. In other words, we begin with a *long syllable*. This, then, is our unit; and there will be no need of accenting it at all. An unaccented syllable, in a system of accentuation, is to be regarded always as a long syllable. Thus a spondee would be without accent. In an iambus, the first syllable being ‘short’, or the *half of long*, should be accented with a small 2, placed *beneath* the syllable; the last syllable, being long, should be unaccented: the whole would be thus (control).

In a trochee, these accents would be merely conversed, thus (manly). In a dactyl, each of the two final syllables,

being the <sup>2</sup>half of long, should, also, be accented with a small 2 beneath the syllable; and, the first syllable left unaccented, the whole would be thus (happiness). In an anapaest we should converse the dactyl, thus <sup>2</sup>(in <sup>2</sup>the land).

In the bastard dactyl, each of the three concluding <sup>2</sup>syllables being the *third* of long, should be accented with a small 3 beneath the syllable, and the whole foot would stand thus (flowers

ever). In the bastard anapaest we should converse the <sup>3</sup>bastard dactyl, thus <sup>3</sup>(in <sup>3</sup>the rebound).

In the bastard iambus, each of the two <sup>3</sup>initial <sup>3</sup>syllables, being the *fourth* of long, should be accented below with a small 4; the whole foot would be thus (in the rain). In the bastard

trochee we should converse the <sup>4</sup>bastard iambus, thus <sup>4</sup>(many a). In the quick trochee, each of the three conclud-

ing syllables, being the *sixth* of long, should be accented below with a small 6 ; the whole foot would be thus (many are the). The quick iambus is not yet created, and most probably never will be, for it will be excessively useless, awkward, and liable to misconception,—as I have already shown that even the quick trochee is,—but, should it appear, we must accent it by conversing the quick trochee. The caesura, being variable in length, but always *longer than 'long'*, should be accented *above*, with a number expressing the length or value of the distinctive foot of the rhythm in which it occurs. Thus a caesura, occurring in a spondaic rhythm, would be accented with a small 2 above the syllable, or, rather, foot. Occurring in a dactylic or anapaestic rhythm, we also accent it with the 2, above the foot. Occurring in an iambic rhythm, however, it must be accented, above, with  $1\frac{1}{2}$ , for this is the relative value of the iambus. Occurring in the trochaic rhythm, we give it, of course, the same accentuation. For the complex  $1\frac{1}{2}$ , however, it would be advisable to substitute the simpler expression,  $\frac{3}{2}$ , which amounts to the same thing.

In this system of accentuation Mr. Cranch's lines, quoted above, would thus be written :

Many are the | thoughts that | come to | me <sup>$\frac{3}{2}$</sup>   
<sup>6</sup> <sup>6</sup> <sup>6</sup> <sup>2</sup> <sup>2</sup>  
 In my | lonely | musing, |  
<sup>2</sup> <sup>2</sup> <sup>2</sup>  
 And they | drift so | strange and | swift <sup>$\frac{3}{2}$</sup>   
<sup>2</sup> <sup>2</sup> <sup>2</sup>  
 There's no | time for | choosing |  
<sup>2</sup> <sup>2</sup> <sup>2</sup>  <sup>$\frac{3}{2}$</sup>   
 Which to | follow, | for to | leave  
<sup>2</sup> <sup>2</sup> <sup>2</sup>  
 Any | seems a | losing. |  
<sup>2</sup> <sup>2</sup>

In the ordinary system the accentuation would be thus :

Māny arē thē | thōughts thāt | cōme tō | mē  
 In my | lōnely | mūsing. |  
 And thēy | drift sō | strānge ānd | swift |  
 Thēre's nō | tīme fōr | choōsing |  
 Which tō | fōllōw, | fōr tō | leave  
 Any | sēems ā | lōsing. |

It must be observed here that I do not grant this to be the 'ordinary' *scansion*. On the contrary, I never yet met the man who had the faintest comprehension of the true scanning of these lines, or of such as these. But granting this to be the mode in which our Prosodies would divide the feet, they would accentuate the syllables as just above.

Now, let any reasonable person compare the two modes. The first advantage seen in my mode is that of simplicity—of time, labour, and ink saved. Counting the fractions as *two* accents, even, there will be found only *twenty-six* accents to the stanza. In the common accentuation there are *forty-one*. But admit that all this is a trifle, which it is *not*, and let us proceed to points of importance. Does the common accentuation express the truth in particular, in general, or in any regard? Is it consistent with itself? Does it convey either to the ignorant or to the scholar a just conception of the rhythm of the lines? Each of these questions must be answered in the negative. The crescents, being precisely similar, must be understood as expressing, all of them, one and the same thing; and so all Prosodies have always understood them and wished them to be understood. They express, indeed, 'short'; but this word has all kinds of meanings. It serves to represent (the reader is left to guess *when*) sometimes the half, sometimes the third, sometimes the fourth, sometimes the sixth of 'long'; while 'long' itself, in the books, is left undefined and undescribed. On the other hand, the horizontal accent, it may be said, expresses sufficiently well and unvaryingly the syllables which are meant to be long. It does nothing of the kind. This horizontal accent is placed over the caesura (wherever, as in the Latin Prosodies, the caesura is recognized) as well as over the ordinary long syllable, and implies anything and everything, just as the crescent. But grant that it does express the ordinary long syllables (leaving the caesura out of question), have I not given the identical expression by not employing any expression at all? In a word, while the Prosodies, with a certain number of accents express *precisely nothing whatever*, I, with scarcely half the number, have expressed everything which, in a system of accentua-

tion, demands expression. In glancing at my mode in the lines of Mr. Cranch it will be seen that it conveys not only the exact relation of the syllables and feet, among themselves, in those particular lines, but their precise value in relation to any other existing or conceivable feet or syllables in any existing or conceivable system of rhythm.

The object of what we call *scansion* is the distinct marking of the rhythmical flow. Scansion with accents or perpendicular lines between the feet—that is to say, scansion *by the voice only*—is scansion *to the ear only*; and all very good in its way. The written scansion addresses the ear through the eye. In either case the object is the distinct marking of the rhythmical, musical, or reading flow. There *can* be no other object, and there is none. Of course, then, the scansion and the reading flow should go hand-in-hand. The former must agree with the latter. The former represents and expresses the latter; and is good or bad as it truly or falsely represents and expresses it. If by the written scansion of a line we are not enabled to perceive any rhythm or music in the line, then either the line is unrhythmical or the scansion false. Apply all this to the English lines which we have quoted, at various points, in the course of this article. It will be found that the scansion exactly conveys the rhythm, and thus thoroughly fulfils the only purpose for which scansion is required.

But let the scansion *of the schools* be applied to the Greek and Latin verse, and what result do we find?—that the verse is one thing and the scansion quite another. The ancient verse, *read* aloud, is in general musical, and occasionally *very* musical. *Scanned* by the prosodial rules we can, for the most part, make nothing of it whatever. In the case of the English verse, the more emphatically we dwell on the divisions between the feet, the more distinct is our perception of the kind of rhythm intended. In the case of the Greek and Latin, the more we dwell the *less* distinct is this perception. To make this clear by an example:

Mæcenas, atavis edite regibus,  
O, et præsidium et dulce decus meum,  
Sunt quos curriculo pulverem Olympicum  
Collegisse juvat, metaque fervidis  
Evitata rotis, palmaque nobilis  
Terrarum dominos evehit ad Deos.

Now in *reading* these lines, there is scarcely one person in a thousand who, if even ignorant of Latin, will not immediately feel and appreciate their flow—their music. A prosodist, however, informs the public that the *scansion* runs thus :

Maece | nas ata | vis | edite | regibus |  
 O et | praesidi' | et | dulce de | cus meum |  
 Sunt quos | curricu | lo | pulver' O | lympicum  
 Colle | gisse ju | vat | metaque | fervidis |  
 Evi | tata ro | tis | palmaque | nobilis |  
 Terra | rum domi | nos | evehit | ad Deos. |

Now I do not deny that we get a *certain sort* of music from the lines if we read them according to this scansion, but I wish to call attention to the fact that this scansion, and the certain sort of music which grows out of it, are entirely at war not only with the reading flow which any ordinary person would naturally give the lines, but with the reading flow universally given them, and never denied them, by even the most obstinate and stolid of scholars.

And now these questions are forced upon us : 'Why exists this discrepancy between the modern verse with its scansion, and the ancient verse with its scansion ?'—'Why, in the former case, are there agreement and representation, while in the latter there is neither the one nor the other ?' or, to come to the point,—'How are we to reconcile the ancient verse with the scholastic scansion of it ?' This absolutely necessary conciliation—shall we bring it about by supposing the scholastic scansion wrong because the ancient verse is right, or by maintaining that the ancient verse is wrong because the scholastic scansion is not to be gainsaid ?

Were we to adopt the latter mode of arranging the difficulty, we might, in some measure, at least simplify the expression of the arrangement by putting it thus : Because the pedants have no eyes, therefore the old poets had no ears.

'But,' say the gentlemen without the eyes, 'the scholastic scansion, although certainly not handed down to us in form from the old poets themselves (the gentlemen without the ears), is nevertheless deduced from certain facts which are supplied us by careful observation of the old poems.'

And let us illustrate this strong position by an example from an American poet—who must be a poet of some eminence, or he will not answer the purpose. Let us take Mr. Alfred B. Street. I remember these two lines of his :

His sinuous path, by blazes, wound  
Among trunks grouped in myriads round.

With the *sense* of these lines I have nothing to do. When a poet is in a 'fine frenzy', he may as well imagine a large forest as a small one ; and 'by blazes' is *not* intended for an oath. My concern is with the rhythm, which is iambic.

Now let us suppose that, a thousand years hence, when the 'American language' is dead, a learned prosodist should be deducing, from 'careful observation' of our best poets, a system of scansion for our poetry. And let us suppose that this prosodist had so little dependence in the generality and immutability of the laws of Nature, as to assume in the outset, that, because we lived a thousand years before his time, and made use of steam-engines instead of mesmeric balloons, we must therefore have had a *very* singular fashion of mouthing our vowels, and altogether of Hudsonizing our verse. And let us suppose that with these and other fundamental propositions carefully put away in his brain, he should arrive at the line,—

Among | trunks grouped | in my | riads round.

Finding it an obviously iambic rhythm, he would divide it as above ; and observing that 'trunks' made the first member of an iambus, he would call it short, as Mr. Street intended it to be. Now farther, if instead of admitting the possibility that Mr. Street (who by that time would be called Street simply, just as we say Homer)—that Mr. Street might have been in the habit of writing carelessly, as the poets of the prosodist's own era did, and as all poets will do (on account of being geniuses),—instead of admitting this, suppose the learned scholar should make a 'rule' and put it in a book, to the effect that, in the American verse, the vowel *u*, *when found imbedded among nine consonants*, was *short*, what, under such circumstances, would the sensible people of the scholar's day have a right not only to think but to say of that scholar?—why, that he was 'a fool—by blazes !'

I have put an extreme case, but it strikes at the root of the error. The 'rules' are grounded in 'authority'; and this 'authority'—can any one tell us what it means? or can any one suggest anything that it may *not* mean? Is it not clear that the 'scholar' above referred to, might as readily have deduced from authority a totally false system as a partially true one? To deduce from authority a consistent prosody of the ancient metres would indeed have been within the limits of the barest possibility; and the task has *not* been accomplished, for the reason that it demands a species of ratiocination altogether out of keeping with the brain of a bookworm. A rigid scrutiny will show that the very few 'rules' which have not as many exceptions as examples, are those which have, by accident, their true bases not in authority, but in the omniprevalent laws of syllabification; such, for example, as the rule which declares a vowel before two consonants to be long.

In a word, the gross confusion and antagonism of the scholastic prosody, as well as its marked inapplicability to the reading flow of the rhythms it pretends to illustrate, are attributable, first, to the utter absence of natural principle as a guide in the investigations which have been undertaken by inadequate men; and secondly to the neglect of the obvious consideration that the ancient poems, which have been the *criteria* throughout, were the work of men who must have written as loosely, and with as little definitive system, as ourselves.

Were Horace alive to-day, he would divide for us his first Ode thus, and 'make great eyes' when assured by prosodists that he had no business to make any such division:—

Maecenas | atavis | edite | regibus  
<sup>2 2</sup> <sup>2 2</sup> <sup>2 2</sup> <sup>2 2</sup>  
 O et præ | sidium et | dulce de | cus meum |  
<sup>2 2</sup> <sup>3 3 3</sup> <sup>2 2</sup> <sup>2 2</sup>  
 Sunt quos cur | riculo | pulverem O | lympicum |  
<sup>2 2</sup> <sup>2 2</sup> <sup>3 3 3</sup> <sup>2 2</sup>  
 Collegisse | juvat | metaque | fervidis |  
<sup>3 3 3</sup> <sup>2 2</sup> <sup>2 2</sup> <sup>2 2</sup>  
 Evitata | rotis | palmaque | nobilis  
<sup>3 3 3</sup> <sup>2 2</sup> <sup>2 2</sup> <sup>2 2</sup>  
 Terrarum | dominos | evehit | ad Deos.  
<sup>2 2</sup> <sup>2 2</sup> <sup>2 2</sup> <sup>2 2</sup>

Read by this scansion, the flow is preserved; and the

more we dwell on the divisions, the more the intended rhythm becomes apparent. Moreover, the feet have all the same time ; while, in the scholastic scansion, trochees—admitted trochees—are absurdly employed as equivalents to spondees and dactyls. The books declare, for instance, that *Colle*, which begins the fourth line, is a trochee, and seem to be gloriously unconscious that to put a trochee in opposition with a longer foot, is to violate the inviolable principle of all music, *time*.

It will be said, however, by 'some people', that I have no business to make a dactyl out of such obviously long syllables as *sunt, quos, cur*. Certainly I have no business to do so. I *never* do so. And Horace should not have done so. But he did. Mr. Bryant and Mr. Longfellow do the same thing every day. And merely because these gentlemen, now and then, forget themselves in this way, it would be hard if some future prosodist should insist upon twisting the 'Thanatopsis', or the 'Spanish Student', into a jumble of trochees, spondees, and dactyls.

It may be said, also, by some other people, that in the word *decus*, I have succeeded no better than the books, in making the scansional agree with the reading flow ; and that *decus* was not pronounced *decus*. I reply, that there can be no doubt of the word having been pronounced, in this case, *decus*. It must be observed, that the Latin inflection, or variation of a word in its terminating syllable, caused the Romans—*must* have caused them—to pay greater attention to the termination of a word than to its commencement, or than we do to the terminations of our words. The end of the Latin word established that relation of the word with other words which we establish by prepositions or auxiliary verbs. Therefore, it would seem infinitely less odd to them than it does to us, to dwell at any time, for any slight purpose, abnormally, on a terminating syllable. In verse, this license—scarcely a license—would be frequently admitted. These ideas unlock the secret of such lines as the

*Litoreis ingens inventa sub ilicibus sus,*

and the

*Parturiunt montes ; nascetur ridiculus mus,*

which I quoted, some time ago, while speaking of rhyme.

As regards the prosodial elisions, such as that of *rem* before *O*, in *pulverem Olympicum*, it is really difficult to understand how so dismally silly a notion could have entered the brain even of a pedant. Were it demanded of me why the books cut off one *vowel* before another, I might say : It is, perhaps, because the books think that, since a bad reader is so apt to slide the one vowel into the other at any rate, it is just as well to print them *ready-slided*. But in the case of the terminating *m*, which is the most readily pronounced of all consonants (as the infantile *mamma* will testify), and the most impossible to cheat the ear of by any system of sliding—in the case of the *m*, I should be driven to reply that, to the best of my belief, the prosodists did the thing, because they had a fancy for doing it, and wished to see how funny it would look after it was done. The thinking reader will perceive that, from the great facility with which *em* may be enunciated, it is admirably suited to form one of the rapid short syllables in the bastard dactyl (*pulverem O*) ; but because the books had no conception of a <sup>3</sup> <sup>3</sup> <sup>3</sup> bastard dactyl, they knocked it on the head at once—by cutting off its tail !

Let me now give a specimen of the true scansion of another Horatian measure—embodying an instance of proper elision.

Integer | vitæ | scelerisque | purus |  
<sup>2</sup> <sup>2</sup> <sup>3</sup> <sup>3</sup> <sup>3</sup>  
 Non eget | Mauri | jaculis ne | que arcu |  
<sup>2</sup> <sup>2</sup> <sup>3</sup> <sup>3</sup> <sup>3</sup>  
 Nec vene | natis | grvida sa | gittis |  
<sup>2</sup> <sup>2</sup> <sup>3</sup> <sup>3</sup> <sup>3</sup>  
 Fusce pha | retrâ.  
<sup>2</sup> <sup>2</sup>

Here the regular recurrence of the bastard dactyl gives great animation to the rhythm. The *e* before the *a* in *que arcu*, is, almost of sheer necessity, cut off—that is to say, run into the *a* so as to preserve the spondee. But even this license it would have been better not to take.

Had I space, nothing would afford me greater pleasure than to proceed with the scansion of *all* the ancient rhythms, and to show how easily, by the help of common-sense, the intended music of each and all can be rendered instantaneously apparent. But I have already overstepped my limits, and must bring this paper to an end.

It will never do, however, to omit all mention of the heroic hexameter.

I began the 'processes' by a suggestion of the spondee as the first step toward verse. But the innate monotony of the spondee has caused its disappearance, as the basis of rhythm, from all modern poetry. We *may* say, indeed, that the French heroic—the most wretchedly monotonous verse in existence—is, to all intents and purposes, spondaic. But it is not designedly spondaic—and if the French were ever to examine it at all, they would no doubt pronounce it iambic. It must be observed that the French language is strangely peculiar in this point—that *it is without accentuation, and consequently without verse*. The genius of the people, rather than the structure of the tongue, declares that their words are, for the most part, enunciated with a uniform dwelling on each syllable. For example, we say 'syllabification'. A Frenchman would say syl-la-bi-fi-ca-ti-on; dwelling on no one of the syllables with any noticeable particularity. Here again I put an extreme case, in order to be well understood; but the general fact is as I give it—that, comparatively, the French have *no* accentuation. And there can be nothing worth the name of verse without. Therefore, the French have no verse worth the name—which is the fact, put in sufficiently plain terms. Their iambic rhythm so superabounds in absolute spondees, as to warrant me in calling its basis spondaic; but French is the *only* modern tongue which has any rhythm with such basis; and even in the French, it is, as I have said, unintentional.

Admitting, however, the validity of my suggestion, that the spondee was the first approach to verse, we should expect to find, first, natural spondees (words each forming just a spondee) most abundant in the most ancient languages; and, secondly, we should expect to find spondees forming the basis of the most ancient rhythms. These expectations are in both cases confirmed.

Of the Greek hexameter, the intentional basis is spondaic. The dactyls are the *variation* of the theme. It will be observed that there is no absolute certainty about *their* points of interposition. The penultimate foot, it is true, is usually a dactyl; but not uniformly so; while the ultimate, on

which the ear *lingers*, is always a spondee. Even that the penultimate is usually a dactyl may be clearly referred to the necessity of winding up with the *distinctive* spondee. In corroboration of this idea, again, we should look to find the penultimate spondee most usual in the most ancient verse; and, accordingly, we find it more frequent in the Greek than in the Latin hexameter.

But besides all this, spondees are not only more prevalent in the heroic hexameter than dactyls, but occur to such an extent as is even unpleasant to modern ears, on account of monotony. What the modern chiefly appreciates and admires in the Greek hexameter, is the *melody of the abundant vowel sounds*. The Latin hexameters *really* please very few moderns—although so many pretend to fall into ecstasies about them. In the hexameters quoted, several pages ago, from Silius Italicus, the preponderance of the spondee is strikingly manifest. Besides the natural spondees of the Greek and Latin, numerous artificial ones arise in the verse of these tongues on account of the tendency which inflection has to throw full accentuation on terminal syllables; and the preponderance of the spondee is farther insured by the comparative infrequency of the small prepositions which *we* have to serve us *instead* of case, and also the absence of the diminutive auxiliary verbs with which *we* have to eke out the expression of our primary ones. These are the monosyllables whose abundance serve to stamp the poetic genius of a language as tripping or dactylic.

Now, paying no attention to these facts, Sir Philip Sidney, Professor Longfellow, and innumerable other persons more or less modern, have busied themselves in constructing what they suppose to be 'English hexameters on the model of the Greek'. The only difficulty was that (even leaving out of question the melodious masses of vowels) these gentlemen never could get their English hexameters to *sound* Greek. Did they *look* Greek?—that should have been the query; and the reply might have led to a solution of the riddle. In placing a copy of ancient hexameters side by side with a copy (in similar type) of such hexameters as Professor Longfellow, or Professor Felton, or the Frogpondian Professors collectively, are in

the shameful practice of composing 'on the model of the Greek', it will be seen that the latter (hexameters, not professors) are about one third longer *to the eye*, on an average, than the former. The more abundant dactyls make the difference. And it is the greater number of spondees in the Greek than in the English—in the ancient than in the modern tongue—which has caused it to fall out that while these eminent scholars were groping about in the dark for a Greek hexameter, which is a spondaic rhythm varied now and then by dactyls, they merely stumbled, to the lasting scandal of scholarship, over something which, on account of its long-leggedness, we may as well term a Feltonian hexameter, and which is a dactylic rhythm, interrupted, rarely, by artificial spondees which are no spondees at all, and which are curiously thrown in by the heels at all kinds of improper and impertinent points.

Here is a specimen of the Longfellownian hexameter.

Also the | church with | in was a | dorned for | this was the | season  
 In which the | young their | parents' | hope and the | loved ones of |  
 Heaven |  
 Should at the | foot of the | altar re | new the | vows of their | baptism |  
 Therefore each | nook and | corner was | swept and | cleaned and the |  
 dust was |  
 Blown from the | walls and | ceiling and | from the | oil-painted | benches |

Mr. Longfellow is a man of imagination—but *can* he imagine that any individual, with a proper understanding of the danger of lock-jaw, would make the attempt of twisting his mouth into the shape necessary for the emission of such spondees as 'parents', and 'from the', or such dactyls as 'cleaned and the', and 'loved ones of'? 'Baptism' is by no means a bad spondee—perhaps because it happens to be a dactyl;—of all the rest, however, I am dreadfully ashamed.

But these feet—dactyls and spondees, all together—should thus be put at once into their proper position :

'Also, the church within was adorned ; for this was the season in which the young, their parents' hope, and the loved ones of Heaven, should, at the foot of the altar, renew the vows of their baptism. Therefore each nook and corner was swept and cleaned ; and the dust was blown from the walls and ceiling, and from the oil-painted benches.'

There !—That is respectable prose ; and it will incur no danger of ever getting its character ruined by anybody's mistaking it for verse.

But even when we let these modern hexameters go, as Greek, and merely hold them fast in their proper character of Longfellownian, or Feltonian, or Frogpondian, we must still condemn them as having been committed in a radical misconception of the philosophy of verse. The spondee, as I observed, is the *theme* of the Greek line. Most of the ancient hexameters *begin* with spondees, for the reason that the spondee is the theme ; and the ear is filled with it as with a burden. Now the Feltonian dactyls have, in the same way, dactyls for the theme, and most of them begin with dactyls—which is all very proper if not very Greek,—but, unhappily, the one point at which they *are* very Greek is that point, precisely, at which they should be nothing but Feltonian. They always *close* with what is meant for a spondee. To be consistently silly, they should die off in a dactyl.

That a truly Greek hexameter *cannot*, however, be readily composed in English, is a proposition which I am by no means inclined to admit. I think I could manage the point myself. For example :

Do tell ! | when may we | hope to make | men of sense | out of the |  
Pundits |

Born and brought | up with their | snouts deep | down in the | mud of  
the | Frog-pond ? |

Why ask ? | who ever | yet saw | money made | out of a | fat old |  
Jew, or | downright | upright | nutmegs | out of a | pine-knot ? |

The proper spondee predominance is here preserved. Some of the dactyls are not so good as I could wish—but, upon the whole, the rhythm is very decent—to say nothing of its excellent sense.

**A. GORDON PYM**

## PREFACE

UPON my return to the United States a few months ago, after the extraordinary series of adventure in the South Seas and elsewhere, of which an account is given in the following pages, accident threw me into the society of several gentlemen in Richmond, Va., who felt deep interest in all matters relating to the regions I had visited, and who were constantly urging it upon me, as a duty, to give my narrative to the public. I had several reasons, however, for declining to do so, some of which were of a nature altogether private, and concern no person but myself; others not so much so. One consideration which deterred me was, that, having kept no journal during a greater portion of the time in which I was absent, I feared I should not be able to write, from mere memory, a statement so minute and connected as to have the *appearance* of that truth it would really possess, barring only the natural and unavoidable exaggeration to which all of us are prone when detailing events which have had powerful influence in exciting the imaginative faculties. Another reason was, that the incidents to be narrated were of a nature so positively marvellous, that, unsupported as my assertions must necessarily be (except by the evidence of a single individual, and he a half-breed Indian), I could only hope for belief among my family, and those of my friends who have had reason, through life, to put faith in my veracity—the probability being that the public at large would regard what I should put forth as merely an impudent and ingenious fiction. A distrust in my own abilities as a writer was, nevertheless, one of the principal causes which prevented me from complying with the suggestions of my advisers.

Among those gentlemen in Virginia who expressed the greatest interest in my statement, more particularly in regard to that portion of it which related to the Antarctic Ocean, was Mr. Poe, lately editor of the 'Southern Literary Messenger', a monthly magazine, published by Mr. Thomas W. White, in the city of Richmond. He strongly advised me, among others, to prepare at once a full account of what I had seen and undergone, and trust to the shrewdness

and common-sense of the public—insisting, with great plausibility, that however roughly, as regards mere authorship, my book should be got up, its very uncouthness, if there were any, would give it all the better chance of being received as truth.

Notwithstanding this representation, I did not make up my mind to do as he suggested. He afterward proposed (finding that I would not stir in the matter) that I should allow him to draw up, in his own words, a narrative of the earlier portion of my adventures, from facts afforded by myself, publishing it in the *Southern Messenger* *under the garb of fiction*. To this, perceiving no objection, I consented, stipulating only that my real name should be retained. Two numbers of the pretended fiction appeared, consequently, in the *Messenger* for January and February (1837), and, in order that it might certainly be regarded as fiction, the name of Mr. Poe was affixed to the articles in the table of contents of the magazine.

The manner in which this *ruse* was received has induced me at length to undertake a regular compilation and publication of the adventures in question; for I found that, in spite of the air of fable which had been so ingeniously thrown around that portion of my statement which appeared in the *Messenger* (without altering or distorting a single fact), the public were still not at all disposed to receive it as fable, and several letters were sent to Mr. P.'s address, distinctly expressing a conviction to the contrary. I thence concluded that the facts of my narrative would prove of such a nature as to carry with them sufficient evidence of their own authenticity, and that I had consequently little to fear on the score of popular incredulity.

This *exposé* being made, it will be seen at once how much of what follows I claim to be my own writing; and it will also be understood that no fact is misrepresented in the first few pages which were written by Mr. Poe. Even to those readers who have not seen the *Messenger*, it will be unnecessary to point out where his portion ends and my own commences; the difference in point of style will be readily perceived.

A. G. Pym.

New York, July, 1838.

# NARRATIVE OF A. GORDON PYM

## CHAPTER I

My name is Arthur Gordon Pym. My father was a respectable trader in sea-stores at Nantucket, where I was born. My maternal grandfather was an attorney in good practice. He was fortunate in everything, and had speculated very successfully in stocks of the Edgarton New Bank, as it was formerly called. By these and other means he had managed to lay by a tolerable sum of money. He was more attached to myself, I believe, than to any other person in the world, and I expected to inherit the most of his property at his death. He sent me, at six years of age, to the school of old Mr. Ricketts, a gentleman with only one arm, and of eccentric manners—he is well known to almost every person who has visited New Bedford. I stayed at his school until I was sixteen, when I left him for Mr. E. Ronald's academy on the hill. Here I became intimate with the son of Mr. Barnard, a sea captain, who generally sailed in the employ of Lloyd and Vredenburg—Mr. Barnard is also very well known in New Bedford, and has many relations, I am certain, in Edgarton. His son was named Augustus, and he was nearly two years older than myself. He had been on a whaling voyage with his father in the *John Donaldson*, and was always talking to me of his adventures in the South Pacific Ocean. I used frequently to go home with him, and remain all day, and sometimes all night. We occupied the same bed, and he would be sure to keep me awake until almost light, telling me stories of the natives of the Island of Tinian, and other places he had visited in his travels. At last I could not help being interested in what he said, and by degrees I felt the greatest desire to go to sea. I owned a sail-boat called the *Ariel*, and worth about seventy-five dollars. She had a half deck or cuddy, and was rigged sloop-fashion—I forget her tonnage, but she would hold ten persons without much crowding. In this boat we were in the habit of going on some of the maddest freaks in the world ; and,

when I now think of them, it appears to me a thousand wonders that I am alive to-day.

I will relate one of these adventures by way of introduction to a longer and more momentous narrative. One night there was a party at Mr. Barnard's, and both Augustus and myself were not a little intoxicated towards the close of it. As usual, in such cases, I took part of his bed in preference to going home. He went to sleep, as I thought, very quietly (it being near one when the party broke up), and without saying a word on his favourite topic. It might have been half an hour from the time of our getting in bed, and I was just about falling into a doze, when he suddenly started up, and swore with a terrible oath that he would not go to sleep for any Arthur Pym in Christendom, when there was so glorious a breeze from the south-west. I never was so astonished in my life, not knowing what he intended, and thinking that the wines and liquors he had drunk had set him entirely beside himself. He proceeded to talk very coolly, however, saying he knew that I supposed him intoxicated, but that he was never more sober in his life. He was only tired, he added, of lying in bed on such a fine night like a dog, and was determined to get up and dress, and go out on a frolic with the boat. I can hardly tell what possessed me, but the words were no sooner out of his mouth than I felt a thrill of the greatest excitement and pleasure, and thought his mad idea one of the most delightful and most reasonable things in the world. It was blowing almost a gale, and the weather was very cold—it being late in October. I sprang out of bed, nevertheless, in a kind of ecstasy, and told him I was quite as brave as himself, and quite as tired as he was of lying in bed like a dog, and quite as ready for any fun or frolic as any Augustus Barnard in Nantucket.

We lost no time in getting on our clothes and hurrying down to the boat. She was lying at the old decayed wharf by the lumber-yard of Pankey & Co., and almost thumping her sides out against the rough logs. Augustus got into her and bailed her, for she was nearly half full of water. This being done, we hoisted jib and mainsail, kept full, and started boldly out to sea.

The wind, as I before said, blew freshly from the south-west. The night was very clear and cold. Augustus had taken the helm, and I stationed myself by the mast, on the deck of the cuddy. We flew along at a great rate—neither of us having said a word since casting loose from the wharf. I now asked my companion what course he intended to steer, and what time he thought it probable we should get back. He whistled for a few minutes, and then said crustily, ‘I am going to sea—you may go home if you think proper’. Turning my eyes upon him, I perceived at once that, in spite of his assumed *nonchalance*, he was greatly agitated. I could see him distinctly by the light of the moon—his face was paler than any marble, and his hand shook so excessively that he could scarcely retain hold of the tiller. I found that something had gone wrong, and became seriously alarmed. At this period I knew little about the management of a boat, and was now depending entirely upon the nautical skill of my friend. The wind, too, had suddenly increased, and we were fast getting out of the lee of the land—still I was ashamed to betray any trepidation, and for almost half an hour maintained a resolute silence. I could stand it no longer, however, and spoke to Augustus about the propriety of turning back. As before, it was nearly a minute before he made answer, or took any notice of my suggestion. ‘By-and-by,’ said he at length—‘time enough—home by-and-by.’ I had expected such a reply, but there was something in the tone of these words which filled me with an indescribable feeling of dread. I again looked at the speaker attentively. His lips were perfectly livid, and his knees shook so violently together, that he seemed scarcely able to stand. ‘For God’s sake, Augustus,’ I screamed, now heartily frightened, ‘what ails you?—what is the matter?—what *are* you going to do?’ ‘Matter!’ he stammered, in the greatest apparent surprise, letting go the tiller at the same moment, and falling forward into the bottom of the boat—‘matter!—why, nothing is the—matter—going home—d-d-don’t you see?’ The whole truth now flashed upon me. I flew to him and raised him up. He was drunk—beastly drunk—he could no longer either stand, speak, or see. His eyes were perfectly glazed; and as I let him go in the extremity

of my despair, he rolled like a mere log into the bilge-water from which I had lifted him. It was evident that, during the evening, he had drunk far more than I suspected, and that his conduct in bed had been the result of a highly-concentrated state of intoxication—a state which, like madness, frequently enables the victim to imitate the outward demeanour of one in perfect possession of his senses. The coolness of the night air, however, had had its usual effect—the mental energy began to yield before its influence—and the confused perception which he no doubt then had of his perilous situation had assisted in hastening the catastrophe. He was now thoroughly insensible, and there was no probability that he would be otherwise for many hours.

It is hardly possible to conceive the extremity of my terror. The fumes of the wine lately taken had evaporated, leaving me doubly timid and irresolute. I knew that I was altogether incapable of managing the boat, and that a fierce wind and strong ebb tide were hurrying us to destruction. A storm was evidently gathering behind us; we had neither compass nor provisions; and it was clear that, if we held our present course, we should be out of sight of land before daybreak. These thoughts, with a crowd of others equally fearful, flashed through my mind with a bewildering rapidity, and for some moments paralyzed me beyond the possibility of making any exertion. The boat was going through the water at a terrible rate—full before the wind—no reef in either jib or mainsail—running her bows completely under the foam. It was a thousand wonders she did not broach to—Augustus having let go the tiller, as I said before, and I being too much agitated to think of taking it myself. By good luck, however, she kept steady, and gradually I recovered some degree of presence of mind. Still the wind was increasing fearfully; and whenever we rose from a plunge forward, the sea behind fell combing over our counter, and deluged us with water. I was so utterly benumbed, too, in every limb, as to be nearly unconscious of sensation. At length I summoned up the resolution of despair, and rushing to the mainsail, let it go by the run. As might have been expected, it flew over the bows, and, getting drenched

with water, carried away the mast short off by the board. This latter accident alone saved me from instant destruction. Under the jib only, I now boomed along before the wind, shipping heavy seas occasionally, but relieved from the terror of immediate death. I took the helm, and breathed with greater freedom, as I found that there yet remained to us a chance of ultimate escape. Augustus still lay senseless in the bottom of the boat; and as there was imminent danger of his drowning (the water being nearly a foot deep just where he fell), I contrived to raise him partially up, and keep him in a sitting position, by passing a rope round his waist, and lashing it to a ringbolt in the deck of the cuddy. Having thus arranged everything as well as I could in my chilled and agitated condition, I recommended myself to God, and made up my mind to bear whatever might happen with all the fortitude in my power.

Hardly had I come to this resolution, when, suddenly, a loud and long scream or yell, as if from the throats of a thousand demons, seemed to pervade the whole atmosphere around and above the boat. Never while I live shall I forget the intense agony of terror I experienced at that moment. My hair stood erect on my head—I felt the blood congealing in my veins—my heart ceased utterly to beat, and without having once raised my eyes to learn the source of my alarm, I tumbled headlong and insensible upon the body of my fallen companion.

I found myself, upon reviving, in the cabin of a large whaling-ship (the *Penguin*) bound to Nantucket. Several persons were standing over me, and Augustus, paler than death, was busily occupied in chafing my hands. Upon seeing me open my eyes, his exclamations of gratitude and joy excited alternate laughter and tears from the rough-looking personages who were present. The mystery of our being in existence was now soon explained. We had been run down by the whaling-ship, which was close hauled, beating up to Nantucket with every sail she could venture to set, and consequently running almost at right angles to our own course. Several men were on the look-out forward, but did not perceive our boat until it was an impossibility to avoid coming in contact—their shouts

of warning upon seeing us were what so terribly alarmed me. The huge ship, I was told, rode immediately over us with as much ease as our own little vessel would have passed over a feather, and without the least perceptible impediment to her progress. Not a scream arose from the deck of the victim—there was a slight grating sound to be heard mingling with the roar of wind and water, as the frail bark which was swallowed up rubbed for a moment along the keel of her destroyer—but this was all. Thinking our boat (which it will be remembered was dismasted) some mere shell cut adrift as useless, the captain (Captain E. T. V. Block of New London) was for proceeding on his course without troubling himself further about the matter. Luckily, there were two of the look-out who swore positively to having seen some person at our helm, and represented the possibility of yet saving him. A discussion ensued, when Block grew angry, and, after a while, said that ‘it was no business of his to be eternally watching for eggshells; that the ship should *not* put about for any such nonsense; and if there was a man run down, it was nobody’s fault but his own—he might drown and be d—d’, or some language to that effect. Henderson, the first mate, now took the matter up, being justly indignant, as well as the whole ship’s crew, at a speech evincing such a degree of heartless atrocity. He spoke plainly, seeing himself upheld by the men, told the captain he considered him a fit subject for the gallows, and that he would disobey his orders if he were hanged for it the moment he set his foot on shore. He strode aft, jostling Block (who turned very pale and made no answer) on one side, and seizing the helm, gave the word, in a firm voice, *Hard-a-lee!* The men flew to their posts, and the ship went cleverly about. All this had occupied nearly five minutes, and it was supposed to be hardly within the bounds of possibility that any individual could be saved—allowing any to have been on board the boat. Yet, as the reader has seen, both Augustus and myself were rescued; and our deliverance seemed to have been brought about by two of those almost inconceivable pieces of good fortune which are attributed by the wise and pious to the special interference of Providence.

While the ship was yet in stays, the mate lowered the

jolly-boat and jumped into her with the very two men, I believe, who spoke up as having seen me at the helm. They had just left the lee of the vessel (the moon still shining brightly) when she made a long and heavy roll to windward, and Henderson, at the same moment, starting up in his seat, bawled out to his crew to *back water*. He would say nothing else—repeating his cry impatiently, *back water ! back water !* The men put back as speedily as possible ; but by this time the ship had gone round, and gotten fully under headway, although all hands on board were making great exertions to take in sail. In despite of the danger of the attempt, the mate clung to the main-chains as soon as they came within his reach. Another huge lurch now brought the starboard side of the vessel out of the water nearly as far as her keel, when the cause of his anxiety was rendered obvious enough. The body of a man was seen to be affixed in the most singular manner to the smooth and shining bottom (the *Penguin* was coppered and copper-fastened), and beating violently against it with every movement of the hull. After several ineffectual efforts, made during the lurches of the ship, and at the imminent risk of swamping the boat, I was finally disengaged from my perilous situation and taken on board—for the body proved to be my own. It appeared that one of the timber-bolts having started and broken a passage through the copper, it had arrested my progress as I passed under the ship, and fastened me in so extraordinary a manner to her bottom. The head of the bolt had made its way through the collar of the green baize jacket I had on, and through the back part of my neck, forcing itself out between two sinews and just below the right ear. I was immediately put to bed—although life seemed to be totally extinct. There was no surgeon on board. The captain, however, treated me with every attention—to make amends, I presume, in the eyes of his crew, for his atrocious behaviour in the previous portion of the adventure.

In the meantime, Henderson had again put off from the ship, although the wind was now blowing almost a hurricane. He had not been gone many minutes when he fell in with some fragments of our boat and shortly afterwards one

of the men with him asserted that he could distinguish a cry for help at intervals amid the roaring of the tempest. This induced the hardy seamen to persevere in their search for more than half an hour, although repeated signals to return were made them by Captain Block, and although every moment on the water in so frail a boat was fraught to them with the most imminent and deadly peril. Indeed, it is nearly impossible to conceive how the small jolly they were in could have escaped destruction for a single instant. She was built, however, for the whaling service, and was fitted, as I have since had reason to believe, with air-boxes, in the manner of some life-boats used on the coast of Wales.

After searching in vain for about the period of time just mentioned, it was determined to get back to the ship. They had scarcely made this resolve when a feeble cry arose from a dark object that floated rapidly by. They pursued and soon overtook it. It proved to be the entire deck of the *Ariel's* cuddy. Augustus was struggling near it, apparently in the last agonies. Upon getting hold of him it was found that he was attached by a rope to the floating timber. This rope, it will be remembered, I had myself tied round his waist, and made fast to a ringbolt, for the purpose of keeping him in an upright position, and my so doing, it appeared, had been ultimately the means of preserving his life. The *Ariel* was slightly put together, and in going down her frame naturally went to pieces; the deck of the cuddy, as might have been expected, was lifted, by the force of the water rushing in, entirely from the main timbers, and floated (with other fragments, no doubt) to the surface—Augustus was buoyed up with it, and thus escaped a terrible death.

It was more than an hour after being taken on board the *Penguin* before he could give any account of himself, or be made to comprehend the nature of the accident which had befallen our boat. At length he became thoroughly aroused, and spoke much of his sensations while in the water. Upon his first attaining any degree of consciousness, he found himself beneath the surface, whirling round and round with inconceivable rapidity, and with a rope wound in three or four folds tightly about his neck. In an instant afterwards he felt himself going rapidly upward, when,

his head striking violently against a hard substance, he again relapsed into insensibility. Upon once more reviving he was in fuller possession of his reason—this was still, however, in the greatest degree clouded and confused. He now knew that some accident had occurred, and that he was in the water, although his mouth was above the surface, and he could breathe with some freedom. Possibly, at this period, the deck was drifting rapidly before the wind and drawing him after it, as he floated upon his back. Of course, as long as he could have retained this position, it would have been nearly impossible that he should be drowned. Presently a surge threw him directly athwart the deck; and this post he endeavoured to maintain, screaming at intervals for help. Just before he was discovered by Mr. Henderson, he had been obliged to relax his hold through exhaustion, and, falling into the sea, had given himself up for lost. During the whole period of his struggles he had not the faintest recollection of the *Ariel*, nor of any matters in connection with the source of his disaster. A vague feeling of terror and despair had taken entire possession of his faculties. When he was finally picked up, every power of his mind had failed him; and, as before said, it was nearly an hour after getting on board the *Penguin* before he became fully aware of his condition. In regard to myself—I was resuscitated from a state bordering very nearly upon death (and after every other means had been tried in vain for three hours and a half) by vigorous friction with flannels bathed in hot oil—a proceeding suggested by Augustus. The wound in my neck, although of an ugly appearance, proved of little real consequence, and I soon recovered from its effects.

The *Penguin* got into port about nine o'clock in the morning, after encountering one of the severest gales ever experienced off Nantucket. Both Augustus and myself managed to appear at Mr. Barnard's in time for breakfast—which, luckily, was somewhat late, owing to the party over night. I suppose all at the table were too much fatigued themselves to notice our jaded appearance—of course, it would not have borne a very rigid scrutiny. Schoolboys, however, can accomplish wonders in the way

of deception, and I verily believe not one of our friends in Nantucket had the slightest suspicion that the terrible story told by some sailors in town of their having run down a vessel at sea and drowned some thirty or forty poor devils, had reference either to the *Ariel*, my companion, or myself. We two have since very frequently talked the matter over—but never without a shudder. In one of our conversations Augustus frankly confessed to me, that in his whole life he had at no time experienced so excruciating a sense of dismay, as when on board our little boat he first discovered the extent of his intoxication, and felt himself sinking beneath its influence.

## CHAPTER II

IN no affairs of mere prejudice, *pro* or *con*, do we deduce inferences with entire certainty, even from the most simple data. It might be supposed that a catastrophe such as I have just related would have effectually cooled my incipient passion for the sea. On the contrary, I never experienced a more ardent longing for the wild adventures incident to the life of a navigator than within a week after our miraculous deliverance. This short period proved amply long enough to erase from my memory the shadows, and bring out in vivid light all the pleasurable exciting points of colour, all the picturesqueness of the late perilous accident. My conversations with Augustus grew daily more frequent and more intensely full of interest. He had a manner of relating his stories of the ocean (more than one-half of which I now suspect to have been sheer fabrications) well adapted to have weight with one of my enthusiastic temperament and somewhat gloomy, although glowing, imagination. It is strange, too, that he most strongly enlisted my feelings in behalf of the life of a seaman, when he depicted his more terrible moments of suffering and despair. For the bright side of the painting I had a limited sympathy. My visions were of shipwreck and famine; of death or captivity among barbarian hordes; of a life-time dragged out in sorrow and tears, upon some gray and desolate rock, in an ocean unapproachable and un-

known. Such visions or desires—for they amounted to desires—are common, I have since been assured, to the whole numerous race of the melancholy among men—at the time of which I speak I regarded them only as prophetic glimpses of a destiny which I felt myself in a measure bound to fulfil. Augustus thoroughly entered into my state of mind. It is probable, indeed, that our intimate communion had resulted in a partial interchange of character.

About eighteen months after the period of the *Ariel's* disaster, the firm of Lloyd and Vredenburg (a house connected in some manner with the Messieurs Enderby, I believe, of Liverpool) were engaged in repairing and fitting out the brig *Grampus* for a whaling voyage. She was an old hulk, and scarcely seaworthy when all was done to her that could be done. I hardly know why she was chosen in preference to other and good vessels belonging to the same owners—but so it was. Mr. Barnard was appointed to command her, and Augustus was going with him. While the brig was getting ready, he frequently urged upon me the excellency of the opportunity now offered for indulging my desire of travel. He found me by no means an unwilling listener—yet the matter could not be so easily arranged. My father made no direct opposition; but my mother went into hysterics at the bare mention of the design; and, more than all, my grandfather, from whom I expected much, vowed to cut me off with a shilling if I should ever broach the subject to him again. These difficulties, however, so far from abating my desire, only added fuel to the flame. I determined to go at all hazards; and, having made known my intention to Augustus, we set about arranging a plan by which it might be accomplished. In the meantime I forbore speaking to any of my relations in regard to the voyage, and, as I busied myself ostensibly with my usual studies, it was supposed that I had abandoned the design. I have since frequently examined my conduct on this occasion with sentiments of displeasure as well as of surprise. The intense hypocrisy I made use of for the furtherance of my project—an hypocrisy pervading every word and action of my life for so long a period of time—could only have been rendered tolerable to myself

by the wild and burning expectation with which I looked forward to the fulfilment of my long-cherished visions of travel.

In pursuance of my scheme of deception, I was necessarily obliged to leave much to the management of Augustus, who was employed for the greater part of every day on board the *Grampus*, attending to some arrangements for his father in the cabin and cabin hold. At night, however, we were sure to have a conference, and talk over our hopes. After nearly a month passed in this manner, without our hitting upon any plan we thought likely to succeed, he told me at last that he had determined upon everything necessary. I had a relation living in New Bedford, a Mr. Ross, at whose house I was in the habit of spending occasionally two or three weeks at a time. The brig was to sail about the middle of June (June, 1827), and it was agreed that, a day or two before her putting to sea, my father was to receive a note, as usual, from Mr. Ross, asking me to come over and spend a fortnight with Robert and Emmet (his sons). Augustus charged himself with the inditing of this note and getting it delivered. Having set out, as supposed, for New Bedford, I was then to report myself to my companion, who would contrive a hiding-place for me in the *Grampus*. This hiding-place, he assured me, would be rendered sufficiently comfortable for a residence of many days, during which I was not to make my appearance. When the brig had proceeded so far on her course as to make any turning back a matter out of question, I should then, he said, be formally installed in all the comforts of the cabin; and as to his father, he would only laugh heartily at the joke. Vessels enough would be met with by which a letter might be sent home explaining the adventure to my parents.

The middle of June at length arrived, and everything had been matured. The note was written and delivered, and on a Monday morning I left the house for the New Bedford packet, as supposed. I went, however, straight to Augustus, who was waiting for me at the corner of a street. It had been our original plan that I should keep out of the way until dark, and then slip on board the brig; but, as there was now a thick fog in our favour, it was

agreed to lose no time in secreting me. Augustus led the way to the wharf, and I followed at a little distance, enveloped in a thick seaman's cloak, which he had brought with him, so that my person might not be easily recognized. Just as we turned the second corner, after passing Mr. Edmund's well, who should appear, standing right in front of me, and looking me full in the face, but old Mr. Peterson, my grandfather. 'Why, bless my soul, Gordon,' said he, after a long pause, 'why, why,—*whose* dirty cloak is that you have on?' 'Sir!' I replied, assuming, as well as I could, in the exigency of the moment, an air of offended surprise, and talking in the gruffest of all imaginable tones—'sir! you are a sum'mat mistaken—my name, in the first place, bee'nt nothing at all like Goddin, and I'd want you for to know better, you black-guard, than to call my new obercoat a darty one.' For my life I could hardly refrain from screaming with laughter at the odd manner in which the old gentleman received this handsome rebuke. He started back two or three steps, turned first pale and then excessively red, threw up his spectacles, then, putting them down, ran full tilt at me, with his umbrella uplifted. He stopped short, however, in his career, as if struck with a sudden recollection; and presently, turning round, hobbled off down the street, shaking all the while with rage, and muttering between his teeth, 'Won't do—new glasses—thought it was Gordon—d—d good-for-nothing salt water Long Tom.'

After this narrow escape we proceeded with greater caution, and arrived at our point of destination in safety. There were only one or two of the hands on board, and these were busy forward, doing something to the fore-castle combings. Captain Barnard, we knew very well, was engaged at Lloyd and Vredenburg's, and would remain there until late in the evening, so we had little to apprehend on his account. Augustus went first up the vessel's side, and in a short while I followed him, without being noticed by the men at work. We proceeded at once into the cabin, and found no person there. It was fitted up in the most comfortable style—a thing somewhat unusual in a whaling-vessel. There were four very excellent state-rooms, with wide and convenient berths. There was also a large stove,

I took notice, and a remarkably thick and valuable carpet covering the floor of both the cabin and state-rooms. The ceiling was full seven feet high, and, in short, everything appeared of a more roomy and agreeable nature than I had anticipated. Augustus, however, would allow me but little time for observation, insisting upon the necessity of my concealing myself as soon as possible. He led the way into his own state-room, which was on the starboard side of the brig, and next to the bulkheads. Upon entering, he closed the door and bolted it. I thought I had never seen a nicer little room than the one in which I now found myself. It was about ten feet long, and had only one berth, which, as I said before, was wide and convenient. In that portion of the closet nearest the bulkheads there was a space of four feet square, containing a table, a chair, and a set of hanging shelves full of books, chiefly books of voyages and travels. There were many other little comforts in the room, among which I ought not to forget a kind of safe or refrigerator, in which Augustus pointed out to me a host of delicacies, both in the eating and drinking department.

He now pressed with his knuckles upon a certain spot of the carpet in one corner of the space just mentioned, letting me know that a portion of the flooring, about sixteen inches square, had been neatly cut out and again adjusted. As he pressed, this portion rose up at one end sufficiently to allow the passage of his finger beneath. In this manner he raised the mouth of the trap (to which the carpet was still fastened by tacks), and I found that it led into the after hold. He next lit a small taper by means of a phosphorus match, and, placing the light in a dark lantern, descended with it through the opening, bidding me follow. I did so, and he then pulled the cover upon the hole, by means of a nail driven into the under side—the carpet, of course, resuming its original position on the floor of the state-room, and all traces of the aperture being concealed.

The taper gave out so feeble a ray that it was with the greatest difficulty I could grope my way through the confused mass of lumber among which I now found myself. By degrees, however, my eyes became accustomed to the gloom, and I proceeded with less trouble, holding on to the

skirts of my friend's coat. He brought me, at length, after creeping and winding through innumerable narrow passages, to an iron-bound box, such as is used sometimes for packing fine earthenware. It was nearly four feet high, and full six long, but very narrow. Two large empty oil-casks lay on the top of it, and above these, again, a vast quantity of straw matting, piled up as high as the floor of the cabin. In every other direction around was wedged as closely as possible, even up to the ceiling, a complete chaos of almost every species of ship-furniture, together with a heterogeneous medley of crates, hampers, barrels, and bales, so that it seemed a matter no less than miraculous that we had discovered any passage at all to the box. I afterward found that Augustus had purposely arranged the stowage in this hold with a view to affording me a thorough concealment, having had only one assistant in the labour, a man not going out in the brig.

My companion now showed me that one of the ends of the box could be removed at pleasure. He slipped it aside and displayed the interior, at which I was excessively amused. A mattress from one of the cabin berths covered the whole of its bottom, and it contained almost every article of mere comfort which could be crowded into so small a space, allowing me, at the same time, sufficient room for my accommodation, either in a sitting position or lying at full length. Among other things, there were some books, pen, ink, and paper, three blankets, a large jug full of water, a keg of sea-biscuit, three or four immense Bologna sausages, an enormous ham, a cold leg of roast mutton, and half a dozen bottles of cordials and liqueurs. I proceeded immediately to take possession of my little apartment, and this with feelings of higher satisfaction, I am sure, than any monarch ever experienced upon entering a new palace. Augustus now pointed out to me the method of fastening the open end of the box, and then, holding the taper close to the deck, showed me a piece of dark whipcord lying along it. This, he said, extended from my hiding-place throughout all the necessary windings among the lumber, to a nail which was driven into the deck of the hold, immediately beneath the trap-door leading into his state-room. By means of this cord I should be enabled

readily to trace my way out without his guidance, provided any unlooked-for accident should render such a step necessary. He now took his departure, leaving with me the lantern, together with a copious supply of tapers and phosphorus, and promising to pay me a visit as often as he could contrive to do so without observation. This was on the seventeenth of June.

I remained three days and nights (as nearly as I could guess) in my hiding-place without getting out of it at all, except twice for the purpose of stretching my limbs by standing erect between two crates just opposite the opening. During the whole period I saw nothing of Augustus ; but this occasioned me little uneasiness, as I knew the brig was expected to put to sea every hour, and in the bustle he would not easily find opportunities of coming down to me. At length I heard the trap open and shut, and presently he called in a low voice, asking if all was well, and if there was anything I wanted. ' Nothing,' I replied ; ' I am as comfortable as can be ; when will the brig sail ? ' ' She will be under weigh in less than half an hour,' he answered. ' I came to let you know, and for fear you should be uneasy at my absence. I shall not have a chance of coming down again for some time—perhaps for three or four days more. All is going on right aboveboard. After I go up and close the trap, do you creep along by the whipcord to where the nail is driven in. You will find my watch there—it may be useful to you, as you have no daylight to keep time by. I suppose you can't tell how long you have been buried—only three days—this is the twentieth. I would bring the watch to your box, but am afraid of being missed.' With this he went up.

In about an hour after he had gone I distinctly felt the brig in motion, and congratulated myself upon having at length fairly commenced a voyage. Satisfied with this idea, I determined to make my mind as easy as possible, and await the course of events until I should be permitted to exchange the box for the more roomy, although hardly more comfortable, accommodations of the cabin. My first care was to get the watch. Leaving the taper burning, I groped along in the dark, following the cord through windings innumerable, in some of which I discovered that,

after toiling a long distance, I was brought back within a foot or two of a former position. At length I reached the nail, and securing the object of my journey, returned with it in safety. I now looked over the books which had been so thoughtfully provided, and selected the expedition of Lewis and Clarke to the mouth of the Columbia. With this I amused myself for some time, when, growing sleepy, I extinguished the light with great care, and soon fell into a sound slumber.

Upon awaking I felt strangely confused in mind, and some time elapsed before I could bring to recollection all the various circumstances of my situation. By degrees, however, I remembered all. Striking a light, I looked at the watch; but it was run down, and there were, consequently, no means of determining how long I had slept. My limbs were greatly cramped, and I was forced to relieve them by standing between the crates. Presently feeling an almost ravenous appetite, I bethought myself of the cold mutton, some of which I had eaten just before going to sleep, and found excellent. What was my astonishment at discovering it to be in a state of absolute putrefaction! This circumstance occasioned me great disquietude; for, connecting it with the disorder of mind I experienced upon awaking, I began to suppose that I must have slept for an inordinately long period of time. The close atmosphere of the hold might have had something to do with this, and might, in the end, be productive of the most serious results. My head ached excessively; I fancied that I drew every breath with difficulty; and, in short, I was oppressed with a multitude of gloomy feelings. Still I could not venture to make any disturbance by opening the trap or otherwise, and, having wound up the watch, contented myself as well as possible.

Throughout the whole of the next tedious twenty-four hours no person came to my relief, and I could not help accusing Augustus of the grossest inattention. What alarmed me chiefly was, that the water in my jug was reduced to about half a pint, and I was suffering much from thirst, having eaten freely of the Bologna sausages after the loss of my mutton. I became very uneasy, and could no longer take any interest in my books. I was over-

powered, too, with a desire to sleep, yet trembled at the thought of indulging it, lest there might exist some pernicious influence, like that of burning charcoal, in the confined air of the hold. In the meantime the roll of the brig told me that we were far in the main ocean, and a dull humming sound, which reached my ears as if from an immense distance, convinced me no ordinary gale was blowing. I could not imagine a reason for the absence of Augustus. We were surely far enough advanced on our voyage to allow of my going up. Some accident might have happened to him—but I could think of none which would account for his suffering me to remain so long a prisoner, except, indeed, his having suddenly died or fallen overboard, and upon this idea I could not dwell with any degree of patience. It was possible that we had been baffled by head winds, and were still in the near vicinity of Nantucket. This notion, however, I was forced to abandon ; for such being the case, the brig must have frequently gone about ; and I was entirely satisfied, from her continual inclination to the larboard, that she had been sailing all along with a steady breeze on her starboard quarter. Besides, granting that we were still in the neighbourhood of the island, why should not Augustus have visited me and informed me of the circumstance ? Pondering in this manner upon the difficulties of my solitary and cheerless condition, I resolved to wait yet another twenty-four hours, when, if no relief were obtained, I would make my way to the trap, and endeavour either to hold a parley with my friend, or get at least a little fresh air through the opening, and a further supply of water from his state-room. While occupied with this thought, however, I fell, in spite of every exertion to the contrary, into a state of profound sleep, or rather stupor. My dreams were of the most terrific description. Every species of calamity and horror befell me. Among other miseries, I was smothered to death between huge pillows, by demons of the most ghastly and ferocious aspect. Immense serpents held me in their embrace, and looked earnestly in my face with their fearfully shining eyes. Then deserts, limitless, and of the most forlorn and awe-inspiring character, spread themselves out before me. Immensely tall trunks of trees, gray and leafless rose up

in endless succession as far as the eye could reach. Their roots were concealed in wide-spreading morasses, whose dreary water lay intensely black, still, and altogether terrible, beneath. And the strange trees seemed endowed with a human vitality, and waving to and fro their skeleton arms, were crying to the silent waters for mercy, in the shrill and piercing accents of the most acute agony and despair. The scene changed ; and I stood, naked and alone, amid the burning sand-plains of Zahara. At my feet lay crouched a fierce lion of the tropics. Suddenly his wild eyes opened and fell upon me. With a convulsive bound he sprang to his feet, and laid bare his horrible teeth. In another instant there burst from his red throat a roar like the thunder of the firmament, and I fell impetuously to the earth. Stiffing in a paroxysm of terror I at last found myself partially awake. My dream, then, was not all a dream. Now, at least, I was in possession of my senses. The paws of some huge and real monster were pressing heavily upon my bosom—his hot breath was in my ear—and his white and ghastly fangs were gleaming upon me through the gloom.

Had a thousand lives hung upon the movement of a limb or the utterance of a syllable, I could have neither stirred nor spoken. The beast, whatever it was, retained his position without attempting any immediate violence, while I lay in an utterly helpless, and, I fancied, a dying condition beneath him. I felt that my powers of body and mind were fast leaving me—in a word, that I was perishing, and perishing of sheer fright. My brain swam—I grew deadly sick—my vision failed—even the glaring eyeballs above me grew dim. Making a last strong effort, I at length breathed a faint ejaculation to God, and resigned myself to die. The sound of my voice seemed to arouse all the latent fury of the animal. He precipitated himself at full length upon my body ; but what was my astonishment, when, with a long and low whine, he commenced licking my face and hands with the greatest eagerness, and with the most extravagant demonstrations of affection and joy ! I was bewildered, utterly lost in amazement—but I could not forget the peculiar whine of my Newfoundland dog Tiger, and the odd manner of his caresses I well knew.

It was he. I experienced a sudden rush of blood to my temples—a giddy and overpowering sense of deliverance and reanimation. I rose hurriedly from the mattress upon which I had been lying, and, throwing myself upon the neck of my faithful follower and friend, relieved the long oppression of my bosom in a flood of the most passionate tears.

As upon a former occasion, my conceptions were in a state of the greatest indistinctness and confusion after leaving the mattress. For a long time I found it nearly impossible to connect any ideas; but, by very slow degrees, my thinking faculties returned, and I again called to memory the several incidents of my condition. For the presence of Tiger I tried in vain to account; and after busying myself with a thousand different conjectures respecting him, was forced to content myself with rejoicing that he was with me to share my dreary solitude, and render me comfort by his caresses. Most people love their dogs, but for Tiger I had an affection far more ardent than common; and never, certainly, did any creature more truly deserve it. For seven years he had been my inseparable companion, and in a multitude of instances had given evidence of all the noble qualities for which we value the animal. I had rescued him, when a puppy, from the clutches of a malignant little villain in Nantucket, who was leading him, with a rope around his neck, to the water; and the grown dog repaid the obligation, about three years afterward, by saving me from the bludgeon of a street robber.

Getting now hold of the watch, I found, upon applying it to my ear, that it had again run down; but at this I was not at all surprised, being convinced, from the peculiar state of my feelings, that I had slept, as before, for a very long period of time; how long, it was of course impossible to say. I was burning up with fever, and my thirst was almost intolerable. I felt about the box for my little remaining supply of water, for I had no light, the taper having burnt to the socket of the lantern, and the phosphorus-box not coming readily to hand. Upon finding the jug, however, I discovered it to be empty—Tiger, no doubt, having been tempted to drink it, as well as to devour the remnant of mutton, the bone of which lay,

well picked, by the opening of the box. The spoiled meat I could well spare, but my heart sank as I thought of the water. I was feeble in the extreme, so much so that I shook all over, as with an ague, at the slightest movement or exertion. To add to my troubles, the brig was pitching and rolling with great violence, and the oil-casks which lay upon my box were in momentary danger of falling down, so as to block up the only way of ingress or egress. I felt, also, terrible sufferings from sea-sickness. These considerations determined me to make my way, at all hazards, to the trap, and obtain immediate relief, before I should be incapacitated from doing so altogether. Having come to this resolve, I again felt about for the phosphorus-box and tapers. The former I found after some little trouble ; but, not discovering the tapers as soon as I had expected (for I remembered very nearly the spot in which I had placed them), I gave up the search for the present, and bidding Tiger lie quiet, began at once my journey towards the trap.

In this attempt my great feebleness became more than ever apparent. It was with the utmost difficulty I could crawl along at all, and very frequently my limbs sank suddenly from beneath me ; when, falling prostrate on my face, I would remain for some minutes in a state bordering on insensibility. Still I struggled forward by slow degrees, dreading every moment that I should swoon amid the narrow and intricate windings of the lumber, in which event I had nothing but death to expect as the result. At length, upon making a push forward with all the energy I could command, I struck my forehead violently against the sharp corner of an iron-bound crate. The accident only stunned me for a few moments ; but I found, to my inexpressible grief, that the quick and violent roll of the vessel had thrown the crate entirely across my path, so as effectually to block up the passage. With my utmost exertions I could not move it a single inch from its position, it being closely wedged in among the surrounding boxes and ship-furniture. It became necessary, therefore, enfeebled as I was, either to leave the guidance of the whipcord and seek out a new passage, or to climb over the obstacle, and resume the path on the other side. The

former alternative presented too many difficulties and dangers to be thought of without a shudder. In my present weak state of both mind and body, I should infallibly lose my way if I attempted it, and perish miserably amid the dismal and disgusting labyrinths of the hold. I proceeded, therefore, without hesitation, to summon up all my remaining strength and fortitude, and endeavour, as I best might, to clamber over the crate.

Upon standing erect, with this end in view, I found the undertaking even a more serious task than my fears had led me to imagine. On each side of the narrow passage arose a complete wall of various heavy lumber, which the least blunder on my part might be the means of bringing down upon my head; or, if this accident did not occur, the path might be effectually blocked up against my return by the descending mass, as it was in front by the obstacle there. The crate itself was a long and unwieldy box, upon which no foothold could be obtained. In vain I attempted, by every means in my power, to reach the top, with the hope of being thus enabled to draw myself up. Had I succeeded in reaching it, it is certain that my strength would have proved utterly inadequate to the task of getting over, and it was better in every respect that I failed. At length, in a desperate effort to force the crate from its ground, I felt a strong vibration in the side next me. I thrust my hand eagerly to the edge of the planks, and found that a very large one was loose. With my pocket-knife which, luckily, I had with me, I succeeded, after great labour, in prying it entirely off; and, getting through the aperture, discovered, to my exceeding joy, that there were no boards on the opposite side—in other words, that the top was wanting, it being the bottom through which I had forced my way. I now met with no important difficulty in proceeding along the line until I finally reached the nail. With a beating heart I stood erect, and with a gentle touch pressed against the cover of the trap. It did not rise as soon as I had expected, and I pressed it with somewhat more determination, still dreading lest some other person than Augustus might be in his state-room. The door, however, to my astonishment, remained steady, and I became somewhat uneasy, for I knew that

it had formerly required little or no effort to remove it. I pushed it strongly—it was nevertheless firm : with all my strength—it still did not give way : with rage, with fury, with despair—it set at defiance my utmost efforts ; and it was evident, from the unyielding nature of the resistance, that the hole had either been discovered and effectually nailed up, or that some immense weight had been placed upon it, which it was useless to think of removing.

My sensations were those of extreme horror and dismay. In vain I attempted to reason on the probable cause of my being thus entombed. I could summon up no connected chain of reflection, and, sinking on the floor, gave way, unresistingly, to the most gloomy imaginings, in which the dreadful deaths of thirst, famine, suffocation, and premature interment, crowded upon me as the prominent disasters to be encountered. At length there returned to me some portion of presence of mind. I arose, and felt with my fingers for the seams or cracks of the aperture. Having found them, I examined them closely to ascertain if they emitted any light from the state-room ; but none was visible. I then forced the pen-blade of my knife through them, until I met with some hard obstacle. Scraping against it, I discovered it to be a solid mass of iron, which, from its peculiar wavy feel as I passed the blade along it, I concluded to be a chain-cable. The only course now left me was to retrace my way to the box, and there either yield to my sad fate, or try so to tranquillize my mind as to admit of my arranging some plan of escape. I immediately set about the attempt, and succeeded, after innumerable difficulties, in getting back. As I sank, utterly exhausted, upon the mattress, Tiger threw himself at full length by my side, and seemed as if desirous, by his caresses, of consoling me in my troubles, and urging me to bear them with fortitude.

The singularity of his behaviour at length forcibly arrested my attention. After licking my face and hands for some minutes, he would suddenly cease doing so, and utter a low whine. Upon reaching out my hand towards him, I then invariably found him lying on his back, with his paws uplifted. This conduct, so frequently repeated,

appeared strange, and I could in no manner account for it. As the dog seemed distressed, I concluded that he had received some injury ; and, taking his paws in my hands, I examined them one by one, but found no sign of any hurt. I then supposed him hungry, and gave him a large piece of ham, which he devoured with avidity—afterward, however, resuming his extraordinary manœuvres. I now imagined that he was suffering, like myself, the torments of thirst, and was about adopting this conclusion as the true one, when the idea occurred to me that I had as yet only examined his paws, and that there might possibly be a wound upon some portion of his body or head. The latter I felt carefully over, but found nothing. On passing my hand, however, along his back, I perceived a slight erection of the hair extending completely across it. Probing this with my finger, I discovered a string, and tracing it up, found that it encircled the whole body. Upon a closer scrutiny, I came across a small slip of what had the feeling of letter paper, through which the string had been fastened in such a manner as to bring it immediately beneath the left shoulder of the animal.

### CHAPTER III

THE thought instantly occurred to me that the paper was a note from Augustus, and that some unaccountable accident having happened to prevent his relieving me from my dungeon, he had devised this method of acquainting me with the true state of affairs. Trembling with eagerness, I now commenced another search for my phosphorus matches and tapers. I had a confused recollection of having put them carefully away just before falling asleep ; and, indeed, previously to my last journey to the trap, I had been able to remember the exact spot where I had deposited them. But now I endeavoured in vain to call it to mind, and busied myself for a full hour in a fruitless and vexatious search for the missing articles ; never, surely, was there a more tantalizing state of anxiety and suspense. At length, while groping about, with my head close to the ballast, near the opening of the box, and outside of it, I perceived

a faint glimmering of light in the direction of the steerage. Greatly surprised, I endeavoured to make my way towards it, as it appeared to be but a few feet from my position. Scarcely had I moved with this intention, when I lost sight of the glimmer entirely, and, before I could bring it into view again, was obliged to feel along by the box until I had exactly resumed my original situation. Now, moving my head with caution to and fro, I found that, by proceeding slowly, with great care, in an opposite direction to that in which I had at first started, I was enabled to draw near the light, still keeping it in view. Presently I came directly upon it (having squeezed my way through innumerable narrow windings), and found that it proceeded from some fragments of my matches lying in an empty barrel turned upon its side. I was wondering how they came in such a place, when my hand fell upon two or three pieces of taperwax, which had been evidently mumbled by the dog. I concluded at once that he had devoured the whole of my supply of candles, and I felt hopeless of being ever able to read the note of Augustus. The small remnants of the wax were so mashed up among other rubbish in the barrel, that I despaired of deriving any service from them, and left them as they were. The phosphorus, of which there was only a speck or two, I gathered up as well as I could, and returned with it, after much difficulty, to my box, where Tiger had all the while remained.

What to do next I could not tell. The hold was so intensely dark that I could not see my hand, however close I would hold it to my face. The white slip of paper could barely be discerned, and not even that when I looked at it directly ; by turning the exterior portions of the retina towards it, that is to say, by surveying it slightly askance, I found that it became in some measure perceptible. Thus the gloom of my prison may be imagined, and the note of my friend, if indeed it were a note from him, seemed only likely to throw me into further trouble, by disquieting to no purpose my already enfeebled and agitated mind. In vain I revolved in my brain a multitude of absurd expedients for procuring light—such expedients precisely as a man in the perturbed sleep occasioned by opium would

be apt to fall upon for a similar purpose—each and all of which appear by turns to the dreamer the most reasonable and the most preposterous of conceptions, just as the reasoning or imaginative faculties flicker, alternately, one above the other. At last an idea occurred to me which seemed rational, and which gave me cause to wonder, very justly, that I had not entertained it before. I placed the slip of paper on the back of a book, and, collecting the fragments of the phosphorus matches which I had brought from the barrel, laid them together upon the paper. I then, with the palm of my hand, rubbed the whole over quickly, yet steadily. A clear light diffused itself immediately throughout the whole surface; and had there been any writing upon it, I should not have experienced the least difficulty, I am sure, in reading it. Not a syllable was there, however—nothing but a dreary and unsatisfactory blank; the illumination died away in a few seconds, and my heart died away within me as it went.

I have before stated more than once that my intellect, for some period prior to this, had been in a condition nearly bordering on idiocy. There were, to be sure, momentary intervals of perfect sanity, and, now and then, even of energy; but these were few. It must be remembered that I had been, for many days certainly, inhaling the almost pestilential atmosphere of a close hold in a whaling-vessel, and a long portion of that time but scantily supplied with water. For the last fourteen hours I had none—nor had I slept during that time. Salt provisions of the most exciting kind had been my chief, and, indeed, since the loss of the mutton, my only supply of food, with the exception of the sea-biscuit; and these latter were utterly useless to me, as they were too dry and hard to be swallowed in the swollen and parched condition of my throat. I was now in a high state of fever, and in every respect exceedingly ill. This will account for the fact that many miserable hours of despondency elapsed after my last adventure with the phosphorus, before the thought suggested itself that I had examined only one side of the paper. I shall not attempt to describe my feelings of rage (for I believe I was more angry than anything else) when the egregious oversight I had committed flashed suddenly upon my perception.

The blunder itself would have been unimportant, had not my own folly and impetuosity rendered it otherwise—in my disappointment at not finding some words upon the slip, I had childishly torn it in pieces and thrown it away, it was impossible to say where.

From the worst part of this dilemma I was relieved by the sagacity of Tiger. Having got, after a long search, a small piece of the note, I put it to the dog's nose, and endeavoured to make him understand that he must bring me the rest of it. To my astonishment, (for I had taught him none of the usual tricks for which his breed are famous), he seemed to enter at once into my meaning, and, rummaging about for a few moments, soon found another considerable portion. Bringing me this, he paused a while, and, rubbing his nose against my hand, appeared to be waiting for my approval of what he had done. I patted him on the head, when he immediately made off again. It was now some minutes before he came back—but when he did come, he brought with him a large slip, which proved to be all the paper missing—it having been torn, it seems, only into three pieces. Luckily, I had no trouble in finding what few fragments of the phosphorus were left—being guided by the indistinct glow one or two of the particles still emitted. My difficulties had taught me the necessity of caution, and I now took time to reflect upon what I was about to do. It was very probable, I considered, that some words were written upon that side of the paper which had not been examined—but which side was that? Fitting the pieces together gave me no clue in this respect, although it assured me that the words (if there were any) would be found all on one side, and connected in a proper manner, as written. There was the greater necessity of ascertaining the point in question beyond a doubt, as the phosphorus remaining would be altogether insufficient for a third attempt, should I fail in the one I was now about to make. I placed the paper on a book as before, and sat for some minutes thoughtfully revolving the matter over in my mind. At last I thought it barely possible that the written side might have some unevenness on its surface, which a delicate sense of feeling might enable me to detect. I determined to make the experiment, and passed my finger very carefully

over the side which first presented itself—nothing, however, was perceptible, and I turned the paper, adjusting it on the book. I now again carried my forefinger cautiously along, when I was aware of an exceedingly slight, but still discernible glow, which followed as it proceeded. This, I knew, must arise from some very minute remaining particles of the phosphorus with which I had covered the paper in my previous attempt. The other, or under side, then, was that on which lay the writing, if writing there should finally prove to be. Again I turned the note, and went to work as I had previously done. Having rubbed in the phosphorus, a brilliancy ensued as before—but this time several lines of MS. in a large hand, and apparently in red ink, became distinctly visible. The glimmer, although sufficiently bright, was but momentary. Still, had I not been too greatly excited, there would have been ample time enough for me to peruse the whole three sentences before me—for I saw there were three. In my anxiety, however, to read all at once, I succeeded only in reading the seven concluding words, which thus appeared—‘*blood—your life depends upon lying close.*’

Had I been able to ascertain the entire contents of the note—the full meaning of the admonition which my friend had thus attempted to convey, that admonition, even although it should have revealed a story of disaster the most unspeakable, could not, I am firmly convinced, have imbued my mind with one tithe of the harrowing and yet indefinable horror with which I was inspired by the fragmentary warning thus received. And ‘*blood*’, too, that word of all words—so rife at all times with mystery, and suffering, and terror—how trebly full of import did it now appear—how chillily and heavily (disjointed, as it thus was, from any foregoing words to qualify or render it distinct) did its vague syllables fall, amid the deep gloom of my prison, into the innermost recesses of my soul !

Augustus had, undoubtedly, good reasons for wishing me to remain concealed, and I formed a thousand surmises as to what they could be—but I could think of nothing affording a satisfactory solution of the mystery. Just after returning from my last journey to the trap, and before my attention had been otherwise directed by the singular

conduct of Tiger, I had come to the resolution of making myself heard at all events by those on board, or, if I could not succeed in this directly, of trying to cut my way through the orlop deck. The half certainty which I felt of being able to accomplish one of these two purposes in the last emergency, had given me courage (which I should not otherwise have had) to endure the evils of my situation. The few words I had been able to read, however, had cut me off from these final resources, and I now, for the first time, felt all the misery of my fate. In a paroxysm of despair I threw myself again upon the mattress, where, for about the period of a day and night, I lay in a kind of stupor, relieved only by momentary intervals of reason and recollection.

At length I once more arose, and busied myself in reflection upon the horrors which encompassed me. For another twenty-four hours it was barely possible that I might exist without water—for a longer time I could not do so. During the first portion of my imprisonment I had made free use of the cordials with which Augustus had supplied me, but they only served to excite fever, without in the least degree assuaging my thirst. I had now only about a gill left, and this was of a species of strong peach liqueur at which my stomach revolted. The sausages were entirely consumed; of the ham nothing remained but a small piece of the skin; and all the biscuit, except a few fragments of one, had been eaten by Tiger. To add to my troubles, I found that my headache was increasing momentarily, and with it the species of delirium which had distressed me more or less since my first falling asleep. For some hours past it had been with the greatest difficulty I could breathe at all, and now each attempt at so doing was attended with the most distressing spasmodic action of the chest. But there was still another and very different source of disquietude, and one, indeed, whose harassing terrors had been the chief means of arousing me to exertion from my stupor on the mattress. It arose from the demeanour of the dog.

I first observed an alteration in his conduct while rubbing in the phosphorus on the paper in my last attempt. As I rubbed, he ran his nose against my hand with a slight snarl; but I was too greatly excited at the time to pay

much attention to the circumstance. Soon afterward, it will be remembered, I threw myself on the mattress, and fell into a species of lethargy. Presently I became aware of a singular hissing sound close at my ears, and discovered it to proceed from Tiger, who was panting and wheezing in a state of the greatest apparent excitement, his eyeballs flashing fiercely through the gloom. I spoke to him, when he replied with a low growl, and then remained quiet. Presently I relapsed into my stupor, from which I was again awakened in a similar manner. This was repeated three or four times, until finally his behaviour inspired me with so great a degree of fear, that I became fully aroused. He was now lying close by the door of the box, snarling fearfully, although in a kind of under-tone, and grinding his teeth as if strongly convulsed. I had no doubt whatever that the want of water or the confined atmosphere of the hold had driven him mad, and I was at a loss what course to pursue. I could not endure the thought of killing him, yet it seemed absolutely necessary for my own safety. I could distinctly perceive his eyes fastened upon me with an expression of the most deadly animosity, and I expected every instant that he would attack me. At last I could endure my terrible situation no longer, and determined to make my way from the box at all hazards, and dispatch him, if his opposition should render it necessary for me to do so. To get out, I had to pass directly over his body, and he already seemed to anticipate my design—raising himself upon his fore-legs (as I perceived by the altered position of his eyes), and displayed the whole of his white fangs, which were easily discernible. I took the remains of the ham-skin, and the bottle containing the liqueur, and secured them about my person, together with a large carving-knife which Augustus had left me—then, folding my cloak as closely around me as possible, I made a movement towards the mouth of the box. No sooner did I do this, than the dog sprang with a loud growl towards my throat. The whole weight of his body struck me on the right shoulder, and I fell violently to the left, while the enraged animal passed entirely over me. I had fallen upon my knees, with my head buried among the blankets, and these protected me from a second furious assault, during which I felt the sharp teeth

pressing vigorously upon the woollen which enveloped my neck—yet, luckily, without being able to penetrate all the folds. I was now beneath the dog, and a few moments would place me completely in his power. Despair gave me strength, and I rose boldly up, shaking him from me by main force, and dragging with me the blankets from the mattress. These I now threw over him, and before he could extricate himself, I had got through the door and closed it effectually against his pursuit. In this struggle, however, I had been forced to drop the morsel of ham-skin, and I now found my whole stock of provisions reduced to a single gill of liqueur. As this reflection crossed my mind, I felt myself actuated by one of those fits of perverseness which might be supposed to influence a spoiled child in similar circumstances, and, raising the bottle to my lips, I drained it to the last drop, and dashed it furiously upon the floor.

Scarcely had the echo of the crash died away, when I heard my name pronounced in an eager but subdued voice, issuing from the direction of the steerage. So unexpected was anything of the kind, and so intense was the emotion excited within me by the sound, that I endeavoured in vain to reply. My powers of speech totally failed, and, in an agony of terror lest my friend should conclude me dead, and return without attempting to reach me, I stood up between the crates near the door of the box, trembling convulsively, and gasping and struggling for utterance. Had a thousand worlds depended upon a syllable, I could not have spoken it. There was a slight movement now audible among the lumber somewhere forward of my station. The sound presently grew less distinct, then again less so, and still less. Shall I ever forget my feelings at this moment? He was going—my friend, my companion, from whom I had a right to expect so much—he was going—he would abandon me—he was gone! He would leave me to perish miserably, to expire in the most horrible and loathsome of dungeons—and one word, one little syllable, would save me—yet that single syllable I could not utter! I felt, I am sure, more than ten thousand times the agonies of death itself. My brain reeled, and I fell, deadly sick, against the end of the box.

As I fell, the carving-knife was shaken out from the

waistband of my pantaloons, and dropped with a rattling sound to the floor. Never did any strain of the richest melody come so sweetly to my ears ! With the intensest anxiety I listened to ascertain the effect of the noise upon Augustus—for I knew that the person who called my name could be no one but himself. All was silent for some moments. At length I again heard the word '*Arthur!*' repeated in a low tone, and one full of hesitation. Reviving hope loosened at once my powers of speech, and I now screamed, at the top of my voice, '*Augustus! oh, Augustus!*' 'Hush! for God's sake be silent!' he replied, in a voice trembling with agitation; 'I will be with you immediately—as soon as I can make my way through the hold'. For a long time I heard him moving among the lumber, and every moment seemed to me an age. At length I felt his hand upon my shoulder, and he placed, at the same moment, a bottle of water to my lips. Those only who have been suddenly redeemed from the jaws of the tomb, or who have known the insufferable torments of thirst under circumstances as aggravated as those which encompassed me in my dreary prison, can form any idea of the unutterable transports which that one long draught of the richest of all physical luxuries afforded.

When I had in some degree satisfied my thirst, Augustus produced from his pocket three or four cold boiled potatoes, which I devoured with the greatest avidity. He had brought with him a light in a dark lantern, and the grateful rays afforded me scarcely less comfort than the food and drink. But I was impatient to learn the cause of his protracted absence, and he proceeded to recount what had happened on board during my incarceration.

## CHAPTER IV

THE brig put to sea, as I had supposed, in about an hour after he had left the watch. This was on the twentieth of June. It will be remembered that I had then been in the hold for three days; and, during this period, there was so constant a bustle on board, and so much running to and fro, especially in the cabin and state-rooms, that he

had had no chance of visiting me without the risk of having the secret of the trap discovered. When at length he did come, I had assured him that I was doing as well as possible ; and, therefore, for the two next days he felt but little uneasiness on my account—still, however, watching an opportunity of going down. It was not *until the fourth day* that he found one. Several times during this interval he had made up his mind to let his father know of the adventure, and have me come up at once ; but we were still within reaching distance of Nantucket, and it was doubtful, from some expressions which had escaped Captain Barnard, whether he would not immediately put back if he discovered me to be on board. Besides, upon thinking the matter over, Augustus, so he told me, could not imagine that I was in immediate want, or that I would hesitate, in such case, to make myself heard at the trap. When, therefore, he considered everything, he concluded to let me stay until he could meet with an opportunity of visiting me unobserved. This, as I said before, did not occur until the fourth day after his bringing me the watch, and the seventh since I had first entered the hold. He then went down without taking with him any water or provisions, intending in the first place merely to call my attention, and get me to come from the box to the trap—when he would go up to the state-room and thence hand me down a supply. When he descended for this purpose he found that I was asleep, for it seems that I was snoring very loudly. From all the calculations I can make on the subject, this must have been the slumber into which I fell just after my return from the trap with the watch, and which, consequently, must have lasted *for more than three entire days and nights* at the very least. Latterly, I have had reason, both from my own experience and the assurance of others, to be acquainted with the strong soporific effects of the stench arising from old fish-oil when closely confined ; and when I think of the condition of the hold in which I was imprisoned, and the long period during which the brig had been used as a whaling-vessel, I am more inclined to wonder that I awoke at all, after once falling asleep, than that I should have slept uninterruptedly for the period specified above.

Augustus called to me at first in a low voice and without closing the trap—but I made him no reply. He then shut the trap, and spoke to me in a louder, and finally in a very loud tone—still I continued to snore. He was now at a loss what to do. It would take him some time to make his way through the lumber to my box, and in the mean while his absence would be noticed by Captain Barnard, who had occasion for his services every minute, in arranging and copying papers connected with the business of the voyage. He determined, therefore, upon reflection, to ascend, and await another opportunity of visiting me. He was the more easily induced to this resolve, as my slumber appeared to be of the most tranquil nature, and he could not suppose that I had undergone any inconvenience from my incarceration. He had just made up his mind on these points when his attention was arrested by an unusual bustle, the sound of which proceeded apparently from the cabin. He sprang through the trap as quickly as possible, closed it, and threw open the door of his state-room. No sooner had he put his foot over the threshold than a pistol flashed in his face, and he was knocked down, at the same moment, by a blow from a handspike.

A strong hand held him on the cabin floor, with a tight grasp upon his throat ; still he was able to see what was going on around him. His father was tied hand and foot, and lying along the steps of the companion-way, with his head down, and a deep wound in the forehead, from which the blood was flowing in a continued stream. He spoke not a word, and was apparently dying. Over him stood the first mate, eyeing him with an expression of fiendish derision, and deliberately searching his pockets, from which he presently drew forth a large wallet and a chronometer. Seven of the crew (among whom was the cook, a negro) were rummaging the state-rooms on the larboard for arms, where they soon equipped themselves with muskets and ammunition. Besides Augustus and Captain Barnard, there were nine men altogether in the cabin, and these among the most ruffianly of the brig's company. The villains now went upon deck, taking my friend with them, after having secured his arms behind his back. They proceeded straight to the fore-castle, which was fastened

down—two of the mutineers standing by it with axes—two also at the main hatch. The mate called out in a loud voice—‘Do you hear there below? tumble up with you, one by one—now, mark that—and no grumbling!’ It was some minutes before any one appeared;—at last an Englishman, who had shipped as a raw hand, came up, weeping piteously, and entreating the mate, in the most humble manner, to spare his life. The only reply was a blow on the forehead from an axe. The poor fellow fell to the deck, without a groan, and the black cook lifted him up in his arms as he would a child, and tossed him deliberately into the sea. Hearing the blow and the plunge of the body, the men below could now be induced to venture on deck neither by threats nor promises, until a proposition was made to smoke them out. A general rush then ensued, and for a moment it seemed possible that the brig might be retaken. The mutineers, however, succeeded at last in closing the forecastle effectually before more than six of their opponents could get up. These six, finding themselves so greatly outnumbered and without arms, submitted after a brief struggle. The mate gave them fair words—no doubt with a view of inducing those below to yield, for they had no difficulty in hearing all that was said on deck. The result proved his sagacity, no less than his diabolical villany. All in the forecastle presently signified their intention of submitting, and, ascending one by one, were pinioned and thrown on their backs, together with the first six—there being, in all of the crew who were not concerned in the mutiny, twenty-seven.

A scene of the most horrible butchery ensued. The bound seamen were dragged to the gangway. Here the cook stood with an axe, striking each victim on the head as he was forced over the side of the vessel by the other mutineers. In this manner twenty-two perished, and Augustus had given himself up for lost, expecting every moment his own turn to come next. But it seemed that the villains were now either weary, or in some measure disgusted with their bloody labour; for the four remaining prisoners, together with my friend who had been thrown on the deck with the rest, were respited while the mate sent below for rum, and the whole murderous party held a

drunken carouse, which lasted until sunset. They now fell to disputing in regard to the fate of the survivors, who lay not more than four paces off, and could distinguish every word said. Upon some of the mutineers the liquor appeared to have a softening effect, for several voices were heard in favour of releasing the captives altogether, on condition of joining the mutiny and sharing the profits. The black cook, however (who in all respects was a perfect demon, and who seemed to exert as much influence, if not more, than the mate himself), would listen to no proposition of the kind, and rose repeatedly for the purpose of resuming his work at the gangway. Fortunately he was so far overcome by intoxication as to be easily restrained by the less blood-thirsty of the party, among whom was a line-manager, who went by the name of Dirk Peters. This man was the son of an Indian woman of the tribe of Upsarokas, who live among the fastnesses of the Black Hills, near the source of the Missouri. His father was a fur-trader, I believe, or at least connected in some manner with the Indian trading-posts on Lewis river. Peters himself was one of the most ferocious-looking men I ever beheld. He was short in stature, not more than four feet eight inches high, but his limbs were of Herculean mould. His hands, especially, were so enormously thick and broad as hardly to retain a human shape. His arms, as well as legs, were *bowed* in the most singular manner, and appeared to possess no flexibility whatever. His head was equally deformed, being of immense size, with an indentation on the crown (like that on the head of most negroes), and entirely bald. To conceal this latter deficiency, which did not proceed from old age, he usually wore a wig formed of any hair-like material which presented itself—occasionally the skin of a Spanish dog or American grizzly bear. At the time spoken of, he had on a portion of one of these bear-skins; and it added no little to the natural ferocity of his countenance, which betook of the Upsaroka character. The mouth extended nearly from ear to ear; the lips were thin, and seemed, like some other portions of his frame, to be devoid of natural pliancy, so that the ruling expression never varied under the influence of any emotion whatever. This ruling expression may be conceived when it is con-

sidered that the teeth were exceedingly long and protruding, and never even partially covered, in any instance, by the lips. To pass this man with a casual glance, one might imagine him to be convulsed with laughter; but a second look would induce a shuddering acknowledgment, that if such an expression were indicative of merriment, the merriment must be that of a demon. Of this singular being many anecdotes were prevalent among the seafaring men of Nantucket. These anecdotes went to prove his prodigious strength when under excitement, and some of them had given rise to a doubt of his sanity. But on board the *Grampus*, it seems, he was regarded, at the time of the mutiny, with feelings more of derision than of anything else. I have been thus particular in speaking of Dirk Peters, because, ferocious as he appeared, he proved the main instrument in preserving the life of Augustus, and because I shall have frequent occasion to mention him hereafter in the course of my narrative—a narrative, let me here say, which, in its latter portions, will be found to include incidents of a nature so entirely out of the range of human experience, and for this reason so far beyond the limits of human credulity, that I proceed in utter hopelessness of obtaining credence for all that I shall tell, yet confidently trusting in time and progressing science to verify some of the most important and most improbable of my statements.

After much indecision and two or three violent quarrels, it was determined at last that all the prisoners (with the exception of Augustus, whom Peters insisted in a jocular manner upon keeping as his clerk) should be set adrift in one of the smallest whaleboats. The mate went down into the cabin to see if Captain Barnard was still living—for, it will be remembered, he was left below when the mutineers came up. Presently the two made their appearance, the captain pale as death, but somewhat recovered from the effects of his wound. He spoke to the men in a voice hardly articulate, entreated them not to set him adrift, but to return to their duty, and promising to land them wherever they chose, and to take no steps for bringing them to justice. He might as well have spoken to the winds. Two of the ruffians seized him by the arms and hurled him

over the brig's side into the boat, which had been lowered while the mate went below. The four men who were lying on the deck were then untied and ordered to follow, which they did without attempting any resistance—Augustus being still left in his painful position, although he struggled and prayed only for the poor satisfaction of being permitted to bid his father farewell. A handful of sea-biscuit and a jug of water were now handed down; but neither mast, sail, oar, nor compass. The boat was towed astern for a few minutes, during which the mutineers held another consultation—it was then finally cut adrift. By this time night had come on—there were neither moon nor stars visible—and a short and ugly sea was running, although there was no great deal of wind. The boat was instantly out of sight, and little hope could be entertained for the unfortunate sufferers who were in it. This event happened, however, in latitude  $35^{\circ} 30'$  north, longitude  $61^{\circ} 20'$  west, and consequently at no very great distance from the Bermuda Islands. Augustus therefore endeavoured to console himself with the idea that the boat might either succeed in reaching the land, or come sufficiently near to be fallen in with by vessels off the coast.

All sail was now put upon the brig, and she continued her original course to the south-west—the mutineers being bent upon some piratical expedition, in which, from all that could be understood, a ship was to be intercepted on her way from the Cape Verd Islands to Porto Rico. No attention was paid to Augustus, who was untied and and suffered to go about anywhere forward of the cabin companion-way. Dirk Peters treated him with some degree of kindness, and on one occasion saved him from the brutality of the cook. His situation was still one of the most precarious, as the men were continually intoxicated, and there was no relying upon their continued good-humour or carelessness in regard to himself. His anxiety on my account he represented, however, as the most distressing result of his condition; and, indeed, I had never reason to doubt the sincerity of his friendship. More than once he had resolved to acquaint the mutineers with the secret of my being on board, but was restrained from so doing, partly through recollection of the atrocities he had

already beheld, and partly through a hope of being able soon to bring me relief. For the latter purpose he was constantly on the watch ; but, in spite of the most constant vigilance, three days elapsed after the boat was cut adrift before any chance occurred. At length, on the night of the third day, there came on a heavy blow from the eastward, and all hands were called up to take in sail. During the confusion which ensued, he made his way below unobserved, and into the state-room. What was his grief and horror in discovering that the latter had been rendered a place of deposit for a variety of sea-stores and ship furniture, and that several fathoms of old chain-cable, which had been stowed away beneath the companion-ladder, had been dragged thence to make room for a chest, and were now lying immediately upon the trap ! To remove it without discovery was impossible, and he returned on deck as quickly as he could. As he came up, the mate seized him by the throat, and demanding what he had been doing in the cabin, was about flinging him over the larboard bulwark, when his life was again preserved through the interference of Dirk Peters. Augustus was now put in handcuffs (of which there were several pairs on board), and his feet lashed tightly together. He was then taken into the steerage, and thrown into a lower berth next to the forecastle bulkheads, with the assurance that he should never put his foot on deck again 'until the brig was no longer a brig'. This was the expression of the cook, who threw him into the berth—it is hardly possible to say what precise meaning was intended by the phrase. The whole affair, however, proved the ultimate means of my relief, as will presently appear.

## CHAPTER V

FOR some minutes after the cook had left the forecastle, Augustus abandoned himself to despair, never hoping to leave the berth alive. He now came to the resolution of acquainting the first of the men who should come down with my situation, thinking it better to let me take my chance with the mutineers than perish of thirst in the hold—

for it had been ten days since I was first imprisoned, and my jug of water was not a plentiful supply even for four. As he was thinking on this subject, the idea came all at once into his head that it might be possible to communicate with me by the way of the main hold. In any other circumstances, the difficulty and hazard of the undertaking would have prevented him from attempting it; but now he had, at all events, little prospect of life, and consequently little to lose—he bent his whole mind, therefore, upon the task.

His handcuffs were the first consideration. At first he saw no method of removing them, and feared that he should thus be baffled in the very outset; but, upon a closer scrutiny, he discovered that the irons could be slipped off and on at pleasure with very little effort or inconvenience, merely by squeezing his hands through them—this species of manacle being altogether ineffectual in confining young persons, in whom the smaller bones readily yield to pressure. He now untied his feet, and, leaving the cord in such a manner that it could easily be readjusted in the event of any person's coming down, proceeded to examine the bulkhead where it joined the berth. The partition here was of soft pine board, an inch thick, and he saw that he should have little trouble in cutting his way through. A voice was now heard at the fore-castle companion-way, and he had just time to put his right hand into its handcuff (the left had not been removed), and to draw the rope in a slipknot around his ankle, when Dirk Peters came below, followed by Tiger, who immediately leaped into the berth and lay down. The dog had been brought on board by Augustus, who knew my attachment to the animal, and thought it would give me pleasure to have him with me during the voyage. He went up to our house for him immediately after first taking me into the hold, but did not think of mentioning the circumstance upon his bringing the watch. Since the mutiny, Augustus had not seen him before his appearance with Dirk Peters, and had given him up for lost, supposing him to have been thrown overboard by some of the malignant villains belonging to the mate's gang. It appeared afterward that he had crawled into a hole beneath a whaleboat, from which, not having room to turn round, he could not extricate

himself. Peters at last let him out, and, with a species of good feeling which my friend knew well how to appreciate, had now brought him to him in the forecastle as a companion, leaving at the same time some salt junk and potatoes, with a can of water : he then went on deck, promising to come down with something more to eat on the next day.

When he had gone, Augustus freed both hands from the manacles and unfastened his feet. He then turned down the head of the mattress on which he had been lying, and with his penknife (for the ruffians had not thought it worth while to search him) commenced cutting vigorously across one of the partition planks, as closely as possible to the floor of the berth. He chose to cut here, because, if suddenly interrupted, he would be able to conceal what had been done by letting the head of the mattress fall into its proper position. For the remainder of the day, however, no disturbance occurred, and by night he had completely divided the plank. It should here be observed, that none of the crew occupied the forecastle as a sleeping-place, living altogether in the cabin since the mutiny, drinking the wines, and feasting on the sea-stores of Captain Barnard, and giving no more heed than was absolutely necessary to the navigation of the brig. These circumstances proved fortunate both for myself and Augustus ; for, had matters been otherwise, he would have found it impossible to reach me. As it was, he proceeded with confidence in his design. It was near daybreak, however, before he completed the second division of the board (which was about a foot above the first cut), thus making an aperture quite large enough to admit his passage through with facility to the main orlop deck. Having got here, he made his way with but little trouble to the lower main hatch, although in so doing he had to scramble over tiers of oil-casks piled nearly as high as the upper deck, there being barely room enough left for his body. Upon reaching the hatch, he found that Tiger had followed him below, squeezing between two rows of the casks. It was now too late, however, to attempt getting to me before dawn, as the chief difficulty lay in passing through the close stowage in the lower hold. He therefore resolved to return, and wait till the next night. With this design, he proceeded to loosen the hatch, so that

he might have as little detention as possible when he should come again. No sooner had he loosened it than Tiger sprang eagerly to the small opening produced, snuffed for a moment, and then uttered a long whine, scratching at the same time, as if anxious to remove the covering with his paws. There could be no doubt, from his behaviour, that he was aware of my being in the hold, and Augustus thought it possible that he would be able to get to me if he put him down. He now hit upon the expedient of sending the note, as it was especially desirable that I should make no attempt at forcing my way out, at least under existing circumstances, and there could be no certainty of his getting to me himself on the morrow as he intended. After events proved how fortunate it was that the idea occurred to him as it did; for, had it not been for the receipt of the note, I should undoubtedly have fallen upon some plan, however desperate, of alarming the crew, and both our lives would most probably have been sacrificed in consequence.

Having concluded to write, the difficulty was now to procure the materials for so doing. An old toothpick was soon made into a pen; and this by means of feeling altogether, for the between-decks were as dark as pitch. Paper enough was obtained from the back of a letter—a duplicate of the forged letter from Mr. Ross. This had been the original draught; but the handwriting not being sufficiently well imitated, Augustus had written another, thrusting the first, by good fortune, into his coat-pocket, where it was now most opportunely discovered. Ink alone was thus wanting, and a substitute was immediately found for this by means of a slight incision with the penknife on the back of a finger just above the nail—a copious flow of blood ensuing, as usual, from wounds in that vicinity. The note was now written, as well as it could be in the dark, and under the circumstances. It briefly explained that a mutiny had taken place; that Captain Barnard was set adrift; and that I might expect immediate relief as far as provisions were concerned, but must not venture upon making any disturbance. It concluded with these words: *‘I have scrawled this with blood—your life depends upon lying close.’*

The slip of paper being tied upon the dog, he was now put down the hatchway, and Augustus made the best of his way back to the fore-castle, where he found no reason to believe that any of the crew had been in his absence. To conceal the hole in the partition, he drove his knife in just above it, and hung up a pea-jacket which he found in the berth. His handcuffs were then replaced, and also the rope around his ankles.

These arrangements were scarcely completed when Dirk Peters came below, very drunk, but in excellent humour, and bringing with him my friend's allowance of provision for the day. This consisted of a dozen large Irish potatoes roasted, and a pitcher of water. He sat for some time on a chest by the berth, and talked freely about the mate, and the general concerns of the brig. His demeanour was exceedingly capricious, and even grotesque. At one time Augustus was much alarmed by his odd conduct. At last, however, he went on deck, muttering a promise to bring his prisoner a good dinner on the morrow. During the day two of the crew (harpooners) came down, accompanied by the cook, all three in nearly the last stage of intoxication. Like Peters, they made no scruple of talking unreservedly about their plans. It appeared that they were much divided among themselves as to their ultimate course, agreeing in no point, except the attack on the ship from the Cape Verd Islands, with which they were in hourly expectation of meeting. As far as could be ascertained, the mutiny had not been brought about altogether for the sake of booty; a private pique of the chief mate's against Captain Barnard having been the main instigation. There now seemed to be two principal factions among the crew—one headed by the mate, the other by the cook. The former party were for seizing the first suitable vessel which should present itself, and equipping it at some of the West India Islands for a piratical cruise. The latter division, however, which was the stronger, and included Dirk Peters among its partisans, were bent upon pursuing the course originally laid out for the brig into the South Pacific; there either to take whale, or act otherwise, as circumstances should suggest. The representations of Peters, who had frequently visited these regions, had great

weight, apparently, with the mutineers, wavering, as they were, between half-engendered notions of profit and pleasure. He dwelt on the world of novelty and amusement to be found among the innumerable islands of the Pacific, on the perfect security and freedom from all restraint to be enjoyed, but, more particularly, on the deliciousness of the climate, on the abundant means of good living, and on the voluptuous beauty of the women. As yet, nothing had been absolutely determined upon; but the pictures of the hybrid line-manager were taking strong hold upon the ardent imaginations of the seamen, and there was every probability that his intentions would be finally carried into effect.

The three men went away in about an hour, and no one else entered the fore-castle all day. Augustus lay quiet until nearly night. He then freed himself from the rope and irons, and prepared for his attempt. A bottle was found in one of the berths, and this he filled with water from the pitcher left by Peters, storing his pockets at the same time with cold potatoes. To his great joy he also came across a lantern, with a small piece of tallow candle in it. This he could light at any moment, as he had in his possession a box of phosphorus matches. When it was quite dark, he got through the hole in the bulkhead, having taken the precaution to arrange the bedclothes in the berth so as to convey the idea of a person covered up. When through, he hung up the pea-jacket on his knife, as before, to conceal the aperture—this manœuvre being easily effected, as he did not readjust the piece of plank taken out until afterward. He was now on the main orlop deck, and proceeded to make his way, as before, between the upper deck and the oil-casks to the main hatchway. Having reached this, he lit the piece of candle, and descended, groping with extreme difficulty among the compact stowage of the hold. In a few moments he became alarmed at the insufferable stench and the closeness of the atmosphere. He could not think it possible that I had survived my confinement for so long a period breathing so oppressive an air. He called my name repeatedly, but I made him no reply, and his apprehensions seemed thus to be confirmed. The brig was rolling violently, and there was so

much noise in consequence, that it was useless to listen for any weak sound, such as those of my breathing or snoring. He threw open the lantern, and held it as high as possible, whenever an opportunity occurred, in order that, by observing the light, I might, if alive, be aware that succour was approaching. Still nothing was heard from me, and the supposition of my death began to assume the character of certainty. He determined, nevertheless, to force a passage, if possible, to the box, and at least ascertain beyond a doubt the truth of his surmises. He pushed on for some time in a most pitiable state of anxiety, until, at length, he found the pathway utterly blocked up, and that there was no possibility of making any farther way by the course in which he had set out. Overcome now by his feelings, he threw himself among the lumber in despair, and wept like a child. It was at this period that he heard the crash occasioned by the bottle which I had thrown down. Fortunate, indeed, was it that the incident occurred—for, upon this incident, trivial as it appears, the thread of my destiny depended. Many years elapsed, however, before I was aware of this fact. A natural shame and regret for his weakness and indecision prevented Augustus from confiding to me at once what a more intimate and unreserved communion afterward induced him to reveal. Upon finding his further progress in the hold impeded by obstacles which he could not overcome, he had resolved to abandon his attempt at reaching me, and return at once to the fore-castle. Before condemning him entirely on this head, the harassing circumstances which embarrassed him should be taken into consideration. The night was fast wearing away, and his absence from the fore-castle might be discovered; and, indeed, would necessarily be so, if he should fail to get back to the berth by daybreak. His candle was expiring in the socket, and there would be the greatest difficulty in retracing his way to the hatchway in the dark. It must be allowed, too, that he had every good reason to believe me dead; in which event no benefit could result to me from his reaching the box, and a world of danger would be encountered to no purpose by himself. He had repeatedly called, and I had made him no answer. I had been now

eleven days and nights with no more water than that contained in the jug which he had left with me—a supply which it was not at all probable I had hoarded in the beginning of my confinement, as I had had every cause to expect a speedy release. The atmosphere of the hold, too, must have appeared to him, coming from the comparatively open air of the steerage, of a nature absolutely poisonous, and by far more intolerable than it had seemed to me upon my first taking up my quarters in the box—the hatchways at that time having been constantly open for many months previous. Add to these considerations that of the scene of bloodshed and terror so lately witnessed by my friend; his confinement, privations, and narrow escapes from death, together with the frail and equivocal tenure by which he still existed—circumstances all so well calculated to prostrate every energy of mind—and the reader will be easily brought, as I have been, to regard his apparent falling off in friendship and in faith with sentiments rather of sorrow than of anger.

The crash of the bottle was distinctly heard, yet Augustus was not sure that it proceeded from the hold. The doubt, however, was sufficient inducement to persevere. He clambered up nearly to the orlop deck by means of the stowage, and then, watching for a lull in the pitchings of the vessel, he called out to me in as loud a tone as he could command, regardless, for the moment, of the danger of being overheard by the crew. It will be remembered that on this occasion the voice reached me, but I was so entirely overcome by violent agitation as to be incapable of reply. Confident, now, that his worst apprehensions were well founded, he descended, with a view of getting back to the fore-castle without loss of time. In his haste, some small boxes were thrown down, the noise occasioned by which I heard, as will be recollected. He had made considerable progress on his return when the fall of the knife again caused him to hesitate. He retraced his steps immediately, and, clambering up the stowage a second time, called out my name, loudly as before, having watched for a lull. This time I found voice to answer. Overjoyed at discovering me to be still alive, he now resolved to brave

every difficulty and danger in reaching me. Having extricated himself as quickly as possible from the labyrinth of lumber by which he was hemmed in, he at length struck into an opening which promised better, and finally, after a series of struggles, arrived at the box in a state of utter exhaustion.

## CHAPTER VI

THE leading particulars of this narration were all that Augustus communicated to me while we remained near the box. It was not until afterward that he entered fully into all the details. He was apprehensive of being missed, and I was wild with impatience to leave my detested place of confinement. We resolved to make our way at once to the hole in the bulkhead, near which I was to remain for the present, while he went through to reconnoitre. To leave Tiger in the box was what neither of us could endure to think of; yet, how to act otherwise was the question. He now seemed to be perfectly quiet, and we could not even distinguish the sound of his breathing upon applying our ears closely to the box. I was convinced that he was dead, and determined to open the door. We found him lying at full length, apparently in a deep stupor, yet still alive. No time was to be lost, yet I could not bring myself to abandon an animal who had now been twice instrumental in saving my life, without some attempt at preserving him. We therefore dragged him along with us as well as we could, although with the greatest difficulty and fatigue; Augustus, during part of the time, being forced to clamber over the impediments in our way with the huge dog in his arms—a feat to which the feebleness of my frame rendered me totally inadequate. At length we succeeded in reaching the hole, when Augustus got through, and Tiger was pushed in afterward. All was found to be safe, and we did not fail to return sincere thanks to God for our deliverance from the imminent danger we had escaped. For the present, it was agreed that I should remain near the opening, through which my companion could readily supply me with a part of his daily provision, and where

I could have the advantages of breathing an atmosphere comparatively pure.

In explanation of some portions of this narrative, wherein I have spoken of the stowage of the brig, and which may appear ambiguous to some of my readers who may have seen a proper or regular stowage, I must here state that the manner in which this most important duty had been performed on board the *Grampus* was a most shameful piece of neglect on the part of Captain Barnard, who was by no means as careful or as experienced a seaman as the hazardous nature of the service on which he was employed would seem necessarily to demand. A proper stowage cannot be accomplished in a careless manner, and many most disastrous accidents, even within the limits of my own experience, have arisen from neglect or ignorance in this particular. Coasting vessels, in the frequent hurry and bustle attendant upon taking in or discharging cargo, are the most liable to mishap from the want of a proper attention to stowage. The great point is to allow no possibility of the cargo or ballast's shifting position even in the most violent rollings of the vessel. With this end, great attention must be paid, not only to the bulk taken in, but to the nature of the bulk, and whether there be a full or only a partial cargo. In most kinds of freight the stowage is accomplished by means of a screw. Thus, in a load of tobacco or flour, the whole is screwed so tightly into the hold of the vessel that the barrels or hogsheads, upon discharging, are found to be completely flattened, and take some time to regain their original shape. This screwing, however, is resorted to principally with a view of obtaining more room in the hold; for in a *full* load of any such commodities as flour or tobacco, there can be no danger of any shifting whatever, at least none from which inconvenience can result. There have been instances, indeed, where this method of screwing has resulted in the most lamentable consequences, arising from a cause altogether distinct from the danger attendant upon a shifting of cargo. A load of cotton, for example, tightly screwed while in certain conditions, has been known, through the expansion of its bulk, to rend a vessel asunder at sea. There can be no doubt, either, that the same result would

ensue in the case of tobacco, while undergoing its usual course of fermentation, were it not for the interstices consequent upon the rotundity of the hogsheads.

It is when a partial cargo is received that danger is chiefly to be apprehended from shifting, and that precautions should be always taken to guard against such misfortune. Only those who have encountered a violent gale of wind, or rather who have experienced the rolling of a vessel in a sudden calm after the gale, can form an idea of the tremendous force of the plunges, and of the consequent terrible impetus given to all loose articles in the vessel. It is then that the necessity of a cautious stowage, when there is a partial cargo, becomes obvious. When lying to (especially with a small head sail), a vessel which is not properly modelled in the bows is frequently thrown upon her beam-ends ; this occurring even every fifteen or twenty minutes upon an average, yet without any serious consequences resulting, *provided there be a proper stowage*. If this, however, has not been strictly attended to, in the first of these heavy lurches the whole of the cargo tumbles over to the side of the vessel which lies upon the water, and, being thus prevented from regaining her equilibrium, as she would otherwise necessarily do, she is certain to fill in a few seconds and go down. It is not too much to say that at least one half of the instances in which vessels have foundered in heavy gales at sea may be attributed to a shifting of cargo or of ballast.

When a partial cargo of any kind is taken on board, the whole, after being first stowed as compactly as may be, should be covered with a layer of stout shifting-boards, extending completely across the vessel. Upon these boards strong temporary stanchions should be erected, reaching to the timbers above, and thus securing everything in its place. In cargoes consisting of grain, or any similar matter, additional precautions are requisite. A hold filled entirely with grain upon leaving port will be found not more than three-fourths full upon reaching its destination—this, too, although the freight, when measured bushel by bushel by the consignee, will overrun by a vast deal (on account of the swelling of the grain) the quantity consigned. This result is occasioned by *settling* during the voyage, and

is the more perceptible in proportion to the roughness of the weather experienced. If grain loosely thrown in a vessel, then, is ever so well secured by shifting-boards and stanchions, it will be liable to shift in a long passage so greatly as to bring about the most distressing calamities. To prevent these, every method should be employed before leaving port to *settle* the cargo as much as possible ; and for this there are many contrivances, among which may be mentioned the driving of wedges into the grain. Even after all this is done, and unusual pains taken to secure the shifting boards, no seaman who knows what he is about will feel altogether secure in a gale of any violence with a cargo of grain on board, and, least of all, with a partial cargo. Yet there are hundreds of our coasting vessels, and, it is likely, many more from the ports of Europe, which sail daily with partial cargoes, even of the most dangerous species, and without any precautions whatever. The wonder is that no more accidents occur than do actually happen. A lamentable instance of this heedlessness occurred to my knowledge in the case of Captain Joel Rice of the schooner *Firefly*, which sailed from Richmond, Virginia, to Madeira, with a cargo of corn, in the year 1825. The captain had gone many voyages without serious accident, although he was in the habit of paying no attention whatever to his stowage, more than to secure it in the ordinary manner. He had never before sailed with a cargo of grain, and on this occasion had the corn thrown on board loosely, when it did not much more than half fill the vessel. For the first portion of the voyage he met with nothing more than light breezes ; but when within a day's sail of Madeira there came on a strong gale from the N.N.E. which forced him to lie to. He brought the schooner to the wind under a double-reefed foresail alone, when she rode as well as any vessel could be expected to do, and shipped not a drop of water. Towards night the gale somewhat abated, and she rolled with more unsteadiness than before, but still did very well, until a heavy lurch threw her upon her beam-ends to starboard. The corn was then heard to shift bodily, the force of the movement bursting open the main hatchway. The vessel went down like a shot. This happened within hail of a small sloop

from Madeira, which picked up one of the crew (the only person saved), and which rode out the gale in perfect security, as indeed a jollyboat might have done under proper management.

The stowage on board the *Grampus* was most clumsily done, if stowage that could be called which was little better than a promiscuous huddling together of oil-casks<sup>1</sup> and ship furniture. I have already spoken of the condition of articles in the hold. On the orlop deck there was space enough for my body (as I have stated) between the oil-casks and the upper deck; a space was left open around the main hatchway; and several other large spaces were left in the stowage. Near the hole cut through the bulkhead by Augustus there was room enough for an entire cask, and in this space I found myself comfortably situated for the present.

By the time my friend had got safely into the berth, and re-adjusted his handcuffs and the rope, it was broad daylight. We had made a narrow escape indeed; for scarcely had he arranged all matters, when the mate came below with Dirk Peters and the cook. They talked for some time about the vessel from the Cape Verds, and seemed to be excessively anxious for her appearance. At length the cook came to the berth in which Augustus was lying, and seated himself in it near the head. I could see and hear everything from my hiding-place, for the piece cut out had not been put back, and I was in momentary expectation that the negro would fall against the pea-jacket, which was hung up to conceal the aperture, in which case all would have been discovered, and our lives would, no doubt, have been instantly sacrificed. Our good fortune prevailed, however; and although he frequently touched it as the vessel rolled, he never pressed against it sufficiently to bring about a discovery. The bottom of the jacket had been carefully fastened to the bulkhead, so that the hole might not be seen by its swinging to one side. All this time Tiger was lying in the foot of the berth, and appeared to have recovered in some measure his faculties, for I could see him occasionally open his eyes and draw a long breath.

<sup>1</sup> Whaling-vessels are usually fitted with iron oil-tanks—why the *Grampus* was not I have never been able to ascertain.

After a few minutes the mate and cook went above, leaving Dirk Peters behind, who, as soon as they were gone, came and sat himself down in the place just occupied by the mate. He began to talk very sociably with Augustus, and we could now see that the greater part of his apparent intoxication, while the two others were with him, was a feint. He answered all my companion's questions with perfect freedom; told him that he had no doubt of his father's having been picked up, as there were no less than five sail in sight just before sundown on the day he was cut adrift; and used other language of a consolatory nature, which occasioned me no less surprise than pleasure. Indeed, I began to entertain hopes, that through the instrumentality of Peters we might be finally enabled to regain possession of the brig, and this idea I mentioned to Augustus as soon as I found an opportunity. He thought the matter possible, but urged the necessity of the greatest caution in making the attempt, as the conduct of the hybrid appeared to be instigated by the most arbitrary caprice alone; and, indeed, it was difficult to say if he was at any moment of sound mind. Peters went upon deck in about an hour, and did not return again until noon, when he brought Augustus a plentiful supply of junk beef and pudding. Of this, when we were left alone, I partook heartily, without returning through the hole. No one else came down into the forecastle during the day, and at night I got into Augustus's berth, where I slept soundly and sweetly until nearly daybreak, when he awakened me upon hearing a stir upon deck, and I regained my hiding-place as quickly as possible. When the day was fully broke, we found that Tiger had recovered his strength almost entirely, and gave no indications of hydrophobia, drinking a little water that was offered him with great apparent eagerness. During the day he regained all his former vigour and appetite. His strange conduct had been brought on, no doubt, by the deleterious quality of the air of the hold, and had no connection with canine madness. I could not sufficiently rejoice that I had persisted in bringing him with me from the box. This day was the thirtieth of June, and the thirteenth since the *Grampus* made sail from Nantucket.

On the second of July the mate came below, drunk as usual, and in an excessively good humour. He came to Augustus's berth, and, giving him a slap on the back, asked him if he thought he could behave himself if he let him loose, and whether he would promise not to be going into the cabin again. To this, of course, my friend answered in the affirmative, when the ruffian set him at liberty, after making him drink from a flask of rum which he drew from his coat-pocket. Both now went on deck, and I did not see Augustus for about three hours. He then came below with the good news that he had obtained permission to go about the brig as he pleased anywhere forward of the mainmast, and that he had been ordered to sleep, as usual, in the forecastle. He brought me, too, a good dinner, and a plentiful supply of water. The brig was still cruising for the vessel from the Cape Verds, and a sail was now in sight, which was thought to be the one in question. As the events of the ensuing eight days were of little importance, and had no direct bearing upon the main incidents of my narrative, I will here throw them into the form of a journal, as I do not wish to omit them altogether.

*July 3.* Augustus furnished me with three blankets, with which I contrived a comfortable bed in my hiding-place. No one came below, except my companion, during the day. Tiger took his station in the berth just by the aperture, and slept heavily, as if not yet entirely recovered from the effects of his sickness. Towards night a flaw of wind struck the brig before sail could be taken in, and very nearly capsized her. The puff died away immediately, however, and no damage was done beyond the splitting of the foretopsail. Dirk Peters treated Augustus all this day with great kindness, and entered into a long conversation with him respecting the Pacific Ocean, and the islands he had visited in that region. He asked him whether he would not like to go with the mutineers on a kind of exploring and pleasure voyage in those quarters, and said that the men were gradually coming over to the mate's views. To this Augustus thought it best to reply that he would be glad to go on such an adventure, since nothing better could be done, and that anything was preferable to a piratical life.

*July 4th.* The vessel in sight proved to be a small brig from Liverpool, and was allowed to pass unmolested. Augustus spent most of his time on deck, with a view of obtaining all the information in his power respecting the intentions of the mutineers. They had frequent and violent quarrels among themselves, in one of which a harpooner, Jim Bonner, was thrown overboard. The party of the mate was gaining ground. Jim Bonner belonged to the cook's gang, of which Peters was a partisan.

*July 5th.* About daybreak there came on a stiff breeze from the west, which at noon freshened into a gale, so that the brig could carry nothing more than her trysail and foresail. In taking in the foretopsail, Simms, one of the common hands, and belonging also to the cook's gang, fell overboard, being very much in liquor, and was drowned—no attempt being made to save him. The whole number of persons on board was now thirteen, to wit: Dirk Peters; Seymour, the black cook; — Jones; — Greely; Hartman Rogers; and William Allen, of the cook's party; the mate, whose name I never learned; Absalom Hicks; — Wilson; John Hunt; and Richard Parker, of the mate's party—besides Augustus and myself.

*July 6th.* The gale lasted all this day, blowing in heavy squalls, accompanied with rain. The brig took in a good deal of water through her seams, and one of the pumps was kept continually going, Augustus being forced to take his turn. Just at twilight a large ship passed close by us, without having been discovered until within hail. This ship was supposed to be the one for which the mutineers were on the look-out. The mate hailed her, but the reply was drowned in the roaring of the gale. At eleven, a sea was shipped amid-ships, which tore away a great portion of the larboard bulwarks, and did some other slight damage. Towards morning the weather moderated, and at sunrise there was very little wind.

*July 7th.* There was a heavy swell running all this day, during which the brig, being light, rolled excessively, and many articles broke loose in the hold, as I could hear distinctly from my hiding-place. I suffered a great deal from sea-sickness. Peters had a long conversation this day with Augustus, and told him that two of his gang, Greely

and Allen, had gone over to the mate, and were resolved to turn pirates. He put several questions to Augustus which he did not then exactly understand. During a part of this evening the leak gained upon the vessel; and little could be done to remedy it, as it was occasioned by the brig's straining, and taking in the water through her seams. A sail was thrummed, and got under the bows, which aided us in some measure, so that we began to gain upon the leak.

*July 8th.* A light breeze sprung up at sunrise from the eastward, when the mate headed the brig to the south-west, with the intention of making some of the West India Islands, in pursuance of his piratical designs. No opposition was made by Peters or the cook—at least none in the hearing of Augustus. All idea of taking the vessel from the Cape Verds was abandoned. The leak was now easily kept under by one pump going every three-quarters of an hour. The sail was drawn from beneath the bows. Spoke two small schooners during the day.

*July 9th.* Fine weather. All hands employed in repairing bulwarks. Peters had again a long conversation with Augustus, and spoke more plainly than he had done heretofore. He said nothing should induce him to come into the mate's views, and even hinted his intention of taking the brig out of his hands. He asked my friend if he could depend upon his aid in such case, to which Augustus said, 'Yes,' without hesitation. Peters then said he would sound the others of his party upon the subject, and went away. During the remainder of the day Augustus had no opportunity of speaking with him privately.

## CHAPTER VII

JULY 10. Spoke a brig from Rio, bound to Norfolk. Weather hazy, with a light baffling wind from the eastward. To-day Hartman Rogers died, having been attacked on the eighth with spasms after drinking a glass of grog. This man was one of the cook's party, and one upon whom Peters placed his main reliance. He told Augustus that he believed the mate had poisoned him, and that he

expected, if he did not be on the look-out, his own turn would come shortly. There were now only himself, Jones, and the cook belonging to his own gang—on the other side there were five. He had spoken to Jones about taking the command from the mate; but the project having been coolly received, he had been deterred from pressing the matter any further, or from saying anything to the cook. It was well, as it happened, that he was so prudent, for in the afternoon the cook expressed his determination of siding with the mate, and went over formally to that party; while Jones took an opportunity of quarrelling with Peters, and hinted that he would let the mate know of the plan in agitation. There was now, evidently, no time to be lost, and Peters expressed his determination of attempting to take the vessel at all hazards, provided Augustus would lend him his aid. My friend at once assured him of his willingness to enter into any plan for that purpose, and, thinking the opportunity a favourable one, made known the fact of my being on board. At this the hybrid was not more astonished than delighted, as he had no reliance whatever upon Jones, whom he already considered as belonging to the party of the mate. They went below immediately, when Augustus called to me by name, and Peters and myself were soon made acquainted. It was agreed that we should attempt to retake the vessel upon the first good opportunity, leaving Jones altogether out of our councils. In the event of success, we were to run the brig into the first port that offered, and deliver her up. The desertion of his party had frustrated Peters's design of going into the Pacific—an adventure which could not be accomplished without a crew, and he depended upon either getting acquitted upon trial, on the score of insanity (which he solemnly averred had actuated him in lending his aid to the mutiny), or upon obtaining a pardon, if found guilty, through the representations of Augustus and myself. Our deliberations were interrupted for the present by the cry of, 'All hands take in sail,' and Peters and Augustus ran up on deck.

As usual, the crew were nearly all drunk; and, before sail could be properly taken in, a violent squall laid the brig on her beam-ends. By keeping her away, however,

she righted, having shipped a good deal of water. Scarcely was everything secure, when another squall took the vessel, and immediately afterward another—no damage being done. There was every appearance of a gale of wind, which, indeed, shortly came on, with great fury, from the northward and westward. All was made as snug as possible, and we laid to, as usual, under a close-reefed foresail. As night drew on, the wind increased in violence, with a remarkably heavy sea. Peters now came into the forecabin with Augustus, and we resumed our deliberations.

We agreed that no opportunity could be more favourable than the present for carrying our design into effect, as an attempt at such a moment would never be anticipated. As the brig was snugly laid to, there would be no necessity of manœuvring her until good weather, when, if we succeeded in our attempt, we might liberate one, or perhaps two of the men, to aid us in taking her into port. The main difficulty was the great disproportion in our forces. There were only three of us, and in the cabin there were nine. All the arms on board, too, were in their possession, with the exception of a pair of small pistols which Peters had concealed about his person, and the large seaman's knife which he always wore in the waistband of his pantaloons. From certain indications, too—such, for example, as there being no such thing as an axe or a handspike lying in their customary places—we began to fear that the mate had his suspicions, at least in regard to Peters, and that he would let slip no opportunity of getting rid of him. It was clear, indeed, that what we should determine to do could not be done too soon. Still the odds were too much against us to allow of our proceeding without the greatest caution.

Peters proposed that he should go up on deck, and enter into conversation with the watch (Allen), when he would be able to throw him into the sea without trouble, and without making any disturbance, by seizing a good opportunity; that Augustus and myself should then come up, and endeavour to provide ourselves with some kind of weapons from the deck; and that we should then make a rush together, and secure the companion-way before any opposition could be offered. I objected to this, because I could not believe that the mate (who was a cunning fellow

in all matters which did not affect his superstitious prejudices) would suffer himself to be so easily entrapped. The very fact of there being a watch on deck at all was sufficient proof that he was upon the alert—it not being usual, except in vessels where discipline is most rigidly enforced, to station a watch on deck when a vessel is lying to in a gale of wind. As I address myself principally, if not altogether, to persons who have never been to sea, it may be as well to state the exact condition of a vessel under such circumstances. Lying to, or, in sea-parlance, ‘laying to,’ is a measure resorted to for various purposes, and effected in various manners. In moderate weather, it is frequently done with a view of merely bringing the vessel to a stand-still, to wait for another vessel, or any similar object. If the vessel which lies to is under full sail, the manœuvre is usually accomplished by throwing round some portion of her sails, so as to let the wind take them aback, when she becomes stationary. But we are now speaking of lying to in a gale of wind. This is done when the wind is ahead, and too violent to admit of carrying sail without danger of capsizing; and sometimes even when the wind is fair, but the sea too heavy for the vessel to be put before it. If a vessel be suffered to scud before the wind in a very heavy sea, much damage is usually done her by the shipping of water over her stern, and sometimes by the violent plunges she makes forward. This manœuvre, then, is seldom resorted to in such case, unless through necessity. When the vessel is in a leaky condition, she is often put before the wind even in the heaviest seas; for, when lying to, her seams are sure to be greatly opened by her violent straining, and it is not so much the case when scudding. Often, too, it becomes necessary to scud a vessel, either when the blast is so exceedingly furious as to tear in pieces the sail which is employed with a view of bringing her head to the wind, or when, through the false modelling of the frame or other causes, the main object cannot be effected.

Vessels in a gale of wind are laid to in different manners, according to their peculiar construction. Some lie to best under a foresail, and this, I believe, is the sail most usually employed. Large square-rigged vessels have sails for the express purpose, called storm-staysails. But the jib is

occasionally employed by itself—sometimes the jib and foresail, or a double-reefed foresail, and not unfrequently the aftersails, are made use of. Foretopsails are very often found to answer the purpose better than any other species of sail. The *Grampus* was generally laid to under a close-reefed foresail.

When a vessel is to be laid to, her head is brought up to the wind just so nearly as to fill the sail under which she lies, when hauled flat aft, that is, when brought diagonally across the vessel. This being done, the bows point within a few degrees of the direction from which the wind issues, and the windward bow of course receives the shock of the waves. In this situation a good vessel will ride out a very heavy gale of wind without shipping a drop of water, and without any further attention being requisite on the part of the crew. The helm is usually lashed down, but this is altogether unnecessary (except on account of the noise it makes when loose), for the rudder has no effect upon the vessel when lying to. Indeed, the helm had far better be left loose than lashed very fast, for the rudder is apt to be torn off by heavy seas if there be no room for the helm to play. As long as the sail holds, a well-modelled vessel will maintain her situation, and ride every sea, as if instinct with life and reason. If the violence of the wind, however, should tear the sail into pieces (a feat which it requires a perfect hurricane to accomplish under ordinary circumstances), there is then imminent danger. The vessel falls off from the wind, and, coming broadside to the sea, is completely at its mercy: the only resource in this case is to put her quietly before the wind, letting her scud until some other sail can be set. Some vessels will lie to under no sail whatever, but such are not to be trusted at sea.

But to return from this digression. It had never been customary with the mate to have any watch on deck when lying to in a gale of wind, and the fact that he had now one, coupled with the circumstance of the missing axes and handspikes, fully convinced us that the crew were too well on the watch to be taken by surprise in the manner Peters had suggested. Something, however, was to be done, and that with as little delay as practicable, for there could be no doubt that a suspicion having been once entertained

against Peters, he would be sacrificed upon the earliest occasion, and one would certainly be either found or made upon the breaking of the gale.

Augustus now suggested that if Peters could contrive to remove, under any pretext, the piece of chain-cable which lay over the trap in the state-room, we might possibly be able to come upon them unawares by means of the hold ; but a little reflection convinced us that the vessel rolled and pitched too violently for any attempt of that nature.

By good fortune I at length hit upon the idea of working upon the superstitious terrors and guilty conscience of the mate. It will be remembered that one of the crew, Hartman Rogers, had died during the morning, having been attacked two days before with spasms after drinking some spirits and water. Peters had expressed to us his opinion that this man had been poisoned by the mate, and for this belief he had reasons, so he said, which were incontrovertible, but which he could not be prevailed upon to explain to us—this wayward refusal being only in keeping with other points of his singular character. But whether or not he had any better grounds for suspecting the mate than we had ourselves, we were easily led to fall in with his suspicion, and determined to act accordingly.

Rogers had died about eleven in the forenoon, in violent convulsions ; and the corpse presented in a few minutes after death one of the most horrid and loathsome spectacles I ever remember to have seen. The stomach was swollen immensely, like that of a man who has been drowned and lain under water for many weeks. The hands were in the same condition, while the face was shrunken, shrivelled, and of a chalky whiteness, except where relieved by two or three glaring red splotches, like those occasioned by the erysipelas : one of these splotches extended diagonally across the face, completely covering up an eye as if with a band of red velvet. In this disgusting condition the body had been brought up from the cabin at noon to be thrown overboard, when the mate getting a glimpse of it (for he now saw it for the first time), and being either touched with remorse for his crime or struck with terror at so horrible a sight, ordered the men to sew the body up in

its hammock, and allow it the usual rites of sea-burial. Having given these directions, he went below, as if to avoid any further sight of his victim. While preparations were making to obey his orders, the gale came on with great fury, and the design was abandoned for the present. The corpse, left to itself, was washed into the larboard scuppers, where it still lay at the time of which I speak, floundering about with the furious lurches of the brig.

Having arranged our plan, we set about putting it in execution as speedily as possible. Peters went upon deck, and, as he had anticipated, was immediately accosted by Allen, who appeared to be stationed more as a watch upon the forecastle than for any other purpose. The fate of this villain, however, was speedily and silently decided; for Peters, approaching him in a careless manner, as if about to address him, seized him by the throat, and before he could utter a single cry, tossed him over the bulwarks. He then called to us, and we came up. Our first precaution was to look about for something with which to arm ourselves, and in doing this we had to proceed with great care, for it was impossible to stand on deck an instant without holding fast, and violent seas broke over the vessel at every plunge forward. It was indispensable, too, that we should be quick in our operations, for every minute we expected the mate to be up to set the pumps going, as it was evident the brig must be taking in water very fast. After searching about for some time, we could find nothing more fit for our purpose than the two pump-handles, one of which Augustus took, and I the other. Having secured these, we stripped off the shirt of the corpse and dropped the body overboard. Peters and myself then went below, leaving Augustus to watch upon deck, where he took his station just where Allen had been placed, and with his back to the cabin companion-way, so that, if any one of the mate's gang should come up, he might suppose it was the watch.

As soon as I got below I commenced disguising myself so as to represent the corpse of Rogers. The shirt which we had taken from the body aided us very much, for it was of singular form and character, and easily recognizable—a kind of smock, which the deceased wore over his other clothing. It was a blue stockinett, with large white stripes

running across. Having put this on, I proceeded to equip myself with a false stomach, in imitation of the horrible deformity of the swollen corpse. This was soon effected by means of stuffing with some bedclothes. I then gave the same appearance to my hands by drawing on a pair of white woollen mittens, and filling them in with any kind of rags that offered themselves. Peters then arranged my face, first rubbing it well over with white chalk, and afterwards splotching it with blood, which he took from a cut in his finger. The streak across the eye was not forgotten, and presented a most shocking appearance.

## CHAPTER VIII

As I viewed myself in a fragment of looking-glass which hung up in the cabin, and by the dim light of a kind of battle-lantern, I was so impressed with a sense of vague awe at my appearance, and at the recollection of the terrific reality which I was thus representing, that I was seized with a violent tremor, and could scarcely summon resolution to go on with my part. It was necessary, however, to act with decision, and Peters and myself went upon deck.

We there found everything safe, and, keeping close to the bulwarks, the three of us crept to the cabin companion-way. It was only partially closed, precautions having been taken to prevent its being suddenly pushed to from without, by means of placing billets of wood on the upper step so as to interfere with the shutting. We found no difficulty in getting a full view of the interior of the cabin through the cracks where the hinges were placed. It now proved to have been very fortunate for us that we had not attempted to take them by surprise, for they were evidently on the alert. Only one was asleep, and he lying just at the foot of the companion-ladder, with a musket by his side. The rest were seated on several mattresses, which had been taken from the berths and thrown on the floor. They were engaged in earnest conversation; and although they had been carousing, as appeared from two empty jugs, with some tin tumblers which lay about, they were not as much intoxicated as usual. All had knives, one or two of them

pistols, and a great many muskets were lying in a berth close at hand.

We listened to their conversation for some time before we could make up our minds how to act, having as yet resolved on nothing determinate, except that we would attempt to paralyze their exertions, when we should attack them, by means of the apparition of Rogers. They were discussing their piratical plans, in which all we could hear distinctly was, that they would unite with the crew of a schooner *Hornet*, and, if possible, get the schooner herself into their possession preparatory to some attempt on a large scale, the particulars of which could not be made out by either of us.

One of the men spoke of Peters, when the mate replied to him in a low voice which could not be distinguished, and afterward added more loudly, that 'he could not understand his being so much forward with the captain's brat in the fore-castle, and he thought the sooner both of them were overboard the better'. To this no answer was made, but we could easily perceive that the hint was well received by the whole party, and more particularly by Jones. At this period I was excessively agitated, the more so as I could see that neither Augustus nor Peters could determine how to act. I made up my mind, however, to sell my life as dearly as possible, and not to suffer myself to be overcome by any feelings of trepidation.

The tremendous noise made by the roaring of the wind in the rigging, and the washing of the sea over the deck, prevented us from hearing what was said, except during momentary lulls. In one of these, we all distinctly heard the mate tell one of the men to 'go forward, and order the d—d lubbers to come into the cabin, where he could have an eye upon them, for he wanted no such secret doings on board the brig'. It was well for us that the pitching of the vessel at this moment was so violent as to prevent this order from being carried into instant execution. The cook got up from his mattress to go for us, when a tremendous lurch, which I thought would carry away the masts, threw him headlong against one of the larboard state-room doors, bursting it open, and creating a good deal of other confusion. Luckily, neither of our party was thrown from his

position, and we had time to make a precipitate retreat to the fore-castle, and arrange a hurried plan of action before the messenger made his appearance, or rather before he put his head out of the companion-hatch, for he did not come on deck. From this station he could not notice the absence of Allen, and he accordingly bawled out, as if to him, repeating the orders of the mate. Peters cried out, 'Ay, ay,' in a disguised voice, and the cook immediately went below, without entertaining a suspicion that all was not right.

My two companions now proceeded boldly aft and down into the cabin, Peters closing the door after him in the same manner he had found it. The mate received them with feigned cordiality, and told Augustus that, since he had behaved himself so well of late, he might take up his quarters in the cabin, and be one of them for the future. He then poured him out a tumbler half full of rum, and made him drink it. All this I saw and heard, for I followed my friends to the cabin as soon as the door was shut, and took up my old point of observation. I had brought with me the two pump-handles, one of which I secured near the companion-way, to be ready for use when required.

I now steadied myself as well as possible so as to have a good view of all that was passing within, and endeavoured to nerve myself to the task of descending among the mutineers when Peters should make a signal to me, as agreed upon. Presently he contrived to turn the conversation upon the bloody deeds of the mutiny, and, by degrees, led the men to talk of the thousand superstitions which are so universally current among seamen. I could not make out all that was said, but I could plainly see the effects of the conversation in the countenances of those present. The mate was evidently much agitated, and presently, when some one mentioned the terrific appearance of Rogers's corpse, I thought he was upon the point of swooning. Peters now asked him if he did not think it would be better to have the body thrown overboard at once, as it was too horrible a sight to see it floundering about in the scuppers. At this the villain absolutely gasped for breath, and turned his head slowly round upon his companions, as if imploring some one to go up and perform

the task. No one, however, stirred, and it was quite evident that the whole party were wound up to the highest pitch of nervous excitement. Peters now made me the signal. I immediately threw open the door of the companion-way, and, descending, without uttering a syllable, stood erect in the midst of the party.

The intense effect produced by this sudden apparition is not at all to be wondered at when the various circumstances are taken into consideration. Usually, in cases of a similar nature, there is left in the mind of the spectator some glimmering of doubt as to the reality of the vision before his eyes ; a degree of hope, however feeble, that he is the victim of chicanery, and that the apparition is not actually a visitant from the world of shadows. It is not too much to say that such remnants of doubt have been at the bottom of almost every such visitation, and that the appalling horror which has sometimes been brought about, is to be attributed, even in the cases most in point, and where most suffering has been experienced, more to a kind of anticipative horror, lest the apparition *might possibly be* real, than to an unwavering belief in its reality. But, in the present instance, it will be seen immediately, that in the minds of the mutineers there was not even the shadow of a basis upon which to rest a doubt that the apparition of Rogers was indeed a revivification of his disgusting corpse, or at least its spiritual image. The isolated situation of the brig, with its entire inaccessibility on account of the gale, confined the apparently possible means of deception within such narrow and definite limits, that they must have thought themselves enabled to survey them all at a glance. They had now been at sea twenty-four days, without holding more than a speaking communication with any vessel whatever. The whole of the crew, too—at least all whom they had the most remote reason for suspecting to be on board—were assembled in the cabin, with the exception of Allen, the watch ; and his gigantic stature (he was six feet six inches high) was too familiar in their eyes to permit the notion that he was the apparition before them to enter their minds even for an instant. Add to these considerations the awe-inspiring nature of the tempest, and that of the conversation brought about by

Peters ; the deep impression which the loathsomeness of the actual corpse had made in the morning upon the imaginations of the men ; the excellence of the imitation in my person, and the uncertain and wavering light in which they beheld me, as the glare of the cabin lantern, swinging violently to and fro, fell dubiously and fitfully upon my figure, and there will be no reason to wonder that the deception had even more than the entire effect which we had anticipated. The mate sprang up from the mattress on which he was lying, and, without uttering a syllable, fell back, stone dead, upon the cabin floor, and was hurled to the leeward like a log by a heavy roll of the brig. Of the remaining seven, there were but three who had at first any degree of presence of mind. The four others sat for some time rooted apparently to the floor—the most pitiable objects of horror and utter despair my eyes ever encountered. The only opposition we experienced at all was from the cook, John Hunt, and Richard Parker ; but they made but a feeble and irresolute defence. The two former were shot instantly by Peters, and I felled Parker with a blow on the head from the pump-handle which I had brought with me. In the meantime, Augustus seized one of the muskets lying on the floor, and shot another mutineer (—— Wilson) through the breast. There were now but three remaining ; but by this time they had become aroused from their lethargy, and perhaps began to see that a deception had been practised upon them, for they fought with great resolution and fury, and, but for the immense muscular strength of Peters, might have ultimately got the better of us. These three men were —— Jones, —— Greely, and Absalom Hicks. Jones had thrown Augustus on the floor, stabbed him in several places along the right arm, and would no doubt have soon dispatched him (as neither Peters nor myself could immediately get rid of our antagonists), had it not been for the timely aid of a friend, upon whose assistance we, surely, had never depended. This friend was no other than Tiger. With a low growl, he bounded into the cabin, at a most critical moment for Augustus, and, throwing himself upon Jones, pinned him to the floor in an instant. My friend, however, was now too much injured to render us any aid whatever,

and I was so encumbered with my disguise that I could do but little. The dog would not leave his hold upon the throat of Jones—Peters, nevertheless, was far more than a match for the two men who remained, and would, no doubt, have dispatched them sooner, had it not been for the narrow space in which he had to act, and the tremendous lurches of the vessel. Presently he was enabled to get hold of a heavy stool, several of which lay about the floor. With this he beat out the brains of Greely as he was in the act of discharging a musket at me, and immediately afterward a roll of the brig throwing him in contact with Hicks, he seized him by the throat, and, by dint of sheer strength, strangled him instantaneously. Thus, in far less time than I have taken to tell it, we found ourselves masters of the brig.

The only person of our opponents who was left alive was Richard Parker. This man, it will be remembered, I had knocked down with a blow from the pump-handle at the commencement of the attack. He now lay motionless by the door of the shattered state-room; but, upon Peters touching him with his foot, he spoke, and entreated for mercy. His head was only slightly cut, and otherwise he had received no injury, having been merely stunned by the blow. He now got up, and, for the present, we secured his hands behind his back. The dog was still growling over Jones; but, upon examination, we found him completely dead, the blood issuing in a stream from a deep wound in the throat, inflicted, no doubt, by the sharp teeth of the animal.

It was now about one o'clock in the morning, and the wind was still blowing tremendously. The brig evidently laboured much more than usual, and it became absolutely necessary that something should be done with a view of easing her in some measure. At almost every roll to leeward she shipped a sea, several of which came partially down into the cabin during our scuffle, the hatchway having been left open by myself when I descended. The entire range of bulwarks to larboard had been swept away, as well as the caboose, together with the jollyboat from the counter. The creaking and working of the mainmast, too, gave indication that it was nearly sprung. To make room

for more stowage in the after hold, the heel of this mast had been stepped between decks (a very reprehensible practice, occasionally resorted to by ignorant ship-builders), so that it was in imminent danger of working from its step. But, to crown all our difficulties, we plumbed the well, and found no less than seven feet water.

Leaving the bodies of the crew lying in the cabin, we got to work immediately at the pumps—Parker, of course, being set at liberty to assist us in the labour. Augustus's arm was bound up as well as we could effect it, and he did what he could, but that was not much. However, we found that we could just manage to keep the leak from gaining upon us by having one pump constantly going. As there were only four of us, this was severe labour; but we endeavoured to keep up our spirits, and looked anxiously for daybreak, when we hoped to lighten the brig by cutting away the mainmast.

In this manner we passed a night of terrible anxiety and fatigue, and, when the day at length broke, the gale had neither abated in the least, nor were there any signs of its abating. We now dragged the bodies on deck and threw them overboard. Our next care was to get rid of the mainmast. The necessary preparations having been made, Peters cut away at the mast (having found axes in the cabin), while the rest of us stood by the stays and lanyards. As the brig gave a tremendous lee-lurch, the word was given to cut away the weather-lanyards, which being done, the whole mass of wood and rigging plunged into the sea, clear of the brig, and without doing any material injury. We now found that the vessel did not labour quite as much as before, but our situation was still exceedingly precarious, and, in spite of the utmost exertions, we could not gain upon the leak without the aid of both pumps. The little assistance which Augustus could render us was not really of any importance. To add to our distress, a heavy sea, striking the brig to windward, threw her off several points from the wind, and, before she could regain her position, another broke completely over her, and hurled her full upon her beam-ends. The ballast now shifted in a mass to leeward (the stowage had been knocking about perfectly at random for some time), and for a few moments

we thought nothing could save us from capsizing. Presently, however, we partially righted; but the ballast still retaining its place to larboard, we lay so much along that it was useless to think of working the pumps, which indeed we could not have done much longer in any case, as our hands were entirely raw with the excessive labour we had undergone, and were bleeding in the most horrible manner.

Contrary to Parker's advice, we now proceeded to cut away the foremast, and at length accomplished it after much difficulty, owing to the position in which we lay. In going overboard the wreck took with it the bowsprit, and left us a complete hulk.

So far we had had reason to rejoice in the escape of our longboat, which had received no damage from any of the huge seas which had come on board. But we had not long to congratulate ourselves; for the foremast having gone, and, of course, the foresail with it, by which the brig had been steadied, every sea now made a complete breach over us, and in five minutes our deck was swept from stem to stern, the longboat and starboard bulwarks torn off, and even the windlass shattered into fragments. It was, indeed, hardly possible for us to be in a more pitiable condition.

At noon there seemed to be some slight appearance of the gale's abating, but in this we were sadly disappointed, for it only lulled for a few minutes to blow with redoubled fury. About four in the afternoon it was utterly impossible to stand up against the violence of the blast; and, as the night closed in upon us, I had not a shadow of hope that the vessel would hold together until morning.

By midnight we had settled very deep in the water, which was now up to the orlop deck. The rudder went soon afterward, the sea which tore it away lifting the after portion of the brig entirely from the water, against which she thumped in her descent with such a concussion as would be occasioned by going ashore. We had all calculated that the rudder would hold its own to the last, as it was unusually strong, being rigged as I have never seen one rigged either before or since. Down its main timber there ran a succession of stout iron hooks, and others in the same manner down the stern-post. Through these

hooks there extended a very thick wrought-iron rod, the rudder being thus held to the stern-post, and swinging freely on the rod. The tremendous force of the sea which tore it off may be estimated by the fact, that the hooks in the stern-post, which ran entirely through it, being clinched on the inside, were drawn every one of them completely out of the solid wood.

We had scarcely time to draw breath after the violence of this shock, when one of the most tremendous waves I had then ever known broke right on board of us, sweeping the companion-way clear off, bursting in the hatchways, and filling every inch of the vessel with water.

## CHAPTER IX

LUCKILY, just before night, all four of us had lashed ourselves firmly to the fragments of the windlass, lying in this manner as flat upon the deck as possible. This precaution alone saved us from destruction. As it was, we were all more or less stunned by the immense weight of water which tumbled upon us, and which did not roll from above us until we were nearly exhausted. As soon as I could recover breath, I called aloud to my companions. Augustus alone replied, saying, 'It is all over with us, and may God have mercy upon our souls'. By-and-by both the others were enabled to speak, when they exhorted us to take courage, as there was still hope; it being impossible, from the nature of the cargo, that the brig could go down, and there being every chance that the gale would blow over by the morning. These words inspired me with new life; for, strange as it may seem, although it was obvious that a vessel with a cargo of empty oil-casks would not sink, I had been hitherto so confused in mind as to have overlooked this consideration altogether; and the danger which I had for some time regarded as the most imminent was that of foundering. As hope revived within me, I made use of every opportunity to strengthen the lashings which held me to the remains of the windlass, and in this occupation I soon discovered that my companions were also busy. The night was as dark as it could possibly be,

and the horrible shrieking din and confusion which surrounded us it is useless to attempt describing. Our deck lay level with the sea, or rather we were encircled with a towering ridge of foam, a portion of which swept over us every instant. It is not too much to say that our heads were not fairly out of water more than one second in three. Although we lay close together, no one of us could see the other, or, indeed, any portion of the brig itself, upon which we were so tempestuously hurled about. At intervals we called one to the other, thus endeavouring to keep alive hope, and render consolation and encouragement to such of us as stood most in need of it. The feeble condition of Augustus made him an object of solicitude with us all ; and as, from the lacerated condition of his right arm, it must have been impossible for him to secure his lashings with any degree of firmness, we were in momentary expectation of finding that he had gone overboard—yet to render him aid was a thing altogether out of the question. Fortunately, his station was more secure than that of any of the rest of us ; for the upper part of his body lying just beneath a portion of the shattered windlass, the seas, as they tumbled in upon him, were greatly broken in their violence. In any other situation than this (into which he had been accidentally thrown after having lashed himself in a very exposed spot) he must inevitably have perished before morning. Owing to the brig's lying so much along, we were all less liable to be washed off than otherwise would have been the case. The heel, as I have before stated, was to larboard, about one-half of the deck being constantly under water. The seas, therefore, which struck us to starboard were much broken by the vessel's side, only reaching us in fragments as we lay flat on our faces ; while those which came from larboard, being what are called back-water seas, and obtaining little hold upon us on account of our posture, had not sufficient force to drag us from our fastenings.

In this frightful situation we lay until the day broke so as to show us more fully the horrors which surrounded us. The brig was a mere log, rolling about at the mercy of every wave ; the gale was upon the increase, if anything, blowing indeed a complete hurricane, and there appeared

to us no earthly prospect of deliverance. For several hours we held on in silence, expecting every moment that our lashings would either give way, that the remains of the windlass would go by the board, or that some of the huge seas, which roared in every direction around us and above us, would drive the hulk so far beneath the water that we should be drowned before it could regain the surface. By the mercy of God, however, we were preserved from these imminent dangers, and about midday were cheered by the light of the blessed sun. Shortly afterward we could perceive a sensible diminution in the force of the wind, when, now for the first time since the latter part of the evening before, Augustus spoke, asking Peters, who lay closest to him, if he thought there was any possibility of our being saved. As no reply was at first made to this question, we all concluded that the hybrid had been drowned where he lay ; but presently, to our great joy, he spoke, although very feebly, saying that he was in great pain, being so cut by the tightness of his lashings across the stomach, that he must either find means of loosening them or perish, as it was impossible that he could endure his misery much longer. This occasioned us great distress, as it was altogether useless to think of aiding him in any manner while the sea continued washing over us as it did. We exhorted him to bear his sufferings with fortitude, and promised to seize the first opportunity which should offer itself to relieve him. He replied that it would soon be too late ; that it would be all over with him before we could help him ; and then, after moaning for some minutes, lay silent, when we concluded that he had perished.

As the evening drew on, the sea had fallen so much that scarcely more than one wave broke over the hulk from windward in the course of five minutes, and the wind had abated a great deal, although still blowing a severe gale. I had not heard any of my companions speak for hours, and now called to Augustus. He replied, although very feebly, so that I could not distinguish what he said. I then spoke to Peters and to Parker, neither of whom returned any answer.

Shortly after this period I fell into a state of partial insensibility, during which the most pleasing images floated

in my imagination ; such as green trees, waving meadows of ripe grain, processions of dancing girls, troops of cavalry, and other phantasies. I now remember that, in all which passed before my mind's eye, *motion* was a predominant idea. Thus, I never fancied any stationary object, such as a house, a mountain, or anything of that kind ; but wind-mills, ships, large birds, balloons, people on horseback, carriages driving furiously, and similar moving objects, presented themselves in endless succession. When I recovered from this state, the sun was, as near as I could guess, an hour high. I had the greatest difficulty in bringing to recollection the various circumstances connected with my situation, and for some time remained firmly convinced that I was still in the hold of the brig, near the box, and that the body of Parker was that of Tiger.

When I at length completely came to my senses, I found that the wind blew no more than a moderate breeze, and that the sea was comparatively calm ; so much so that it only washed over the brig amidships. My left arm had broken loose from its lashings, and was much cut about the elbow ; my right was entirely benumbed, and the hand and wrist swollen prodigiously by the pressure of the rope, which had worked from the shoulder downward. I was also in great pain from another rope which went about my waist, and had been drawn to an insufferable degree of tightness. Looking round upon my companions, I saw that Peters still lived, although a thick line was pulled so forcibly around his loins as to give him the appearance of being cut nearly in two ; as I stirred, he made a feeble motion to me with his hand, pointing to the rope. Augustus gave no indication of life whatever, and was bent nearly double across a splinter of the windlass. Parker spoke to me when he saw me moving, and asked me if I had not sufficient strength to release him from his situation, saying, that if I would summon up what spirits I could, and contrive to untie him, we might yet save our lives ; but that otherwise we must all perish. I told him to take courage, and I would endeavour to free him. Feeling in my pantaloons' pocket, I got hold of my penknife, and, after several ineffectual attempts, at length succeeded in opening it. I then, with my left hand, managed to free my right from its

fastenings, and afterward cut the other ropes which held me. Upon attempting, however, to move from my position, I found that my legs failed me altogether, and that I could not get up ; neither could I move my right arm in any direction. Upon mentioning this to Parker, he advised me to lie quiet for a few minutes, holding on to the windlass with my left hand, so as to allow time for the blood to circulate. Doing this, the numbness presently began to die away, so that I could move first one of my legs, and then the other ; and, shortly afterward, I regained the partial use of my right arm. I now crawled with great caution towards Parker, without getting on my legs, and soon cut loose all the lashings about him, when, after a short delay, he also recovered the partial use of his limbs. We now lost no time in getting loose the rope from Peters. It had cut a deep gash through the waistband of his woollen pantaloons, and through two shirts, and made its way into his groin, from which the blood flowed out copiously as we removed the cordage. No sooner had we removed it, however, than he spoke, and seemed to experience instant relief—being able to move with much greater ease than either Parker or myself—this was no doubt owing to the discharge of blood.

We had little hope that Augustus would recover, as he evinced no signs of life ; but, upon getting to him, we discovered that he had merely swooned from loss of blood, the bandages we had placed around his wounded arm having been torn off by the water ; none of the ropes which held him to the windlass were drawn sufficiently tight to occasion his death. Having relieved him from the fastenings, and got him clear of the broken wood about the windlass, we secured him in a dry place to windward, with his head somewhat lower than his body, and all three of us busied ourselves in chafing his limbs. In about half an hour he came to himself, although it was not until the next morning that he gave signs of recognizing any of us, or had sufficient strength to speak. By the time we had thus got clear of our lashings it was quite dark, and it began to cloud up, so that we were again in the greatest agony lest it should come on to blow hard, in which event nothing could have saved us from perishing, exhausted as

we were. By good fortune it continued very moderate during the night, the sea subsiding every minute, which gave us great hopes of ultimate preservation. A gentle breeze still blew from the N.W., but the weather was not at all cold. Augustus was lashed carefully to windward in such a manner as to prevent him from slipping overboard with the rolls of the vessel, as he was still too weak to hold on at all. For ourselves there was no such necessity. We sat close together, supporting each other with the aid of the broken ropes about the windlass, and devising methods of escape from our frightful situation. We derived much comfort from taking off our clothes and wringing the water from them. When we put them on after this, they felt remarkably warm and pleasant, and served to invigorate us in no little degree. We helped Augustus off with his, and wrung them for him, when he experienced the same comfort.

Our chief sufferings were now those of hunger and thirst, and, when we looked forward to the means of relief in this respect, our hearts sunk within us, and we were induced to regret that we had escaped the less dreadful perils of the sea. We endeavoured, however, to console ourselves with the hope of being speedily picked up by some vessel, and encouraged each other to bear with fortitude the evils that might happen.

The morning of the fourteenth at length dawned, and the weather still continued clear and pleasant, with a steady but very light breeze from the N.W. The sea was now quite smooth, and as, from some cause which we could not determine, the brig did not lie so much along as she had done before, the deck was comparatively dry, and we could move about with freedom. We had now been better than three entire days and nights without either food or drink, and it became absolutely necessary that we should make an attempt to get up something from below. As the brig was completely full of water, we went to this work despondingly, and with but little expectation of being able to obtain anything. We made a kind of drag by driving some nails which we broke out from the remains of the companion-hatch into two pieces of wood. Tying these across each other, and fastening them to the end of a rope,

we threw them into the cabin, and dragged them to and fro, in the faint hope of being thus able to entangle some article which might be of use to us for food, or which might at least render us assistance in getting it. We spent the greater part of the morning in this labour without effect, fishing up nothing more than a few bedclothes, which were readily caught by the nails. Indeed, our contrivance was so very clumsy, that any greater success was hardly to be anticipated.

We now tried the fore-castle, but equally in vain, and were upon the brink of despair, when Peters proposed that we should fasten a rope to his body, and let him make an attempt to get up something by diving into the cabin. This proposition we hailed with all the delight which reviving hope could inspire. He proceeded immediately to strip off his clothes with the exception of his pantaloons; and a strong rope was then carefully fastened around his middle, being brought up over his shoulders in such a manner that there was no possibility of its slipping. The undertaking was one of great difficulty and danger; for, as we could hardly expect to find much, if any, provision in the cabin itself, it was necessary that the diver, after letting himself down, should make a turn to the right, and proceed under water a distance of ten or twelve feet, in a narrow passage, to the store-room, and return, without drawing breath.

Everything being ready, Peters now descended into the cabin, going down the companion-ladder until the water reached his chin. He then plunged in, head first, turning to the right as he plunged, and endeavouring to make his way to the store-room. In this first attempt, however, he was altogether unsuccessful. In less than half a minute after his going down we felt the rope jerked violently (the signal we had agreed upon when he desired to be drawn up). We accordingly drew him up instantly, but so incautiously as to bruise him badly against the ladder. He had brought nothing with him, and had been unable to penetrate more than a very little way into the passage, owing to the constant exertions he found it necessary to make in order to keep himself from floating up against the deck. Upon getting out he was very much exhausted, and

had to rest full fifteen minutes before he could again venture to descend.

The second attempt met with even worse success ; for he remained so long under water without giving the signal, that, becoming alarmed for his safety, we drew him out without it, and found that he was almost at the last gasp, having, as he said, repeatedly jerked at the rope without our feeling it. This was probably owing to a portion of it having become entangled in the balustrade at the foot of the ladder. This balustrade was, indeed, so much in the way, that we determined to remove it, if possible, before proceeding with our design. As we had no means of getting it away except by main force, we all descended into the water as far as we could on the ladder, and giving a pull against it with our united strength, succeeded in breaking it down.

The third attempt was equally unsuccessful with the two first, and it now became evident that nothing could be done in this manner without the aid of some weight with which the diver might steady himself, and keep to the floor of the cabin while making his search. For a long time we looked about in vain for something which might answer this purpose ; but at length, to our great joy, we discovered one of the weather-forechains so loose that we had not the least difficulty in wrenching it off. Having fastened this securely to one of his ankles, Peters now made his fourth descent into the cabin, and this time succeeded in making his way to the door of the steward's room. To his inexpressible grief, however, he found it locked, and was obliged to return without effecting an entrance, as, with the greatest exertion, he could remain under water not more, at the utmost extent, than a single minute. Our affairs now looked gloomy indeed, and neither Augustus nor myself could refrain from bursting into tears, as we thought of the host of difficulties which encompassed us, and the slight probability which existed of our finally making an escape. But this weakness was not of long duration. Throwing ourselves on our knees to God, we implored his aid in the many dangers which beset us ; and arose with renewed hope and vigour to think what could yet be done by mortal means towards accomplishing our deliverance.

## CHAPTER X

SHORTLY afterward an incident occurred which I am induced to look upon as more intensely productive of emotion, as far more replete with the extremes first of delight and then of horror, than even any of the thousand chances which afterward befell me in nine long years, crowded with events of the most startling, and in many cases, of the most unconceived and unconceivable character. We were lying on the deck near the companion-way, and debating the possibility of yet making our way into the store-room, when, looking towards Augustus, who lay fronting myself, I perceived that he had become all at once deadly pale, and that his lips were quivering in the most singular and unaccountable manner. Greatly alarmed, I spoke to him, but he made me no reply, and I was beginning to think that he was suddenly taken ill, when I took notice of his eyes, which were glaring apparently at some object behind me. I turned my head, and shall never forget the ecstatic joy which thrilled through every particle of my frame, when I perceived a large brig bearing down upon us, and not more than a couple of miles off. I sprung to my feet as if a musket bullet had suddenly struck me to the heart; and, stretching out my arms in the direction of the vessel, stood in this manner, motionless, and unable to articulate a syllable. Peters and Parker were equally affected, although in different ways. The former danced about the deck like a madman, uttering the most extravagant rhodomontades, intermingled with howls and imprecations, while the latter burst into tears, and continued for many minutes weeping like a child.

The vessel in sight was a large hermaphrodite brig, of a Dutch build, and painted black, with a tawdry gilt figurehead. She had evidently seen a good deal of rough weather, and, we supposed, had suffered much in the gale which had proved so disastrous to ourselves; for her fore-topmast was gone, and some of her starboard bulwarks. When we first saw her, she was, as I have already said, about two miles off and to windward, bearing down upon us. The breeze was very gentle, and what astonished us

chiefly was, that she had no other sails set than her foresail and mainsail, with a flying jib—of course she came down but slowly, and our impatience amounted nearly to frenzy. The awkward manner in which she steered, too, was remarked by all of us, even excited as we were. She yawed about so considerably, that once or twice we thought it impossible she could see us, or imagined that, having seen us, and discovered no person on board, she was about to tack and make off in another direction. Upon each of these occasions we screamed and shouted at the top of our voices, when the stranger would appear to change for a moment her intention, and again hold on towards us—this singular conduct being repeated two or three times, so that at last we could think of no other manner of accounting for it than by supposing the helmsman to be in liquor.

No person was seen upon her decks until she arrived within about a quarter of a mile of us. We then saw three seamen, whom by their dress we took to be Hollanders. Two of these were lying on some old sails near the fore-castle, and the third, who appeared to be looking at us with great curiosity, was leaning over the starboard bow near the bowsprit. This last was a stout and tall man, with a very dark skin. He seemed by his manner to be encouraging us to have patience, nodding to us in a cheerful although rather odd way, and smiling constantly, so as to display a set of the most brilliantly white teeth. As his vessel drew nearer, we saw a red flannel cap which he had on fall from his head into the water; but of this he took little or no notice, continuing his odd smiles and gesticulations. I relate these things and circumstances minutely, and I relate them, it must be understood, precisely as they *appeared* to us.

The brig came on slowly, and now more steadily than before, and—I cannot speak calmly of this event—our hearts leaped up wildly within us, and we poured out our whole souls in shouts and thanksgiving to God for the complete, unexpected, and glorious deliverance that was so palpably at hand. Of a sudden, and all at once, there came wafted over the ocean from the strange vessel (which was now close upon us) a smell, a stench, such as the whole world has no name for—no conception of—hellish—utterly

suffocating—insufferable, inconceivable. I gasped for breath, and turning to my companions, perceived that they were paler than marble. But we had now no time left for question or surmise—the brig was within fifty feet of us, and it seemed to be her intention to run under our counter, that we might board her without her putting out a boat. We rushed aft, when, suddenly, a wide yaw threw her off full five or six points from the course she had been running, and, as she passed under our stern at the distance of about twenty feet, we had a full view of her decks. Shall I ever forget the triple horror of that spectacle? Twenty-five or thirty human bodies, among whom were several females, lay scattered about between the counter and the galley in the last and most loathsome state of putrefaction. We plainly saw that not a soul lived in that fated vessel! Yet we could not help shouting to the dead for help! Yes, long and loudly did we beg, in the agony of the moment, that those silent and disgusting images would stay for us, would not abandon us to become like them, would receive us among their goodly company! We were raving with horror and despair—thoroughly mad through the anguish of our grievous disappointment.

As our first loud yell of terror broke forth, it was replied to by something, from near the bowsprit of the stranger, so closely resembling the scream of a human voice that the nicest ear might have been startled and deceived. At this instant another sudden yaw brought the region of the forecastle for a moment into view, and we beheld at once the origin of the sound. We saw the tall stout figure still leaning on the bulwark, and still nodding his head to and fro, but his face was now turned from us so that we could not behold it. His arms were extended over the rail, and the palms of his hands fell outward. His knees were lodged upon a stout rope, tightly stretched, and reaching from the heel of the bowsprit to a cathead. On his back, from which a portion of the shirt had been torn, leaving it bare, there sat a huge seagull, busily gorging itself with the horrible flesh, its bill and talons deep buried, and its white plumage spattered all over with blood. As the brig moved further round so as to bring us close in view, the bird, with much apparent difficulty, drew

out its crimsoned head, and, after eyeing us for a moment as if stupefied, arose lazily from the body upon which it had been feasting, and, flying directly above our deck, hovered there awhile with a portion of clotted and liver-like substance in its beak. The horrid morsel dropped at length with a sullen splash immediately at the feet of Parker. May God forgive me, but now, for the first time, there flashed through my mind a thought, a thought which I will not mention, and I felt myself making a step towards the ensanguined spot. I looked upward, and the eyes of Augustus met my own with a degree of intense and eager meaning which immediately brought me to my senses. I sprang forward quickly, and, with a deep shudder, threw the frightful thing into the sea.

The body from which it had been taken, resting as it did upon the rope, had been easily swayed to and fro by the exertions of the carnivorous bird, and it was this motion which had at first impressed us with the belief of its being alive. As the gull relieved it of its weight, it swung round and fell partially over, so that the face was fully discovered. Never, surely, was any object so terribly full of awe! The eyes were gone, and the whole flesh around the mouth, leaving the teeth utterly naked. This, then, was the smile which had cheered us on to hope! this the—but I forbear. The brig, as I have already told, passed under our stern, and made its way slowly but steadily to leeward. With her and with her terrible crew went all our gay visions of deliverance and joy. Deliberately as she went by, we might possibly have found means of boarding her, had not our sudden disappointment, and the appalling nature of the discovery which accompanied it, laid entirely prostrate every active faculty of mind and body. We had seen and felt, but we could neither think nor act, until, alas, too late. How much our intellects had been weakened by this incident may be estimated by the fact, that when the vessel had proceeded so far that we could perceive no more than the half of her hull, the proposition was seriously entertained of attempting to overtake her by swimming!

I have, since this period, vainly endeavoured to obtain some clew to the hideous uncertainty which enveloped the

fate of the stranger. Her build and general appearance, as I have before stated, led us to the belief that she was a Dutch trader, and the dresses of the crew also sustained this opinion. We might have easily seen the name upon her stern, and, indeed, taken other observations, which would have guided us in making out her character; but the intense excitement of the moment blinded us to everything of that nature. From the saffron-like hue of such of the corpses as were not entirely decayed, we concluded that the whole of her company had perished by the yellow fever, or some other virulent disease of the same fearful kind. If such were the case (and I know not what else to imagine), death, to judge from the positions of the bodies, must have come upon them in a manner awfully sudden and overwhelming, in a way totally distinct from that which generally characterizes even the most deadly pestilences with which mankind are acquainted. It is possible, indeed, that poison, accidentally introduced into some of their sea-stores, may have brought about the disaster; or that the eating some unknown venomous species of fish, or other marine animal, or oceanic bird, might have induced it—but it is utterly useless to form conjectures where all is involved, and will, no doubt, remain for ever involved, in the most appalling and unfathomable mystery.

## CHAPTER XI

WE spent the remainder of the day in a condition of stupid lethargy, gazing after the retreating vessel until the darkness, hiding her from our sight, recalled us in some measure to our senses. The pangs of hunger and thirst then returned, absorbing all other cares and considerations. Nothing, however, could be done until the morning, and, securing ourselves as well as possible, we endeavoured to snatch a little repose. In this I succeeded beyond my expectations, sleeping until my companions, who had not been so fortunate, aroused me at daybreak to renew our attempts at getting up provision from the hull.

It was now a dead calm, with the sea as smooth as I have ever known it—the weather warm and pleasant. The

brig was out of sight. We commenced our operations by wrenching off, with some trouble, another of the forechains ; and having fastened both to Peters's feet, he again made an endeavour to reach the door of the store-room, thinking it possible that he might be able to force it open, provided he could get at it in sufficient time ; and this he hoped to do, as the hulk lay much more steadily than before.

He succeeded very quickly in reaching the door, when, loosening one of the chains from his ankle, he made every exertion to force a passage with it, but in vain, the framework of the room being far stronger than was anticipated. He was quite exhausted with his long stay under water, and it became absolutely necessary that some other one of us should take his place. For this service Parker immediately volunteered ; but, after making three ineffectual efforts, found that he could never even succeed in getting near the door. The condition of Augustus's wounded arm rendered it useless for him to attempt going down, as he would be unable to force the room open should he reach it, and it accordingly now devolved upon me to exert myself for our common deliverance.

Peters had left one of the chains in the passage, and I found upon plunging in, that I had not sufficient balance to keep me firmly down. I determined, therefore, to attempt no more, in my first effort, than merely to recover the other chain. In groping along the floor of the passage for this, I felt a hard substance, which I immediately grasped, not having time to ascertain what it was, but returning and ascending instantly to the surface. The prize proved to be a bottle, and our joy may be conceived when I say that it was found to be full of port wine. Giving thanks to God for this timely and cheering assistance, we immediately drew the cork with my penknife, and, each taking a moderate sup, felt the most indescribable comfort from the warmth, strength, and spirits with which it inspired us. We then carefully recorked the bottle, and, by means of a handkerchief, swung it in such a manner that there was no possibility of its getting broken.

Having rested awhile after this fortunate discovery, I again descended, and now recovered the chain, with which I instantly came up. I then fastened it on and went down

for the third time, when I became fully satisfied that no exertions whatever, in that situation, would enable me to force open the door of the store-room. I therefore returned in despair.

There seemed now to be no longer any room for hope, and I could perceive in the countenances of my companions that they had made up their minds to perish. The wine had evidently produced in them a species of delirium, which, perhaps, I had been prevented from feeling by the immersion I had undergone since drinking it. They talked incoherently, and about matters unconnected with our condition, Peters repeatedly asking me questions about Nantucket. Augustus, too, I remember, approached me with a serious air, and requested me to lend him a pocket-comb, as his hair was full of fish-scales, and he wished to get them out before going on shore. Parker appeared somewhat less affected, and urged me to dive at random into the cabin, and bring up any article which might come to hand. To this I consented, and, in the first attempt, after staying under a full minute, brought up a small leather trunk belonging to Captain Barnard. This was immediately opened in the faint hope that it might contain something to eat or drink. We found nothing, however, except a box of razors and two linen shirts. I now went down again, and returned without any success. As my head came above water I heard a crash on deck, and, upon getting up, saw that my companions had ungratefully taken advantage of my absence to drink the remainder of the wine, having let the bottle fall in the endeavour to replace it before I saw them. I remonstrated with them on the heartlessness of their conduct, when Augustus burst into tears. The other two endeavoured to laugh the matter off as a joke, but I hope never again to behold laughter of such a species: the distortion of countenance was absolutely frightful. Indeed, it was apparent that the stimulus, in the empty state of their stomachs, had taken instant and violent effect, and that they were all exceedingly intoxicated. With great difficulty I prevailed upon them to lie down, when they fell very soon into a heavy slumber, accompanied with loud stertorous breathing.

I now found myself, as it were, alone in the brig, and my

reflections, to be sure, were of the most fearful and gloomy nature. No prospect offered itself to my view but a lingering death by famine, or, at the best, by being overwhelmed in the first gale which should spring up, for in our present exhausted condition we could have no hope of living through another.

The gnawing hunger which I now experienced was nearly insupportable, and I felt myself capable of going to any lengths in order to appease it. With my knife I cut off a small portion of the leather trunk, and endeavoured to eat it, but found it utterly impossible to swallow a single morsel, although I fancied that some little alleviation of my suffering was obtained by chewing small pieces of it and spitting them out. Towards night my companions awoke, one by one, each in an indescribable state of weakness and horror, brought on by the wine, whose fumes had now evaporated. They shook as if with a violent ague, and uttered the most lamentable cries for water. Their condition affected me in the most lively degree, at the same time causing me to rejoice in the fortunate train of circumstances which had prevented me from indulging in the wine, and consequently from sharing their melancholy and most distressing sensations. Their conduct, however, gave me great uneasiness and alarm ; for it was evident that, unless some favourable change took place, they could afford me no assistance in providing for our common safety. I had not yet abandoned all idea of being able to get up something from below ; but the attempt could not possibly be resumed until some one of them was sufficiently master of himself to aid me by holding the end of the rope while I went down. Parker appeared to be somewhat more in possession of his senses than the others, and I endeavoured, by every means in my power, to arouse him. Thinking that a plunge in the sea-water might have a beneficial effect, I contrived to fasten the end of a rope around his body, and then, leading him to the companion-way (he remaining quite passive all the while), pushed him in, and immediately drew him out. I had good reason to congratulate myself upon having made this experiment ; for he appeared much revived and invigorated, and, upon getting out, asked me, in a rational manner, why I had so served him. Having

explained my object, he expressed himself indebted to me, and said that he felt greatly better from the immersion, afterward conversing sensibly upon our situation. We then resolved to treat Augustus and Peters in the same way, which we immediately did, when they both experienced much benefit from the shock. This idea of sudden immersion had been suggested to me by reading in some medical work the good effect of the shower-bath in a case where the patient was suffering from *mania a potu*.

Finding that I could now trust my companions to hold the end of the rope, I again made three or four plunges into the cabin, although it was now quite dark, and a gentle but long swell from the northward rendered the hulk somewhat unsteady. In the course of these attempts I succeeded in bringing up two case-knives, a three-gallon jug, empty, and a blanket, but nothing which could serve us for food. I continued my efforts, after getting these articles, until I was completely exhausted, but brought up nothing else. During the night Parker and Peters occupied themselves by turns in the same manner; but nothing coming to hand, we now gave up this attempt in despair, concluding that we were exhausting ourselves in vain.

We passed the remainder of this night in a state of the most intense mental and bodily anguish that can possibly be imagined. The morning of the sixteenth at length dawned, and we looked eagerly around the horizon for relief, but to no purpose. The sea was still smooth, with only a long swell from the northward, as on yesterday. This was the sixth day since we had tasted either food or drink, with the exception of the bottle of port wine, and it was clear that we could hold out but a very little while longer unless something could be obtained. I never saw before, nor wish to see again, human beings so utterly emaciated as Peters and Augustus. Had I met them on shore in their present condition I should not have had the slightest suspicion that I had ever beheld them. Their countenances were totally changed in character, so that I could not bring myself to believe them really the same individuals with whom I had been in company but a few days before. Parker, although sadly reduced, and so feeble that he could not raise his head from his bosom, was not so

far gone as the other two. He suffered with great patience, making no complaint, and endeavouring to inspire us with hope in every manner he could devise. For myself, although at the commencement of the voyage I had been in bad health, and was at all times of a delicate constitution, I suffered less than any of us, being much less reduced in frame, and retaining my powers of mind in a surprising degree, while the rest were completely prostrated in intellect, and seemed to be brought to a species of second childhood, generally simpering in their expressions, with idiotic smiles, and uttering the most absurd platitudes. At intervals, however, they would appear to revive suddenly, as if inspired all at once with a consciousness of their condition, when they would spring upon their feet in a momentary flash of vigour, and speak, for a short period, of their prospects, in a manner altogether rational, although full of the most intense despair. It is possible, however, that my companions may have entertained the same opinion of their own condition as I did of mine, and that I may have unwittingly been guilty of the same extravagances and imbecilities as themselves—this is a matter which cannot be determined.

About noon Parker declared that he saw land off the larboard quarter, and it was with the utmost difficulty I could restrain him from plunging into the sea with the view of swimming towards it. Peters and Augustus took little notice of what he said, being apparently wrapped up in moody contemplation. Upon looking in the direction pointed out, I could not perceive the faintest appearance of the shore—indeed, I was too well aware that we were far from any land to indulge in a hope of that nature. It was a long time, nevertheless, before I could convince Parker of his mistake. He then burst into a flood of tears, weeping like a child, with loud cries and sobs, for two or three hours, when, becoming exhausted, he fell asleep.

Peters and Augustus now made several ineffectual efforts to swallow portions of the leather. I advised them to chew it and spit it out ; but they were too excessively debilitated to be able to follow my advice. I continued to chew pieces of it at intervals, and found some relief from so doing ; my chief distress was for water, and I was only prevented

from taking a draught from the sea by remembering the horrible consequences which thus have resulted to others who were similarly situated with ourselves.

The day wore on in this manner, when I suddenly discovered a sail to the eastward, and on our larboard bow. She appeared to be a large ship, and was coming nearly athwart us, being probably twelve or fifteen miles distant. None of my companions had as yet discovered her, and I forbore to tell them of her for the present, lest we might again be disappointed of relief. At length, upon her getting nearer, I saw distinctly that she was heading immediately for us, with her light sails filled. I could now contain myself no longer, and pointed her out to my fellow-sufferers. They immediately sprang to their feet, again indulging in the most extravagant demonstrations of joy, weeping, laughing in an idiotic manner, jumping, stamping upon the deck, tearing their hair, and praying and cursing by turns. I was so affected by their conduct, as well as by what I now considered a sure prospect of deliverance, that I could not refrain from joining in with their madness, and gave way to the impulses of my gratitude and ecstasy by lying and rolling on the deck, clapping my hands, shouting, and other similar acts, until I was suddenly called to my recollection, and once more to the extreme of human misery and despair, by perceiving the ship all at once with her stern fully presented towards us, and steering in a direction nearly opposite to that in which I had at first perceived her.

It was some time before I could induce my poor companions to believe that this sad reverse in our prospects had actually taken place. They replied to all my assertions with a stare and a gesture implying that they were not to be deceived by such misrepresentations. The conduct of Augustus most sensibly affected me. In spite of all I could say or do to the contrary, he persisted in saying that the ship was rapidly nearing us, and in making preparations to go on board of her. Some sea-weed floating by the brig, he maintained that it was the ship's boat, and endeavoured to throw himself upon it, howling and shrieking in the most heart-rending manner, when I forcibly restrained him from thus casting himself into the sea.

Having become in some degree pacified, we continued to watch the ship until we finally lost sight of her, the weather becoming hazy, with a light breeze springing up. As soon as she was entirely gone, Parker turned suddenly towards me with an expression of countenance which made me shudder. There was about him an air of self-possession which I had not noticed in him until now, and before he opened his lips my heart told me what he would say. He proposed, in a few words, that one of us should die to preserve the existence of the others.

## CHAPTER XII

I HAD, for some time past, dwelt upon the prospect of our being reduced to this last horrible extremity, and had secretly made up my mind to suffer death in any shape or under any circumstances rather than resort to such a course. Nor was this resolution in any degree weakened by the present intensity of hunger under which I laboured. The proposition had not been heard by either Peters or Augustus. I therefore took Parker aside ; and mentally praying to God for power to dissuade him from the horrible purpose he entertained, I expostulated with him for a long time, and in the most supplicating manner, begging him in the name of everything which he held sacred, and urging him by every species of argument which the extremity of the case suggested, to abandon the idea, and not to mention it to either of the other two.

He heard all I said without attempting to controvert any of my arguments, and I had begun to hope that he would be prevailed upon to do as I desired. But when I had ceased speaking, he said that he knew very well all I had said was true, and that to resort to such a course was the most horrible alternative which could enter into the mind of man ; but that he had now held out as long as human nature could be sustained ; that it was unnecessary for all to perish, when, by the death of one, it was possible, and even probable, that the rest might be finally preserved ; adding that I might save myself the trouble of trying to turn him from his purpose, his mind having been

thoroughly made up on the subject even before the appearance of the ship, and that only her heaving in sight had prevented him from mentioning his intention at an earlier period.

I now begged him, if he would not be prevailed upon to abandon his design, at least to defer it for another day, when some vessel might come to our relief; again reiterating every argument I could devise, and which I thought likely to have influence with one of his rough nature. He said, in reply, that he had not spoken until the very last possible moment; that he could exist no longer without sustenance of some kind; and that therefore in another day his suggestion would be too late, as regarded himself at least.

Finding that he was not to be moved by anything I could say in a mild tone, I now assumed a different demeanour, and told him that he must be aware I had suffered less than any of us from our calamities; that my health and strength, consequently, were at that moment far better than his own, or than that either of Peters or Augustus; in short, that I was in a condition to have my own way by force if I found it necessary; and that, if he attempted in any manner to acquaint the others with his bloody and cannibal designs, I would not hesitate to throw him into the sea. Upon this he immediately seized me by the throat, and drawing a knife, made several ineffectual efforts to stab me in the stomach; an atrocity which his excessive debility alone prevented him from accomplishing. In the mean time, being roused to a high pitch of anger, I forced him to the vessel's side, with the full intention of throwing him overboard. He was saved from this fate, however, by the interference of Peters, who now approached and separated us, asking the cause of the disturbance. This Parker told before I could find means in any manner to prevent him.

The effect of his words was even more terrible than what I had anticipated. Both Augustus and Peters, who, it seems, had long secretly entertained the same fearful idea which Parker had been merely the first to broach, joined with him in his design, and insisted upon its immediately being carried into effect. I had calculated that one at

least of the two former would be found still possessed of sufficient strength of mind to side with myself in resisting any attempt to execute so dreadful a purpose ; and, with the aid of either one of them, I had no fear of being able to prevent its accomplishment. Being disappointed in this expectation, it became absolutely necessary that I should attend to my own safety, as a further resistance on my part might possibly be considered by men in their frightful condition a sufficient excuse for refusing me fair play in the tragedy that I knew would speedily be enacted.

I now told them I was willing to submit to the proposal, merely requesting a delay of about one hour, in order that the fog which had gathered around us might have an opportunity of lifting, when it was possible that the ship we had seen might be again in sight. After great difficulty I obtained from them a promise to wait thus long ; and, as I had anticipated (a breeze rapidly coming in), the fog lifted before the hour had expired, when, no vessel appearing in sight, we prepared to draw lots.

It is with extreme reluctance that I dwell upon the appalling scene which ensued ; a scene which, with its minutest details, no after events have been able to efface in the slightest degree from my memory, and whose stern recollection will embitter every future moment of my existence. Let me run over this portion of my narrative with as much haste as the nature of the events to be spoken of will permit. The only method we could devise for the terrific lottery, in which we were to take each a chance, was that of drawing straws. Small splinters of wood were made to answer our purpose, and it was agreed that I should be the holder. I retired to one end of the hulk, while my poor companions silently took up their station in the other with their backs turned towards me. The bitterest anxiety which I endured at any period of this fearful drama was while I occupied myself in the arrangement of the lots. There are few conditions into which man can possibly fall where he will not feel a deep interest in the preservation of his existence ; an interest momentarily increasing with the frailness of the tenure by which that existence may be held. But now that the silent, definite, and stern nature of the business in which I was

engaged (so different from the tumultuous dangers of the storm or the gradually approaching horrors of famine) allowed me to reflect on the few chances I had of escaping the most appalling of deaths—a death for the most appalling of purposes—every particle of that energy which had so long buoyed me up departed like feathers before the wind, leaving me a helpless prey to the most abject and pitiable terror. I could not, at first, even summon up sufficient strength to tear and fit together the small splinters of wood, my fingers absolutely refusing their office, and my knees knocking violently against each other. My mind ran over rapidly a thousand absurd projects by which to avoid becoming a partner in the awful speculation. I thought of falling on my knees to my companions, and entreating them to let me escape this necessity ; of suddenly rushing upon them, and, by putting one of them to death, of rendering the decision by lot useless—in short, of everything but of going through with the matter I had in hand. At last, after wasting a long time in this imbecile conduct, I was recalled to my senses by the voice of Parker, who urged me to relieve them at once from the terrible anxiety they were enduring. Even then I could not bring myself to arrange the splinters upon the spot, but thought over every species of finesse by which I could trick some one of my fellow-sufferers to draw the short straw, as it had been agreed that whoever drew the shortest of four splinters from my hand was to die for the preservation of the rest. Before any one condemn me for this apparent heartlessness, let him be placed in a situation precisely similar to my own.

At length delay was no longer possible, and, with a heart almost bursting from my bosom, I advanced to the region of the fore-castle, where my companions were awaiting me. I held out my hand with the splinters, and Peters immediately drew. He was free—*his*, at least, was not the shortest ; and there was now another chance against my escape. I summoned up all my strength, and passed the lots to Augustus. He also drew immediately, and he also was free ; and now, whether I should live or die, the chances were no more than precisely even. At this moment all the fierceness of the tiger possessed my bosom, and I felt

towards my poor fellow-creature, Parker, the most intense, the most diabolical hatred. But the feeling did not last; and, at length, with a convulsive shudder and closed eyes, I held out the two remaining splinters towards him. It was full five minutes before he could summon resolution to draw, during which period of heart-rending suspense I never once opened my eyes. Presently one of the two lots was quickly drawn from my hand. The decision was then over, yet I knew not whether it was for me or against me. No one spoke, and still I dared not satisfy myself by looking at the splinter I held. Peters at length took me by the hand, and I forced myself to look up, when I immediately saw by the countenance of Parker that I was safe, and that he it was who had been doomed to suffer. Gasping for breath, I fell senseless to the deck.

I recovered from my swoon in time to behold the consummation of the tragedy in the death of him who had been chiefly instrumental in bringing it about. He made no resistance whatever, and was stabbed in the back by Peters, when he fell instantly dead. I must not dwell upon the fearful repast which immediately ensued. Such things may be imagined, but words have no power to impress the mind with the exquisite horror of their reality. Let it suffice to say that, having in some measure appeased the raging thirst which consumed us by the blood of the victim, and having by common consent taken off the hands, feet, and head, throwing them together with the entrails, into the sea, we devoured the rest of the body, piecemeal, during the four ever memorable days of the seventeenth, eighteenth, nineteenth, and twentieth of the month.

On the nineteenth, there coming on a smart shower which lasted fifteen or twenty minutes, we contrived to catch some water by means of a sheet which had been fished up from the cabin by our drag just after the gale. The quantity we took in all did not amount to more than half a gallon; but even this scanty allowance supplied us with comparative strength and hope.

On the twenty-first we were again reduced to the last necessity. The weather still remained warm and pleasant, with occasional fogs and light breezes, most usually from N. to W.

On the twenty-second, as we were sitting close huddled together, gloomily revolving over our lamentable condition, there flashed through my mind all at once an idea which inspired me with a bright gleam of hope. I remembered that, when the foremast had been cut away, Peters, being in the windward chains, passed one of the axes into my hand, requesting me to put it, if possible, in a place of security, and that a few minutes before the last heavy sea struck the brig and filled her I had taken this axe into the forecabin, and laid it in one of the larboard berths. I now thought it possible that, by getting at this axe, we might cut through the deck over the store-room, and thus readily supply ourselves with provisions.

When I communicated this project to my companions, they uttered a feeble shout of joy, and we all proceeded forthwith to the forecabin. The difficulty of descending here was greater than that of going down in the cabin, the opening being much smaller, for it will be remembered that the whole framework about the cabin companion-hatch had been carried away, whereas the forecabin-way, being a simple hatch of only about three feet square, had remained uninjured. I did not hesitate, however, to attempt the descent; and, a rope being fastened round my body as before, I plunged boldly in, feet foremost, made my way quickly to the berth, and, at the very first attempt, brought up the axe. It was hailed with the most ecstatic joy and triumph, and the ease with which it had been obtained was regarded as an omen of our ultimate preservation.

We now commenced cutting at the deck with all the energy of rekindled hope, Peters and myself taking the axe by turns, Augustus's wounded arm not permitting him to aid us in any degree. As we were still so feeble as to be scarcely able to stand unsupported, and could consequently work but a minute or two without resting, it soon became evident that many long hours would be requisite to accomplish our task—that is, to cut an opening sufficiently large to admit of a free access to the store-room. This consideration, however, did not discourage us; and, working all night by the light of the moon, we succeeded in effecting our purpose by daybreak on the morning of the twenty-third.

Peters now volunteered to go down ; and, having made all arrangements as before, he descended, and soon returned, bringing up with him a small jar, which, to our great joy, proved to be full of olives. Having shared these among us, and devoured them with the greatest avidity, we proceeded to let him down again. This time he succeeded beyond our utmost expectations, returning instantly with a large ham and a bottle of Madeira wine. Of the latter we each took a moderate sup, having learned by experience the pernicious consequences of indulging too freely. The ham, except about two pounds near the bone, was not in a condition to be eaten, having been entirely spoiled by the salt water. The sound part was divided among us. Peters and Augustus, not being able to restrain their appetite, swallowed theirs upon the instant ; but I was more cautious, and ate but a small portion of mine, dreading the thirst which I knew would ensue. We now rested awhile from our labours, which had been intolerably severe.

By noon, feeling somewhat strengthened and refreshed, we again renewed our attempt at getting up provision, Peters and myself going down alternately, and always with more or less success, until sundown. During this interval we had the good fortune to bring up, altogether, four more small jars of olives, another ham, a carboy containing nearly three gallons of excellent Cape Madeira wine, and, what gave us still more delight, a small tortoise of the Gallipago breed, several of which had been taken on board by Captain Barnard, as the *Grampus* was leaving port, from the schooner *Mary Pitts*, just returned from a sealing voyage in the Pacific.

In a subsequent portion of this narrative I shall have frequent occasion to mention this species of tortoise. It is found principally, as most of my readers may know, in the group of islands called the Gallipagos which, indeed, derive their name from the animal—the Spanish word Gallipago meaning a fresh-water terapin. From the peculiarity of their shape and action they have been sometimes called the elephant tortoise. They are frequently found of an enormous size. I have myself seen several which would weigh from twelve to fifteen hundred pounds, although I

do not remember that any navigator speaks of having seen them weighing more than eight hundred. Their appearance is singular, and even disgusting. Their steps are very slow, measured, and heavy, their bodies being carried about a foot from the ground. Their neck is long and exceedingly slender; from eighteen inches to two feet is a very common length, and I killed one, where the distance from the shoulder to the extremity of the head was no less than three feet ten inches. The head has a striking resemblance to that of a serpent. They can exist without food for an almost incredible length of time, instances having been known where they have been thrown into the hold of a vessel and lain two years without nourishment of any kind—being as fat, and, in every respect, in as good order at the expiration of the time as when they were first put in. In one particular these extraordinary animals bear a resemblance to the dromedary, or camel of the desert. In a bag at the root of the neck they carry with them a constant supply of water. In some instances, upon killing them after a full year's deprivation of all nourishment, as much as three gallons of perfectly sweet and fresh water have been found in their bags. Their food is chiefly wild parsley and celery, with purslain, sea-kelp, and prickly-pears, upon which latter vegetable they thrive wonderfully, a great quantity of it being usually found on the hill-sides near the shore wherever the animal itself is discovered. They are excellent and highly nutritious food, and have, no doubt, been the means of preserving the lives of thousands of seamen employed in the whale-fishery and other pursuits in the Pacific.

The one which we had the good fortune to bring up from the store-room was not of a large size, weighing probably sixty-five or seventy pounds. It was a female, and in excellent condition, being exceedingly fat, and having more than a quart of limpid and sweet water in its bag. This was indeed a treasure; and, falling on our knees with one accord, we returned fervent thanks to God for so seasonable a relief.

We had great difficulty in getting the animal up through the opening, as its struggles were fierce and its strength prodigious. It was upon the point of making its escape

from Peters's grasp, and slipping back into the water, when Augustus, throwing a rope with a slip-knot around its throat, held it up in this manner until I jumped into the hole by the side of Peters, and assisted him in lifting it out.

The water we drew carefully from the bag into the jug, which it will be remembered, had been brought up before from the cabin. Having done this, we broke off the neck of a bottle so as to form, with the cork, a kind of glass, holding not quite half a gill. We then each drank one of these measures full, and resolved to limit ourselves to this quantity per day as long as it should hold out.

During the last two or three days, the weather having been dry and pleasant, the bedding we had obtained from the cabin, as well as our clothing, had become thoroughly dry so that we passed this night (that of the twenty-third) in comparative comfort, enjoying a tranquil repose, after having supped plentifully on olives and ham, with a small allowance of the wine. Being afraid of losing some of our stores overboard during the night, in the event of a breeze springing up, we secured them as well as possible with cordage to the fragments of the windlass. Our tortoise, which we were anxious to preserve alive as long as we could, we threw on its back, and otherwise carefully fastened.

### CHAPTER XIII

**JULY 24.** This morning saw us wonderfully recruited in spirits and strength. Notwithstanding the perilous situation in which we were still placed, ignorant of our position, although certainly at a great distance from land, without more food than would last us for a fortnight even with great care, almost entirely without water, and floating about at the mercy of every wind and wave on the merest wreck in the world, still the infinitely more terrible distresses and dangers from which we had so lately and so providentially been delivered caused us to regard what we now endured as but little more than an ordinary evil—so strictly comparative is either good or ill.

At sunrise we were preparing to renew our attempts at

getting up something from the store-room, when, a smart shower coming on, with some lightning, we turned our attention to the catching of water by means of the sheet we had used before for this purpose. We had no other means of collecting the rain than by holding the sheet spread out with one of the forechain-plates in the middle of it. The water, thus conducted to the centre, was drained through into our jug. We had nearly filled it in this manner, when, a heavy squall coming on from the northward, obliged us to desist, as the hulk began once more to roll so violently that we could no longer keep our feet. We now went forward, and, lashing ourselves securely to the remnant of the windlass as before, awaited the event with far more calmness than could have been anticipated or would have been imagined possible under the circumstances. At noon the wind had freshened into a two-reef breeze, and by night into a stiff gale, accompanied with a tremendously heavy swell. Experience having taught us, however, the best method of arranging our lashings, we weathered this dreary night in tolerable security, although thoroughly drenched at almost every instant by the sea, and in momentary dread of being washed off. Fortunately, the weather was so warm as to render the water rather grateful than otherwise.

*July 25.* This morning the gale had diminished to a mere ten-knot breeze, and the sea had gone down with it so considerably that we were able to keep ourselves dry upon the deck. To our great grief, however, we found that two jars of our olives, as well as the whole of our ham, had been washed overboard, in spite of the careful manner in which they had been fastened. We determined not to kill the tortoise as yet, and contented ourselves for the present with a breakfast on a few of the olives, and a measure of water each, which latter we mixed, half and half, with wine, finding great relief and strength from the mixture, without the distressing intoxication which had ensued upon drinking the port. The sea was still far too rough for the renewal of our efforts at getting up provision from the store-room. Several articles, of no importance to us in our present situation, floated up through the opening during the day, and were immediately washed overboard. We

also now observed that the hulk lay more along than ever, so that we could not stand an instant without lashing ourselves. On this account we passed a gloomy and uncomfortable day. At noon the sun appeared to be nearly vertical, and we had no doubt that we had been driven down by the long succession of northward and north-westerly winds into the near vicinity of the equator. Towards evening saw several sharks, and were somewhat alarmed by the audacious manner in which an enormously large one approached us. At one time, a lurch throwing the deck very far beneath the water, the monster actually swam in upon us, floundering for some moments just over the companion-hatch, and striking Peters violently with his tail. A heavy sea at length hurled him overboard, much to our relief. In moderate weather we might have easily captured him.

*July 26.* This morning, the wind having greatly abated, and the sea not being very rough, we determined to renew our exertions in the store-room. After a great deal of hard labour during the whole day, we found that nothing further was to be expected from this quarter, the partitions of the room having been stove during the night, and its contents swept into the hold. The discovery, as may be supposed, filled us with despair.

*July 27.* The sea nearly smooth, with a light wind, and still from the northward and westward. The sun coming out hotly in the afternoon, we occupied ourselves in drying our clothes. Found great relief from thirst, and much comfort otherwise, by bathing in the sea; in this, however, we were forced to use great caution, being afraid of sharks, several of which were seen swimming around the brig during the day.

*July 28.* Good weather still. The brig now began to lie along so alarmingly that we feared she would eventually roll bottom up. Prepared ourselves as well as we could for this emergency, lashing our tortoise, water-jug, and two remaining jars of olives as far as possible over to the windward, placing them outside the hull, below the main-chains. The sea very smooth all day, with little or no wind.

*July 29.* A continuance of the same weather. Augustus's wounded arm began to evince symptoms of mortification. He complained of drowsiness and excessive thirst, but no

acute pain. Nothing could be done for his relief beyond rubbing his wounds with a little of the vinegar from the olives, and from this no benefit seemed to be experienced. We did everything in our power for his comfort, and trebled his allowance of water.

*July 30.* An excessively hot day, with no wind. An enormous shark kept close by the hulk during the whole of the forenoon. We made several unsuccessful attempts to capture him by means of a noose. Augustus much worse, and evidently sinking as much from want of proper nourishment as from the effect of his wounds. He constantly prayed to be released from his sufferings, wishing for nothing but death. This evening we ate the last of our olives, and found the water in our jug so putrid that we could not swallow it at all without the addition of wine. Determined to kill our tortoise in the morning.

*July 31.* After a night of excessive anxiety and fatigue, owing to the position of the hulk, we set about killing and cutting up our tortoise. It proved to be much smaller than we had supposed, although in good condition—the whole meat about it not amounting to more than ten pounds. With a view of preserving a portion of this as long as possible, we cut it into fine pieces, and filled with them our three remaining olive-jars and the wine-bottle (all of which had been kept), pouring in afterward the vinegar from the olives. In this manner we put away about three pounds of the tortoise, intending not to touch it until we had consumed the rest. We concluded to restrict ourselves to about four ounces of the meat per day; the whole would thus last us thirteen days. A brisk shower, with severe thunder and lightning, came on about dusk, but lasted so short a time that we only succeeded in catching about half a pint of water. The whole of this, by common consent, was given to Augustus, who now appeared to be in the last extremity. He drank the water from the sheet as we caught it (we holding it above him as he lay so as to let it run into his mouth), for we had now nothing left capable of holding water, unless we had chosen to empty out our wine from the carboy, or the stale water from the jug. Either of these expedients would have been resorted to had the shower lasted.

The sufferer seemed to derive but little benefit from the draught. His arm was completely black from the wrist to the shoulder, and his feet were like ice. We expected every moment to see him breathe his last. He was frightfully emaciated; so much so that, although he weighed a hundred and twenty-seven pounds upon his leaving Nantucket, he now did not weigh more than *forty or fifty at the farthest*. His eyes were sunk far in his head, being scarcely perceptible, and the skin of his cheeks hung so loosely as to prevent his masticating any food, or even swallowing any liquid, without great difficulty.

*August 1.* A continuance of the same calm weather, with an oppressively hot sun. Suffered exceedingly from thirst, the water in the jug being absolutely putrid and swarming with vermin. We contrived, nevertheless, to swallow a portion of it by mixing it with wine—our thirst, however, was but little abated. We found more relief by bathing in the sea, but could not avail ourselves of this expedient except at long intervals, on account of the continual presence of sharks. We now saw clearly that Augustus could not be saved; that he was evidently dying. We could do nothing to relieve his sufferings, which appeared to be great. About twelve o'clock he expired in strong convulsions, and without having spoken for several hours. His death filled us with the most gloomy forebodings, and had so great an effect upon our spirits that we sat motionless by the corpse during the whole day, and never addressed each other except in a whisper. It was not until some time after dark that we took courage to get up and throw the body overboard. It was then loathsome beyond expression, and so far decayed that, as Peters attempted to lift it, an entire leg came off in his grasp. As the mass of putrefaction slipped over the vessel's side into the water, the glare of phosphoric light with which it was surrounded plainly discovered to us seven or eight large sharks, the clashing of whose horrible teeth, as their prey was torn to pieces among them, might have been heard at the distance of a mile. We shrunk within ourselves in the extremity of horror at the sound.

*August 2.* The same fearfully calm and hot weather. The dawn found us in a state of pitiable dejection as well

as bodily exhaustion. The water in the jug was now absolutely useless, being a thick gelatinous mass ; nothing but frightful-looking worms mingled with slime. We threw it out, and washed the jug well in the sea, afterward pouring a little vinegar in it from our bottles of pickled tortoise. Our thirst could now scarcely be endured, and we tried in vain to relieve it by wine, which seemed only to add fuel to the flame, and excited us to a high degree of intoxication. We afterward endeavoured to relieve our sufferings by mixing the wine with sea-water ; but this instantly brought about the most violent retchings, so that we never again attempted it. During the whole day we anxiously sought an opportunity of bathing, but to no purpose ; for the hulk was now entirely besieged on all sides with sharks—no doubt the identical monsters who had devoured our poor companion on the evening before, and who were in momentary expectation of another similar feast. This circumstance occasioned us the most bitter regret, and filled us with the most depressing and melancholy forebodings. We had experienced indescribable relief in bathing, and to have this resource cut off in so frightful a manner was more than we could bear. Nor, indeed, were we altogether free from the apprehension of immediate danger, for the least slip or false movement would have thrown us at once within reach of these voracious fish, who frequently thrust themselves directly upon us, swimming up to leeward. No shouts or exertions on our part seemed to alarm them. Even when one of the largest was struck with an axe by Peters, and much wounded, he persisted in his attempts to push in where we were. A cloud came up at dusk, but, to our extreme anguish, passed over without discharging itself. It is quite impossible to conceive our sufferings from thirst at this period. We passed a sleepless night, both on this account and through dread of the sharks.

*August 3.* No prospect of relief, and the brig lying still more and more along, so that now we could not maintain a footing upon deck at all. Busied ourselves in securing our wine and tortoise-meat, so that we might not lose them in the event of our rolling over. Got out two stout spikes from the forechains, and, by means of the axe, drove them

into the hull to windward within a couple of feet of the water ; this not being very far from the keel, as we were nearly upon our beam-ends. To these spikes we now lashed our provisions, as being more secure than their former position beneath the chains. Suffered great agony from thirst during the whole day—no chance of bathing on account of the sharks, which never left us for a moment. Found it impossible to sleep.

*August 4.* A little before daybreak we perceived that the hulk was heeling over, and aroused ourselves to prevent being thrown off by the movement. At first the roll was slow and gradual, and we contrived to clamber over to windward very well, having taken the precaution to leave ropes hanging from the spikes we had driven in for the provision. But we had not calculated sufficiently upon the acceleration of the impetus ; for, presently the heel became too violent to allow of our keeping pace with it ; and, before either of us knew what was to happen, we found ourselves hurled furiously into the sea, and struggling several fathoms beneath the surface, with the huge hull immediately above us.

In going under the water I had been obliged to let go my hold upon the rope ; and finding that I was completely beneath the vessel, and my strength utterly exhausted, I scarcely made a struggle for life, and resigned myself, in a few seconds, to die. But here again I was deceived, not having taken into consideration the natural rebound of the hull to windward. The whirl of the water upward, which the vessel occasioned in rolling partially back, brought me to the surface still more violently than I had been plunged beneath. Upon coming up, I found myself about twenty yards from the hulk, as near as I could judge. She was lying keel up, rocking furiously from side to side, and the sea in all directions around was much agitated, and full of strong whirlpools. I could see nothing of Peters. An oil-cask was floating within a few feet of me, and various other articles from the brig were scattered about.

My principal terror was now on account of the sharks, which I knew to be in my vicinity. In order to deter these, if possible, from approaching me, I splashed the water vigorously with both hands and feet as I swam towards

the hulk, creating a body of foam. I have no doubt that to this expedient, simple as it was, I was indebted for my preservation ; for the sea all around the brig, just before her rolling over, was so crowded with these monsters, that I must have been, and really was, in actual contact with some of them during my progress. By great good fortune, however, I reached the side of the vessel in safety, although so utterly weakened by the violent exertion I had used that I should never have been able to get upon it but for the timely assistance of Peters, who now, to my great joy, made his appearance (having scrambled up to the keel from the opposite side of the hull), and threw me the end of a rope—one of those which had been attached to the spikes.

Having barely escaped this danger, our attention was now directed to the dreadful imminency of another ; that of absolute starvation. Our whole stock of provision had been swept overboard in spite of all our care in securing it ; and seeing no longer the remotest possibility of obtaining more, we gave way both of us to despair, weeping aloud like children, and neither of us attempting to offer consolation to the other. Such weakness can scarcely be conceived, and to those who have never been similarly situated will, no doubt, appear unnatural ; but it must be remembered that our intellects were so entirely disordered by the long course of privation and terror to which we had been subjected, that we could not justly be considered, at that period, in the light of rational beings. In subsequent perils, nearly as great, if not greater, I bore up with fortitude against all the evils of my situation, and Peters, it will be seen, evinced a stoical philosophy nearly as incredible as his present childlike supineness and imbecility—the mental condition made the difference.

The overturning of the brig, even with the consequent loss of the wine and turtle, would not, in fact, have rendered our situation more deplorable than before, except for the disappearance of the bedclothes by which we had been hitherto enabled to catch rain-water, and of the jug in which we had kept it when caught ; for we found the whole bottom, from within two or three feet of the bends as far as the keel, together with the keel itself, *thickly covered with large barnacles, which proved to be excellent and*

*highly nutritious food.* Thus, in two important respects, the accident we had so greatly dreaded proved a benefit rather than an injury; it had opened to us a supply of provisions, which we could not have exhausted, using it moderately, in a month; and it had greatly contributed to our comfort as regards position, we being much more at our ease, and in infinitely less danger, than before.

The difficulty, however, of now obtaining water blinded us to all the benefits of the change in our condition. That we might be ready to avail ourselves, as far as possible, of any shower which might fall, we took off our shirts, to make use of them as we had of the sheets—not hoping, of course, to get more in this way, even under the most favourable circumstances, than half a gill at a time. No signs of a cloud appeared during the day, and the agonies of our thirst were nearly intolerable. At night, Peters obtained about an hour's disturbed sleep, but my intense sufferings would not permit me to close my eyes for a single moment.

*August 5.* To-day, a gentle breeze springing up, carried us through a vast quantity of seaweed, among which we were so fortunate as to find eleven small crabs, which afforded us several delicious meals. Their shells being quite soft, we ate them entire, and found that they irritated our thirst far less than the barnacles. Seeing no trace of sharks among the seaweed, we also ventured to bathe, and remained in the water for four or five hours, during which we experienced a very sensible diminution of our thirst. Were greatly refreshed, and spent the night somewhat more comfortably than before, both of us snatching a little sleep.

*August 6.* This day we were blessed by a brisk and continual rain, lasting from about noon until after dark. Bitterly did we now regret the loss of our jug and carboy; for, in spite of the little means we had of catching the water, we might have filled one, if not both of them. As it was, we contrived to satisfy the cravings of thirst by suffering the shirts to become saturated, and then wringing them so as to let the grateful fluid trickle into our mouths. In this occupation we passed the entire day.

*August 7.* Just at daybreak we both at the same instant

descried a sail to the eastward, and *evidently coming towards us* ! We hailed the glorious sight with a long, although feeble shout of rapture ; and began instantly to make every signal in our power, by flaring the shirts in the air, leaping as high as our weak condition would permit, and even by hallooing with all the strength of our lungs, although the vessel could not have been less than fifteen miles distant. However, she still continued to near our hulk, and we felt that, if she but held her present course, she must eventually come so close as to perceive us. In about an hour after we first discovered her, we could clearly see the people on her decks. She was a long, low, and rakish-looking topsail schooner, with a black ball in her foretop-sail, and had, apparently, a full crew. We now became alarmed, for we could hardly imagine it possible that she did not observe us, and were apprehensive that she meant to leave us to perish as we were—an act of fiendish barbarity, which, however incredible it may appear, has been repeatedly perpetrated at sea, under circumstances very nearly similar, and by beings who were regarded as belonging to the human species.<sup>1</sup> In this instance, however, by

<sup>1</sup> The case of the brig *Polly*, of Boston, is one so much in point, and her fate, in many respects, so remarkably similar to our own, that I cannot forbear alluding to it here. This vessel, of one hundred and thirty tons burden, sailed from Boston, with a cargo of lumber and provisions, for Santa Croix, on the twelfth of December, 1811, under the command of Captain Casneau. There were eight souls on board besides the captain—the mate, four seamen, and the cook, together with a Mr. Hunt, and a negro girl belonging to him. On the fifteenth, having cleared the shoal of Georges, she sprung a leak in a gale of wind from the southeast, and was finally capsized : but, the mast going by the board, she afterward righted. They remained in this situation, without fire, and with very little provision, for the period of *one hundred and ninety-one days* (from December the fifteenth to June the twentieth), when Captain Casneau and Samuel Badger, the only survivors, were taken off the wreck by the *Fame*, of Hull, Captain Featherstone, bound home from Rio Janeiro. When picked up, they were in latitude 28° N., longitude 13° W., *having drifted above two thousand miles* ! On the ninth of July, the *Fame* fell in with the brig *Dromeo*, Captain Perkins, who landed the two sufferers in Kennebeck. The narrative from which we gather these details, ends in the following words :

‘ It is natural to inquire how they could float such a vast distance, upon the most frequented part of the Atlantic, and not be discovered all this time. *They were passed by more than a dozen sail, one of which came so nigh them that they could distinctly see the people on deck and on*

the mercy of God, we were destined to be most happily deceived ; for, presently we were aware of a sudden commotion on the deck of the stranger, who immediately afterward run up a British flag, and, hauling her wind, bore up directly upon us. In half an hour more we found ourselves in her cabin. She proved to be the *Jane Guy*, of Liverpool, Captain Guy, bound on a sealing and trading voyage to the South Seas and Pacific.

## CHAPTER XIV

THE *Jane Guy* was a fine-looking topsail schooner of a hundred and eighty tons burden. She was unusually sharp in the bows, and on a wind, in moderate weather, the fastest sailer I have ever seen. Her qualities, however, as a rough sea-boat, were not so good, and her draught of water was by far too great for the trade to which she was destined. For this peculiar service, a larger vessel, and one of a light proportionate draught, is desirable—say a vessel of from three to three hundred and fifty tons. She should be barque-rigged, and in other respects of a different construction from the usual South Sea ships. It is absolutely necessary that she should be well armed. She should have, say ten or twelve twelve-pound carronades, and two or three long twelves, with brass blunderbusses, and watertight arm-chests for each top. Her anchors and cables should be of far greater strength than is required for any other species of trade, and, above all, her crew should be numerous and efficient ; not less, for such a vessel as I have described, than fifty or sixty able-bodied men. The *Jane Guy* had a crew of thirty-five, all able seamen, besides the captain and mate, but she was not altogether as well armed or otherwise equipped, as a navigator acquainted with the difficulties and dangers of the trade could have desired.

Captain Guy was a gentleman of great urbanity of manner, and of considerable experience in the southern traffic, to which he had devoted a greater portion of his

*the rigging looking at them ; but, to the inexpressible disappointment of the starving and freezing men, they stifled the dictates of compassion, hoisted sail, and cruelly abandoned them to their fate.'*

life. He was deficient, however, in energy, and consequently, in that spirit of enterprise which is here so absolutely requisite. He was part owner of the vessel in which he sailed, and was invested with discretionary powers to cruise in the South Seas for any cargo which might come most readily to hand. He had on board, as usual in such voyages, beads, looking-glasses, tinder-works, axes, hatchets, saws, adzes, planes, chisels, gouges, gimlets, files, spokeshaves, rasps, hammers, nails, knives, scissors, razors, needles, thread, crockeryware, calico, trinkets, and other similar articles.

The schooner sailed from Liverpool on the tenth of July, crossed the tropic of Cancer on the twenty-fifth, in longitude twenty degrees west, and reached Sal, one of the Cape Verd Islands, on the twenty-ninth, where she took in salt and other necessities for the voyage. On the third of August, she left the Cape Verds and steered southwest, stretching over towards the coast of Brazil, so as to cross the equator between the meridians of twenty-eight and thirty degrees west longitude. This is the course usually taken by vessels bound from Europe to the Cape of Good Hope, or by that route to the East Indies. By proceeding thus they avoid the calms and strong contrary currents which continually prevail on the coast of Guinea, while, in the end, it is found to be the shortest track, as westerly winds are never wanting afterward by which to reach the Cape. It was Captain Guy's intention to make his first stoppage at Kerguelen's Land—I hardly know for what reason. On the day we were picked up the schooner was off Cape St. Roque, in longitude thirty-one degrees west ; so that, when found, we had drifted probably, from north to south, *not less than five-and-twenty degrees !*

On board the *Jane Guy* we were treated with all the kindness our distressed situation demanded. In about a fortnight, during which time we continued steering to the southeast, with gentle breezes and fine weather, both Peters and myself recovered entirely from the effects of our late privation and dreadful suffering, and we began to remember what had passed rather as a frightful dream from which we had been happily awakened, than as events which had taken place in sober and naked reality. I have

since found that this species of partial oblivion is usually brought about by sudden transition, whether from joy to sorrow or from sorrow to joy—the degree of forgetfulness being proportioned to the degree of difference in the exchange. Thus, in my own case, I now feel it impossible to realize the full extent of the misery which I endured during the days spent upon the hulk. The incidents are remembered, but not the feelings which the incidents elicited at the time of their occurrence. I only know, that when they did occur, I *then* thought human nature could sustain nothing more of agony.

We continued our voyage for some weeks without any incidents of greater moment than the occasional meeting with whaling-ships, and more frequently with the black or right whale, so called in contradistinction to the spermaceti. These, however, were chiefly found south of the twenty-fifth parallel. On the sixteenth of September, being in the vicinity of the Cape of Good Hope, the schooner encountered her first gale of any violence since leaving Liverpool. In this neighbourhood, but more frequently to the south and east of the promontory (we were to the westward), navigators have often to contend with storms from the northward, which rage with great fury. They always bring with them a heavy sea, and one of their most dangerous features is the instantaneous chopping round of the wind, an occurrence almost certain to take place during the greatest force of the gale. A perfect hurricane will be blowing at one moment from the northward or northeast, and in the next not a breath of wind will be felt in that direction, while from the southwest it will come out all at once with a violence almost inconceivable. A bright spot to the southward is the sure forerunner of the change, and vessels are thus enabled to take the proper precautions.

It was about six in the morning when the blow came on with a white squall, and, as usual, from the northward. By eight it had increased very much, and brought down upon us one of the most tremendous seas I had then ever beheld. Everything had been made as snug as possible, but the schooner laboured excessively, and gave evidence of her bad qualities as a sea-boat, pitching her forecastle under at every plunge, and with the greatest difficulty

struggling up from one wave before she was buried in another. Just before sunset the bright spot for which we had been on the look out made its appearance in the southwest, and in an hour afterward we perceived the little head-sail we carried flapping listlessly against the mast. In two minutes more, in spite of every preparation, we were hurled on our beam-ends, as if by magic, and a perfect wilderness of foam made a clear breach over us as we lay. The blow from the southwest, however, luckily proved to be nothing more than a squall, and we had the good fortune to right the vessel without the loss of a spar. A heavy cross sea gave us great trouble for a few hours after this, but towards morning we found ourselves in nearly as good condition as before the gale. Captain Guy considered that he had made an escape little less than miraculous.

On the thirteenth of October we came in sight of Prince Edward's Island, in latitude  $46^{\circ} 53' S.$ , longitude  $37^{\circ} 46' E.$  Two days afterward we found ourselves near Possession Island, and presently passed the islands of Crozet, in latitude  $42^{\circ} 59' S.$ , longitude  $48^{\circ} E.$  On the eighteenth we made Kerguelen's or Desolation Island, in the southern Indian Ocean, and came to anchor in Christmas Harbour, having four fathoms of water.

This island, or rather group of islands, bears southeast from the Cape of Good Hope, and is distant therefrom nearly eight hundred leagues. It was first discovered in 1772, by the Baron de Kergulen, or Kerguelen, a Frenchman, who, thinking the land to form a portion of an extensive southern continent, carried home information to that effect, which produced much excitement at the time. The government, taking the matter up, sent the baron back in the following year for the purpose of giving his new discovery a critical examination, when the mistake was discovered. In 1777, Captain Cook fell in with the same group, and gave to the principal one the name of Desolation Island, a title which it certainly well deserves. Upon approaching the land, however, the navigator might be induced to suppose otherwise, as the sides of most of the hills, from September to March, are clothed with very brilliant verdure. This deceitful appearance is caused by a small plant resembling saxifrage, which is abundant,

growing in large patches on a species of crumbling moss. Besides this plant there is scarcely a sign of vegetation on the island, if we except some coarse rank grass near the harbour, some lichen, and a shrub which bears resemblance to a cabbage shooting into seed, and which has a bitter and acrid taste.

The face of the country is hilly, although none of the hills can be called lofty. Their tops are perpetually covered with snow. There are several harbours, of which Christmas Harbour is the most convenient. It is the first to be met with on the northeast side of the island after passing Cape François, which forms the northern shore, and, by its peculiar shape, serves to distinguish the harbour. Its projecting point terminates in a high rock, through which is a large hole, forming a natural arch. The entrance is in latitude  $48^{\circ} 40' S.$ , longitude  $69^{\circ} 6' E.$  Passing in here, good anchorage may be found under the shelter of several small islands, which form a sufficient protection from all easterly winds. Proceeding on eastwardly from this anchorage you come to Wasp Bay, at the head of the harbour. This is a small basin, completely landlocked, into which you can go with four fathoms, and find anchorage in from ten to three, hard clay bottom. A ship might lie here with her best bower ahead all the year round without risk. To the westward, at the head of Wasp Bay, is a small stream of excellent water, easily procured.

Some seal of the fur and hair species are still to be found on Kerguelen's Island, and sea elephants abound. The feathered tribes are discovered in great numbers. Penguins are very plenty, and of these there are four different kinds. The royal penguin, so called from its size and beautiful plumage, is the largest. The upper part of the body is usually gray, sometimes of a lilac tint; the under portion of the purest white imaginable. The head is of a glossy and most brilliant black, the feet also. The chief beauty of the plumage, however, consists in two broad stripes of a gold colour, which pass along from the head to the breast. The bill is long, and either pink or bright scarlet. These birds walk erect, with a stately carriage. They carry their heads high, with their wings drooping like two arms, and, as their tails project from their body in a line with the legs,

the resemblance to a human figure is very striking, and would be apt to deceive the spectator at a casual glance or in the gloom of the evening. The royal penguins which we meet with on Kerguelen's Land were rather larger than a goose. The other kinds are the maccaroni, the jackass, and the rookery penguin. These are much smaller, less beautiful in plumage, and different in other respects.

Besides the penguin many other birds are here to be found, among which may be mentioned sea-hens, blue petrels, teal, ducks, Port Egmont hens, shags, Cape pigeons, the nelly, sea-swallows, terns, sea-gulls, Mother Carey's chickens, Mother Carey's geese, or the great petrel, and, lastly, the albatross.

The great petrel is as large as the common albatross, and is carnivorous. It is frequently called the break-bones, or osprey petrel. They are not at all shy, and, when properly cooked, are palatable food. In flying they sometimes sail very close to the surface of the water, with the wings expanded, without appearing to move them in the least degree, or make any exertion with them whatever.

The albatross is one of the largest and fiercest of the South Sea birds. It is of the gull species, and takes its prey on the wing, never coming on land except for the purpose of breeding. Between this bird and the penguin the most singular friendship exists. Their nests are constructed with great uniformity, upon a plan concerted between the two species—that of the albatross being placed in the centre of a little square formed by the nests of four penguins. Navigators have agreed in calling an assemblage of such encampments a *rookery*. These rookeries have been often described, but, as my readers may not all have seen these descriptions, and as I shall have occasion hereafter to speak of the penguin and albatross, it will not be amiss to say something here of their mode of building and living.

When the season for incubation arrives, the birds assemble in vast numbers, and for some days appear to be deliberating upon the proper course to be pursued. At length they proceed to action. A level piece of ground is selected, of suitable extent, usually comprising three or four acres, and situated as near the sea as possible, being still beyond its reach. The spot is chosen with reference to

its evenness of surface, and that is preferred which is the least encumbered with stones. This matter being arranged, the birds proceed, with one accord, and actuated apparently by one mind, to trace out, with mathematical accuracy, either a square or other parallelogram, as may best suit the nature of the ground, and of just sufficient size to accommodate easily all the birds assembled, and no more—in this particular seeming determined upon preventing the access of future stragglers who have not participated in the labour of the encampment. One side of the place thus marked out runs parallel with the water's edge, and is left open for ingress or egress.

Having defined the limits of the rookery, the colony now begin to clear it of every species of rubbish, picking up stone by stone, and carrying them outside of the lines, and close by them, so as to form a wall on the three inland sides. Just within this wall a perfectly level and smooth walk is formed, from six to eight feet wide, and extending around the encampment—thus serving the purpose of a general promenade.

The next process is to partition out the whole area into small squares exactly equal in size. This is done by forming narrow paths, very smooth, and crossing each other at right angles throughout the entire extent of the rookery. At each intersection of these paths the nest of an albatross is constructed, and a penguin's nest in the centre of each square—thus every penguin is surrounded by four albatrosses, and each albatross by a like number of penguins. The penguin's nest consists of a hole in the earth, very shallow, being only just of sufficient depth to keep her single egg from rolling. The albatross is somewhat less simple in her arrangements, erecting a hillock about a foot high and two in diameter. This is made of earth, seaweed, and shells. On its summit she builds her nest.

The birds take especial care never to leave their nests unoccupied for an instant during the period of incubation, or, indeed, until the young progeny are sufficiently strong to take care of themselves. While the male is absent at sea in search of food, the female remains on duty, and it is only upon the return of her partner that she ventures abroad. The eggs are never left uncovered at all—while

one bird leaves the nest, the other nestling in by its side. This precaution is rendered necessary by the thievish propensities prevalent in the rookery, the inhabitants making no scruple to purloin each other's eggs at every good opportunity.

Although there are some rookeries in which the penguin and albatross are the sole population, yet in most of them a variety of oceanic birds are to be met with, enjoying all the privileges of citizenship, and scattering their nests here and there, wherever they can find room, never interfering, however, with the stations of the larger species. The appearance of such encampments when seen from a distance, is exceedingly singular. The whole atmosphere just above the settlement is darkened with the immense number of the albatross (mingled with the smaller tribes) which are continually hovering over it, either going to the ocean or returning home. At the same time a crowd of penguins are to be observed, some passing to and fro in the narrow alleys, and some marching with the military strut so peculiar to them, around the general promenade-ground which encircles the rookery. In short, survey it as we will, nothing can be more astonishing than the spirit of reflection evinced by these feathered beings, and nothing surely can be better calculated to elicit reflection in every well-regulated human intellect.

On the morning after our arrival in Christmas Harbour the chief mate, Mr. Patterson, took the boats, and (although it was somewhat early in the season) went in search of seal, leaving the captain and a young relation of his on a point of barren land to the westward, they having some business, whose nature I could not ascertain, to transact in the interior of the island. Captain Guy took with him a bottle, in which was a sealed letter, and made his way from the point on which he was set on shore towards one of the highest peaks in the place. It is probable that his design was to leave the letter on that height for some vessel which he expected to come after him. As soon as we lost sight of him we proceeded (Peters and myself being in the mate's boat) on our cruise around the coast, looking for seal. In this business we were occupied about three weeks, examining with great care every nook and corner, not only of

Kerguelen's Land, but of the several small islands in the vicinity. Our labours, however, were not crowned with any important success. We saw a great many fur seal, but they were exceedingly shy, and with the greatest exertions we could only procure three hundred and fifty skins in all. Sea elephants were abundant, especially on the western coast of the mainland, but of these we killed only twenty, and this with great difficulty. On the smaller islands we discovered a good many of the hair seal, but did not molest them. We returned to the schooner on the eleventh, where we found Captain Guy and his nephew, who gave a very bad account of the interior, representing it as one of the most dreary and utterly barren countries in the world. They had remained two nights on the island, owing to some misunderstanding, on the part of the second mate, in regard to the sending a jollyboat from the schooner to take them off.

## CHAPTER XV

ON the twelfth we made sail from Christmas Harbour, retracing our way to the westward, and leaving Marion's Island, one of Crozet's group, on the larboard. We afterward passed Prince Edward's Island, leaving it also on our left; then, steering more to the northward, made, in fifteen days, the islands of Tristan d'Acunha, in latitude  $37^{\circ} 8' S.$ , longitude  $12^{\circ} 8' W.$

This group, now so well known, and which consists of three circular islands, was first discovered by the Portuguese, and was visited afterward by the Dutch in 1643, and by the French in 1767. The three islands together form a triangle, and are distant from each other about ten miles, there being fine open passages between. The land in all of them is very high, especially in Tristan d'Acunha, properly so called. This is the largest of the group, being fifteen miles in circumference, and so elevated that it can be seen in clear weather at the distance of eighty or ninety miles. A part of the land towards the north rises more than a thousand feet perpendicularly from the sea. A tableland at this height extends back nearly to the centre of the island, and from this tableland

arises a lofty cone like that of Teneriffe. The lower half of this cone is clothed with trees of good size, but the upper region is barren rock, usually hidden among the clouds, and covered with snow during the greater part of the year. There are no shoals or other dangers about the island, the shores being remarkably bold and the water deep. On the northwestern coast is a bay, with a beach of black sand, where a landing with boats can be easily effected, provided there be a southerly wind. Plenty of excellent water may here be readily procured; also cod, and other fish, may be taken with hook and line.

The next island in point of size, and the most westwardly of the group, is that called the Inaccessible. Its precise situation is  $37^{\circ} 17'$  S. latitude, longitude  $12^{\circ} 24'$  W. It is seven or eight miles in circumference, and on all sides presents a forbidding and precipitous aspect. Its top is perfectly flat, and the whole region is sterile, nothing growing upon it except a few stunted shrubs.

Nightingale Island, the smallest and most southerly, is in latitude  $37^{\circ} 26'$  S., longitude  $12^{\circ} 12'$  W. Off its southern extremity is a high ledge of rocky islets; a few also of a similar appearance are seen to the northeast. The ground is irregular and sterile, and a deep valley partially separates it.

The shores of these islands abound, in the proper season, with sea lions, sea elephants, the hair and fur seal, together with a great variety of oceanic birds. Whales are also plenty in their vicinity. Owing to the ease with which these various animals were here formerly taken, the group has been much visited since its discovery. The Dutch and French frequented it at a very early period. In 1790, Captain Patten, of the ship *Industry*, of Philadelphia, made Tristan d'Acunha, where he remained seven months (from August, 1790, to April, 1791) for the purpose of collecting sealskins. In this time he gathered no less than five thousand six hundred, and says that he would have had no difficulty in loading a large ship with oil in three weeks. Upon his arrival he found no quadrupeds, with the exception of a few wild goats—the island now abounds with all our most valuable domestic animals, which have been introduced by subsequent navigators.

I believe it was not long after Captain Patten's visit that Captain Colquhoun, of the American brig *Betsey* touched at the largest of the islands for the purpose of refreshment. He planted onions, potatoes, cabbages, and a great many other vegetables, an abundance of all which are now to be met with.

In 1811, a Captain Haywood, in the *Nereus*, visited Tristan. He found there three Americans, who were residing upon the islands to prepare sealskins and oil. One of these men was named Jonathan Lambert, and he called himself the sovereign of the country. He had cleared and cultivated about sixty acres of land, and turned his attention to raising the coffee-plant and sugar-cane, with which he had been furnished by the American minister at Rio Janeiro. This settlement, however, was finally abandoned, and in 1817 the islands were taken possession of by the British government, who sent a detachment for that purpose from the Cape of Good Hope. They did not, however, retain them long; but, upon the evacuation of the country as a British possession, two or three English families took up their residence there independently of the government. On the twenty-fifth of March, 1824, the *Berwick*, Captain Jeffrey, from London to Van Diemen's Land, arrived at the place, where they found an Englishman of the name of Glass, formerly a corporal in the British artillery. He claimed to be supreme governor of the islands, and had under his control twenty-one men and three women. He gave a very favourable account of the salubrity of the climate and of the productiveness of the soil. The population occupied themselves chiefly in collecting sealskins and sea-elephant oil, with which they traded to the Cape of Good Hope, Glass owning a small schooner. At the period of our arrival the governor was still a resident, but his little community had multiplied, there being fifty-six persons upon Tristan, besides a smaller settlement of seven on Nightingale Island. We had no difficulty in procuring almost every kind of refreshment which we required—sheep, hogs, bullocks, rabbits, poultry, goats, fish in great variety, and vegetables were abundant. Having come to anchor close in with the large island, in eighteen fathoms, we took all we wanted on board very

conveniently. Captain Guy also purchased of Glass five hundred sealskins and some ivory. We remained here a week, during which the prevailing winds were from the northward and westward, and the weather somewhat hazy. On the fifth of November we made sail to the southward and westward, with the intention of having a thorough search for a group of islands called the Auroras, respecting whose existence a great diversity of opinion has existed.

These islands are said to have been discovered as early as 1762, by the commander of the ship *Aurora*. In 1790, Captain Manuel de Oyarvido, in the ship *Princess*, belonging to the Royal Philippine Company, sailed, as he asserts, directly among them. In 1794, the Spanish corvette *Atrevida* went with the determination of ascertaining their precise situation, and, in a paper published by the Royal Hydrographical Society of Madrid in the year 1809, the following language is used respecting this expedition. 'The corvette *Atrevida* practised, in their immediate vicinity, from the twenty-first to the twenty-seventh of January, all the necessary observations, and measured by chronometers the difference of longitude between these islands and the port of Soledad in the Malvinas. The islands are three; they are very nearly in the same meridian; the centre one is rather low, and the other two may be seen at nine leagues distance.' The observations made on board the *Atrevida* give the following results as the precise situation of each island. The most northern is in latitude  $52^{\circ} 37' 24''$  S., longitude  $47^{\circ} 43' 15''$  W.; the middle one in latitude  $53^{\circ} 2' 40''$  S., longitude  $47^{\circ} 55' 15''$  W.; and the most southern in latitude  $53^{\circ} 15' 22''$  S., longitude  $47^{\circ} 57' 15''$  W.

On the twenty-seventh of January, 1820, Captain James Weddell, of the British navy, sailed from Staten Land also in search of the Auroras. He reports that, having made the most diligent search and passed not only immediately over the spots indicated by the commander of the *Atrevida*, but in every direction throughout the vicinity of these spots, he could discover no indication of land. These conflicting statements have induced other navigators to look out for the islands; and, strange to say, while some have sailed through every inch of sea where they are

supposed to lie without finding them, there have been not a few who declare positively that they have seen them ; and even been close in with their shores. It was Captain Guy's intention to make every exertion within his power to settle the question so oddly in dispute.<sup>1</sup>

We kept on our course, between the south and west, with variable weather, until the twentieth of the month, when we found ourselves on the debated ground, being in latitude  $53^{\circ} 15' S.$ , longitude  $47^{\circ} 58' W.$ —that is to say, very nearly upon the spot indicated as the situation of the most southern of the group. Not perceiving any sign of land, we continued to the westward in the parallel of fifty-three degrees south, as far as the meridian of fifty degrees west. We then stood to the north as far as the parallel of fifty-two degrees south, when we turned to the eastward, and kept our parallel by double altitudes, morning and evening, and meridian altitudes of the planets and moon. Having thus gone eastwardly to the meridian of the western coast of Georgia, we kept that meridian until we were in the latitude from which we set out. We then took diagonal courses throughout the entire extent of sea circumscribed, keeping a look out constantly at the mast-head, and repeating our examination with the greatest care for a period of three weeks, during which the weather was remarkably pleasant and fair, with no haze whatsoever. Of course we were thoroughly satisfied that, whatever islands might have existed in this vicinity at any former period, no vestige of them remained at the present day. Since my return home I find that the same ground was traced over, with equal care, in 1822, by Captain Johnson, of the American schooner *Henry*, and by Captain Morrell, in the American schooner *Wasp*—in both cases with the same result as in our own.

<sup>1</sup> Among the vessels which at various times have professed to meet with the Auroras may be mentioned the ship *San Miguel*, in 1769 ; the ship *Aurora*, in 1774 ; the brig *Pearl*, in 1779 : and the ship *Dolores*, in 1790. They all agree in giving the mean latitude fifty-three degrees south.

## CHAPTER XVI

It had been Captain Guy's original intention, after satisfying himself about the Auroras, to proceed through the Strait of Magellan, and up along the western coast of Patagonia; but information received at Tristan d'Acunha induced him to steer to the southward, in the hope of falling in with some small islands said to lie about the parallel of  $60^{\circ}$  S., longitude  $41^{\circ} 20'$  W. In the event of his not discovering these lands, he designed, should the season prove favourable, to push on towards the pole. Accordingly, on the twelfth of December, we made sail in that direction. On the eighteenth we found ourselves about the station indicated by Glass, and cruised for three days in that neighbourhood without finding any traces of the islands he had mentioned. On the twenty-first, the weather being unusually pleasant, we again made sail to the southward, with the resolution of penetrating in that course as far as possible. Before entering upon this portion of my narrative, it may be as well, for the information of those readers who have paid little attention to the progress of discovery in these regions, to give some brief account of the very few attempts at reaching the southern pole which have hitherto been made.

That of Captain Cook was the first of which we have any distinct account. In 1772, he sailed to the south in the *Resolution*, accompanied by Lieutenant Furneaux in the *Adventure*. In December he found himself as far as the fifty-eighth parallel of south latitude, and in longitude  $26^{\circ} 57'$  E. Here he met with narrow fields of ice, about eight or ten inches thick, and running northwest and southeast. This ice was in large cakes, and usually it was packed so closely that the vessels had great difficulty in forcing a passage. At this period Captain Cook supposed, from the vast number of birds to be seen, and from other indications, that he was in the near vicinity of land. He kept on to the southward, the weather being exceedingly cold, until he reached the sixty-fourth parallel, in longitude  $38^{\circ} 14'$  E. Here he had mild weather, with gentle breezes, for five days, the thermometer being at thirty-six. In

January, 1773, the vessels crossed the Antarctic circle, but did not succeed in penetrating much farther; for, upon reaching latitude  $67^{\circ} 15'$ , they found all farther progress impeded by an immense body of ice, extending all along the southern horizon as far as the eye could reach. This ice was of every variety—and some large floes of it, miles in extent, formed a compact mass, rising eighteen or twenty feet above the water. It being late in the season, and no hope entertained of rounding these obstructions, Captain Cook now reluctantly turned to the northward.

In the November following he renewed his search in the Antarctic. In latitude  $59^{\circ} 40'$  he met with a strong current setting to the southward. In December, when the vessels were in latitude  $67^{\circ} 31'$ , longitude  $142^{\circ} 54'$  W., the cold was excessive, with heavy gales and fog. Here also birds were abundant; the albatross, the penguin, and the petrel especially. In latitude  $70^{\circ} 23'$  some large islands of ice were encountered, and shortly afterward, the clouds to the southward were observed to be of a snowy whiteness, indicating the vicinity of field ice. In latitude  $71^{\circ} 10'$ , longitude  $106^{\circ} 54'$  W., the navigators were stopped, as before, by an immense frozen expanse, which filled the whole area of the southern horizon. The northern edge of this expanse was ragged and broken, so firmly wedged together as to be utterly impassable, and extending about a mile to the southward. Behind it the frozen surface was comparatively smooth for some distance, until terminated in the extreme background by gigantic ranges of ice mountains, the one towering above the other. Captain Cook concluded that this vast field reached the southern pole or was joined to a continent. Mr. J. N. Reynolds, whose great exertions and perseverance have at length succeeded in getting set on foot a national expedition, partly for the purpose of exploring these regions, thus speaks of the attempt of the *Resolution*: 'We are not surprised that Captain Cook was unable to go beyond  $71^{\circ} 10'$ , but we are astonished that he did attain that point on the meridian of  $106^{\circ} 54'$  west longitude. Palmer's Land lies south of the Shetland, latitude sixty-four degrees, and tends to the southward and westward farther than any navigator has yet penetrated. Cook was standing for this

land when his progress was arrested by the ice ; which, we apprehend, must always be the case in that point, and so early in the season as the sixth of January—and we should not be surprised if a portion of the icy mountains described was attached to the main body of Palmer's Land, or to some other portions of land lying farther to the southward and westward.'

In 1803, Captains Kreutzenstern and Lisiauský were dispatched by Alexander of Russia for the purpose of circumnavigating the globe. In endeavouring to get south, they made no farther than  $59^{\circ} 58'$ , in longitude  $70^{\circ} 15' W.$  They here met with strong currents setting eastwardly. Whales were abundant, but they saw no ice. In regard to this voyage, Mr. Reynolds observes that, if Kreutzenstern had arrived where he did earlier in the season, he must have encountered ice—it was March when he reached the latitude specified. The winds prevailing, as they do, from the southward and westward, had carried the floes, aided by currents, into that icy region bounded on the north by Georgia, east by Sandwich Land and the South Orkneys, and west by the South Shetland Islands.

In 1822, Captain James Weddell, of the British navy, with two very small vessels, penetrated farther to the south than any previous navigator, and this too, without encountering extraordinary difficulties. He states that although he was frequently hemmed in by ice *before* reaching the seventy-second parallel, yet, upon attaining it, not a particle was to be discovered, and that, upon arriving at the latitude of  $74^{\circ} 15'$ , no fields, and only three islands of ice were visible. It is somewhat remarkable that, although vast flocks of birds were seen, and other usual indications of land, and although, south of the Shetlands, unknown coasts were observed from the masthead tending southwardly, Weddell discourages the idea of land existing in the polar regions of the south.

On the 11th of January, 1823, Captain Benjamin Morrell, of the American schooner *Wasp*, sailed from Kerguelen's Land with a view of penetrating as far south as possible. On the first of February he found himself in latitude  $64^{\circ} 52' S.$ , longitude  $118^{\circ} 27' E.$  The following passage is extracted from his journal of that date : ' The wind soon

freshened to an eleven-knot breeze, and we embraced this opportunity of making to the west; being however convinced that the farther we went south beyond latitude sixty-four degrees, the less ice was to be apprehended, we steered a little to the southward, until we crossed the Antarctic circle, and were in latitude  $69^{\circ} 15' E$ . In this latitude there was *no field ice*, and very few ice islands in sight.'

Under the date of March fourteenth I find also this entry: 'The sea was now entirely free of field ice, and there were not more than a dozen ice islands in sight. At the same time the temperature of the air and water was at least thirteen degrees higher (more mild) than we had ever found it between the parallels of sixty and sixty-two south. We were now in latitude  $70^{\circ} 14' S$ ., and the temperature of the air was forty-seven, and that of the water forty-four. In this situation I found the variation to be  $14^{\circ} 27'$  easterly, per azimuth. . . . I have several times passed within the Antarctic circle, on different meridians, and have uniformly found the temperature, both of the air and the water, to become more and more mild the farther I advanced beyond the sixty-fifth degree of south latitude, and that the variation decreases in the same proportion. While north of this latitude, say between sixty and sixty-five south, we frequently had great difficulty in finding a passage for the vessel between the immense and almost innumerable ice islands, some of which were from one to two miles in circumference, and more than five hundred feet above the surface of the water.'

Being nearly destitute of fuel and water, and without proper instruments, it being also late in the season, Captain Morrell was now obliged to put back, without attempting any farther progress to the westward, although an entirely open sea lay before him. He expresses the opinion that, had not these overruling considerations obliged him to retreat, he could have penetrated, if not to the pole itself, at least to the eighty-fifth parallel. I have given his ideas respecting these matters somewhat at length, that the reader may have an opportunity of seeing how far they were borne out by my own subsequent experience.

In 1831, Captain Briscoe, in the employ of the Messieurs

Enderby, whale-ship owners of London, sailed in the brig *Lively* for the South Seas, accompanied by the cutter *Tula*. On the twenty-eighth of February, being in latitude  $66^{\circ} 30'$  S., longitude  $47^{\circ} 13'$  E., he descried land, and 'clearly discovered through the snow the black peaks of a range of mountains running E.S.E.' He remained in this neighbourhood during the whole of the following month, but was unable to approach the coast nearer than within ten leagues, owing to the boisterous state of the weather. Finding it impossible to make farther discovery during this season, he returned northward to winter in Van Diemen's Land.

In the beginning of 1832 he again proceeded southwardly, and on the fourth of February land was seen to the south-east in latitude  $67^{\circ} 15'$ , longitude  $69^{\circ} 29'$  W. This was soon found to be an island near the headland of the country he had first discovered. On the twenty-first of the month he succeeded in landing on the latter, and took possession of it in the name of William IV., calling it Adelaide's Island, in honour of the English queen. These particulars being made known to the Royal Geographical Society of London, the conclusion was drawn by that body 'that there is a continuous tract of land extending from  $47^{\circ} 30'$  E. to  $69^{\circ} 29'$  W. longitude, running the parallel of from sixty-six to sixty-seven degrees south latitude'. In respect to this conclusion Mr. Reynolds observes, 'In the correctness of it we by no means concur; nor do the discoveries of Briscoe warrant any such inference. It was within these limits that Weddell proceeded south on a meridian to the east of Georgia, Sandwich Land, and the South Orkney and Shetland Islands.' My own experience will be found to testify most directly to the falsity of the conclusion arrived at by the society.

These are the principal attempts which have been made at penetrating to a high southern latitude, and it will now be seen that there remained, previous to the voyage of the *Jane*, nearly three hundred degrees of longitude in which the Antarctic circle had not been crossed at all. Of course a wide field lay before us for discovery, and it was with feelings of most intense interest that I heard Captain Guy express his resolution of pushing boldly to the southward.

## CHAPTER XVII

WE kept our course southwardly for four days after giving up the search for Glass's Islands, without meeting with any ice at all. On the twenty-sixth, at noon, we were in latitude  $63^{\circ} 23'$  S., longitude  $41^{\circ} 25'$  W. We now saw several large ice islands, and a floe of field ice, not, however, of any great extent. The winds generally blew from the southeast, or the northeast, but were very light. Whenever we had a westerly wind, which was seldom, it was invariably attended with a rain squall. Every day we had more or less snow. The thermometer, on the twenty-seventh, stood at thirty-five.

*January 1, 1828.* This day we found ourselves completely hemmed in by the ice, and our prospects looked cheerless indeed. A strong gale blew, during the whole forenoon, from the northeast, and drove large cakes of the drift against the rudder and counter with such violence that we all trembled for the consequences. Towards evening, the gale still blowing with fury, a large field in front separated, and we were enabled, by carrying a press of sail, to force a passage through the smaller flakes into some open water beyond. As we approached this space we took in sail by degrees, and having at length got clear, lay to under a single reefed foresail.

*January 2.* We had now tolerably pleasant weather. At noon we found ourselves in latitude  $69^{\circ} 10'$  S., longitude  $42^{\circ} 20'$  W., having crossed the Antarctic circle. Very little ice was to be seen to the southward, although large fields of it lay behind us. This day we rigged some sounding gear, using a large iron pot capable of holding twenty gallons, and a line of two hundred fathoms. We found the current setting to the north, about a quarter of a mile per hour. The temperature of the air was now about thirty-three. Here we found the variation to be  $14^{\circ} 28'$  easterly, per azimuth.

*January 5.* We had still held on to the southward without any very great impediments. On this morning, however, being in latitude  $73^{\circ} 15'$  E., longitude  $42^{\circ} 10'$  W. we were again brought to a stand by an immense expanse

of firm ice. We saw, nevertheless, much open water to the southward, and felt no doubt of being able to reach it eventually. Standing to the eastward along the edge of the floe, we at length came to a passage of about a mile in width, through which we warped our way by sundown. The sea in which we now were was thickly covered with ice islands, but had no field ice, and we pushed on boldly as before. The cold did not seem to increase, although we had snow very frequently, and now and then hail squalls of great violence. Immense flocks of the albatross flew over the schooner this day, going from southeast to northwest.

*January 7.* The sea still remained pretty well open, so that we had no difficulty in holding on our course. To the westward we saw some icebergs of incredible size, and in the afternoon passed very near one whose summit could not have been less than four hundred fathoms from the surface of the ocean. Its girth was probably, at the base, three quarters of a league, and several streams of water were running from crevices in its sides. We remained in sight of this island two days, and then only lost it in a fog.

*January 10.* Early this morning we had the misfortune to lose a man overboard. He was an American, named Peter Vredenburg, a native of New York, and was one of the most valuable hands on board the schooner. In going over the bows his foot slipped, and he fell between two cakes of ice, never rising again. At noon of this day we were in latitude  $78^{\circ} 30'$ , longitude  $40^{\circ} 15' W$ . The cold was now excessive, and we had hail squalls continually from the northward and eastward. In this direction also we saw several more immense icebergs, and the whole horizon to the eastward appeared to be blocked up with field ice, rising in tiers, one mass above the other. Some driftwood floated by during the evening, and a great quantity of birds flew over, among which were nellys, petrels, albatrosses, and a large bird of a brilliant blue plumage. The variation here, per azimuth, was less than it had been previously to our passing the Antarctic circle.

*January 12.* Our passage to the south again looked doubtful, as nothing was to be seen in the direction of the pole but one apparently limitless floe, backed by absolute mountains of ragged ice, one precipice of which arose

frowningly above the other. We stood to the westward until the fourteenth, in the hope of finding an entrance.

*January 14.* This morning we reached the western extremity of the field which had impeded us, and, weathering it, came to an open sea, without a particle of ice. Upon sounding with two hundred fathoms, we here found a current setting southwardly at the rate of half a mile per hour. The temperature of the air was forty-seven, that of the water thirty-four. We now sailed to the southward without meeting any interruption of moment until the sixteenth, when, at noon, we were in latitude  $81^{\circ} 21'$ , longitude  $42^{\circ}$  W. We here again sounded, and found a current setting still southwardly, and at the rate of three-quarters of a mile per hour. The variation per azimuth had diminished, and the temperature of the air was mild and pleasant, the thermometer being as high as fifty-one. At this period not a particle of ice was to be discovered. All hands on board now felt certain of attaining the pole.

*January 17.* This day was full of incident. Innumerable flights of birds flew over us from the southward, and several were shot from the deck; one of them, a species of pelican, proved to be excellent eating. About midday a small floe of ice was seen from the masthead off the larboard bow, and upon it there appeared to be some large animal. As the weather was good and nearly calm, Captain Guy ordered out two of the boats to see what it was. Dirk Peters and myself accompanied the mate in the larger boat. Upon coming up with the floe, we perceived that it was in the possession of a gigantic creature of the race of the Arctic bear, but far exceeding in size the largest of these animals. Being well armed, we made no scruple of attacking it at once. Several shots were fired in quick succession, the most of which took effect, apparently, in the head and body. Nothing discouraged, however, the monster threw himself from the ice, and swam, with open jaws, to the boat in which were Peters and myself. Owing to the confusion which ensued among us at this unexpected turn of the adventure, no person was ready immediately with a second shot, and the bear had actually succeeded in getting half his vast bulk across our gunwale, and seizing one of the men by the small of his back, before any efficient

means were taken to repel him. In this extremity nothing but the promptness and agility of Peters saved us from destruction. Leaping upon the back of the huge beast, he plunged the blade of a knife behind the neck, reaching the spinal marrow at a blow. The brute tumbled into the sea lifeless, and without a struggle, rolling over Peters as he fell. The latter soon recovered himself, and a rope being thrown him, he secured the carcass before entering the boat. We then returned in triumph to the schooner, towing our trophy behind us. This bear, upon admeasurement, proved to be full fifteen feet in his greatest length. His wool was perfectly white, and very coarse, curling tightly. The eyes were of a blood red, and larger than those of the Arctic bear—the snout also more rounded, rather resembling the snout of the bull-dog. The meat was tender, but excessively rank and fishy, although the men devoured it with avidity, and declared it excellent eating.

Scarcely had we got our prize alongside, when the man at the masthead gave the joyful shout of '*land on the starboard bow!*' All hands were now upon the alert, and, a breeze springing up very opportunely from the northward and eastward, we were soon close in with the coast. It proved to be a low rocky islet, of about a league in circumference, and altogether destitute of vegetation, if we except a species of prickly pear. In approaching it from the northward, a singular ledge of rock is seen projecting into the sea, and bearing a strong resemblance to corded bales of cotton. Around this ledge to the westward is a small bay, at the bottom of which our boats effected a convenient landing.

It did not take us long to explore every portion of the island, but, with one exception, we found nothing worthy of our observation. In the southern extremity, we picked up near the shore, half buried in a pile of loose stones, a piece of wood, which seemed to have formed the prow of a canoe. There had been evidently some attempt at carving upon it, and Captain Guy fancied that he made out the figure of a tortoise, but the resemblance did not strike me very forcibly. Besides this prow, if such it were, we found no other token that any living creature had ever been here before. Around the coast we discovered

occasional small floes of ice—but these were very few. The exact situation of this islet (to which Captain Guy gave the name of Bennet's Islet, in honour of his partner in the ownership of the schooner) is  $82^{\circ} 50'$  S. latitude,  $42^{\circ} 20'$  W. longitude.

We had now advanced to the southward more than eight degrees farther than any previous navigators, and the sea still lay perfectly open before us. We found, too, that the variation uniformly decreased as we proceeded, and, what was still more surprising, that the temperature of the air, and latterly of the water, became milder. The weather might even be called pleasant, and we had a steady but very gentle breeze always from some northern point of the compass. The sky was usually clear, with now and then a slight appearance of thin vapour in the southern horizon—this, however, was invariably of brief duration. Two difficulties alone presented themselves to our view; we were getting short of fuel, and symptoms of scurvy had occurred among several of the crew. These considerations began to impress upon Captain Guy the necessity of returning, and he spoke of it frequently. For my own part, confident as I was of soon arriving at land of some description upon the course we were pursuing, and having every reason to believe, from present appearances, that we should not find it the sterile soil met with in the higher Arctic latitudes, I warmly pressed upon him the expediency of persevering, at least for a few days longer, in the direction we were now holding. So tempting an opportunity of solving the great problem in regard to an Antarctic continent had never yet been afforded to man, and I confess that I felt myself bursting with indignation at the timid and ill-timed suggestions of our commander. I believe, indeed, that what I could not refrain from saying to him on this head had the effect of inducing him to push on. While, therefore, I cannot but lament the most unfortunate and bloody events which immediately arose from my advice, I must still be allowed to feel some degree of gratification at having been instrumental, however remotely, in opening to the eye of science one of the most intensely exciting secrets which has ever engrossed its attention.

## CHAPTER XVIII

JANUARY 18. This morning<sup>1</sup> we continued to the southward, with the same pleasant weather as before. The sea was entirely smooth, the air tolerably warm and from the northeast, the temperature of the water fifty-three. We now again got our sounding-gear in order, and, with a hundred and fifty fathoms of line, found the current setting towards the pole at the rate of a mile an hour. This constant tendency to the southward, both in the wind and current, caused some degree of speculation, and even of alarm, in different quarters of the schooner, and I saw distinctly that no little impression had been made upon the mind of Captain Guy. He was exceedingly sensitive to ridicule, however, and I finally succeeded in laughing him out of his apprehensions. The variation was now very trivial. In the course of the day we saw several large whales of the right species, and innumerable flights of the albatross passed over the vessel. We also picked up a bush, full of red berries, like those of the hawthorn, and the carcass of a singular-looking land-animal. It was three feet in length, and but six inches in height, with four very short legs, the feet armed with long claws of a brilliant scarlet, and resembling coral in substance. The body was covered with a straight silky hair, perfectly white. The tail was peaked like that of a rat, and about a foot and a half long. The head resembled a cat's, with the exception of the ears—these were flapped like the ears of a dog. The *teeth* were of the same brilliant scarlet as the claws.

January 19. To-day, being in latitude 83° 20', longitude 43° 5' W. (the sea being of an extraordinarily dark colour), we again saw land from the masthead, and, upon a closer

<sup>1</sup> The terms *morning* and *evening*, which I have made use of to avoid confusion in my narrative, as far as possible, must not, of course, be taken in their ordinary sense. For a long time past we had had no night at all, the daylight being continual. The dates throughout are according to nautical time, and the bearings must be understood as per compass. I would also remark, in this place, that I cannot, in the first portion of what is here written, pretend to strict accuracy in respect to dates, or latitudes and longitudes, having kept no regular journal until after the period of which this first portion treats. In many instances I have relied altogether upon memory.

scrutiny, found it to be one of a group of very large islands. The shore was precipitous, and the interior seemed to be well wooded, a circumstance which occasioned us great joy. In about four hours from our first discovering the land we came to anchor in ten fathoms, sandy bottom, a league from the coast, as a high surf, with strong ripples here and there, rendered a nearer approach of doubtful expediency. The two largest boats were now ordered out, and a party, well armed (among whom were Peters and myself), proceeded to look for an opening in the reef which appeared to encircle the island. After searching about for some time, we discovered an inlet, which we were entering, when we saw four large canoes put off from the shore, filled with men who seemed to be well armed. We waited for them to come up, and, as they moved with great rapidity, they were soon within hail. Captain Guy now held up a white handkerchief on the blade of an oar, when the strangers made a full stop, and commenced a loud jabbering all at once, intermingled with occasional shouts, in which we could distinguish the words *Anamoo-moo!* and *Lama-Lama!* They continued this for at least half an hour, during which we had a good opportunity of observing their appearance.

In the four canoes, which might have been fifty feet long and five broad, there were a hundred and ten savages in all. They were about the ordinary stature of Europeans, but of a more muscular and brawny frame. Their complexion a jet black, with thick and long woolly hair. They were clothed in skins of an unknown black animal, shaggy and silky, and made to fit the body with some degree of skill, the hair being inside, except where turned out about the neck, wrists, and ankles. Their arms consisted principally of clubs, of a dark, and apparently very heavy wood. Some spears, however, were observed among them, headed with flint, and a few slings. The bottoms of the canoes were full of black stones about the size of a large egg.

When they had concluded their harangue (for it was clear they intended their jabbering for such), one of them who seemed to be the chief stood up in the prow of his canoe, and made signs for us to bring our boats alongside of him. This hint we pretended not to understand, thinking

it the wiser plan to maintain, if possible, the interval between us, as their number more than quadrupled our own. Finding this to be the case, the chief ordered the three other canoes to hold back, while he advanced towards us with his own. As soon as he came up with us he leaped on board the largest of our boats, and seated himself by the side of Captain Guy, pointing at the same time to the schooner, and repeating the words *Anamoo-moo!* and *Lama-Lama!* We now put back to the vessel, the four canoes following at a little distance.

Upon getting alongside, the chief evinced symptoms of extreme surprise and delight, clapping his hands, slapping his thighs and breast, and laughing obstreperously. His followers behind joined in his merriment, and for some minutes the din was so excessive as to be absolutely deafening. Quiet being at length restored, Captain Guy ordered the boats to be hoisted up, as a necessary precaution, and gave the chief (whose name we soon found to be *Too-wit*) to understand that we could admit no more than twenty of his men on deck at one time. With this arrangement he appeared perfectly satisfied, and gave some directions to the canoes, when one of them approached, the rest remaining about fifty yards off. Twenty of the savages now got on board, and proceeded to ramble over every part of the deck, and scramble about among the rigging, making themselves much at home, and examining every article with great inquisitiveness.

It was quite evident that they had never before seen any of the white race—from whose complexion, indeed, they appeared to recoil. They believed the *Jane* to be a living creature, and seemed to be afraid of hurting it with the points of their spears, carefully turning them up. Our crew were much amused with the conduct of *Too-wit* in one instance. The cook was splitting some wood near the galley, and, by accident, struck his axe into the deck, making a gash of considerable depth. The chief immediately ran up, and pushing the cook on one side rather roughly, commenced a half whine, half howl, strongly indicative of sympathy in what he considered the sufferings of the schooner, patting and smoothing the gash with his hand, and washing it from a bucket of seawater which

stood by. This was a degree of ignorance for which we were not prepared, and for my part I could not help thinking some of it affected.

When the visitors had satisfied, as well as they could, their curiosity in regard to our upper works, they were admitted below, when their amazement exceeded all bounds. Their astonishment now appeared to be far too deep for words, for they roamed about in silence, broken only by low ejaculations. The arms afforded them much food for speculation, and they were suffered to handle and examine them at leisure. I do not believe that they had the least suspicion of their actual use, but rather took them for idols, seeing the care we had of them, and the attention with which we watched their movements while handling them. At the great guns their wonder was redoubled. They approached them with every mark of the profoundest reverence and awe, but forbore to examine them minutely. There were two large mirrors in the cabin, and here was the acme of their amazement. Too-wit was the first to approach them, and he had got in the middle of the cabin, with his face to one and his back to the other, before he fairly perceived them. Upon raising his eyes and seeing his reflected self in the glass, I thought the savage would go mad; but, upon turning short round to make a retreat, and beholding himself a second time in the opposite direction, I was afraid he would expire upon the spot. No persuasion could prevail upon him to take another look; but, throwing himself upon the floor, with his face buried in his hands, he remained thus until we were obliged to drag him upon deck.

The whole of the savages were admitted on board in this manner, twenty at a time, Too-wit being suffered to remain during the entire period. We saw no disposition to thievery among them, nor did we miss a single article after their departure. Throughout the whole of their visit they evinced the most friendly manner. There were, however, some points in their demeanour which we found it impossible to understand: for example, we could not get them to approach several very harmless objects—such as the schooner's sails, an egg, an open book, or a pan of flour. We endeavoured to ascertain if they had among them any

articles which might be turned to account in the way of traffic, but found great difficulty in being comprehended. We made out, nevertheless, what greatly astonished us, that the islands abounded in the large tortoise of the Gallipagos, one of which we saw in the canoe of Too-wit. We saw also some *biche de mer* in the hands of one of the savages, who was greedily devouring it in its natural state. These anomalies, for they were such when considered in regard to the latitude, induced Captain Guy to wish for a thorough investigation of the country, in the hope of making a profitable speculation in his discovery. For my own part, anxious as I was to know something more of these islands, I was still more earnestly bent on prosecuting the voyage to the southward without delay. We had now fine weather, but there was no telling how long it would last ; and being already in the eighty-fourth parallel, with an open sea before us, a current setting strongly to the southward, and the wind fair, I could not listen with any patience to a proposition of stopping longer than was absolutely necessary for the health of the crew and the taking on board a proper supply of fuel and fresh provisions. I represented to the captain that we might easily make this group on our return, and winter here in the event of being blocked up by the ice. He at length came into my views (for in some way, hardly known to myself, I had acquired much influence over him), and it was finally resolved that, even in the event of our finding *biche de mer*, we should only stay here a week to recruit, and then push on to the southward while we might. Accordingly we made every necessary preparation, and, under the guidance of Too-wit, got the *Jane* through the reef in safety, coming to anchor about a mile from the shore, in an excellent bay, completely landlocked, on the southeastern coast of the main island, and in ten fathoms of water, black sandy bottom. At the head of this bay there were three fine springs (we were told) of good water, and we saw abundance of wood in the vicinity. The four canoes followed us in, keeping, however, at a respectful distance. Too-wit himself remained on board, and, upon our dropping anchor, invited us to accompany him on shore, and visit his village in the interior. To this Captain Guy consented ; and ten savages

being left on board as hostages, a party of us, twelve in all, got in readiness to attend the chief. We took care to be well armed, yet without evincing any distrust. The schooner had her guns run out, her boarding-nettings up, and every other proper precaution was taken to guard against surprise. Directions were left with the chief mate to admit no person on board during our absence, and, in the event of our not appearing in twelve hours, to send the cutter, with a swivel, around the island in search of us.

At every step we took inland the conviction forced itself upon us that we were in a country differing essentially from any hitherto visited by civilized men. We saw nothing with which we had been formerly conversant. The trees resembled no growth of either the torrid, the temperate, or the northern frigid zones, and were altogether unlike those of the lower southern latitudes we had already traversed. The very rocks were novel in their mass, their colour, and their stratification; and the streams themselves, utterly incredible as it may appear, had so little in common with those of other climates, that we were scrupulous of tasting them, and, indeed, had difficulty in bringing ourselves to believe that their qualities were purely those of nature. At a small brook which crossed our path (the first we had reached) Too-wit and his attendants halted to drink. On account of the singular character of the water, we refused to taste it, supposing it to be polluted; and it was not until some time afterward we came to understand that such was the appearance of the streams throughout the whole group. I am at a loss to give a distinct idea of the nature of this liquid, and cannot do so without many words. Although it flowed with rapidity in all declivities where common water would do so, yet never, except when falling in a cascade, had it the customary appearance of *limpidity*. It was, nevertheless, in point of fact, as perfectly limpid as any limestone water in existence, the difference being only in appearance. At first sight, and especially in cases where little declivity was found, it bore resemblance, as regards consistency, to a thick infusion of gum Arabic in common water. But this was only the least remarkable of its extraordinary qualities. It was *not* colourless, nor was it of any one uniform colour—presenting to the eye, as it

flowed, every possible shade of purple, like the hues of a changeable silk. This variation in shade was produced in a manner which excited as profound astonishment in the minds of our party as the mirror had done in the case of Too-wit. Upon collecting a basinful, and allowing it to settle thoroughly, we perceived that the whole mass of liquid was made up of a number of distinct veins, each of a distinct hue ; that these veins did not commingle ; and that their cohesion was perfect in regard to their own particles among themselves, and imperfect in regard to neighbouring veins. Upon passing the blade of a knife athwart the veins, the water closed over it immediately, as with us, and also, in withdrawing it, all traces of the passage of the knife were instantly obliterated. If, however, the blade was passed down accurately between the two veins, a perfect separation was effected, which the power of cohesion did not immediately rectify. The phenomena of this water formed the first definite link in that vast chain of apparent miracles with which I was destined to be at length encircled.

## CHAPTER XIX

WE were nearly three hours in reaching the village, it being more than nine miles in the interior, and the path lying through a rugged country. As we passed along, the party of Too-wit (the whole hundred and ten savages of the canoes) was momentarily strengthened by smaller detachments, of from two to six or seven, which joined us, as if by accident, at different turns in the road. There appeared so much of system in this that I could not help feeling distrust, and I spoke to Captain Guy of my apprehensions. It was now too late, however, to recede, and we concluded that our best security lay in evincing a perfect confidence in the good faith of Too-wit. We accordingly went on, keeping a wary eye upon the manœuvres of the savages, and not permitting them to divide our numbers by pushing in between. In this way, passing through a precipitous ravine, we at length reached what we were told was the only collection of habitations upon the island. As

we came in sight of them, the chief set up a shout, and frequently repeated the word *Klock-klock*, which we supposed to be the name of the village, or perhaps the generic name for villages.

The dwellings were of the most miserable description imaginable, and, unlike those of even the lowest of the savage races with which mankind are acquainted, were of no uniform plan. Some of them (and these we found belonged to the *Wampoos* or *Yampoos*, the great men of the land) consisted of a tree cut down at about four feet from the root, with a large black skin thrown over it, and hanging in loose folds upon the ground. Under this the savage nestled. Others were formed by means of rough limbs of trees, with the withered foliage upon them, made to recline, at an angle of forty-five degrees, against a bank of clay, heaped up, without regular form, to the height of five or six feet. Others, again, were mere holes dug in the earth perpendicularly, and covered over with similar branches, these being removed when the tenant was about to enter, and pulled on again when he had entered. A few were built among the forked limbs of trees as they stood, the upper limbs being partially cut through, so as to bend over upon the lower, thus forming thicker shelter from the weather. The greater number, however, consisted of small shallow caverns, apparently scratched in the face of a precipitous ledge of dark stone, resembling fuller's earth, with which three sides of the village was bounded. At the door of each of these primitive caverns was a small rock, which the tenant carefully placed before the entrance upon leaving his residence, for what purpose I could not ascertain, as the stone itself was never of sufficient size to close up more than a third of the opening.

This village, if it were worthy of the name, lay in a valley of some depth, and could only be approached from the southward, the precipitous ledge of which I have already spoken cutting off all access in other directions. Through the middle of the valley ran a brawling stream of the same magical-looking water which has been described. We saw several strange animals about the dwellings, all appearing to be thoroughly domesticated. The largest of these creatures resembled our common hog in the structure

of the body and snout ; the tail, however, was bushy, and the legs slender as those of the antelope. Its motion was exceedingly awkward and indecisive, and we never saw it attempt to run. We noticed also several animals very similar in appearance, but of a greater length of body, and covered with a black wool. There were a great variety of tame fowls running about, and these seemed to constitute the chief food of the natives. To our astonishment we saw black albatross among these birds in a state of entire domestication, going to sea periodically for food, but always returning to the village as a home, and using the southern shore in the vicinity as a place of incubation. There they were joined by their friends the pelicans as usual, but these latter never followed them to the dwellings of the savages. Among the other kinds of tame fowls were ducks, differing very little from the canvas-back of our own country, black gannets, and a large bird not unlike the buzzard in appearance, but not carnivorous. Of fish there seemed to be a great abundance. We saw, during our visit, a quantity of dried salmon, rock cod, blue dolphins, mackerel, blackfish, skate, conger eels, elephant-fish, mullets, soles, parrot-fish, leather-jackets, gurnards, hake, flounders, paracutas, and innumerable other varieties. We noticed, too, that most of them were similar to the fish about the group of the Lord Auckland Islands, in a latitude as low as fifty-one degrees south. The Gallipago tortoise was also very plentiful. We saw but few wild animals, and none of a large size, or of a species with which we were familiar. One or two serpents of a formidable aspect crossed our path, but the natives paid them little attention, and we concluded that they were not venomous.

As we approached the village with Too-wit and his party, a vast crowd of the people rushed out to meet us, with loud shouts, among which we could only distinguish the everlasting *Anamoo-moo!* and *Lama-Lama!* We were much surprised at perceiving that, with one or two exceptions, these new-comers were entirely naked, the skins being used only by the men of the canoes. All the weapons of the country seemed also to be in the possession of the latter, for there was no appearance of any among the villagers. There were a great many women and children,

the former not altogether wanting in what might be termed personal beauty. They were straight, tall, and well formed, with a grace and freedom of carriage not to be found in civilized society. Their lips, however, like those of the men, were thick and clumsy, so that, even when laughing, the teeth were never disclosed. Their hair was of a finer texture than that of the males. Among these naked villagers there might have been ten or twelve who were clothed, like the party of Too-wit, in dresses of black skin, and armed with lances and heavy clubs. These appeared to have great influence among the rest, and were always addressed by the title *Wampoo*. These, too, were the tenants of the black skin palaces. That of Too-wit was situated in the centre of the village, and was much larger and somewhat better constructed than others of its kind. The tree which formed its support was cut off at a distance of twelve feet or thereabout from the root, and there were several branches left just below the cut, these serving to extend the covering, and in this way prevent its flapping about the trunk. The covering, too, which consisted of four very large skins fastened together with wooden skewers, was secured at the bottom with pegs driven through it and into the ground. The floor was strewn with a quantity of dry leaves by way of carpet.

To this hut we were conducted with great solemnity, and as many of the natives crowded in after us as possible. Too-wit seated himself on the leaves, and made signs that we should follow his example. This we did, and presently found ourselves in a situation peculiarly uncomfortable, if not indeed critical. We were on the ground, twelve in number, with the savages, as many as forty, sitting on their hams so closely around us that, if any disturbance had arisen, we should have found it impossible to make use of our arms, or indeed to have risen on our feet. The pressure was not only inside the tent, but outside, where probably was every individual on the whole island, the crowd being prevented from trampling us to death only by the incessant exertions and vociferations of Too-wit. Our chief security lay, however, in the presence of Too-wit himself among us, and we resolved to stick by him closely, as the best chance of extricating ourselves from the dilemma, sacrificing

him immediately upon the first appearance of hostile design.

After some trouble a certain degree of quiet was restored, when the chief addressed us in a speech of great length, and very nearly resembling the one delivered in the canoes, with the exception that the *Anamoo-moos!* were now somewhat more strenuously insisted upon than the *Lama-Lamas!* We listened in profound silence until the conclusion of his harangue, when Captain Guy replied by assuring the chief of his eternal friendship and good-will, concluding what he had to say by a present of several strings of blue beads and a knife. At the former the monarch, much to our surprise, turned up his nose with some expression of contempt; but the knife gave him the most unlimited satisfaction, and he immediately ordered dinner. This was handed into the tent over the heads of the attendants, and consisted of the palpitating entrails of a species of unknown animal, probably one of the slim-legged hogs which we had observed in our approach to the village. Seeing us at a loss how to proceed, he began, by way of setting us an example, to devour yard after yard of the enticing food, until we could positively stand it no longer, and evinced such manifest symptoms of rebellion of stomach as inspired his majesty with a degree of astonishment only inferior to that brought about by the looking-glasses. We declined, however, partaking of the delicacies before us, and endeavoured to make him understand that we had no appetite whatever, having just finished a hearty *déjeuner*.

When the monarch had made an end of his meal, we commenced a series of cross-questioning in every ingenious manner we could devise, with a view of discovering what were the chief productions of the country, and whether any of them might be turned to profit. At length he seemed to have some idea of our meaning, and offered to accompany us to a part of the coast where he assured us the *biche de mer* (pointing to a specimen of that animal) was to be found in great abundance. We were glad at this early opportunity of escaping from the oppression of the crowd, and signified our eagerness to proceed. We now left the tent, and, accompanied by the whole population of the

village, followed the chief to the south-eastern extremity of the island, not far from the bay where our vessel lay at anchor. We waited here for about an hour, until the four canoes were brought round by some of the savages to our station. The whole of our party then getting into one of them, we were paddled along the edge of the reef before mentioned, and of another still farther out, where we saw a far greater quantity of *biche de mer* than the oldest seaman among us had ever seen in those groups of the lower latitudes most celebrated for this article of commerce. We stayed near these reefs only long enough to satisfy ourselves that we could easily load a dozen vessels with the animal if necessary, when we were taken alongside the schooner, and parted with Too-wit, after obtaining from him a promise that he would bring us, in the course of twenty-four hours, as many of the canvas-back ducks and Gallipago tortoises as his canoes would hold. In the whole of this adventure we saw nothing in the demeanour of the natives calculated to create suspicion, with the single exception of the systematic manner in which their party was strengthened during our route from the schooner to the village.

## CHAPTER XX

THE chief was as good as his word, and we were soon plentifully supplied with fresh provision. We found the tortoises as fine as we had ever seen, and the ducks surpassed our best species of wild fowl, being exceedingly tender, juicy, and well-flavoured. Besides these, the savages brought us, upon our making them comprehend our wishes, a vast quantity of brown celery and scurvy grass, with a canoe-load of fresh fish and some dried. The celery was a treat indeed, and the scurvy grass proved of incalculable benefit in restoring those of our men who had shown symptoms of disease. In a very short time we had not a single person on the sick-list. We had also plenty of other kinds of fresh provision, among which may be mentioned a species of shell-fish resembling the mussel in shape, but with the taste of an oyster. Shrimps, too, and prawns were abundant, and albatross and other birds' eggs

with dark shells. We took in, too, a plentiful stock of the flesh of the hog which I have mentioned before. Most of the men found it a palatable food, but I thought it fishy and otherwise disagreeable. In return for these good things we presented the natives with blue beads, brass trinkets, nails, knives, and pieces of red cloth, they being fully delighted in the exchange. We established a regular market on shore, just under the guns of the schooner, where our barterings were carried on with every appearance of good faith, and a degree of order which their conduct at the village of *Klock-klock* had not led us to expect from the savages.

Matters went on thus very amicably for several days, during which parties of the natives were frequently on board the schooner, and parties of our men frequently on shore, making long excursions into the interior, and receiving no molestation whatever. Finding the ease with which the vessel might be loaded with *biche de mer*, owing to the friendly disposition of the islanders, and the readiness with which they would render us assistance in collecting it, Captain Guy resolved to enter into negotiation with Too-wit for the erection of suitable houses in which to cure the article, and for the services of himself and tribe in gathering as much as possible, while he himself took advantage of the fine weather to prosecute his voyage to the southward. Upon mentioning this project to the chief he seemed very willing to enter into an agreement. A bargain was accordingly struck, perfectly satisfactory to both parties, by which it was arranged that, after making the necessary preparations, such as laying off the proper grounds, erecting a portion of the buildings, and doing some other work in which the whole of our crew would be required, the schooner should proceed on her route, leaving three of her men on the island to superintend the fulfilment of the project, and instruct the natives in drying the *biche de mer*. In regard to terms, these were made to depend upon the exertions of the savages in our absence. They were to receive a stipulated quantity of blue beads, knives, red cloth, and so forth, for every certain number of piculs of the *biche de mer* which should be ready on our return.

A description of the nature of this important article of

commerce, and the method of preparing it, may prove of some interest to my readers, and I can find no more suitable place than this for introducing an account of it. The following comprehensive notice of the substance is taken from a modern history of a voyage to the South Seas.

‘It is that *mollusca* from the Indian Seas which is known in commerce by the French name *bouche de mer* (a nice morsel from the sea). If I am not much mistaken, the celebrated Cuvier calls it *gasteropeda pulmonifera*. It is abundantly gathered in the coasts of the Pacific Islands, and gathered especially for the Chinese market, where it commands a great price, perhaps as much as their much-talked-of edible bird’s nests, which are probably made up of the gelatinous matter picked up by a species of swallow from the body of these molluscae. They have no shell, no legs, nor any prominent part, except an *absorbing* and an *excretory*, opposite organs ; but, by their elastic wings, like caterpillars or worms, they creep in shallow waters, in which, when low, they can be seen by a kind of swallow, the sharp bill of which, inserted in the soft animal, draws a gummy and filamentous substance, which, by drying, can be wrought into the solid walls of their nest. Hence the name of *gasteropeda pulmonifera*.

This mollusca is oblong, and of different sizes, from three to eighteen inches in length ; and I have seen a few that were not less than two feet long. They are nearly round, a little flattish on one side, which lies next the bottom of the sea ; and they are from one to eight inches thick. They crawl up into shallow water at particular seasons of the year, probably for the purpose of gendering, as we often find them in pairs. It is when the sun has the most power on the water, rendering it tepid, that they approach the shore ; and they often go up into places so shallow that, on the tide’s receding, they are left dry, exposed to the heat of the sun. But they do not bring forth their young in shallow water, as we never see any of their progeny, and the full-grown ones are always observed coming in from deep water. They feed principally on that class of zoophytes which produce the coral.

‘The *biche de mer* is generally taken in three or four feet water ; after which they are brought on shore, and split at

one end with a knife, the incision being one inch or more, according to the size of the mollusca. Through this opening the entrails are forced out by pressure, and they are much like those of any other small tenant of the deep. The article is then washed, and afterward boiled to a certain degree, which must not be too much or too little. They are then buried in the ground for four hours, then boiled again for a short time, after which they are dried, either by the fire or the sun. Those cured by the sun are worth the most ; but where one picul (133½ lbs.) can be cured that way, I can cure thirty piculs by the fire. When once properly cured, they can be kept in a dry place for two or three years without any risk ; but they should be examined once in every few months, say four times a year, to see if any dampness is likely to affect them.

‘The Chinese, as before stated, consider *biche de mer* a very great luxury, believing that it wonderfully strengthens and nourishes the system, and renews the exhausted system of the immoderate voluptuary. The first quality commands a high price in Canton, being worth ninety dollars a picul ; the second quality seventy-five dollars ; the third fifty dollars ; the fourth thirty dollars ; the fifth twenty dollars ; the sixth twelve dollars ; the seventh eight dollars ; and the eighth four dollars ; small cargoes, however, will often bring more in Manilla, Singapore, and Batavia.’

An agreement having been thus entered into, we proceeded immediately to land everything necessary for preparing the buildings and clearing the ground. A large flat space near the eastern shore of the bay was selected, where there was plenty both of wood and water, and within a convenient distance of the principal reefs on which the *biche de mer* was to be procured. We now all set to work in good earnest, and soon, to the great astonishment of the savages, had felled a sufficient number of trees for our purpose, getting them quickly in order for the framework of the houses, which in two or three days were so far under way that we could safely trust the rest of the work to the three men whom we intended to leave behind. These were John Carson, Alfred Harris, — Peterson (all natives of London, I believe), who volunteered their services in this respect.

By the last of the month we had everything in readiness for departure. We had agreed, however, to pay a formal visit of leave-taking to the village, and Too-wit insisted so pertinaciously upon our keeping the promise, that we did not think it advisable to run the risk of offending him by a final refusal. I believe that not one of us had at this time the slightest suspicion of the good faith of the savages. They had uniformly behaved with the greatest decorum, aiding us with alacrity in our work, offering us their commodities, frequently without price, and never, in any instance, pilfering a single article, although the high value they set upon the goods we had with us was evident by the extravagant demonstrations of joy always manifested upon our making them a present. The women especially were most obliging in every respect, and, upon the whole, we should have been the most suspicious of human beings had we entertained a single thought of perfidy on the part of a people who treated us so well. A very short while sufficed to prove that this apparent kindness of disposition was only the result of a deeply-laid plan for our destruction, and that the islanders for whom we entertained such inordinate feelings of esteem, were among the most barbarous, subtle, and bloodthirsty wretches that ever contaminated the face of the globe.

It was on the first of February that we went on shore for the purpose of visiting the village. Although, as said before, we entertained not the slightest suspicion, still no proper precaution was neglected. Six men were left in the schooner, with instructions to permit none of the savages to approach the vessel during our absence, under any pretence whatever, and to remain constantly on deck. The boarding-nettings were up, the guns double-shotted with grape and canister, and the swivels loaded with canisters of musket-balls. She lay, with her anchor apeak, about a mile from the shore, and no canoe could approach her in any direction without being distinctly seen and exposed to the full fire of our swivels immediately.

The six men being left on board, our shore-party consisted of thirty-two persons in all. We were armed to the teeth, having with us muskets, pistols, and cutlasses, besides each a long kind of seaman's knife, somewhat

resembling the Bowie knife now so much used throughout our western and southern country. A hundred of the black skin warriors met us at the landing for the purpose of accompanying us on our way. We noticed, however, with some surprise, that they were now entirely without arms; and, upon questioning Too-wit in relation to this circumstance, he merely answered that *Mattee non we pa pa si*—meaning that there was no need of arms where all were brothers. We took this in good part, and proceeded.

We had passed the spring and rivulet of which I before spoke, and were now entering upon a narrow gorge leading through the chain of soapstone hills among which the village was situated. This gorge was very rocky and uneven, so much so that it was with no little difficulty we scrambled through it on our first visit to Klock-klock. The whole length of the ravine might have been a mile and a half, or probably two miles. It wound in every possible direction through the hills (having apparently formed, at some remote period, the bed of a torrent), in no instance proceeding more than twenty yards without an abrupt turn. The sides of this dell would have averaged, I am sure, seventy or eighty feet in perpendicular altitude throughout the whole of their extent, and in some portions they arose to an astonishing height, overshadowing the pass so completely that but little of the light of day could penetrate. The general width was about forty feet, and occasionally it diminished so as not to allow the passage of more than five or six persons abreast. In short, there could be no place in the world better adapted for the consummation of an ambushade, and it was no more than natural that we should look carefully to our arms as we entered upon it. When I now think of our egregious folly, the chief subject of astonishment seems to be, that we should have ever ventured, under any circumstances, so completely into the power of unknown savages as to permit them to march both before and behind us in our progress through this ravine. Yet such was the order we blindly took up, trusting foolishly to the force of our party, the unarmed condition of Too-wit and his men, the certain efficacy of our fire-arms (whose effect was yet a secret to the natives), and, more than all, to the long-sustained pretension of friendship kept up by

these infamous wretches. Five or six of them went on before, as if to lead the way, ostentatiously busying themselves in removing the larger stones and rubbish from the path. Next came our own party. We walked closely together, taking care only to prevent separation. Behind followed the main body of the savages, observing unusual order and decorum.

Dirk Peters, a man named Wilson Allen, and myself were on the right of our companions, examining, as we went along, the singular stratification of the precipice which overhung us. A fissure in the soft rock attracted our attention. It was about wide enough for one person to enter without squeezing, and extended back into the hill some eighteen or twenty feet in a straight course, sloping afterward to the left. The height of the opening, as far as we could see into it from the main gorge, was perhaps sixty or seventy feet. There were one or two stunted shrubs growing from the crevices, bearing a species of filbert, which I felt some curiosity to examine, and pushed in briskly for that purpose, gathering five or six of the nuts at a grasp, and then hastily retreating. As I turned, I found that Peters and Allen had followed me. I desired them to go back, as there was not room for two persons to pass, saying they should have some of my nuts. They accordingly turned, and were scrambling back, Allen being close to the mouth of the fissure, when I was suddenly aware of a concussion resembling nothing I had ever before experienced and which impressed me with a vague conception, if indeed I then thought of anything, that the whole foundations of the solid globe were suddenly rent asunder, and that the day of universal dissolution was at hand.

## CHAPTER XXI

As soon as I could collect my scattered senses, I found myself nearly suffocated, and grovelling in utter darkness among a quantity of loose earth, which was also falling upon me heavily in every direction, threatening to bury me entirely. Horribly alarmed at this idea, I struggled to gain my feet, and at length succeeded. I then remained

motionless for some moments, endeavouring to conceive what had happened to me, and where I was. Presently I heard a deep groan just at my ear, and afterward the smothered voice of Peters calling to me for aid in the name of God. I scrambled one or two paces forward, when I fell directly over the head and shoulders of my companion, who, I soon discovered, was buried in a loose mass of earth as far as his middle, and struggling desperately to free himself from the pressure. I tore the dirt from around him with all the energy I could command, and at length succeeded in getting him out.

As soon as we sufficiently recovered from our fright and surprise to be capable of conversing rationally, we both came to the conclusion that the walls of the fissure in which we had ventured had, by some convulsion of nature, or probably from their own weight, caved in overhead, and that we were consequently lost for ever, being thus entombed alive. For a long time we gave up supinely to the most intense agony and despair, such as cannot be adequately imagined by those who have never been in a similar situation. I firmly believe that no incident ever occurring in the course of human events is more adapted to inspire the supremeness of mental and bodily distress than a case like our own, of living inhumation. The blackness of darkness which envelops the victim, the terrific oppression of lungs, the stifling fumes from the damp earth, unite with the ghastly considerations that we are beyond the remotest confines of hope, and that such is the allotted portion of *the dead*, to carry into the human heart a degree of appalling awe and horror not to be tolerated—never to be conceived.

At length Peters proposed that we should endeavour to ascertain precisely the extent of our calamity, and grope about our prison; it being barely possible, he observed, that some opening might be yet left us for escape. I caught eagerly at this hope, and, arousing myself to exertion, attempted to force my way through the loose earth. Hardly had I advanced a single step before a glimmer of light became perceptible, enough to convince me that, at all events, we should not immediately perish for want of air. We now took some degree of heart, and encouraged

each other to hope for the best. Having scrambled over a bank of rubbish which impeded our farther progress in the direction of the light, we found less difficulty in advancing, and also experienced some relief from the excessive oppression of lungs which had tormented us. Presently we were enabled to obtain a glimpse of the objects around, and discovered that we were near the extremity of the straight portion of the fissure, where it made a turn to the left. A few struggles more, and we reached the bend, when, to our inexpressible joy, there appeared a long seam or crack extending upward a vast distance, generally at an angle of about forty-five degrees, although sometimes much more precipitous. We could not see through the whole extent of this opening; but, as a good deal of light came down it, we had little doubt of finding at the top of it (if we could by any means reach the top) a clear passage into the open air.

I now called to mind that three of us had entered the fissure from the main gorge, and that our companion, Allen, was still missing; we determined at once to retrace our steps and look for him. After a long search, and much danger from the further caving in of the earth above us, Peters at length cried out to me that he had hold of our companion's foot, and that his whole body was deeply buried beneath the rubbish, beyond a possibility of extricating him. I soon found that what he said was too true, and that, of course, life had been long extinct. With sorrowful hearts, therefore, we left the corpse to its fate, and again made our way to the bend.

The breadth of the seam was barely sufficient to admit us, and after one or two ineffectual efforts at getting up, we began once more to despair. I have before said that the chain of hills through which ran the main gorge was composed of a species of soft rock resembling soapstone. The sides of the cleft we were now attempting to ascend were of the same material, and so excessively slippery, being wet, that we could get but little foothold upon them even in their least precipitous parts; in some places, where the ascent was nearly perpendicular, the difficulty was, of course, much aggravated; and, indeed, for some time we thought it insurmountable. We took courage, however,

from despair; and what, by dint of cutting steps in the soft stone with our Bowie knives, and swinging, at the risk of our lives, to small projecting points of a harder species of slaty rock which now and then protruded from the general mass, we at length reached a natural platform, from which was perceptible a patch of blue sky, at the extremity of a thickly-wooded ravine. Looking back now, with somewhat more leisure, at the passage through which we had thus far proceeded, we clearly saw, from the appearance of its sides, that it was of late formation, and we concluded that the concussion, whatever it was, which had so unexpectedly overwhelmed us, had also, at the same moment, laid open this path for escape. Being quite exhausted with exertion, and, indeed, so weak that we were scarcely able to stand or articulate, Peters now proposed that we should endeavour to bring our companions to the rescue by firing the pistols which still remained in our girdles—the muskets as well as cutlasses had been lost among the loose earth at the bottom of the chasm. Subsequent events proved that, had we fired, we should have sorely repented it; but luckily, a half suspicion of foul play had by this time arisen in my mind, and we forbore to let the savages know of our whereabouts.

After having reposed for about an hour, we pushed on slowly up the ravine, and had gone no great way before we heard a succession of tremendous yells. At length we reached what might be called the surface of the ground; for our path hitherto, since leaving the platform, had lain beneath an archway of high rock and foliage, at a vast distance overhead. With great caution we stole to a narrow opening, through which we had a clear sight of the surrounding country, when the whole dreadful secret of the concussion broke upon us in one moment and at one view.

The spot from which we looked was not far from the summit of the highest peak in the range of the soapstone hills. The gorge in which our party of thirty-two had entered ran within fifty feet to the left of us. But, for at least one hundred yards, the channel or bed of this gorge was entirely filled up with the chaotic ruins of more than a million tons of earth and stone that had been artificially tumbled within it. The means by which the vast mass had

been precipitated were not more simple than evident, for sure traces of the murderous work were yet remaining. In several spots along the top of the eastern side of the gorge (we were now on the western) might be seen stakes of wood driven into the earth. In these spots the earth had not given way; but throughout the whole extent of the face of the precipice from which the mass *had* fallen, it was clear, from marks left in the soil resembling those made by the drill of the rock-blaster, that stakes similar to those we saw standing had been inserted, at not more than a yard apart, for the length of perhaps three hundred feet, and ranging at about ten feet back from the edge of the gulf. Strong cords of grape vine were attached to the stakes still remaining on the hill, and it was evident that such cords had also been attached to each of the other stakes. I have already spoken of the singular stratification of these soapstone hills; and the description just given of the narrow and deep fissure through which we effected our escape from inhumation will afford a further conception of its nature. This was such that almost every natural convulsion would be sure to split the soil into perpendicular layers or ridges running parallel with one another; and a very moderate exertion of art would be sufficient for effecting the same purpose. Of this stratification the savages had availed themselves to accomplish their treacherous ends. There can be no doubt that, by the continuous line of stakes, a partial rupture of the soil had been brought about, probably to the depth of one or two feet, when, by means of a savage pulling at the end of each of the cords (these cords being attached to the tops of the stakes, and extending back from the edge of the cliff), a vast leverage power was obtained, capable of hurling the whole face of the hill, upon a given signal, into the bosom of the abyss below. The fate of our poor companions was no longer a matter of uncertainty. We alone had escaped from the tempest of that overwhelming destruction. We were the only living white men upon the island.

.

## CHAPTER XXII

OUR situation, as it now appeared, was scarcely less dreadful than when we had conceived ourselves entombed forever. We saw before us no prospect but that of being put to death by the savages, or of dragging out a miserable existence in captivity among them. We might, to be sure, conceal ourselves for a time from their observation among the fastnesses of the hills, and, as a final resort, in the chasm from which we had just issued ; but we must either perish in the long Polar winter through cold and famine, or be ultimately discovered in our efforts to obtain relief.

The whole country around us seemed to be swarming with savages, crowds of whom, we now perceived, had come over from the islands to the southward on flat rafts, doubtless with a view of lending their aid in the capture and plunder of the *Jane*. The vessel still lay calmly at anchor in the bay, those on board being apparently quite unconscious of any danger awaiting them. How we longed at that moment to be with them ! either to aid in effecting their escape, or to perish with them in attempting a defence. We saw no chance even of warning them of their danger without bringing immediate destruction upon our own heads, with but a remote hope of benefit to them. A pistol fired might suffice to apprise them that something wrong had occurred ; but the report could not possibly inform them that their only prospect of safety lay in getting out of the harbour forthwith—it could not tell them that no principles of honour now bound them to remain, that their companions were no longer among the living. Upon hearing the discharge they could not be more thoroughly prepared to meet the foe, who were now getting ready to attack, than they already were, and always had been. No good, therefore, and infinite harm, would result from our firing and, after mature deliberation, we forbore.

Our next thought was to attempt a rush towards the vessel, to seize one of the four canoes which lay at the head of the bay, and endeavour to force a passage on board. But the utter impossibility of succeeding in this desperate task soon became evident. The country, as I said before,

was literally swarming with the natives, skulking among the bushes and recesses of the hills, so as not to be observed from the schooner. In our immediate vicinity especially, and blockading the sole path by which we could hope to attain the shore in the proper point, were stationed the whole party of the black skin warriors, with Too-wit at their head, and apparently only waiting for some reinforcement to commence his onset upon the *Jane*. The canoes, too, which lay at the head of the bay, were manned with savages, unarmed, it is true, but who undoubtedly had arms within reach. We were forced, therefore, however unwillingly, to remain in our place of concealment, mere spectators of the conflict which presently ensued.

In about half an hour we saw some sixty or seventy rafts, or flatboats, with outriggers, filled with savages, and coming round the southern bight of the harbour. They appeared to have no arms except short clubs, and stones which lay in the bottom of the rafts. Immediately afterward another detachment, still larger, approached in an opposite direction, and with similar weapons. The four canoes, too, were now quickly filled with natives, starting up from the bushes at the head of the bay, and put off swiftly to join the other parties. Thus, in less time than I have taken to tell it, and as if by magic, the *Jane* saw herself surrounded by an immense multitude of desperadoes evidently bent upon capturing her at all hazards.

That they would succeed in so doing could not be doubted for an instant. The six men left in the vessel, however resolutely they might engage in her defence, were altogether unequal to the proper management of the guns, or in any manner to sustain a contest at such odds. I could hardly imagine that they would make resistance at all, but in this was deceived; for presently I saw them get springs upon the cable, and bring the vessel's starboard broadside to bear upon the canoes, which by this time were within pistol range, the rafts being nearly a quarter of a mile to windward. Owing to some cause unknown, but most probably to the agitation of our poor friends at seeing themselves in so hopeless a situation, the discharge was an entire failure. Not a canoe was hit or a single savage injured, the shots striking short and ricocheting over their heads.

The only effect produced upon them was astonishment at the unexpected report and smoke, which was so excessive that for some moments I almost thought they would abandon their design entirely, and return to the shore. And this they would most likely have done had our men followed up their broadside by a discharge of small arms, in which, as the canoes were now so near at hand, they could not have failed in doing some execution, sufficient, at least, to deter this party from a farther advance, until they could have given the rafts also a broadside. But, in place of this, they left the canoe party to recover from their panic, and, by looking about them, to see that no injury had been sustained, while they flew to the larboard to get ready for the rafts.

The discharge to larboard produced the most terrible effect. The star and double-headed shot of the large guns cut seven or eight of the rafts completely asunder, and killed, perhaps, thirty or forty of the savages outright, while a hundred of them, at least, were thrown into the water, the most of them dreadfully wounded. The remainder, frightened out of their senses, commenced at once a precipitate retreat, not even waiting to pick up their maimed companions, who were swimming about in every direction, screaming and yelling for aid. This great success, however, came too late for the salvation of our devoted people. The canoe party were already on board the schooner to the number of more than a hundred and fifty, the most of them having succeeded in scrambling up the chains and over the boarding-nettings even before the matches had been applied to the larboard guns. Nothing could now withstand their brute rage. Our men were borne down at once, overwhelmed, trodden under foot, and absolutely torn to pieces in an instant.

Seeing this, the savages on the rafts got the better of their fears, and came up in shoals to the plunder. In five minutes the *Jane* was a pitiable scene indeed of havoc and tumultuous outrage. The decks were split open and ripped up; the cordage, sails, and everything movable on deck demolished as if by magic; while, by dint of pushing at the stern, towing with the canoes, and hauling at the sides, as they swam in thousands around the vessel, the wretches

finally forced her on shore (the cable having been slipped), and delivered her over to the good offices of Too-wit, who, during the whole of the engagement, had maintained, like a skilful general, his post of security and reconnoissance among the hills, but, now that the victory was completed to his satisfaction, condescended to scamper down with his warriors of the black skin, and become a partaker in the spoils.

Too-wit's descent left us at liberty to quit our hiding-place and reconnoitre the hill in the vicinity of the chasm. At about fifty yards from the mouth of it we saw a small spring of water, at which we slaked the burning thirst that now consumed us. Not far from the spring we discovered several of the filbert-bushes which I mentioned before. Upon tasting the nuts we found them palatable, and very nearly resembling in flavour the common English filbert. We collected our hats full immediately, deposited them within the ravine, and returned for more. While we were busily employed in gathering these, a rustling in the bushes alarmed us, and we were upon the point of stealing back to our covert, when a large black bird of the bittern species strugglingly and slowly arose above the shrubs. I was so much startled that I could do nothing, but Peters had sufficient presence of mind to run up to it before it could make its escape, and seize it by the neck. Its struggles and screams were tremendous, and we had thoughts of letting it go, lest the noise should alarm some of the savages who might be still lurking in the neighbourhood. A stab with a Bowie knife, however, at length brought it to the ground, and we dragged it into the ravine, congratulating ourselves that, at all events, we had thus obtained a supply of food enough to last us for a week.

We now went out again to look about us, and ventured a considerable distance down the southern declivity of the hill, but met with nothing else which could serve us for food. We therefore collected a quantity of dry wood and returned, seeing one or two large parties of the natives on their way to the village, laden with the plunder of the vessel, and who, we were apprehensive, might discover us in passing beneath the hill.

Our next care was to render our place of concealment as

secure as possible, and, with this object, we arranged some brushwood over the aperture which I have before spoken of as the one through which we saw the patch of blue sky, on reaching the platform from the interior of the chasm. We left only a very small opening, just wide enough to admit of our seeing the bay, without the risk of being discovered from below. Having done this, we congratulated ourselves upon the security of the position ; for we were now completely excluded from observation, as long as we chose to remain within the ravine itself, and not venture out upon the hill. We could perceive no traces of the savages having ever been within this hollow ; but, indeed, when we came to reflect upon the probability that the fissure through which we attained it had been only just now created by the fall of the cliff opposite, and that no other way of attaining it could be perceived, we were not so much rejoiced at the thought of being secure from molestation as fearful lest there should be absolutely no means left us for descent. We resolved to explore the summit of the hill thoroughly, when a good opportunity should offer. In the mean time we watched the motions of the savages through our loophole.

They had already made a complete wreck of the vessel, and were now preparing to set her on fire. In a little while we saw the smoke ascending in huge volumes from her main-hatchway, and, shortly afterward, a dense mass of flame burst up from the fore-castle. The rigging, masts, and what remained of the sails caught immediately, and the fire spread rapidly along the decks. Still a great many of the savages retained their stations about her, hammering with large stones, axes, and cannon balls at the bolts and other copper and iron work. On the beach, and in canoes and rafts, there were not less, altogether, in the immediate vicinity of the schooner, than ten thousand natives, besides the shoals of them who, laden with booty, were making their way inland and over to the neighbouring islands. We now anticipated a catastrophe, and were not disappointed. First of all there came a smart shock (which we felt distinctly where we were as if we had been slightly galvanized), but unattended with any visible signs of an explosion. The savages were evidently startled, and paused

for an instant from their labours and yellings. They were upon the point of recommencing, when suddenly a mass of smoke puffed up from the decks, resembling a black and heavy thunder-cloud—then, as if from its bowels, arose a tall stream of vivid fire to the height, apparently, of a quarter of a mile—then there came a sudden circular expansion of the flame—then the whole atmosphere was magically crowded, in a single instant, with a wild chaos of wood, and metal, and human limbs—and, lastly, came the concussion in its fullest fury, which hurled us impetuously from our feet, while the hills echoed and re-echoed the tumult, and a dense shower of the minutest fragments of the ruins tumbled headlong in every direction around us.

The havoc among the savages far exceeded our utmost expectation, and they had now, indeed, reaped the full and perfect fruits of their treachery. Perhaps a thousand perished by the explosion, while at least an equal number were desperately mangled. The whole surface of the bay was literally strewn with the struggling and drowning wretches, and on shore matters were even worse. They seemed utterly appalled by the suddenness and completeness of their discomfiture, and made no efforts at assisting one another. At length we observed a total change in their demeanour. From absolute stupor, they appeared to be, all at once, aroused to the highest pitch of excitement, and rushed wildly about, going to and from a certain point on the beach, with the strangest expressions of mingled horror, rage, and intense curiosity depicted on their countenances, and shouting, at the top of their voices, *Tekeli-li ! Tekeli-li !*

Presently we saw a large body go off into the hills, whence they returned in a short time, carrying stakes of wood. These they brought to the station where the crowd was the thickest, which now separated so as to afford us a view of the object of all this excitement. We perceived something white lying upon the ground, but could not immediately make out what it was. At length we saw that it was the carcass of the strange animal with the scarlet teeth and claws which the schooner had picked up at sea on the eighteenth of January. Captain Guy had had the body preserved for the purpose of stuffing the skin and

taking it to England. I remember he had given some directions about it just before our making the island, and it had been brought into the cabin and stowed away in one of the lockers. It had now been thrown on shore by the explosion; but why it had occasioned so much concern among the savages was more than we could comprehend. Although they crowded around the carcass at a little distance, none of them seemed willing to approach it closely. By-and-by the men with the stakes drove them in a circle around it, and, no sooner was this arrangement completed, than the whole of the vast assemblage rushed into the interior of the island, with loud screams of *Tekeli-li ! Tekeli-li !*

## CHAPTER XXIII

DURING the six or seven days immediately following we remained in our hiding-place upon the hill, going out only occasionally, and then with the greatest precaution, for water and filberts. We had made a kind of pent-house on the platform, furnishing it with a bed of dry leaves, and placing in it three large flat stones, which served us for both fire-place and table. We kindled a fire without difficulty by rubbing two pieces of dry wood together, the one soft, the other hard. The bird we had taken in such good season proved excellent eating, although somewhat tough. It was not an oceanic fowl, but a species of bittern, with jet black and grizzly plumage, and diminutive wings in proportion to its bulk. We afterward saw three of the same kind in the vicinity of the ravine, apparently seeking for the one we had captured; but, as they never alighted, we had no opportunity of catching them.

As long as this fowl lasted we suffered nothing from our situation, but it was now entirely consumed, and it became absolutely necessary that we should look out for provision. The filberts would not satisfy the cravings of hunger, afflicting us, too, with severe gripings of the bowels, and, if freely indulged in, with violent headache. We had seen several large tortoises near the seashore to the eastward of the hill, and perceived they might be easily taken, if we could get at them without the observation of the natives.

It was resolved, therefore, to make an attempt at descending.

We commenced by going down the southern declivity, which seemed to offer the fewest difficulties, but had not proceeded a hundred yards before (as we had anticipated from appearances on the hill-top) our progress was entirely arrested by a branch of the gorge in which our companions had perished. We now passed along the edge of this for about a quarter of a mile, when we were again stopped by a precipice of immense depth, and, not being able to make our way along the brink of it, we were forced to retrace our steps by the main ravine.

We now pushed over to the eastward, but with precisely similar fortune. After an hour's scramble, at the risk of breaking our necks, we discovered that we had merely descended into a vast pit of black granite, with fine dust at the bottom, and whence the only egress was by the rugged path in which we had come down. Toiling again up this path, we now tried the northern edge of the hill. Here we were obliged to use the greatest possible caution in our manœuvres, as the least indiscretion would expose us to the full view of the savages in the village. We crawled along, therefore, on our hands and knees, and, occasionally, were even forced to throw ourselves at full length, dragging our bodies along by means of the shrubbery. In this careful manner we had proceeded but a little way, when we arrived at a chasm far deeper than any we had yet seen, and leading directly into the main gorge. Thus our fears were fully confirmed, and we found ourselves cut off entirely from access to the world below. Thoroughly exhausted by our exertions, we made the best of our way back to the platform, and, throwing ourselves upon the bed of leaves, slept sweetly and soundly for some hours.

For several days after this fruitless search we were occupied in exploring every part of the summit of the hill, in order to inform ourselves of its actual resources. We found that it would afford us no food, with the exception of the unwholesome filberts, and a rank species of scurvy grass which grew in a little patch of not more than four rods square, and would be soon exhausted. On the fifteenth of February, as near as I can remember, there was not a blade

of this left, and the nuts were growing scarce ; our situation, therefore, could hardly be more lamentable.<sup>1</sup> On the sixteenth we again went round the walls of our prison, in hope of finding some avenue of escape ; but to no purpose. We also descended the chasm in which we had been overwhelmed, with the faint expectation of discovering, through this channel, some opening to the main ravine. Here, too, we were disappointed, although we found and brought up with us a musket.

On the seventeenth we set out with the determination of examining more thoroughly the chasm of black granite into which we had made our way in the first search. We remembered that one of the fissures in the sides of this pit had been but partially looked into, and we were anxious to explore it, although with no expectation of discovering here any opening.

We found no great difficulty in reaching the bottom of the hollow as before, and were now sufficiently calm to survey it with some attention. It was, indeed, one of the most singular looking places imaginable, and we could scarcely bring ourselves to believe it altogether the work of nature. The pit, from its eastern to its western extremity, was about five hundred yards in length, when all its windings were threaded ; the distance from east to west in a straight line not being more (I should suppose, having no means of accurate examination) than forty or fifty yards. Upon first descending into the chasm, that is to say, for a hundred feet downward from the summit of the hill, the sides of the abyss bore little resemblance to each other, and, apparently, had at no time been connected, the one surface being of the soapstone, and the other of marl, granulated with some metallic matter. The average breadth, or interval between the two cliffs, was probably here sixty feet, but there seemed to be no regularity of formation. Passing down, however, beyond the limit spoken of, the interval rapidly contracted, and the sides began to run parallel, although for some distance farther, they were still dissimilar in their material and form of surface. Upon arriving within fifty feet of the bottom, a perfect regularity

<sup>1</sup> This day was rendered remarkable by our observing in the south several huge wreaths of the grayish vapour I have before spoken of.

commenced. The sides were now entirely uniform in substance, in colour, and in lateral direction, the material being a very black and shining granite, and the distance between the two sides, at all points, facing each other, exactly twenty yards. The precise formation of the chasm will be best understood by means of a delineation taken upon the spot; for I had luckily with me a pocket-book and pencil, which I preserved with great care through a long series of subsequent adventure, and to which I am indebted for memoranda of many subjects which would otherwise have been crowded from my remembrance.

*Figure 1.*

This figure (see figure 1) gives the general outlines of the chasm, without the minor cavities in the sides, of which there were several, each cavity having a corresponding protuberance opposite. The bottom of the gulf was covered to the depth of three or four inches with a powder almost impalpable, beneath which we found a continuation of the black granite. To the right, at the lower extremity, will be noticed the appearance of a small opening; this is the fissure alluded to above, and to examine which more minutely than before was the object of our second visit. We now pushed into it with vigour, cutting away a quantity of brambles which impeded us, and removing a vast heap of sharp flints somewhat resembling arrowheads in shape. We were encouraged to persevere, however, by perceiving some little light proceeding from the farther end. We at

length squeezed our way for about thirty feet, and found that the aperture was a low and regularly-formed arch, having a bottom of the same impalpable powder as that in the main chasm. A strong light now broke upon us, and, turning a short bend, we found ourselves in another lofty chamber, similar to the one we had left in every respect but longitudinal form. Its general figure is here given. (See figure 2.)

The total length of this chasm, commencing at the opening *a* and proceeding round the curve *b* to the ex-

*Figure 2.*

trinity *d*, is five hundred and fifty yards. At *c* we discovered a small aperture similar to the one through which we had issued from the other chasm, and this was choked up in the same manner with brambles and a quantity of the white arrowhead flints. We forced our way through it, finding it about forty feet long, and emerged into a third chasm. This, too, was precisely like the first, except in its longitudinal shape, which was thus. (See figure 3.)

We found the entire length of the third chasm three hundred and twenty yards. At the point *a* was an opening about six feet wide, and extending fifteen feet into the rock, where it terminated in a bed of marl, there being no other chasm beyond, as we had expected. We were about leaving this fissure, into which very little light was admitted, when Peters called my attention to a range of singular looking

indentures in the surface of the marl forming the termination of the *cul-de-sac*. With a very slight exertion of the imagination, the left, or most northern of these indentures might have been taken for the intentional, although rude, representation of a human figure standing erect, with outstretched arm. The rest of them bore also some little resemblance to alphabetical characters, and Peters was

Figure 3.

Figure 5.

willing, at all events, to adopt the idle opinion that they were really such. I convinced him of his error, finally, by directing his attention to the floor of the fissure, where, among the powder, we picked up, piece by piece, several large flakes of the marl, which had evidently been broken

Figure 4.

off by some convulsion from the surface where the indentures were found, and which had projecting points exactly fitting the indentures ; thus proving them to have been the work of nature. Figure 4 presents an accurate copy of the whole.

After satisfying ourselves that these singular caverns afforded us no means of escape from our prison, we made our way back, dejected and dispirited, to the summit of the hill. Nothing worth mentioning occurred during the next

twenty-four hours, except that, in examining the ground to the eastward of the third chasm, we found two triangular holes of great depth, and also with black granite sides. Into these holes we did not think it worth while to attempt descending, as they had the appearance of mere natural wells, without outlet. They were each about twenty yards in circumference, and their shape, as well as relative position in regard to the third chasm, is shown in figure 5, preceding page.

## CHAPTER XXIV

ON the twentieth of the month, finding it altogether impossible to subsist any longer upon the filberts, the use of which occasioned us the most excruciating torment, we resolved to make a desperate attempt at descending the southern declivity of the hill. The face of the precipice was here of the softest species of soapstone, although nearly perpendicular throughout its whole extent (a depth of a hundred and fifty feet at the least), and in many places even overarching. After long search we discovered a narrow ledge about twenty feet below the brink of the gulf ; upon this Peters contrived to leap, with what assistance I could render him by means of our pocket-handkerchiefs tied together. With somewhat more difficulty I also got down ; and we then saw the possibility of descending the whole way by the process in which we had clambered up from the chasm when we had been buried by the fall of the hill—that is, by cutting steps in the face of the soapstone with our knives. The extreme hazard of the attempt can scarcely be conceived ; but, as there was no other resource, we determined to undertake it.

Upon the ledge where we stood there grew some filbert-bushes ; and to one of these we made fast an end of our rope of handkerchiefs. The other end being tied round Peters's waist, I lowered him down over the edge of the precipice until the handkerchiefs were stretched tight. He now proceeded to dig a deep hole in the soapstone (as far in as eight or ten inches), sloping away the rock above to the height of a foot, or thereabout, so as to allow of his driving, with the butt of a pistol, a tolerably strong peg

into the levelled surface. I then drew him up for about four feet, when he made a hole similar to the one below, driving in a peg as before, and having thus a resting-place for both feet and hands. I now unfastened the handkerchiefs from the bush, throwing him the end, which he tied to the peg in the uppermost hole, letting himself down gently to a station about three feet lower than he had yet been, that is, to the full extent of the handkerchiefs. Here he dug another hole, and drove another peg. He then drew himself up, so as to rest his feet in the hole just cut, taking hold with his hands upon the peg in the one above. It was now necessary to untie the handkerchiefs from the topmost peg, with a view of fastening them to the second ; and here he found that an error had been committed in cutting the holes at so great a distance apart. However, after one or two unsuccessful and dangerous attempts at reaching the knot (having to hold on with his left hand while he laboured to undo the fastening with his right), he at length cut the string, leaving six inches of it affixed to the peg. Tying the handkerchiefs now to the second peg, he descended to a station below the third, taking care not to go too far down. By these means (means which I should never have conceived of myself, and for which we were indebted altogether to Peters's ingenuity and resolution) my companion finally succeeded, with the occasional aid of projections in the cliff, in reaching the bottom without accident.

It was some time before I could summon sufficient resolution to follow him ; but I did at length attempt it. Peters had taken off his shirt before descending, and this, with my own, formed the rope necessary for the adventure. After throwing down the musket found in the chasm, I fastened this rope to the bushes, and let myself down rapidly, striving, by the vigour of my movements, to banish the trepidation which I could overcome in no other manner. This answered sufficiently well for the first four or five steps ; but presently I found my imagination growing terribly excited by thoughts of the vast depth yet to be descended, and the precarious nature of the pegs and soapstone holes which were my only support. It was in vain I endeavoured to banish these reflections, and to keep my eyes steadily bent upon the flat surface of the cliff

before me. The more earnestly I struggled *not to think*, the more intensely vivid became my conceptions, and the more horribly distinct. At length arrived that crisis of fancy, so fearful in all similar cases, the crisis in which we begin to anticipate the feelings with which we *shall* fall—to picture to ourselves the sickness, and dizziness, and the last struggle, and the half swoon, and the final bitterness of the rushing and headlong descent. And now I found these fancies creating their own realities, and all imagined horrors crowding upon me in fact. I felt my knees strike violently together, while my fingers were gradually yet certainly relaxing their grasp. There was a ringing in my ears, and I said, ‘This is my knell of death!’ And now I was consumed with the irrepressible desire of looking below. I could not, I would not, confine my glances to the cliff; and, with a wild, indefinable emotion, half of horror, half of a relieved oppression, I threw my vision far down into the abyss. For one moment my fingers clutched convulsively upon their hold, while, with the movement, the faintest possible idea of ultimate escape wandered, like a shadow, through my mind—in the next my whole soul was pervaded with a *longing to fall*; a desire, a yearning, a passion utterly uncontrollable. I let go at once my grasp upon the peg, and, turning half round from the precipice, remained tottering for an instant against its naked face. But now there came a spinning of the brain; a shrill-sounding and phantom voice screamed within my ears; a dusky, fiendish, and filmy figure stood immediately beneath me; and, sighing, I sunk down with a bursting heart, and plunged within its arms.

I had swooned, and Peters had caught me as I fell. He had observed my proceedings from his station at the bottom of the cliff; and perceiving my imminent danger, had endeavoured to inspire me with courage by every suggestion he could devise; although my confusion of mind had been so great as to prevent my hearing what he said, or being conscious that he had even spoken to me at all. At length, seeing me totter, he hastened to ascend to my rescue, and arrived just in time for my preservation. Had I fallen with my full weight, the rope of linen would inevitably have snapped, and I should have been pre-

cipitated into the abyss ; as it was, he contrived to let me down gently, so as to remain suspended without danger until animation returned. This was in about fifteen minutes. On recovery, my trepidation had entirely vanished ; I felt a new being, and, with some little further aid from my companion, reached the bottom also in safety.

We now found ourselves not far from the ravine which had proved the tomb of our friends, and to the southward of the spot where the hill had fallen. The place was one of singular wildness, and its aspect brought to my mind the descriptions given by travellers of those dreary regions marking the site of degraded Babylon. Not to speak of the ruins of the disrupted cliff, which formed a chaotic barrier in the vista to the northward, the surface of the ground in every other direction was strewn with huge tumuli, apparently the wreck of some gigantic structures of art ; although, in detail, no semblance of art could be detected. Scoria were abundant, and large shapeless blocks of the black granite, intermingled with others of marl,<sup>1</sup> and both granulated with metal. Of vegetation there were no traces whatsoever throughout the whole of the desolate area within sight. Several immense scorpions were seen, and various reptiles not elsewhere to be found in the high latitudes.

As food was our most immediate object, we resolved to make our way to the sea-coast, distant not more than half a mile, with a view of catching turtle, several of which we had observed from our place of concealment on the hill. We had proceeded some hundred yards, threading our route cautiously between the huge rocks and tumuli, when, upon turning a corner, five savages sprung upon us from a small cavern, felling Peters to the ground with a blow from a club. As he fell the whole party rushed upon him to secure their victim, leaving me time to recover from my astonishment. I still had the musket, but the barrel had received so much injury in being thrown from the precipice that I cast it aside as useless, preferring to trust my pistols, which had been carefully preserved in order. With these I advanced upon the assailants, firing one after the other in quick

<sup>1</sup> The marl was also black ; indeed, we noticed no light-coloured substances of any kind upon the island.

succession. Two savages fell, and one, who was in the act of thrusting a spear into Peters, sprang to his feet without accomplishing his purpose. My companion being thus released, we had no further difficulty. He had his pistols also, but prudently declined using them, confiding in his great personal strength, which far exceeded that of any person I have ever known. Seizing a club from one of the savages who had fallen, he dashed out the brains of the three who remained, killing each instantaneously with a single blow of the weapon, and leaving us completely masters of the field.

So rapidly had these events passed, that we could scarcely believe in their reality, and were standing over the bodies of the dead in a species of stupid contemplation, when we were brought to recollection by the sound of shouts in the distance. It was clear that the savages had been alarmed by the firing, and that we had little chance of avoiding discovery. To regain the cliff, it would be necessary to proceed in the direction of the shouts ; and even should we succeed in arriving at its base, we should never be able to ascend it without being seen. Our situation was one of the greatest peril, and we were hesitating in which path to commence a flight, when one of the savages whom I had shot, and supposed dead, sprang briskly to his feet, and attempted to make his escape. We overtook him, however, before he had advanced many paces, and were about to put him to death, when Peters suggested that we might derive some benefit from forcing him to accompany us in our attempt at escape. We therefore dragged him with us, making him understand that we would shoot him if he offered resistance. In a few minutes he was perfectly submissive, and ran by our sides as we pushed in among the rocks, making for the sea-shore.

So far, the irregularities of the ground we had been traversing hid the sea, except at intervals, from our sight, and, when we first had it fairly in view, it was, perhaps, two hundred yards distant. As we emerged into the open beach we saw, to our great dismay, an immense crowd of the natives pouring from the village, and from all visible quarters of the island, making towards us with gesticulations of extreme fury, and howling like wild beasts. We

were upon the point of turning upon our steps, and trying to secure a retreat among the fastnesses of the rougher ground, when I discovered the bows of two canoes projecting from behind a large rock which ran out into the water. Towards these we now ran with all speed, and, reaching them, found them unguarded, and without any other freight than three of the large Gallipago turtles and the usual supply of paddles for sixty rowers. We instantly took possession of one of them, and, forcing our captive on board, pushed out to sea with all the strength we could command.

We had not made, however, more than fifty yards from the shore before we became sufficiently calm to perceive the great oversight of which we had been guilty in leaving the other canoe in the power of the savages, who, by this time, were not more than twice as far from the beach as ourselves, and were rapidly advancing to the pursuit. No time was now to be lost. Our hope was, at best, a forlorn one, but we had none other. It was very doubtful whether, with the utmost exertion, we could get back in time to anticipate them in taking possession of the canoe; but yet there was a chance that we could. We might save ourselves if we succeeded, while not to make the attempt was to resign ourselves to inevitable butchery.

The canoe was modelled with the bow and stern alike, and, in place of turning it around, we merely changed our position in paddling. As soon as the savages perceived this they redoubled their yells, as well as their speed, and approached with inconceivable rapidity. We pulled, however, with all the energy of desperation, and arrived at the contested point before more than one of the natives had attained it. This man paid dearly for his superior agility, Peters shooting him through the head with a pistol as he approached the shore. The foremost among the rest of his party were probably some twenty or thirty paces distant as we seized upon the canoe. We at first endeavoured to pull her into the deep water, beyond the reach of the savages, but, finding her too firmly aground, and there being no time to spare, Peters, with one or two heavy strokes from the butt of the musket, succeeded in dashing out a large portion of the bow and of one side. We then pushed off. Two of the natives by this time had

got hold of our boat, obstinately refusing to let go, until we were forced to despatch them with our knives. We were now clear off, and making great way out to sea. The main body of the savages, upon reaching the broken canoe, set up the most tremendous yell of rage and disappointment conceivable. In truth, from everything I could see of these wretches, they appeared to be the most wicked, hypocritical, vindictive, bloodthirsty, and altogether fiendish race of men upon the face of the globe. It is clear we should have had no mercy had we fallen into their hands. They made a mad attempt at following us in the fractured canoe, but, finding it useless, again vented their rage in a series of hideous vociferations, and rushed up into the hills.

We were thus relieved from immediate danger, but our situation was still sufficiently gloomy. We knew that four canoes of the kind we had were at one time in the possession of the savages, and were not aware of the fact (afterward ascertained from our captive) that two of these had been blown to pieces in the explosion of the *Jane Guy*. We calculated, therefore, upon being yet pursued, as soon as our enemies could get round to the bay (distant about three miles) where the boats were usually laid up. Fearing this, we made every exertion to leave the island behind us, and went rapidly through the water, forcing the prisoner to take a paddle. In about half an hour, when we had gained probably five or six miles to the southward, a large fleet of the flat-bottomed canoes or rafts were seen to emerge from the bay, evidently with the design of pursuit. Presently they put back, despairing to overtake us.

## CHAPTER XXV

WE now found ourselves in the wide and desolate Antarctic Ocean, in a latitude exceeding eighty-four degrees, in a frail canoe, and with no provision but the three turtles. The long Polar winter, too, could not be considered as far distant, and it became necessary that we should deliberate well upon the course to be pursued. There were six or seven islands in sight belonging to the same group, and distant from each other about five or six leagues; but

upon neither of these had we any intention to venture. In coming from the northward in the *Jane Guy* we had been gradually leaving behind us the severest regions of ice—this, however little it may be in accordance with the generally received notions respecting the Antarctic, was a fact experience would not permit us to deny. To attempt, therefore, getting back, would be folly—especially at so late a period of the season. Only one course seemed to be left open for hope. We resolved to steer boldly to the southward, where there was at least a probability of discovering other lands, and more than a probability of finding a still milder climate.

So far we had found the Antarctic, like the Arctic Ocean, peculiarly free from violent storms or immoderately rough water; but our canoe was, at best, of frail structure, although large, and we set busily to work with a view of rendering her as safe as the limited means in our possession would admit. The body of the boat was of no better material than bark—the bark of a tree unknown. The ribs were of a tough osier, well adapted to the purpose for which it was used. We had fifty feet room from stem to stern, from four to six in breadth, and in depth throughout four feet and a half—the boats thus differing vastly in shape from those of any other inhabitants of the Southern Ocean with whom civilized nations are acquainted. We never did believe them the workmanship of the ignorant islanders who owned them; and some days after this period discovered, by questioning our captive, that they were in fact made by the natives of a group to the southwest of the country where we found them, having fallen accidentally into the hands of our barbarians. What we could do for the security of our boat was very little indeed. Several wide rents were discovered near both ends, and these we contrived to patch up with pieces of woollen jacket. With the help of the superfluous paddles, of which there were a great many, we erected a kind of framework about the bow, so as to break the force of any seas which might threaten to fill us in that quarter. We also set up two paddle-blades for masts, placing them opposite each other, one by each gunwale, thus saving the necessity of a yard. To these masts we attached a sail made of our shirts—doing this

with some difficulty, as here we could get no assistance from our prisoner whatever, although he had been willing enough to labour in all the other operations. The sight of the linen seemed to affect him in a very singular manner. He could not be prevailed upon to touch it or go near it, shuddering when we attempted to force him, and shrieking out *Tekeli-li*.

Having completed our arrangements in regard to the security of the canoe, we now set sail to the south southeast for the present, with the view of weathering the most southerly of the group in sight. This being done, we turned the bow full to the southward. The weather could by no means be considered disagreeable. We had a prevailing and very gentle wind from the northward, a smooth sea and continual daylight. No ice whatever was to be seen; *nor did I ever see one particle of this after leaving the parallel of Bennett's Islet*. Indeed, the temperature of the water was here far too warm for its existence in any quantity. Having killed the largest of our tortoises, and obtained from him not only food, but a copious supply of water, we continued on our course, without any incident of moment, for perhaps seven or eight days, during which period we must have proceeded a vast distance to the southward, as the wind blew constantly with us, and a very strong current set continually in the direction we were pursuing.

*March 1.*<sup>1</sup> Many unusual phenomena now indicated that we were entering upon a region of novelty and wonder. A high range of light gray vapour appeared constantly in the southern horizon, flaring up occasionally in lofty streaks, now darting from east to west, now from west to east, and again presenting a level and uniform summit—in short, having all the wild variations of the Aurora Borealis. The average height of this vapour, as apparent from our station, was about twenty-five degrees. The temperature of the sea seemed to be increasing momentarily, and there was a very perceptible alteration in its colour.

*March 2.* To-day, by repeated questioning of our captive, we came to the knowledge of many particulars in regard to

<sup>1</sup> For obvious reasons I cannot pretend to strict accuracy in these dates. They are given principally with a view to perspicuity of narration, and as set down in my pencil memoranda.

the island of the massacre, its inhabitants, and customs—but with these how can I *now* detain the reader? I may say, however, that we learned there were eight islands in the group—that they were governed by a common king, named *Tsalemon* or *Psalemoun*, who resided in one of the smallest of the islands; that the black skins forming the dress of the warriors came from an animal of huge size to be found only in a valley near the court of the king—that the inhabitants of the group fabricated no other boats than the flat-bottomed rafts; the four canoes being all of the kind in their possession, and these having been obtained, by mere accident, from some large island in the southwest—that his own name was Nu-Nu—that he had no knowledge of Bennett's Islet—and that the appellation of the island we had left was *Tsalal*. The commencement of the words *Tsalemon* and *Tsalal* was given with a prolonged hissing sound, which we found it impossible to imitate, even after repeated endeavours, and which was precisely the same with the note of the black bittern we had eaten up on the summit of the hill.

*March 3.* The heat of the water was now truly remarkable, and its colour was undergoing a rapid change, being no longer transparent, but of a milky consistency and hue. In our immediate vicinity it was usually smooth, never so rough as to endanger the canoe—but we were frequently surprised at perceiving, to our right and left, at different distances, sudden and extensive agitations of the surface—these, we at length noticed, were always preceded by wild flickerings in the region of vapour to the southward.

*March 4.* To-day, with the view of widening our sail, the breeze from the northward dying away perceptibly, I took from my coat-pocket a white handkerchief. Nu-Nu was seated at my elbow, and the linen accidentally flaring in his face, he became violently affected with convulsions. These were succeeded by drowsiness and stupor, and low murmurings of '*Tekeli-li! Tekeli-li!*'

*March 5.* The wind had entirely ceased, but it was evident that we were still hurrying on to the southward, under the influence of a powerful current. And now, indeed, it would seem reasonable that we should experience some alarm at the turn events were taking—but we felt

none. The countenance of Peters indicated nothing of this nature, although it wore at times an expression I could not fathom. The Polar winter appeared to be coming on—but coming without its terrors. I felt a *numbness* of body and mind—a dreaminess of sensation—but this was all.

*March 6.* The gray vapour had now arisen many more degrees above the horizon, and was gradually losing its grayness of tint. The heat of the water was extreme, even unpleasant to the touch, and its milky hue was more evident than ever. To-day a violent agitation of the water occurred very close to the canoe. It was attended, as usual, with a wild flaring up of the vapour at its summit, and a momentary division at its base. A fine white powder, resembling ashes—but certainly not such—fell over the canoe and over a large surface of the water, as the flickering died away among the vapour and the commotion subsided in the sea. Nu-Nu now threw himself on his face in the bottom of the boat, and no persuasions could induce him to arise.

*March 7.* This day we questioned Nu-Nu concerning the motives of his countrymen in destroying our companions; but he appeared to be too utterly overcome by terror to afford us any rational reply. He still obstinately lay in the bottom of the boat; and, upon our reiterating the questions as to the motive, made use only of idiotic gesticulations, such as raising with his forefinger the upper lip, and displaying the teeth which lay beneath it. These were black. We had never before seen the teeth of an inhabitant of Tsalal.

*March 8.* To-day there floated by us one of the white animals whose appearance upon the beach at Tsalal had occasioned so wild a commotion among the savages. I would have picked it up, but there came over me a sudden listlessness, and I forbore. The heat of the water still increased, and the hand could no longer be endured within it. Peters spoke little, and I knew not what to think of his apathy. Nu-Nu breathed, and no more.

*March 9.* The whole ashy material fell now continually around us, and in vast quantities. The range of vapour to the southward had arisen prodigiously in the horizon, and began to assume more distinctness of form. I can

liken it to nothing but a limitless cataract, rolling silently into the sea from some immense and far-distant rampart in the heaven. The gigantic curtain ranged along the whole extent of the southern horizon. It emitted no sound.

*March 21.* A sullen darkness now hovered above us—but from out the milky depths of the ocean a luminous glare arose, and stole up along the bulwarks of the boat. We were nearly overwhelmed by the white ashy shower which settled upon us and upon the canoe, but melted into the water as it fell. The summit of the cataract was utterly lost in the dimness and the distance. Yet we were evidently approaching it with a hideous velocity. At intervals there were visible in it wide, yawning, but momentary rents, and from out these rents, within which was a chaos of flitting and indistinct images, there came rushing and mighty, but soundless winds, tearing up the enkindled ocean in their course.

*March 22.* The darkness had materially increased, relieved only by the glare of the water thrown back from the white curtain before us. Many gigantic and pallidly white birds flew continuously now from beyond the veil, and their scream was the eternal *Tekeli-li*! as they retreated from our vision. Hereupon Nu-Nu stirred in the bottom of the boat; but, upon touching him, we found his spirit departed. And now we rushed into the embraces of the cataract, where a chasm threw itself open to receive us. But there arose in our pathway a shrouded human figure, very far larger in its proportions than any dweller among men. And the hue of the skin of the figure was of the perfect whiteness of the snow.

#### NOTE

THE circumstances connected with the late sudden and distressing death of Mr. Pym, are already well known to the public through the medium of the daily press. It is feared that the few remaining chapters which were to have completed his narrative, and which were retained by him, while the above were in type, for the purpose of revision, have been irrecoverably lost through the accident by which he perished himself. This, however, may prove not to be the case, and the papers, if ultimately found, will be given to the public.

No means have been left untried to remedy the deficiency. The gentleman whose name is mentioned in the preface, and who, from the

statement there made, might be supposed able to fill the vacuum, has declined the task—this, for satisfactory reasons connected with the general inaccuracy of the details afforded him, and his disbelief in the entire truth of the latter portions of the narration. Peters, from whom some information might be expected, is still alive, and a resident of Illinois, but cannot be met with at present. He may hereafter be found, and will, no doubt, afford material for a conclusion of Mr. Pym's account.

The loss of two or three final chapters (for there were but two or three), is the more deeply to be regretted, as, it cannot be doubted, they contained matter relative to the Pole itself, or at least to regions in its very near proximity; and as, too, the statements of the author in relation to these regions may shortly be verified or contradicted by means of the governmental expedition now preparing for the Southern Ocean.

On one point in the Narrative some remarks may well be offered; and it would afford the writer of this appendix much pleasure if what he may here observe should have a tendency to throw credit, in any degree, upon the very singular pages now published. We allude to the chasms found in the island of Tsalal, and to the whole of the figures upon pages 413, 414, 415.

Mr. Pym has given the figures of the chasms without comment, and speaks decidedly of the *indentures* found at the extremity of the most easterly of these chasms as having but a fanciful resemblance to alphabetical characters, and, in short, as being positively *not such*. This assertion is made in a manner so simple, and sustained by a species of demonstration so conclusive (*viz.*, the fitting of the projections of the fragments found among the dust into the indentures upon the wall), that we are forced to believe the writer in earnest; and no reasonable reader should suppose otherwise. But as the facts in relation to *all* the figures are most singular (especially when taken in connection with statements made in the body of the narrative), it may be as well to say a word or two concerning them all—this, too, the more especially as the facts in question have, beyond doubt, escaped the attention of Mr. Poe.

Figure 1, then, figure 2, figure 3, and figure 5, when conjoined with one another in the precise order which the chasms themselves presented, and when deprived of the small lateral branches or arches (which, it will be remembered, served only as a means of communication between the main chambers, and were of totally distinct character), constitute an Ethiopian verbal root—the root  'To be shady'—whence all the inflections of shadow or darkness.

In regard to the 'left or most northwardly' of the indentures in figure 4, it is more than probable that the opinion of Peters was correct, and that the hieroglyphical appearance was really the work of art, and intended as the representation of a human form. The delineation is before the reader, and he may, or may not, perceive the resemblance suggested; but the rest of the indentures afford strong confirmation of Peters's idea. The upper range is evidently the Arabic verbal root

 'To be white', whence all the inflections of brilliancy and whiteness. The lower range is not so immediately perspicuous. The characters are somewhat broken and disjointed; nevertheless, it cannot be doubted that, in their perfect state, they formed the full Egyptian

word Π&ϠΥΡΗC. 'The region of the south'. It should be observed that these interpretations confirm the opinion of Peters in regard to the 'most northwardly' of the figures. The arm is outstretched towards the south.

Conclusions such as these open a wide field for speculation and exciting conjecture. They should be regarded, perhaps, in connection with some of the most faintly-detailed incidents of the narrative: although in no visible manner is this chain of connection complete. '*Tekeli-li*!' was the cry of the affrighted natives of Tsalal upon discovering the carcass of the *white* animal picked up at sea. This also was the shuddering exclamation of the captive Tsalalian upon encountering the *white* materials in possession of Mr. Pym. This also was the shriek of the swift-flying, *white*, and gigantic birds which issued from the vapoury *white* curtain of the South. Nothing *white* was to be found at Tsalal, and nothing otherwise in the subsequent voyage to the region beyond. It is not impossible that 'Tsalal', the appellation of the island of the chasms, may be found, upon minute philological scrutiny, to betray either some alliance with the chasms themselves, or some reference to the Ethiopian characters so mysteriously written in their windings.

*'I have graven it within the hills, and my vengeance upon the dust within the rock.'*

## THE SYSTEM

### OF

#### DOCTOR TARR AND PROFESSOR FETHER

DURING the autumn of 18—, while on a tour through the extreme southern provinces of France, my route led me within a few miles of a certain *Maison de Santé*, or private Mad-House, about which I had heard much, in Paris, from my medical friends. As I had never visited a place of the kind, I thought the opportunity too good to be lost ; and so proposed to my travelling companion (a gentleman with whom I had made casual acquaintance a few days before) that we should turn aside, for an hour or so, and look through the establishment. To this he objected—pleading haste, in the first place, and, in the second, a very usual horror at the sight of a lunatic. He begged me, however, not to let any mere courtesy towards himself interfere with the gratification of my curiosity, and said that he would ride on leisurely, so that I might overtake him during the day, or, at all events, during the next. As he bade me good-by, I bethought me that there might be some difficulty in obtaining access to the premises, and mentioned my fears on this point. He replied that, in fact, unless I had personal knowledge of the superintendent, Monsieur Maillard, or some credential in the way of a letter, a difficulty might be found to exist, as the regulations of these private mad-houses were more rigid than the public hospital laws. For himself, he added, he had, some years since, made the acquaintance of Maillard, and would so far assist me as to ride up to the door and introduce me ; although his feelings on the subject of lunacy would not permit of his entering the house.

I thanked him, and, turning from the main-road, we entered a grass-grown by-path, which, in half an hour,

nearly lost itself in a dense forest, clothing the base of a mountain. Through this dank and gloomy wood we rode some two miles, when the *Maison de Santé* came in view. It was a fantastic *château*, much dilapidated, and indeed scarcely tenatable through age and neglect. Its aspect inspired me with absolute dread, and, checking my horse, I half resolved to turn back. I soon, however, grew ashamed of my weakness, and proceeded.

As we rode up to the gateway, I perceived it slightly open, and the visage of a man peering through. In an instant afterward, this man came forth, accosted my companion by name, shook him cordially by the hand, and begged him to alight. It was Monsieur Maillard himself. He was a portly, fine-looking gentleman of the old school, with a polished manner, and a certain air of gravity, dignity, and authority which was very impressive.

My friend, having presented me, mentioned my desire to inspect the establishment, and received Monsieur Maillard's assurance that he would show me all attention, now took leave, and I saw him no more.

When he had gone, the superintendent ushered me into a small and exceedingly neat parlour, containing among other indications of refined taste, many books, drawings, pots of flowers, and musical instruments. A cheerful fire blazed upon the hearth. At a piano, singing an aria from Bellini, sat a young and very beautiful woman, who, at my entrance, paused in her song, and received me with graceful courtesy. Her voice was low, and her whole manner subdued. I thought, too, that I perceived the traces of sorrow in her countenance, which was excessively, although to my taste, not unpleasingly pale. She was attired in deep mourning, and excited in my bosom a feeling of mingled respect, interest, and admiration.

I had heard, at Paris, that the institution of Monsieur Maillard was managed upon what is vulgarly termed the 'system of soothing'—that all punishments were avoided—that even confinement was seldom resorted to—that the patients, while secretly watched, were left much apparent liberty, and that most of them were permitted to roam about the house and grounds, in the ordinary apparel of persons in right mind.

Keeping these impressions in view, I was cautious in what I said before the young lady ; for I could not be sure that she was sane ; and, in fact, there was a certain restless brilliancy about her eyes which half led me to imagine she was not. I confined my remarks, therefore, to general topics, and to such as I thought would not be displeasing or exciting even to a lunatic. She replied in a perfectly rational manner to all that I said ; and even her original observations were marked with the soundest good sense ; but a long acquaintance with the metaphysics of *mania*, had taught me to put no faith in such evidence of sanity, and I continued to practice, throughout the interview, the caution with which I commenced it.

Presently a smart footman in livery brought in a tray with fruit, wine, and other refreshments, of which I partook, the lady soon afterwards leaving the room. As she departed I turned my eyes in an inquiring manner towards my host.

‘No,’ he said, ‘oh, no—a member of my family—my niece, and a most accomplished woman.’

‘I beg a thousand pardons for the suspicion,’ I replied, ‘but of course you will know how to excuse me. The excellent administration of your affairs here is well understood in Paris, and I thought it just possible, you know—’

‘Yes, yes—say no more—or rather it is myself who should thank you for the commendable prudence you have displayed. We seldom find so much of forethought in young men ; and, more than once, some unhappy *contre-temps* has occurred in consequence of thoughtlessness on the part of our visitors. While my former system was in operation, and my patients were permitted the privilege of roaming to and fro at will, they were often aroused to a dangerous frenzy by injudicious persons who called to inspect the house. Hence I was obliged to enforce a rigid system of exclusion ; and none obtained access to the premises upon whose discretion I could not rely.’

‘While your former system was in operation !’ I said, repeating his words—‘do I understand you, then, to say that the “soothing system” of which I have heard so much, is no longer in force ?’

‘It is now’, he replied, ‘several weeks since we have concluded to renounce it forever.’

‘Indeed! you astonish me!’

‘We found it, sir,’ he said, with a sigh, ‘absolutely necessary to return to the old usages. The *danger* of the soothing system was, at all times, appalling; and its advantages have been much over-rated. I believe, sir, that in this house it has been given a fair trial, if ever in any. We did everything that rational humanity could suggest. I am sorry that you could not have paid us a visit at an earlier period, that you might have judged for yourself. But I presume you are conversant with the soothing practice—with its details.’

‘Not altogether. What I have heard has been at third or fourth hand.’

‘I may state the system then, in general terms, as one in which the patients were *ménagés*, humoured. We contradicted no fancies which entered the brains of the mad. On the contrary, we not only indulged but encouraged them; and many of our most permanent cures have been thus effected. There is no argument which so touches the feeble reason of the madman as the *reductio ad absurdum*. We have had men, for example, who fancied themselves chickens. The cure was, to insist upon the thing as a fact—to accuse the patient of stupidity in not sufficiently perceiving it to be a fact—and thus to refuse him any other diet for a week than that which properly appertains to a chicken. In this manner a little corn and gravel were made to perform wonders.’

‘But was this species of acquiescence all?’

‘By no means. We put much faith in amusements of a simple kind, such as music, dancing, gymnastic exercises generally, cards, certain classes of books, and so forth. We affected to treat each individual as if for some ordinary physical disorder; and the word ‘lunacy’ was never employed. A great point was to set each lunatic to guard the actions of all the others. To repose confidence in the understanding or discretion of a madman, is to gain him body and soul. In this way we were enabled to dispense with an expensive body of keepers.’

‘And you had no punishments of any kind?’

‘None.’

‘And you never confined your patients?’

‘Very rarely. Now and then, the malady of some individual growing to a crisis, or taking a sudden turn of fury, we conveyed him to a secret cell, lest his disorder should infect the rest, and there kept him until we could dismiss him to his friends—for with the raging maniac we have nothing to do. He is usually removed to the public hospitals.’

‘And you have now changed all this—and you think for the better?’

‘Decidedly. The system had its disadvantages, and even its dangers. It is now, happily, exploded throughout all the *Maisons de Santé* of France.’

‘I am very much surprised’, I said, ‘at what you tell me; for I made sure that, at this moment, no other method of treatment for mania existed in any portion of the country.’

‘You are young yet, my friend,’ replied my host, ‘but the time will arrive when you will learn to judge for yourself of what is going on in the world, without trusting to the gossip of others. Believe nothing you hear, and only one-half that you see. Now, about our *Maisons de Santé*, it is clear that some ignoramus has misled you. After dinner, however, when you have sufficiently recovered from the fatigue of your ride, I will be happy to take you over the house, and introduce to you a system which, in my opinion, and in that of every one who has witnessed its operation, is incomparably the most effectual as yet devised.’

‘Your own?’ I inquired—‘one of your own invention?’

‘I am proud’, he replied, ‘to acknowledge that it is—at least in some measure.’

In this manner I conversed with Monsieur Maillard for an hour or two, during which he showed me the gardens and conservatories of the place.

‘I cannot let you see my patients’, he said, ‘just at present. To a sensitive mind there is always more or less of the shocking in such exhibitions; and I do not wish to spoil your appetite for dinner. We will dine. I can give you some veal à la *Menéhoul*, with cauliflowers in *velouté* sauce—after that a glass of *Clos-Vougeot*—then your nerves will be sufficiently steadied.’

At six, dinner was announced; and my host conducted

me into a large *salle à manger*, where a very numerous company were assembled—twenty-five or thirty in all. They were, apparently, people of rank—certainly of high breeding—although their habiliments, I thought, were extravagantly rich, partaking somewhat too much of the ostentatious finery of the *vielle cour*. I noticed that at least two-thirds of these guests were ladies; and some of the latter were by no means accoutred in what a Parisian would consider good taste at the present day. Many females, for example, whose age could not have been less than seventy, were bedecked with a profusion of jewelry, such as rings, bracelets, and ear-rings, and wore their bosoms and arms shamefully bare. I observed, too, that very few of the dresses were well made—or, at least, that very few of them fitted the wearers. In looking about, I discovered the interesting girl to whom Monsieur Maillard had presented me in the little parlour; but my surprise was great to see her wearing a hoop and farthingale, with high-heeled shoes, and a dirty cap of Brussels lace, so much too large for her that it gave her face a ridiculously diminutive expression. When I had first seen her, she was attired, most becomingly, in deep mourning. There was an air of oddity, in short, about the dress of the whole party, which, at first, caused me to recur to my original idea of the ‘soothing system’, and to fancy that Monsieur Maillard had been willing to deceive me until after dinner, that I might experience no uncomfortable feelings during the repast, at finding myself dining with lunatics; but I remembered having been informed, in Paris, that the southern provincialists were a peculiarly eccentric people, with a vast number of antiquated notions; and then, too, upon conversing with several members of the company, my apprehensions were immediately and fully dispelled.

The dining-room, itself, although perhaps sufficiently comfortable, and of good dimensions, had nothing too much of elegance about it. For example, the floor was uncarpeted; in France however, a carpet is frequently dispensed with. The windows, too, were without curtains; the shutters, being shut, were securely fastened with iron bars, applied diagonally, after the fashion of our ordinary shop-shutters. The apartment, I observed, formed, in itself,

a wing of the *château*, and thus the windows were on three sides of the parallelogram ; the door being at the other. There were no less than ten windows in all.

The table was superbly set out. It was loaded with plate, and more than loaded with delicacies. The profusion was absolutely barbaric. There were meats enough to have feasted the Anakim. Never, in all my life, had I witnessed so lavish, so wasteful an expenditure of the good things of life. There seemed very little taste, however, in the arrangements ; and my eyes, accustomed to quiet lights, were sadly offended by the prodigious glare of a multitude of wax candles, which, in silver candelabra, were deposited upon the table, and all about the room, wherever it was possible to find a place. There were several active servants in attendance ; and, upon a large table, at the farther end of the apartment, were seated seven or eight people with fiddles, fifes, trombones, and a drum. These fellows annoyed me very much, at intervals, during the repast, by an infinite variety of noises, which were intended for music, and which appeared to afford much entertainment to all present, with the exception of myself.

Upon the whole, I could not help thinking that there was much of the *bizarre* about everything I saw—but then the world is made up of all kinds of persons, with all modes of thought, and all sorts of conventional customs. I had travelled, too, so much as to be quite an adept in the *nil admirari* ; so I took my seat very coolly at the right hand of my host, and, having an excellent appetite, did justice to the good cheer set before me.

The conversation, in the mean time, was spirited and general. The ladies, as usual, talked a great deal. I soon found that nearly all the company were well educated ; and my host was a world of good-humoured anecdote in himself. He seemed quite willing to speak of his position as superintendent of a *Maison de Santé* ; and, indeed, the topic of lunacy was, much to my surprise, a favourite one with all present. A great many amusing stories were told, having reference to the *whims* of the patients.

‘ We had a fellow here once,’ said a fat little gentleman, who sat at my right—‘ a fellow that fancied himself a teapot ; and, by the way, is it not especially singular how often

this particular crotchet has entered the brain of the lunatic ? There is scarcely an insane asylum in France which cannot supply a human tea-pot. *Our* gentleman was a Britannia-ware tea-pot, and was careful to polish himself every morning with buckskin and whiting.'

'And then', said a tall man, just opposite, 'we had here, not long ago, a person who had taken it into his head that he was a donkey—which, allegorically speaking, you will say, was quite true. He was a troublesome patient ; and we had much ado to keep him within bounds. For a long time he would eat nothing but thistles ; but of this idea we soon cured him by insisting upon his eating nothing else. Then he was perpetually kicking out his heels—so—so—'

'Mr. De Kock ! I will thank you to behave yourself !' here interrupted an old lady, who sat next to the speaker. 'Please keep your feet to yourself ! You have spoiled my brocade ! Is it necessary, pray, to illustrate a remark in so practical a style ? Our friend, here, can surely comprehend you without all this. Upon my word, you are nearly as great a donkey as the poor unfortunate imagined himself. Your acting is very natural, as I live.'

'*Mille pardons ! Mam'selle !*' replied Monsieur De Kock, thus addressed—'a thousand pardons ! I had no intention of offending. Mam'selle Laplace—Monsieur De Kock will do himself the honour of taking wine with you.'

Here Monsieur De Kock bowed low, kissed his hand with much ceremony, and took wine with Mam'selle Laplace.

'Allow me, *mon ami*,' now said Monsieur Maillard, addressing myself, 'allow me to send you a morsel of this veal à la *St. Menehoult*—you will find it particularly fine.'

At this instant three sturdy waiters had just succeeded in depositing safely upon the table an enormous dish, or trencher, containing what I supposed to be the '*monstrum, horrendum, informe, ingens, cui lumen ademptum*'. A closer scrutiny assured me, however, that it was only a small calf roasted whole, and set upon its knees, with an apple in its mouth, as is the English fashion of dressing a hare.

'Thank you, no,' I replied ; 'to say the truth, I am not particularly partial to veal à la *St.*—what is it ?—for I do

not find that it altogether agrees with me. I will change my plate, however, and try some of the rabbit.'

There were several side-dishes on the table, containing what appeared to be the ordinary French rabbit—a very delicious *morceau*, which I can recommend.

'Pierre,' cried the host, 'change this gentleman's plate, and give him a side-piece of this rabbit *au-chat*.'

'This what?' said I.

'This rabbit *au-chat*.'

'Why, thank you—upon second thoughts, no. I will just help myself to some of the ham.'

There is no knowing what one eats, thought I to myself, at the tables of these people of the province. I will have none of their rabbit *au-chat*—and, for the matter of that, none of their *cat-au-rabbit* either.

'And then,' said a cadaverous-looking personage, near the foot of the table, taking up the thread of the conversation where it had been broken off—'and then, among other oddities, we had a patient, once upon a time, who very pertinaciously maintained himself to be a Cordova cheese, and went about, with a knife in his hand, soliciting his friends to try a small slice from the middle of his leg.'

'He was a great fool, beyond doubt,' interposed some one, 'but not to be compared with a certain individual whom we all know, with the exception of this strange gentleman. I mean the man who took himself for a bottle of champagne, and always went off with a pop and a fizz, in this fashion.'

Here the speaker, very rudely, as I thought, put his right thumb in his left cheek, withdrew it with a sound resembling the popping of a cork, and then, by a dexterous movement of the tongue upon the teeth, created a sharp hissing and fizzing, which lasted for several minutes, in imitation of the frothing of champagne. This behaviour, I saw plainly, was not very pleasing to Monsieur Maillard; but that gentleman said nothing, and the conversation was resumed by a very lean little man in a big wig.

'And then there was an ignoramus,' said he, 'who mistook himself for a frog; which, by the way, he resembled in no little degree. I wish you could have seen

him, sir,'—here the speaker addressed myself—'it would have done your heart good to see the natural airs that he put on. Sir, if that man was *not* a frog, I can only observe that it is a pity he was not. His croak thus—o-o-o-o-gh—o-o-o-o-gh! was the finest note in the world—B flat; and when he put his elbows upon the table thus—after taking a glass or two of wine—and distended his mouth, thus, and rolled up his eyes, thus, and winked them with excessive rapidity, thus, why then, sir, I take it upon myself to say, positively, that you would have been lost in admiration of the genius of the man.'

'I have no doubt of it,' I said.

'And then,' said somebody else, 'then there was Petit Gaillard, who thought himself a pinch of snuff, and was truly distressed because he could not take himself between his own finger and thumb.'

'And then there was Jules Desoulières, who was a very singular genius indeed, and went mad with the idea that he was a pumpkin. He persecuted the cook to make him up into pies—a thing which the cook indignantly refused to do. For my part, I am by no means sure that a pumpkin pie *à la Desoulières*, would not have been very capital eating, indeed!'

'You astonish me!' said I; and I looked inquisitively at Monsieur Maillard.

'Ha! ha! ha!' said that gentleman—'he! he! he!—hi! hi! hi!—ho! ho! ho!—hu! hu! hu!—very good indeed! You must not be astonished, *mon ami*; our friend here is a wit—a *drôle*—you must not understand him to the letter.'

'And then,' said some other one of the party, 'then there was Bouffon Le Grand—another extraordinary personage in his way. He grew deranged through love, and fancied himself possessed of two heads. One of these he maintained to be the head of Cicero; the other he imagined a composite one, being Demosthenes' from the top of the forehead to the mouth, and Lord Brougham from the mouth to the chin. It is not impossible that he was wrong; but he would have convinced you of his being in the right; for he was a man of great eloquence. He had an absolute passion for oratory, and could not refrain from display.

For example, he used to leap upon the dinner-table thus, and—and—'

Here a friend, at the side of the speaker, put a hand upon his shoulder, and whispered a few words in his ear ; upon which he ceased talking with great suddenness, and sank back within his chair.

‘And then’, said the friend, who had whispered, ‘there was Boullard, the teetotum. I call him the teetotum, because, in fact, he was seized with the droll, but not altogether irrational crotchet, that he had been converted into a teetotum. You would have roared with laughter to see him spin. He would turn round upon one heel by the hour, in this manner—so—’

Here the friend whom he had just interrupted by a whisper, performed an exactly similar office for himself.

‘But then,’ cried an old lady, at the top of her voice, ‘your Monsieur Boullard was a madman, and a very silly madman at best; for who, allow me to ask you, ever heard of a human teetotum? The thing is absurd. Madame Joyeuse was a more sensible person, as you know. She had a crotchet, but it was instinct with common sense, and gave pleasure to all who had the honour of her acquaintance. She found, upon mature deliberation, that, by some accident, she had been turned into a chicken-cock; but, as such, she behaved with propriety. She flapped her wings with prodigious effect—so—so—so—and, as for her crow, it was delicious! Cock-a-doodle-doo!—cock-a-doodle-doo-cock-a-doodle-de-doo-doo-dooo-do-o-o-o-o-o-o-o-o-o!’

'Madame Joyeuse, I will thank you to behave yourself !' here interrupted our host, very angrily. 'You can either conduct yourself as a lady should do, or you can quit the table forthwith—take your choice.'

The lady (whom I was much astonished to hear addressed as Madame Joyeuse, after the description of Madame Joyeuse she had just given) blushed up to the eyebrows, and seemed exceedingly abashed at the reproof. She hung down her head, and said not a syllable in reply. But another and younger lady resumed the theme. It was my beautiful girl of the little parlour !

'Oh, Madame Joyeuse *was* a fool!' she exclaimed; 'but there was really much sound sense, after all, in the

opinion of Eugénie Salsafette. She was a very beautiful and painfully modest young lady, who thought the ordinary mode of habiliment indecent, and wished to dress herself, always, by getting outside, instead of inside of her clothes. It is a thing very easily done, after all. You have only to do so—and then so—so—so—and then so—so—so—and then—’

‘Mon dieu ! Mam’selle Salsafette !’ here cried a dozen voices at once. ‘What *are* you about ?—forbear !—that is sufficient !—we see, very plainly, how it is done !—hold ! hold !’ and several persons were already leaping from their seats to withhold Mam’selle Salsafette from putting herself upon a par with the Medicean Venus, when the point was very effectually and suddenly accomplished by a series of loud screams, or yells, from some portion of the main body of the *château*.

My nerves were very much affected, indeed, by these yells ; but the rest of the company I really pitied. I never saw any set of reasonable people so thoroughly frightened in my life. They all grew as pale as so many corpses, and, shrinking within their seats, sat quivering and gibbering with terror, and listening for a repetition of the sound. It came again—louder and seemingly nearer—and then a third time *very* loud, and then a fourth time with a vigour evidently diminished. At this apparent dying away of the noise, the spirits of the company were immediately regained, and all was life and anecdote as before. I now ventured to inquire the cause of the disturbance.

‘A mere *bagatelle*,’ said Monsieur Maillard. ‘We are used to these things, and care really very little about them. The lunatics, every now and then, get up a howl in concert ; one starting another, as is sometimes the case with a bevy of dogs at night. It occasionally happens, however, that the *concerto* yells are succeeded by a simultaneous effort at breaking loose ; when, of course, some little danger is to be apprehended.’

‘And how many have you in charge ?’

‘At present, we have not more than ten, altogether.’

‘Principally females, I presume ?’

‘Oh, no—every one of them men, and stout fellows, too, I can tell you.’

'Indeed! I have always understood that the majority of lunatics were of the gentler sex.'

'It is generally so, but not always. Some time ago, there were about twenty-seven patients here; and, of that number, no less than eighteen were women; but, lately, matters have changed very much, as you see.'

'Yes—have changed very much, as you see,' here interrupted the gentleman who had broken the shins of *Mam'selle Laplace*.

'Yes—have changed very much as you see!' chimed in the whole company at once.

'Hold your tongues, every one of you!' said my host, in a great rage. Whereupon the whole company maintained a dead silence for nearly a minute. As for one lady, she obeyed Monsieur Maillard to the letter, and thrusting out her tongue, which was an excessively long one, held it very resignedly, with both hands, until the end of the entertainment.

'And this gentlewoman,' said I, to Monsieur Maillard, bending over and addressing him in a whisper—'this good lady who has just spoken, and who gives us the cock-a-doodle-de-doo—she, I presume, is harmless—quite harmless, eh?'

'Harmless!' ejaculated he, in unfeigned surprise, 'why—why what *can* you mean?'

'Only slightly touched?' said I, touching my head. 'I take it for granted that she is not particularly—not dangerously affected, eh?'

'*Mon Dieu!* what *is* it you imagine? This lady, my particular old friend, Madame Joyeuse, is as absolutely sane as myself. She has her little eccentricities, to be sure—but then, you know, all old women—all *very* old women are more or less eccentric!'

'To be sure,' said I—'to be sure—and then the rest of these ladies and gentlemen—'

'Are my friends and keepers,' interrupted Monsieur Maillard, drawing himself up with *hauteur*—'my very good friends and assistants.'

'What! all of them?' I asked—'the women and all?'

'Assuredly,' he said—'we could not do at all without

the women ; they are the best lunatic nurses in the world ; they have a way of their own, you know ; their bright eyes have a marvellous effect ;—something like the fascination of the snake, you know.’

‘To be sure,’ said I—‘to be sure ! They behave a little odd, eh ?—they are a little *queer*, eh ?—don’t you think so ?’

‘Odd !—queer !—why, do you *really* think so ? We are not very prudish, to be sure, here in the South—do pretty much as we please—enjoy life, and all that sort of thing, you know—’

‘To be sure,’ said I—‘to be sure.’

‘And then, perhaps, this *Clos-Vougeot* is a little heady, you know—a little *strong*—you understand, eh ?’

‘To be sure,’ said I—‘to be sure. By-the-by, monsieur, did I understand you to say that the system you have adopted, in place of the celebrated soothing system, was one of very rigorous severity ?’

‘By no means. Our confinement is necessarily close ; but the treatment—the medical treatment, I mean—is agreeable to the patients than otherwise.’

‘And the new system is one of your own invention ?’

‘Not altogether. Some portions of it are referable to Professor Tarr, of whom you have, necessarily, heard ; and, again, there are modifications in my plan which I am happy to acknowledge as belonging of right to the celebrated Fether, with whom, if I mistake not, you have the honour of an intimate acquaintance.’

‘I am quite ashamed to confess,’ I replied, ‘that I have never even heard the name of either gentleman before.’

‘Good Heavens !’ ejaculated my host, drawing back his chair abruptly, and uplifting his hands. ‘I surely do not hear you aright ! You did not intend to say, eh ? that you had never *heard* either of the learned Doctor Tarr, or of the celebrated Professor Fether ?’

‘I am forced to acknowledge my ignorance,’ I replied ; ‘but the truth should be held inviolate above all things. Nevertheless, I feel humbled to the dust, not to be acquainted with the works of these, no doubt, extraordinary men. I will seek out their writings forthwith, and peruse them with deliberate care. Monsieur Maillard, you have

really—I must confess it—you have *really*—made me ashamed of myself !’

And this was the fact.

‘Say no more, my good young friend,’ he said kindly, pressing my hand—‘join me now in a glass of Sauterne.’

We drank. The company followed our example, without stint. They chatted—they jested—they laughed—they perpetrated a thousand absurdities—the fiddles shrieked—the drum row-de-dowed—the trombones bellowed like so many brazen bulls of Phalaris—and the whole scene, growing gradually worse and worse, as the wines gained the ascendancy, became at length a sort of Pandemonium *in petto*. In the meantime, Monsieur Maillard and myself, with some bottles of Sauterne and Vougeot between us, continued our conversation at the top of the voice. A word spoken in an ordinary key stood no more chance of being heard than the voice of a fish from the bottom of Niagara Falls.

‘And, sir,’ said I, screaming in his ear, ‘you mentioned something before dinner, about the danger incurred in the old system of soothing. How is that ?’

‘Yes,’ he replied, ‘there was, occasionally, very great danger, indeed. There is no accounting for the caprices of madmen ; and, in my opinion, as well as in that of Doctor Tarr and Professor Fether, it is *never* safe to permit them to run at large unattended. A lunatic may be “soothed”, as it is called, for a time, but, in the end, he is very apt to become obstreperous. His cunning, too, is proverbial, and great. If he has a project in view, he conceals his design with a marvellous wisdom ; and the dexterity with which he counterfeits sanity, presents, to the metaphysician, one of the most singular problems in the study of mind. When a madman appears *thoroughly* sane, indeed, it is high time to put him in a strait jacket.’

‘But the *danger*, my dear sir, of which you were speaking—in your own experience—during your control of this house—have you had practical reason to think liberty hazardous, in the case of a lunatic ?’

‘Here ?—in my own experience ?—why, I may say, yes. For example :—no *very* long while ago, a singular circumstance occurred in this very house. The “soothing system”,

you know, was then in operation, and the patients were at large. They behaved remarkably well—especially so—any one of sense might have known that some devilish scheme was brewing from that particular fact, that the fellows behaved so *remarkably* well. And, sure enough, one fine morning the keepers found themselves pinioned hand and foot, and thrown into the cells, where they were attended, as if *they* were the lunatics, by the lunatics themselves, who had usurped the offices of the keepers.’

‘You don’t tell me so! I never heard of anything so absurd in my life!’

‘Fact—it all came to pass by means of a stupid fellow—a lunatic—who, by some means, had taken it into his head that he had invented a better system of government than any ever heard of before—of lunatic government, I mean. He wished to give his invention a trial, I suppose—and so he persuaded the rest of the patients to join him in a conspiracy for the overthrow of the reigning powers.’

‘And he really succeeded?’

‘No doubt of it. The keepers and kept were soon made to exchange places. Not that exactly either—for the madmen had been free, but the keepers were shut up in cells forthwith, and treated, I am sorry to say, in a very cavalier manner.’

‘But I presume a counter-revolution was soon effected. This condition of things could not have long existed. The country people in the neighbourhood—visitors coming to see the establishment—would have given the alarm.’

‘There you are out. The head rebel was too cunning for that. He admitted no visitors at all—with the exception, one day, of a very stupid-looking young gentleman of whom he had no reason to be afraid. He let him in to see the place—just by way of variety—to have a little fun with him. As soon as he had gammoned him sufficiently, he let him out, and sent him about his business.’

‘And *how* long, then, did the madmen reign?’

‘Oh, a very long time indeed—a month certainly—how much longer I can’t precisely say. In the mean time, the lunatics had a jolly season of it—that you may swear. They doffed their own shabby clothes, and made free with the family wardrobe and jewels. The cellars of the *château*

were well stocked with wine ; and these madmen are just the devils that know how to drink it. They lived well, I can tell you.'

'And the treatment—what was the particular species of treatment which the leader of the rebels put into operation ?'

'Why, as for that, a madman is not necessarily a fool, as I have already observed ; and it is my honest opinion that his treatment was a much better treatment than that which it superseded. It was a very capital system indeed—simple—neat—no trouble at all—in fact it was delicious—it was—'

Here my host's observations were cut short by another series of yells, of the same character as those which had previously disconcerted us. This time, however, they seemed to proceed from persons rapidly approaching.

'Gracious Heavens !' I ejaculated—'the lunatics have most undoubtedly broken loose.'

'I very much fear it is so,' replied Monsieur Maillard, now becoming excessively pale. He had scarcely finished the sentence, before loud shouts and imprecations were heard beneath the windows ; and, immediately afterward, it became evident that some persons outside were endeavouring to gain entrance into the room. The door was beaten with what appeared to be a sledge-hammer, and the shutters were wrenched and shaken with prodigious violence.

A scene of the most terrible confusion ensued. Monsieur Maillard, to my excessive astonishment, threw himself under the sideboard. I had expected more resolution at his hands. The members of the orchestra, who, for the last fifteen minutes, had been seemingly too much intoxicated to do duty, now sprang all at once to their feet and to their instruments, and, scrambling upon their table, broke out, with one accord, into 'Yankee Doodle', which they performed, if not exactly in tune, at least with an energy superhuman, during the whole of the uproar.

Meantime, upon the main dining-table, among the bottles and glasses, leaped the gentleman, who, with such difficulty, had been restrained from leaping there before. As soon as he fairly settled himself, he commenced an oration, which,

no doubt, was a very capital one, if it could only have been heard. At the same moment, the man with the teetotum predilections set himself to spinning around the apartment, with immense energy, and with arms outstretched at right angles with his body; so that he had all the air of a teetotum in fact, and knocked everybody down that happened to get in his way. And now, too, hearing an incredible popping and fizzing of champagne, I discovered at length, that it proceeded from the person who performed the bottle of that delicate drink during dinner. And then, again, the frog-man croaked away as if the salvation of his soul depended upon every note that he uttered. And, in the midst of all this, the continuous braying of a donkey arose over all. As for my old friend, Madame Joyeuse, I really could have wept for the poor lady, she appeared so terribly perplexed. All she did, however, was to stand up in a corner, by the fire-place, and sing out incessantly, at the top of her voice, 'Cock-a-doodle-de-doooooooooh !'

And now came the climax—the catastrophe of the drama. As no resistance, beyond whooping and yelling and cock-a-doodle-ing, was offered to the encroachments of the party without, the ten windows were very speedily, and almost simultaneously, broken in. But I shall never forget the emotions of wonder and horror with which I gazed, when, leaping through these windows, and down among us *pêle-mêle*, fighting, stamping, scratching, and howling, there rushed a perfect army of what I took to be Chimpanzees, Ourang-Outangs, or big black baboons of the Cape of Good Hope.

I received a terrible beating—after which I rolled under a sofa and lay still. After lying there some fifteen minutes, however, during which time I listened with all my ears to what was going on in the room, I came to some satisfactory *dénouement* of this tragedy. Monsieur Maillard, it appeared, in giving me the account of the lunatic who had excited his fellows to rebellion, had been merely relating his own exploits. This gentleman had, indeed, some two or three years before, been the superintendent of the establishment; but grew crazy himself, and so became a patient. This fact was unknown to the travelling companion who introduced me. The keepers, ten in number, having been

suddenly overpowered, were first well tarred, then carefully feathered, and then shut up in underground cells. They had been so imprisoned for more than a month, during which period Monsieur Maillard had generously allowed them not only the tar and feathers (which constituted his 'system'), but some bread and abundance of water. The latter was pumped on them daily. At length, one, escaping through a sewer, gave freedom to all the rest.

The 'soothing system', with important modifications, has been resumed at the *château*; yet I cannot help agreeing with Monsieur Maillard, that his own 'treatment' was a very capital one of its kind. As he justly observed, it was 'simple—neat—and gave no trouble at all—not the least'.

I have only to add that, although I have searched every library in Europe for the works of Doctor *Tarr* and Professor *Fether*, I have, up to the present day, utterly failed in my endeavours at procuring an edition.

## THE LITERARY LIFE OF THINGUM BOB, ESQ.

LATE EDITOR OF THE 'GOOSEETHERUMFOODLE'

BY HIMSELF

I AM now growing in years, and—since I understand that Shakespeare and Mr. Emmons are deceased—it is not impossible that I may even die. It has occurred to me, therefore, that I may as well retire from the field of Letters and repose upon my laurels. But I am ambitious of signaling my abdication of the literary sceptre by some important bequest to posterity; and, perhaps, I cannot do a better thing than just pen for it an account of my earlier career. My name, indeed, has been so long and so constantly before the public eye, that I am not only willing to admit the naturalness of the interest which it has everywhere excited, but ready to satisfy the extreme curiosity which it has inspired. In fact, it is no more than the duty of him who achieves greatness to leave behind him, in his ascent, such landmarks as may guide others to be great. I propose, therefore, in the present paper (which I had some idea of calling 'Memoranda to serve for the Literary History of

America ') to give a detail of those important, yet feeble and tottering first steps, by which, at length, I attained the high road to the pinnacle of human renown.

Of one's *very* remote ancestors it is superfluous to say much. My father, Thomas Bob, Esq., stood for many years at the summit of his profession, which was that of a merchant-barber, in the city of Smug. His warehouse was the resort of all the principal people of the place, and especially of the editorial corps—a body which inspires all about it with profound veneration and awe. For my own part, I regarded them as gods, and drank in with avidity the rich wit and wisdom which continuously flowed from their august mouths during the process of what is styled 'lather'. My first moment of positive inspiration must be dated from that ever-memorable epoch, when the brilliant conductor of the 'Gad-Fly', in the intervals of the important process just mentioned, recited aloud, before a conclave of our apprentices, an inimitable poem in honour of the 'Only Genuine Oil-of-Bob' (so called from its talented inventor, my father), and for which effusion the editor of the 'Fly' was remunerated with a regal liberality, by the firm of Thomas Bob and Company, merchant-barbers.

The genius of the stanzas to the 'Oil-of-Bob' first breathed into me, I say, the divine *afflatus*. I resolved at once to become a great man and to commence by becoming a great poet. That very evening I fell upon my knees at the feet of my father.

'Father,' I said, 'pardon me!—but I have a soul above lather. It is my firm intention to cut the shop. I would be an editor—I would be a poet—I would pen stanzas to the "Oil-of-Bob". Pardon me and aid me to be great!'

'My dear Thingum,' replied my father (I had been christened Thingum after a wealthy relative so surnamed), 'My dear Thingum,' he said, raising me from my knees by the ears—'Thingum, my boy, you're a trump, and take after your father in having a soul. You have an immense head, too, and it must hold a great many brains. This I have long seen, and therefore had thoughts of making you a lawyer. The business, however, has grown ungenteel, and that of a politician don't pay. Upon the whole you judge wisely;—the trade of editor is best:—and if you can be

a poet at the same time,—as most of the editors are, by-the-by,—why you will kill two birds with one stone. To encourage you in the beginning of things, I will allow you a garret; pen, ink, and paper; a rhyming dictionary; and a copy of the “Gad-Fly”. I suppose you would scarcely demand any more.’

‘I would be an ungrateful villain if I did,’ I replied with enthusiasm. ‘Your generosity is boundless. I will repay it by making you the father of a genius.’

Thus ended my conference with the best of men, and immediately upon its termination, I betook myself with zeal to my poetical labours; as upon these, chiefly, I founded my hopes of ultimate elevation to the editorial chair.

In my first attempts at composition I found the stanzas to ‘The Oil-of-Bob’ rather a drawback than otherwise. Their splendour more dazzled than enlightened me. The contemplation of their excellence tended, naturally, to discourage me by comparison with my own abortions; so that for a long time I laboured in vain. At length there came into my head one of those exquisitely original ideas which now and then *will* permeate the brain of a man of genius. It was this:—or, rather, thus was it carried into execution. From the rubbish of an old book-stall, in a very remote corner of the town, I got together several antique and altogether unknown or forgotten volumes. The bookseller sold them to me for a song. From one of these, which purported to be a translation of one Dante’s ‘Inferno’, I copied with remarkable neatness a long passage about a man named Ugolino, who had a parcel of brats. From another which contained a good many old plays by some person whose name I forget, I extracted in the same manner, and with the same care, a great number of lines about ‘angels’ and ‘ministers saying grace’, and ‘goblins damned’, and more besides of that sort. From a third, which was the composition of some blind man or other, either a Greek or a Choctaw—I cannot be at the pains of remembering every trifle exactly—I took about fifty verses beginning with ‘Achilles’ wrath’, and ‘grease’, and something else. From a fourth, which I recollect was also the work of a blind man, I selected a page or two all about

'hail' and 'holy light'; and although a blind man has no business to write about light, still the verses were sufficiently good in their way.

Having made fair copies of these poems I signed every one of them 'Oppodeldoc' (a fine sonorous name), and, doing each up nicely in a separate envelope, I despatched one to each of the four principal Magazines, with a request for speedy insertion and prompt pay. The result of this well-conceived plan, however (the success of which would have saved me much trouble in after life), served to convince me that some editors are not to be bamboozled, and gave the *coup-de-grâce* (as they say in France) to my nascent hopes (as they say in the city of the transcendentials).

The fact is, that each and every one of the Magazines in question gave Mr. 'Oppodeldoc' a complete using-up, in the 'Monthly Notices to Correspondents'. The 'Hum-Drum' gave him a dressing after this fashion :

" 'Oppodeldoc' (whoever he is) has sent us a long *tirade* concerning a bedlamite whom he styles "Ugolino", who had a great many children that should have been all whipped and sent to bed without their suppers. The whole affair is exceedingly tame—not to say *flat*. "Oppodeldoc" (whoever he is) is entirely devoid of imagination—and imagination, in our humble opinion, is not only the soul of POESY, but also its very heart. "Oppodeldoc" (whoever he is) has the audacity to demand of us, for his twattle, a "speedy insertion and prompt pay". We neither insert nor purchase any stuff of the sort. There can be no doubt, however, that he would meet with a ready sale for all the balderdash he can scribble, at the office of either the "Rowdy-Dow", the "Lollipop", or the "Goosetherumfoodle".

All this, it must be acknowledged, was very severe upon 'Oppodeldoc'—but the unkindest cut was putting the word POESY in small caps. In those five pre-eminent letters what a world of bitterness is there not involved !

But 'Oppodeldoc' was punished with equal severity in the 'Rowdy-Dow', which spoke thus :

'We have received a most singular and insolent communication from a person (whoever he is) signing himself "Oppodeldoc"—thus desecrating the greatness of the illustrious Roman Emperor so named. Accompanying the letter of "Oppodeldoc" (whoever he is) we find sundry lines of most disgusting and unmeaning rant about "angels and ministers of grace"—rant such as no madman short of a Nat Lee, or an "Oppodeldoc", could possibly perpetrate. And for this trash of trash, we are modestly requested to "pay promptly". No, sir—no ! We pay for nothing of *that* sort. Apply to the "Hum-Drum", the "Lollipop",

or the "Goosetherumfoodle". These *periodicals* will undoubtedly accept any literary ofial you may send them—and as undoubtedly *promise* to pay for it.

This was bitter indeed upon poor 'Oppodeldoc', but, in this instance, the weight of the satire falls upon the 'Humdrum', the 'Lollipop', and the 'Goosetherumfoodle', who are pungently styled '*periodicals*'—in italics, too—a thing that must have cut them to the heart.

Scarcely less savage was the 'Lollipop', which thus discoursed :

'Some *individual*, who rejoices in the appellation "Oppodeldoc" (to what low uses are the names of the illustrious dead too often applied !), has enclosed us some fifty or sixty *verses* commencing after this fashion :

Achilles' wrath, to Greece the direful spring  
Of woes unnumbered, &c., &c., &c., &c.

"Oppodeldoc" (whoever he is) is respectfully informed that there is not a printer's devil in our office who is not in the daily habit of composing better *lines*. Those of "Oppodeldoc" will not *scan*. "Oppodeldoc" should learn to *count*. But why he should have conceived the idea that *we* (of all others, *we* !) would disgrace our pages with his ineffable nonsense, is utterly beyond comprehension. Why, the absurd twattle is scarcely good enough for the "Hum-Drum", the "Rowdy-Dow", the "Goosetherumfoodle"—things that are in the practice of publishing "Mother Goose's Melodies" as original lyrics. And "Oppodeldoc" (whoever he is) has even the assurance to demand *pay* for this drivel. Does "Oppodeldoc" (whoever he is) know—is he aware that we could not be paid to insert it ?

As I perused this I felt myself growing gradually smaller and smaller, and when I came to the point at which the editor sneered at the poem as '*verses*', there was little more than an ounce of me left. As for 'Oppodeldoc', I began to experience *compassion* for the poor fellow. But the 'Goosetherumfoodle' showed, if possible, less mercy than the 'Lollipop'. It was the 'Goosetherumfoodle' that said :

'A wretched poetaster, who signs himself "Oppodeldoc", is silly enough to fancy that *we* will print and *pay* for a medley of incoherent and ungrammatical bombast which he has transmitted to us, and which commences with the following most *intelligible* line :

Hail, Holy Light ! Offspring of Heaven, first born.

'We say, "most *intelligible*". "Oppodeldoc" (whoever he is) will be kind enough to tell us, perhaps, how '*hail*' can be '*holy light*'. We always regarded it as *frozen rain*. Will he inform us, also, how frozen rain can be, at one and the same time, both "*holy light*" (whatever that is) and an "*offspring*" ?—which latter term (if we understand

anything about English) is only employed, with propriety, in reference to small babies of about six weeks old. But it is preposterous to descant upon such absurdity—although “Oppodeldoc” (whoever he is) has the unparalleled effrontery to suppose that we will not only “insert” his ignorant ravings, but (absolutely) *pay for them!*

‘Now this is fine—it is rich!—and we have half a mind to punish this young scribbler for his egotism, by really publishing his effusion, *verbatim et literatim*, as he has written it. We could inflict no punishment so severe, and we *would* inflict it, but for the boredom which we should cause our readers in so doing.

‘Let “Oppodeldoc” (whoever he is) send any future *composition* of like character to the “Hum-Drum”, the “Lollipop”, or the “Rowdy-Dow”. They will “insert” it. They “insert” every month just such stuff. Send it to them. WE are not to be insulted with impunity.’

This made an end of me; and as for the ‘Hum-Drum’, the ‘Rowdy-Dow’, and the ‘Lollipop’, I never could comprehend how they survived it. The putting *them* in the smallest possible *minion* (that was the rub—thereby insinuating their lowness—their baseness), while WE stood looking down upon them in gigantic capitals!—oh it was *too* bitter!—it was wormwood—it was gall. Had I been either of these periodicals I would have spared no pains to have the ‘Goosetherumfoodle’ prosecuted. It might have been done under the Act for the ‘Prevention of Cruelty to Animals’. As for ‘Oppodeldoc’ (whoever he was), I had by this time lost all patience with the fellow, and sympathized with him no longer. He was a fool, beyond doubt (whoever he was), and got not a kick more than he deserved.

The result of my experiment with the old books, convinced me, in the first place, that ‘honesty is the best policy’, and, in the second, that if I could not write better than Mr. Dante, and the two blind men, and the rest of the old set, it would, at least, be a difficult matter to write worse. I took heart, therefore, and determined to prosecute the ‘entirely original’ (as they say on the covers of the magazines) at whatever cost of study and pains. I again placed before my eyes, as a model, the brilliant stanzas on ‘The Oil-of-Bob’ by the editor of the ‘Gad-Fly’, and resolved to construct an Ode on the same sublime theme, in rivalry of what had already been done.

With my first verse I had no material difficulty. It ran thus:

*To pen an Ode upon the ‘Oil-of-Bob’.*

Having carefully looked out, however, all the legitimate rhymes to 'Bob', I found it impossible to proceed. In this dilemma I had recourse to paternal aid; and, after some hours of mature thought, my father and myself thus constructed the poem:

*To pen an Ode upon the 'Oil-of-Bob'  
Is all sorts of a job.*

(Signed)

SNOB.

To be sure, this composition was of no very great length—but I 'have yet to learn', as they say in the Edinburgh Review, that the mere extent of a literary work has anything to do with its merit. As for the Quarterly cant about 'sustained effort', it is impossible to see the sense of it. Upon the whole, therefore, I was satisfied with the success of my maiden attempt, and now the only question regarded the disposal I should make of it. My father suggested that I should send it to the 'Gad-Fly'—but there were two reasons which operated to prevent me from so doing. I dreaded the jealousy of the editor—and I had ascertained that he did not pay for original contributions. I therefore, after due deliberation, consigned the article to the more dignified pages of the 'Lollipop', and awaited the event in anxiety, but with resignation.

In the very next published number I had the proud satisfaction of seeing my poem printed at length, as the leading article, with the following significant words, prefixed in italics and between brackets:

*[We call the attention of our readers to the subjoined admirable stanzas on 'The Oil-of-Bob'. We need say nothing of their sublimity, or of their pathos:—it is impossible to peruse them without tears. Those who have been nauseated with a sad dose on the same august topic from the goose-quill of the editor of the 'Gad-Fly', will do well to compare the two compositions.*

*P.S. We are consumed with anxiety to probe the mystery which envelops the evident pseudonym 'Snob'. May we hope for a personal interview?]*

All this was scarcely more than justice, but it was, I confess, rather more than I had expected:—I acknowledged this, be it observed, to the everlasting disgrace of my country and of mankind. I lost no time, however, in calling upon the editor of the 'Lollipop', and had the good fortune to find this gentleman at home. He saluted me with an air of profound respect, slightly blended with a fatherly and

patronizing admiration, wrought in him, no doubt, by my appearance of extreme youth and inexperience. Begging me to be seated, he entered at once upon the subject of my poem ;—but modesty will ever forbid me to repeat the thousand compliments which he lavished upon me. The eulogies of Mr. Crab (such was the editor's name) were, however, by no means fulsomely indiscriminate. He analyzed my composition with much freedom and great ability—not hesitating to point out a few trivial defects—a circumstance which elevated him highly in my esteem. The 'Gad-Fly' was, of course, brought upon the *tapis*, and I hope never to be subjected to a criticism so searching, or to rebukes so withering, as were bestowed by Mr. Crab upon that unhappy effusion. I had been accustomed to regard the editor of the 'Gad-Fly' as something superhuman ; but Mr. Crab soon disabused me of that idea. He set the literary as well as the personal character of the Fly (so Mr. C. satirically designated the rival editor) in its true light. He, the Fly, was very little better than he should be. He had written infamous things. He was a penny-a-liner, and a buffoon. He was a villain. He had composed a tragedy which set the whole country in a guffaw, and a farce which deluged the universe in tears. Besides all this, he had the impudence to pen what he meant for a lampoon upon himself (Mr. Crab) and the temerity to style him 'an ass'. Should I at any time wish to express my opinion of Mr. Fry, the pages of the 'Lollipop', Mr. Crab assured me, were at my unlimited disposal. In the meantime, as it was very certain that I would be attacked in the Fly for my attempt at composing a rival poem on the 'Oil-of-Bob', he (Mr. Crab) would take it upon himself to attend, pointedly, to my private and personal interests. If I were not made a man of at once, it should not be the fault of himself (Mr. Crab).

Mr. Crab having now paused in his discourse (the latter portion of which I found it impossible to comprehend) I ventured to suggest something about the remuneration which I had been taught to expect for my poem, by an announcement on the cover of the 'Lollipop', declaring that it (the 'Lollipop') 'insisted upon being permitted to pay exorbitant prices for all accepted contributions ;—

frequently expending more money for a single brief poem than the whole annual cost of the "Hum-Drum", the "Rowdy-Dow", and the "Goosetherumfoodle" combined'.

As I mentioned the word 'remuneration', Mr. Crab first opened his eyes, and then his mouth, to quite a remarkable extent; causing his personal appearance to resemble that of a highly-agitated elderly duck in the act of quacking;—and in this condition he remained (ever and anon pressing his hands tightly to his forehead, as if in a state of desperate bewilderment) until I had nearly made an end of what I had to say.

Upon my conclusion, he sank back into his seat, as if much overcome, letting his arms fall lifelessly by his side, but keeping his mouth still rigorously open, after the fashion of the duck. While I remained in speechless astonishment at behaviour so alarming, he suddenly leaped to his feet and made a rush at the bell-rope; but just as he reached this, he appeared to have altered his intention, whatever it was, for he dived under a table and immediately re-appeared with a cudgel. This he was in the act of uplifting (for what purpose I am at a loss to imagine), when, all at once, there came a benign smile over his features, and he sank placidly back in his chair.

'Mr. Bob,' he said (for I had sent up my card before ascending myself), 'Mr. Bob, you are a young man, I presume—*very* ?'

I assented; adding that I had not yet concluded my third lustrum.

'Ah!' he replied, 'very good! I see how it is—say no more! Touching this matter of compensation, what you observe is very just: in fact it is excessively so. But ah—ah—the *first* contribution—the *first*, I say—it is never the Magazine custom to pay for—you comprehend, eh? The truth is, we are usually the *recipients* in such case.' [Mr. Crab smiled blandly as he emphasized the word 'recipients'.] 'For the most part, we are *paid* for the insertion of a maiden attempt—especially in verse. In the second place, Mr. Bob, the Magazine rule is never to disburse what we term in France the *argent comptant*:—I have no doubt you understand. In a quarter or two after publication of the article—or in a year or two—we make no objection

to giving our note at nine months:—provided always that we can so arrange our affairs as to be quite certain of a “burst up” in six. I really *do* hope, Mr. Bob, that you will look upon this explanation as satisfactory.’ Here Mr. Crab concluded, and the tears stood in his eyes.

Grieved to the soul at having been, however innocently, the cause of pain to so eminent and so sensitive a man, I hastened to apologize, and to reassure him, by expressing my perfect coincidence with his views, as well as my entire appreciation of the delicacy of his position. Having done all this in a neat speech, I took leave.

One fine morning, very shortly afterwards, ‘I awoke and found myself famous’. The extent of my renown will be best estimated by reference to the editorial opinions of the day. These opinions, it will be seen, were embodied in critical notices of the number of the ‘Lollipop’ containing my poem, and are perfectly satisfactory, conclusive, and clear with the exception, perhaps, of the hieroglyphical marks, ‘Sep. 15—1 t.’ appended to each of the critiques.

The ‘Owl’, a journal of profound sagacity, and well known for the deliberate gravity of its literary decisions—the ‘Owl’, I say, spoke as follows :

“THE LOLLIPOP !” The October number of this delicious Magazine surpasses its predecessors, and sets competition at defiance. In the beauty of its typography and paper—in the number and excellence of its steel plates—as well as in the literary merit of its contributions—the “Lollipop” compares with its slow-paced rivals as Hyperion with a Satyr. The “Hum-Drum”, the “Rowdy-Dow”, and the “Goosetherumfoodle”, excel, it is true, in braggadocio, but, in all other points, give us the “Lollipop” ! How this celebrated journal can sustain its evidently tremendous expenses, is more than we can understand. To be sure, it has a circulation of 100,000, and its subscription-list has increased one-fourth during the last month ; but, on the other hand, the sums it disburses constantly for contributions are inconceivable. It is reported that Mr. Slyass received no less than thirty-seven and a half cents for his inimitable paper on “Pigs”. With Mr. CRAB, as editor, and with such names upon the list of contributors as SNOB and Slyass, there can be no such word as “fail” for the “Lollipop”. Go and subscribe. Sep. 15—1 t.’

I must say that I was gratified with this high-toned notice from a paper so respectable as the ‘Owl’. The placing my name—that is to say, my *nom de guerre*—in priority of station to that of the great Slyass, was a compliment as happy as I felt it to be deserved.

My attention was next arrested by these paragraphs in the 'Toad'—a print highly distinguished for its uprightness, and independence—for its entire freedom from sycophancy and subservience to the givers of dinners :

'The "Lollipop" for October is out in advance of all its contemporaries, and infinitely surpasses them, of course, in the splendour of its embellishments, as well as in the richness of its literary contents. The "Hum-Drum", the "Rowdy-Dow", and the "Goosetherumfoodle" excel, we admit, in braggadocio, but, in all other points, give us the "Lollipop". How this celebrated Magazine can sustain its evidently tremendous expenses, is more than we can understand. To be sure, it has a circulation of 200,000, and its subscription list has increased one-third during the last fortnight, but on the other hand, the sums it disburses, monthly, for contributions, are fearfully great. We learn that Mr. Mumblethumb received no less than fifty cents for his late "Monody in a Mud-Puddle".

'Among the original contributors to the present number we notice (besides the eminent editor, Mr. CRAB) such men as SNOB, Slyass, and Mumblethumb. Apart from the editorial matter, the most valuable paper, nevertheless, is, we think, a poetical gem by "Snob", on the "Oil-of-Bob"—but our readers must not suppose from the title of this incomparable *bijou*, that it bears any similitude to some balderdash on the same subject by a certain contemptible individual whose name is unmentionable to ears polite. The *present* poem "On the Oil-of-Bob", has excited universal anxiety and curiosity in respect to the owner of the evident pseudonym, "Snob"—a curiosity which, happily, we have it in our power to satisfy. "Snob" is the *nom-de-plume* of Mr. Thingum Bob, of this city,—a relative of the great Mr. Thingum (after whom he is named), and otherwise connected with the most illustrious families of the State. His father, Thomas Bob, Esq., is an opulent merchant in Smug. *Sep. 15—1 t.*

This generous approbation touched me to the heart—the more especially as it emanated from a source so avowedly—so proverbially pure as the 'Toad'. The word 'balderdash', as applied to the 'Oil-of-Bob' of the Fly, I considered singularly pungent and appropriate. The words 'gem' and '*bijou*', however, used in reference to my composition, struck me as being, in some degree, feeble. They seemed to me to be deficient in force. They were not sufficiently *prononcés* (as we have it in France).

I had hardly finished reading the 'Toad', when a friend placed in my hands a copy of the 'Mole', a daily, enjoying high reputation for the keenness of its perception about matters in general, and for the open, honest, above-ground

style of its editorials. The 'Mole' spoke of the 'Lollipop' as follows :

'We have just received the "Lollipop" for October, and *must* say that never before have we perused any single number of any periodical which afforded us a felicity so supreme. We speak advisedly. The "Hum-Drum", the "Rowdy-Dow", and the "Goosetherumfoodle" must look well to their laurels. These prints, no doubt, surpass everything in loudness of pretension, but, in all other points, give us the "Lollipop"! How this celebrated Magazine can sustain its evidently tremendous expenses, is more than we can comprehend. To be sure, it has a circulation of 300,000; and its subscription-list has increased one-half within the last week, but then the sum it disburses, monthly, for contributions, is astoundingly enormous. We have it upon good authority, that Mr. Fatquack received no less than sixty-two cents and a half for his late Domestic Nouvelette, the "Dish-Clout".

'The contributors to the number before us are Mr. CRAB (the eminent editor), SNOB, Mumblethumb, Fatquack, and others; but, after the inimitable compositions of the editor himself, we prefer a diamond-like effusion from the pen of a rising poet who writes over the signature "Snob"—a *nom de guerre* which we predict will one day extinguish the radiance of "Boz". "SNOB", we learn, is a Mr. THINGUM BOB, Esq., sole heir of a wealthy merchant of this city, Thomas Bob, Esq., and a near relative of the distinguished Mr. Thingum. The title of Mr. B.'s admirable poem is the "Oil-of-Bob"—a somewhat unfortunate name, by the by, as some contemptible vagabond connected with the penny press has already disgusted the town with a great deal of drivel upon the same topic. There will be no danger, however, of confounding the compositions. Sep. 15—1 t.'

The generous approbation of so clear-sighted a journal as the 'Mole' penetrated my soul with delight. The only objection which occurred to me was, that the terms 'contemptible vagabond' might have been better written '*odious and contemptible, wretch, villain, and vagabond*'. This would have sounded more gracefully, I think. 'Diamond-like', also, was scarcely, it will be admitted, of sufficient intensity to express what the 'Mole' evidently *thought* of the brilliancy of the 'Oil-of-Bob'.

On the same afternoon in which I saw these notices in the 'Owl', the 'Toad', and the 'Mole' I happened to meet with a copy of the 'Daddy-Long-Legs', a periodical proverbial for the extreme extent of its understanding. And it was the 'Daddy-Long-Legs' which spoke thus :

'The "Lollipop"! This gorgeous Magazine is already before the public for October. The question of pre-eminence is forever put to rest, and hereafter it will be excessively preposterous in the "Hum-Drum",

the "Rowdy-Dow", or the "Goosetherumfoodle", to make any farther spasmodic attempts at competition. These journals may excel the "Lollipop" in outcry, but, in all other points, give us the "Lollipop"! How this celebrated Magazine can sustain its evidently tremendous expenses, is past comprehension. To be sure, it has a circulation of precisely half a million, and its subscription-list has increased seventy-five per cent. within the last couple of days; but then the sums it disburses, monthly, for contributions, are scarcely credible; we are cognizant of the fact, that Mademoiselle Cribalittle received no less than eighty-seven cents and a half for her late valuable Revolutionary Tale entitled "The York-Town Katy-Did, and the Bunker-Hill Katy-Did'nt."

The most able papers in the present number, are, of course, those furnished by the editor (the eminent Mr. CRAB), but there are numerous magnificent contributions from such names as SNOB, Mademoiselle Cribalittle, Slyass, Mrs. Fibalittle, Mumblethumb, Mrs. Squibalittle, and last, though not least, Fatquack. The world may well be challenged to produce so rich a galaxy of genius.

The poem over the signature "SNOB" is, we find, attracting universal commendation, and, we are constrained to say, deserves, if possible, even more applause than it has received. The "Oil-of-Bob" is the title of this masterpiece of eloquence and art. One or two of our readers *may* have a *very* faint, although sufficiently disgusting recollection of a poem (?) similarly entitled, the perpetration of a miserable penny-a-liner, mendicant, and cut-throat, connected in the capacity of scullion, we believe, with one of the indecent prints about the purlieus of the city; we beg them, for God's sake, not to confound the compositions. The author of the "Oil-of-Bob" is, we hear, THINGUM BOB, Esq., a gentleman of high genius, and a scholar. "Snob" is merely a *nom-de-guerre*. Sept. 15—1 t.

I could scarcely restrain my indignation while I perused the concluding portions of this diatribe. It was clear to me that the yea-nay manner—not to say the gentleness—the positive forbearance with which the 'Daddy-Long-Legs' spoke of that pig, the editor of the 'Gad-Fly'—it was evident to me, I say, that this gentleness of speech could proceed from nothing else than a partiality for the Fly—whom it was clearly the intention of the 'Daddy-Long-Legs' to elevate into reputation at my expense. Any one, indeed, might perceive, with half an eye, that, had the real design of the 'Daddy' been what it wished to appear, it (the 'Daddy') might have expressed itself in terms more direct, more pungent, and altogether more to the purpose. The words 'penny-a-liner', 'mendicant', 'scullion', and 'cut-throat', were epithets so intentionally inexpressive and equivocal, as to be worse than nothing when applied

attack of astonishment, he assured me that he employed the words 'Thomas Hawk' to avoid the colloquialism, Tommy, which was low—but that the true idea was Tommy Hawk—or tomahawk—and that by 'playing tomahawk' he referred to scalping, brow-beating, and otherwise using-up the herd of poor-devil authors.

I assured my patron that, if this was all, I was perfectly resigned to the task of playing Thomas Hawk. Hereupon Mr. Crab desired me to use-up the editor of the 'Gad-Fly' forthwith, in the fiercest style within the scope of my ability, and as a specimen of my powers. This I did, upon the spot, in a review of the original 'Oil-of-Bob', occupying thirty-six pages of the 'Lollipop'. I found playing Thomas Hawk, indeed, a far less onerous occupation than poetizing; for I went upon *system* altogether, and thus it was easy to do the thing thoroughly and well. My practice was this. I bought auction copies (cheap) of 'Lord Brougham's Speeches', 'Cobbett's Complete Works', the 'New Slang-Syllabus', the 'Whole Art of Snubbing', 'Prentice's Billingsgate' (folio edition), and 'Lewis G. Clarke on Tongue'. These works I cut up thoroughly with a curry-comb, and then, throwing the shreds into a sieve, sifted out carefully all that might be thought decent (a mere trifle); reserving the hard phrases, which I threw into a large tin pepper-castor with longitudinal holes, so that an entire sentence could get through without material injury. The mixture was then ready for use. When called upon to play Thomas Hawk, I anointed a sheet of foolscap with the white of a gander's egg; then, shredding the thing to be reviewed as I had previously shredded the books,—only with more care, so as to get every word separate—I threw the latter shreds in with the former, screwed on the lid of the castor, gave it a shake, and so dusted out the mixture upon the egg'd foolscap; where it stuck. The effect was beautiful to behold. It was captivating. Indeed, the reviews I brought to pass by this simple expedient have never been approached, and were the wonder of the world. At first, through bashfulness—the result of inexperience—I was a little put out by a certain inconsistency—a certain air of the *bizarre* (as we say in France), worn by the composition as a whole. All the phrases did not *fit* (as we

say in the Anglo-Saxon). Many were quite awry. Some, even, were upside-down; and there were none of them which were not, in some measure, injured in regard to effect, by this latter species of accident, when it occurred;—with the exception of Mr. Lewis Clarke's paragraphs, which were so vigorous, and altogether stout, that they seemed not particularly disconcerted by any extreme of position, but looked equally happy and satisfactory, whether on their heads, or on their heels.

What became of the editor of the 'Gad-Fly', after the publication of my criticism on his 'Oil-of-Bob', it is somewhat difficult to determine. The most reasonable conclusion is that he wept himself to death. At all events he disappeared instantaneously from the face of the earth, and no man has seen even the ghost of him since.

This matter having been properly accomplished, and the Furies appeased, I grew at once into high favour with Mr. Crab. He took me into his confidence, gave me a permanent situation as Thomas Hawk of the 'Lollipop', and, as for the present, he could afford me no salary, allowed me to profit, at discretion, by his advice.

'My dear Thingum,' said he to me one day after dinner, 'I respect your abilities and love you as a son. You shall be my heir. When I die I will bequeath you the "Lollipop". In the meantime I will make a man of you—I *will*—provided always that you follow my counsel. The first thing to do is to get rid of the old bore.'

'Boar?' said I inquiringly—'pig, eh?—*aper*? (as we say in Latin)—who?—where?'

'Your father,' said he.

'Precisely,' I replied,—'pig.'

'You have your fortune to make, Thingum,' resumed Mr. Crab, 'and that governor of yours is a millstone about your neck. We must cut him at once.' [Here I took out my knife.] 'We must cut him,' continued Mr. Crab, 'decidedly and forever. He won't do—he *won't*. Upon second thoughts, you had better kick him, or cane him, or something of that kind.'

'What do you say,' I suggested modestly, 'to my kicking him in the first instance, caning him afterwards, and winding up by tweaking his nose?'

Mr. Crab looked at me musingly for some moments, and then answered :

‘ I think, Mr. Bob, that what you propose would answer sufficiently well—indeed remarkably well—that is to say, as far as it went—but barbers are exceedingly hard to cut, and I think, upon the whole, that, having performed upon Thomas Bob the operations you suggest, it would be advisable to blacken, with your fists, both his eyes, very carefully and thoroughly, to prevent his ever seeing you again in fashionable promenades. After doing this, I really do not perceive that you can do any more. However—it might be just as well to roll him once or twice in the gutter, and then put him in charge of the police. Any time the next morning you can call at the watch-house and swear an assault.’

I was much affected by the kindness of feeling towards me personally, which was evinced in this excellent advice of Mr. Crab, and I did not fail to profit by it forthwith. The result was, that I got rid of the old bore, and began to feel a little independent and gentleman-like. The want of money, however, was, for a few weeks, a source of some discomfort ; but at length, by carefully putting to use my two eyes, and observing how matters went just in front of my nose, I perceived how the thing was to be brought about. I say ‘ thing ’—be it observed—for they tell me the Latin for it is *rem*. By the way, talking of Latin, can any one tell me the meaning of *quocunque*—or what is the meaning of *modo* ?

My plan was exceedingly simple. I bought, for a song, a sixteenth of the ‘ Snapping-Turtle ’ :—that was all. The thing was *done*, and I put money in my purse. There were some trivial arrangements afterwards, to be sure ; but these formed no portion of the plan. They were a consequence—a result. For example, I bought pen, ink, and paper, and put them into furious activity. Having thus completed a Magazine article, I gave it, for appellation, ‘ FOL-LOL, *by the Author of “THE OIL-OF-BOB”*’, and enveloped it to the ‘ Goosetherumfoodle’. That journal, however, having pronounced it ‘ twattle’ in the ‘ Monthly Notices to Correspondents’, I reheaded the paper “ Hey-Diddle-Diddle”, by THINGUM BOB, Esq., Author of the Ode on

"The Oil-of-Bob", and Editor of the "Snapping-Turtle". With this amendment, I re-enclosed it to the 'Goosetherumfoodle', and, while I awaited a reply, published daily, in the 'Turtle', six columns of what may be termed philosophical and analytical investigation of the literary merits of the 'Goosetherumfoodle', as well as of the personal character of the editor of the 'Goosetherumfoodle'. At the end of a week the 'Goosetherumfoodle' discovered that it had, by some odd mistake, 'confounded a stupid article, headed "Hey-Diddle-Diddle" and composed by some unknown ignoramus, with a gem of resplendent lustre similarly entitled, the work of Thingum Bob, Esq., the celebrated author of "The Oil-of-Bob"'. The 'Goosetherumfoodle' deeply 'regretted this very natural accident', and promised, moreover, an insertion of the *genuine* 'Hey-Diddle-Diddle' in the very next number of the Magazine.

The fact is, I *thought*—I *really* thought—I thought at the time—I thought *then*—and have no reason for thinking otherwise *now*—that the 'Goosetherumfoodle' *did* make a mistake. With the best intentions in the world, I never knew anything that made as many singular mistakes as the 'Goosetherumfoodle'. From that day I took a liking to the 'Goosetherumfoodle', and the result was I soon saw into the very depths of its literary merits, and did not fail to expatiate upon them, in the 'Turtle', whenever a fitting opportunity occurred. And it is to be regarded as a very peculiar coincidence—as one of those positively *remarkable* coincidences which set a man to serious thinking—that just such a total revolution of opinion—just such entire *bouleversement* (as we say in French)—just such thorough *topsiturviness* (if I may be permitted to employ a rather forcible term of the Choctaws) as happened, *pro* and *con*, between myself on the one part, and the 'Goosetherumfoodle' on the other, did actually again happen, in a brief period afterwards, and with precisely similar circumstances, in the case of myself and the 'Rowdy-Dow', and in the case of myself and the 'Hum-Drum'.

Thus it was that, by a master-stroke of genius, I at length consummated my triumphs by 'putting money in my purse', and thus may be said really and fairly to have commenced that brilliant and eventful career which ren-

dered me illustrious, and which now enables me to say, with Chateaubriand, 'I have made history'—'*J'ai fait l'histoire*'.

I have indeed 'made history'. From the bright epoch which I now record, my actions—my works—are the property of mankind. They are familiar to the world. It is, then, needless for me to detail how, soaring rapidly, I fell heir to the 'Lollipop'—how I merged this journal in the 'Hum-Drum'—how again I made purchase of the 'Rowdy-Dow', thus combining the three periodicals—how, lastly, I effected a bargain for the sole remaining rival, and united all the literature of the country in one magnificent Magazine, known everywhere as the

'Rowdy-Dow, Lollipop, Hum-Drum,  
*and*

GOOSETHERUMFOODLE.'

Yes; I have made history. My fame is universal. It extends to the uttermost ends of the earth. You cannot take up a common newspaper in which you shall not see some allusion to the immortal THINGUM BOB. It is Mr. Thingum Bob said so, and Mr. Thingum Bob wrote this, and Mr. Thingum Bob did that. But I am meek and expire with an humble heart. After all, what is it?—this indescribable something which men will persist in terming 'genius'? I agree with Buffon—with Hogarth—it is but *diligence* after all.

Look at *me*!—how I laboured—how I toiled—how I wrote! Ye Gods, did I *not* write? I knew not the word 'ease'. By day I adhered to my desk, and at night, a pale student, I consumed the midnight oil. You should have seen me—you *should*. I leaned to the right. I leaned to the left. I sat forward. I sat backward. I sat upon end. I sat *tête baissée* (as they have it in the Kickapoo) bowing my head close to the alabaster page. And, through all, I—*wrote*. Through joy and through sorrow, I—*wrote*. Through hunger and through thirst, I—*wrote*. Through good report and through ill report, I—*wrote*. Through sunshine and through moonshine, I—*wrote*. *What* I wrote it is unnecessary to say. The *style*!—that was the thing. I caught it from Fatquack—whizz!—fizz!—and I am giving you a specimen of it now.

## HOW TO WRITE A BLACKWOOD ARTICLE

'In the name of the Prophet—figs!!'

CRY OF TURKISH FIG-PEDLER.

I PRESUME everybody has heard of me. My name is the Signora Psyche Zenobia. This I know to be a fact. Nobody but my enemies ever calls me Suky Snobbs. I have been assured that Suky is but a vulgar corruption of Psyche, which is good Greek, and means 'the soul' (that's me, I'm *all* soul) and sometimes 'a butterfly', which latter meaning undoubtedly alludes to my appearance in my new crimson satin dress, with the sky-blue Arabian *mantelet*, and the trimmings of green *agraffas*, and the seven flounces of orange-coloured *auriculas*. As for Snobbs—any person who should look at me would be instantly aware that my name wasn't Snobbs. Miss Tabitha Turnip propagated that report through sheer envy. Tabitha Turnip indeed! Oh, the little wretch! But what can we expect from a turnip? Wonder if she remembers the old adage about 'blood out of a turnip, &c.' [Mem: put her in mind of it the first opportunity.] [Mem. again—pull her nose.] Where was I? Ah! I have been assured that Snobbs is a mere corruption of Zenobia, and that Zenobia was a queen—(So am I. Dr. Moneypenny always calls me the Queen of Hearts)—and that Zenobia, as well as Psyche, is good Greek, and that my father was 'a Greek', and that consequently I have a right to our patronymic, which is Zenobia, and not by any means Snobbs. Nobody but Tabitha Turnip calls me Suky Snobbs. I am the Signora Psyche Zenobia.

As I said before, everybody has heard of me. I am that very Signora Psyche Zenobia, so justly celebrated as corresponding secretary to the '*Philadelphia, Regular, Exchange, Tea, Total, Young, Belles, Lettres, Universal, Experimental, Bibliographical, Association, To, Civilize, Humanity*'. Dr. Moneypenny made the title for us, and says he chose it because it sounded big like an empty rum-puncheon. (A vulgar man that sometimes—but he's deep.) We all sign the initials of the society after our names, in the fashion of the R. S. A., Royal Society of Arts—the S. D. U. K., Society for the Diffusion of Useful Knowledge,

&c. &c. Dr. Moneyppenny says that S stands for *stale*, and that D. U. K. spells duck (but it don't), and that S. D. U. K. stands for Stale Duck, and not for Lord Brougham's society—but then Dr. Moneyppenny is such a queer man that I am never sure when he is telling me the truth. At any rate, we always add to our names the initials P. R. E. T. T. Y. B. L. U. E. B. A. T. C. H.—that is to say, Philadelphia, Regular, Exchange, Tea, Total, Young, Belles, Lettres, Universal, Experimental, Bibliographical, Association, To, Civilize, Humanity—one letter for each word, which is a decided improvement upon Lord Brougham. Dr. Moneyppenny will have it that our initials give our true character—but for my life I can't see what he means.

Notwithstanding the good offices of the Doctor, and the strenuous exertions of the association to get itself into notice, it met with no very great success until I joined it. The truth is, members indulged in too flippant a tone of discussion. The papers read every Saturday evening were characterized less by depth than buffoonery. They were all whipped syllabub. There was no investigation of first causes, first principles. There was no investigation of anything at all. There was no attention paid to that great point, the 'fitness of things'. In short there was no fine writing like this. It was all low—very! No profundity, no reading, no metaphysics—nothing which the learned call spirituality, and which the unlearned choose to stigmatize as cant. [Dr. M. says I ought to spell 'cant' with a capital K—but I know better.]

When I joined the society it was my endeavour to introduce a better style of thinking and writing, and all the world knows how well I have succeeded. We get up as good papers now in the P. R. E. T. T. Y. B. L. U. E. B. A. T. C. H. as any to be found even in Blackwood. I say, Blackwood, because I have been assured that the finest writing, upon every subject, is to be discovered in the pages of that justly celebrated Magazine. We now take it for our model upon all themes, and are getting into rapid notice accordingly. And, after all, it's not so very difficult a matter to compose an article of the genuine Blackwood stamp, if one only goes properly about it. Of course I don't speak of the political

articles. Everybody knows how *they* are managed, since Dr. Moneyppenny explained it. Mr. Blackwood has a pair of tailor's-shears, and three apprentices who stand by him for orders. One hands him the 'Times', another the 'Examiner', and a third a 'Gulley's New Compendium of Slang-Whang'. Mr. B. merely cuts out and intersperses. It is soon done—nothing but Examiner, Slang-Whang, and Times—then Times, Slang-Whang, and Examiner—and then Times, Examiner, and Slang-Whang.

But the chief merit of the Magazine lies in its miscellaneous articles; and the best of these come under the head of what Dr. Moneyppenny calls the *bizarrerries* (whatever that may mean) and what everybody else calls the *intensities*. This is a species of writing which I have long known how to appreciate, although it is only since my late visit to Mr. Blackwood (deputed by the society) that I have been made aware of the exact method of composition. This method is very simple, but not so much so as the politics. Upon my calling at Mr. B.'s, and making known to him the wishes of the society, he received me with great civility, took me into his study, and gave me a clear explanation of the whole process.

'My dear madam,' said he, evidently struck with my majestic appearance, for I had on the crimson satin, with the green *agraffas*, and orange-coloured *auriculas*, 'My dear madam,' said he, 'sit down. The matter stands thus. In the first place, your writer of intensities must have very black ink, and a very big pen, with a very blunt nib. And, mark me, Miss Psyche Zenobia!' he continued, after a pause, with the most impressive energy and solemnity of manner, 'mark me!—*that pen—must—never be mended!* Herein, madam, lies the secret, the soul, of intensity. I assume upon myself to say, that no individual, of however great genius, ever wrote with a good pen—understand me—a good article. You may take it for granted, that when manuscript can be read it is never worth reading. This is a leading principle in our faith, to which if you cannot readily assent, our conference is at an end.'

He paused. But, of course, as I had no wish to put an end to the conference, I assented to a proposition so very obvious, and one, too, of whose truth I had all along been

sufficiently aware. He seemed pleased, and went on with his instructions.

‘It may appear invidious in me, Miss Psyche Zenobia, to refer you to an article, or set of articles, in the way of model or study; yet perhaps I may as well call your attention to a few cases. Let me see. There was “The Dead Alive”, a capital thing!—the record of a gentleman’s sensations when entombed before the breath was out of his body—full of taste, terror, sentiment, metaphysics, and erudition. You would have sworn that the writer had been born and brought up in a coffin. Then we had the “Confessions of an Opium-eater”—fine, very fine!—glorious imagination—deep philosophy—acute speculation—plenty of fire and fury, and a good spicing of the decidedly unintelligible. That was a nice bit of flummery, and went down the throats of the people delightfully. They would have it that Coleridge wrote the paper—but not so. It was composed by my pet baboon, Juniper, over a rummer of Hollands and water, “hot, without sugar”.’ [This I could scarcely have believed had it been anybody but Mr. Blackwood, who assured me of it.] ‘Then there was “The Involuntary Experimentalist”, all about a gentleman who got baked in an oven, and came out alive and well, although certainly done to a turn. And then there was “The Diary of a Late Physician”, where the merit lay in good rant, and indifferent Greek—both of them taking things with the public. And then there was “The Man in the Bell”, a paper by-the-by, Miss Zenobia, which I cannot sufficiently recommend to your attention. It is the history of a young person who goes to sleep under the clapper of a church bell, and is awakened by its tolling for a funeral. The sound drives him mad, and, accordingly, pulling out his tablets, he gives a record of his sensations. Sensations are the great things after all. Should you ever be drowned or hung, be sure and make a note of your sensations—they will be worth to you ten guineas a sheet. If you wish to write forcibly, Miss Zenobia, pay minute attention to the sensations.’

‘That I certainly will, Mr. Blackwood,’ said I.

‘Good!’ he replied. ‘I see you are a pupil after my own heart. But I must put you *au fait* to the details

necessary in composing what may be denominated a genuine Blackwood article of the sensation stamp—the kind which you will understand me to say I consider the best for all purposes.

‘The first thing requisite is to get yourself into such a scrape as no one ever got into before. The oven, for instance,—that was a good hit. But if you have no oven, or big bell, at hand, and if you cannot conveniently tumble out of a balloon, or be swallowed up in an earthquake, or get stuck fast in a chimney, you will have to be contented with simply imagining some similar misadventure. I should prefer, however, that you have the actual fact to bear you out. Nothing so well assists the fancy, as an experimental knowledge of the matter in hand. “Truth is strange,” you know, “stranger than fiction”—besides being more to the purpose.’

Here I assured him I had an excellent pair of garters, and would go and hang myself forthwith.

‘Good!’ he replied, ‘do so;—although hanging is somewhat hackneyed. Perhaps you might do better. Take a dose of Brandreth’s pills, and then give us your sensations. However, my instructions will apply equally well to any variety of misadventure, and in your way home you may easily get knocked on the head, or run over by an omnibus, or bitten by a mad dog, or drowned in a gutter. But to proceed.

‘Having determined upon your subject, you must next consider the tone, or manner, of your narration. There is the tone didactic, the tone enthusiastic, the tone natural—all commonplace enough. But then there is the tone laconic, or curt, which has lately come much into use. It consists in short sentences. Somehow thus: Can’t be too brief. Can’t be too snappish. Always a full stop. And never a paragraph.

‘Then there is the tone elevated, diffusive, and interjectional. Some of our best novelists patronize this tone. The words must be all in a whirl, like a humming-top, and make a noise very similar, which answers remarkably well instead of meaning. This is the best of all possible styles where the writer is in too great a hurry to think.

‘The tone metaphysical is also a good one. If you know

any big words this is your chance for them. Talk of the Ionic and Eleatic schools—of Archytas, Gorgias, and Alcmaeon. Say something about objectivity and subjectivity. Be sure and abuse a man named Locke. Turn up your nose at things in general, and when you let slip anything a little *too* absurd, you need not be at the trouble of scratching it out, but just add a foot-note, and say that you are indebted for the above profound observation to the “*Kritik der reinem Vernunft*”, or to the “*Metaphysische Anfangsgrunde der Naturwissenschaft*”. This will look erudite and—and—and frank.

‘There are various other tones of equal celebrity, but I shall mention only two more—the tone transcendental and the tone heterogeneous. In the former the merit consists in seeing into the nature of affairs a very great deal farther than anybody else. This second sight is very efficient when properly managed. A little reading of the “*Dial*” will carry you a great way. Eschew, in this case, big words; get them as small as possible, and write them upside down. Look over Channing’s poems and quote what he says about a “fat little man with a delusive show of Can”. Put in something about the Supernal Oneness. Don’t say a syllable about the Infernal Twoness. Above all, study innuendo. Hint everything—assert nothing. If you feel inclined to say “bread and butter”, do not by any means say it outright. You may say anything and everything *approaching* to “bread and butter”. You may hint at buckwheat cake, or you may even go so far as to insinuate oatmeal porridge, but if bread and butter be your real meaning, be cautious, my *dear* Miss Psyche, not on any account to say “bread and butter”!’

I assured him that I should never say it again as long as I lived. He kissed me and continued:

‘As for the tone heterogeneous, it is merely a judicious mixture, in equal proportions, of all the other tones in the world, and is consequently made up of everything deep, great, odd, piquant, pertinent, and pretty.

‘Let us suppose now you have determined upon your incidents and tone. The most important portion—in fact, the soul of the whole business, is yet to be attended to—I allude to the *filling up*. It is not to be supposed that a lady,

or gentleman either, has been leading the life of a book-worm. And yet above all things it is necessary that your article have an air of erudition, or at least afford evidence of extensive general reading. Now I'll put you in the way of accomplishing this point. See here !' (pulling down some three or four ordinary-looking volumes, and opening them at random). 'By casting your eye down almost any page of any book in the world, you will be able to perceive at once a host of little scraps of either learning or *bel-esprit-ism*, which are the very thing for the spicing of a Blackwood article. You might as well note down a few while I read them to you. I shall make two divisions : first, *Piquant Facts for the Manufacture of Similes* ; and second, *Piquant Expressions to be introduced as occasion may require*. Write now !—' and I wrote as he dictated.

'PIQUANT FACTS FOR SIMILES. "There were originally but three Muses—Melete, Mneme, Acœde—meditation, memory, and singing." You may make a great deal of that little fact if properly worked. You see it is not generally known, and looks *recherché*. You must be careful and give the thing with a downright improviso air.

'Again. "The river Alpheus passed beneath the sea, and emerged without injury to the purity of its waters." Rather stale that, to be sure, but, if properly dressed and dished up, will look quite as fresh as ever.

'Here is something better. "The Persian Iris appears to some persons to possess a sweet and very powerful perfume, while to others it is perfectly scentless." Fine that, and very delicate ! Turn it about a little, and it will do wonders. We'll have something else in the botanical line. There's nothing goes down so well, especially with the help of a little Latin. Write !

'"*The Epidendrum Flos Aeris*, of Java, bears a very beautiful flower, and will live when pulled up by the roots. The natives suspend it by a cord from the ceiling, and enjoy its fragrance for years." That's capital ! That will do for the similes. Now for the Piquant Expressions.

'PIQUANT EXPRESSIONS. "*The venerable Chinese novel Ju-Kiao-Li*." Good ! By introducing these few words with

dexterity you will evince your intimate acquaintance with the language and literature of the Chinese. With the aid of this you may possibly get along without either Arabic, or Sanscrit, or Chickasaw. There is no passing muster, however, without Spanish, Italian, German, Latin, and Greek. I must look you out a little specimen of each. Any scrap will answer, because you must depend upon your own ingenuity to make it fit into your article. Now write !

“*Aussi tendre que Zaïre*”—as tender as Zaïre—French. Alludes to the frequent repetition of the phrase, *la tendre Zaïre*, in the French tragedy of that name. Properly introduced, will show not only your knowledge of the language, but your general reading and wit. You can say, for instance, that the chicken you were eating (write an article about being choked to death by a chicken-bone) was not altogether *aussi tendre que Zaïre*. Write !

*Ven muerte tan escondida,  
Que no te sienta venir,  
Porque el plazer del morir  
No me torne a dar la vida.*

That's Spanish—from Miguel de Cervantes. “Come quickly, O death ! but be sure and don't let me see you coming, lest the pleasure I shall feel at your appearance should unfortunately bring me back again to life.” This you may slip in quite *à propos* when you are struggling in the last agonies with the chicken-bone. Write !

*Il pover' huomo che non se'n era accorto,  
Andava combattendo, e era morto.*

That's Italian, you perceive—from Ariosto. It means that a great hero, in the heat of combat, not perceiving that he had been fairly killed, continued to fight valiantly, dead as he was. The application of this to your own case is obvious—for I trust, Miss Psyche, that you will not neglect to kick for at least an hour and a half after you have been choked to death by that chicken-bone. Please to write !

*Und sterb'ich doch, so sterb'ich denn  
Durch Sie—durch Sie !*

That's German—from Schiller. “And if I die, at least I die—for thee—for thee !” Here it is clear that you are

apostrophizing the *cause* of your disaster, the chicken. Indeed what gentleman (or lady either) of sense, *wouldn't* die, I should like to know, for a well-fattened capon of the right Molucca breed, stuffed with capers and mushrooms, and served up in a salad-bowl, with orange-jellies *en mosaïques*. Write! (You can get them that way at Tortoni's).—Write, if you please!

'Here is a nice little Latin phrase, and rare too (one can't be too *recherché* or brief in one's Latin, it's getting so common),—*ignoratio elenchi*. He has committed an *ignoratio elenchi*—that is to say, he has understood the words of your proposition, but not the idea. The man was a fool, you see. Some poor fellow whom you address while choking with that chicken-bone, and who therefore didn't precisely understand what you were talking about. Throw the *ignoratio elenchi* in his teeth, and, at once, you have him annihilated. If he dare to reply, you can tell him from Lucan (here it is) that speeches are mere *anemone verborum*, anemone words. The anemone, with great brilliancy, has no smell. Or, if he begin to bluster, you may be down upon him with *insomnia Jovis*, reveries of Jupiter—a phrase which Silius Italicus (see here!) applies to thoughts pompous and inflated. This will be sure and cut him to the heart. He can do nothing but roll over and die. Will you be kind enough to write?

'In Greek we must have something pretty—from Demos- [thenes, for example. Ἄνὴρ ὁ φεύγων καὶ πάλιν μαχήσεται. Aner o pheugon kai palin makesetai.] There is a tolerably good translation of it in Hudibras—

For he that flies may fight again,  
Which he can never do that's slain:

In a Blackwood article nothing makes so fine a show as your Greek. The very letters have an air of profundity about them. Only observe, madam, the astute look of that Epsilon! That Phi ought certainly to be a bishop! Was ever there a smarter fellow than that Omicron? Just twig that Tau! In short, there is nothing like Greek for a genuine sensation-paper. In the present case your application is the most obvious thing in the world. Rap out the sentence, with a huge oath, and by way of *ultimatum* at the

good-for-nothing dunder-headed villain who couldn't understand your plain English in relation to the chicken-bone. He'll take the hint and be off, you may depend upon it.'

These were all the instructions Mr. B. could afford me upon the topic in question, but I felt they would be entirely sufficient. I was, at length, able to write a genuine Blackwood article, and determined to do it forthwith. In taking leave of me, Mr. B. made a proposition for the purchase of the paper when written; but as he could offer me only fifty guineas a sheet, I thought it better to let our society have it, than sacrifice it for so paltry a sum. Notwithstanding this niggardly spirit, however, the gentleman showed his consideration for me in all other respects, and indeed treated me with the greatest civility. His parting words made a deep impression upon my heart, and I hope I shall always remember them with gratitude.

'My dear Miss Zenobia,' he said, while the tears stood in his eyes, 'is there *anything* else I can do to promote the success of your laudable undertaking? Let me reflect! It is just possible that you may not be able, so soon as convenient, to—to—get yourself drowned, or—choked with a chicken-bone, or—or hung,—or—bitten by a—but stay! Now I think me of it, there are a couple of very excellent bull-dogs in the yard—fine fellows, I assure you—savage, and all that—indeed just the thing for your money—they'll have you eaten up, *auriculas* and all, in less than five minutes (here's my watch!)—and then only think of the sensations! Here! I say—Tom!—Peter!—Dick, you villain!—let out those'—but as I was really in a great hurry, and had not another moment to spare, I was reluctantly forced to expedite my departure, and accordingly took leave *at once*—somewhat more abruptly, I admit, than strict courtesy would have otherwise allowed.

It was my primary object upon quitting Mr. Blackwood, to get into some immediate difficulty, pursuant to his advice, and with this view I spent the greater part of the day in wandering about Edinburgh, seeking for desperate adventures—adventures adequate to the intensity of my feelings, and adapted to the vast character of the article I intended to write. In this excursion I was attended by one negro-servant Pompey, and my little lap-dog Diana.

whom I had brought with me from Philadelphia. It was not, however, until late in the afternoon that I fully succeeded in my arduous undertaking. An important event then happened of which the following Blackwood article, in the tone heterogeneous, is the substance and result.

### A PREDICAMENT

What chance, good lady, hath bereft you thus ?—COMUS.

It was a quiet and still afternoon when I strolled forth in the goodly city of Edina. The confusion and bustle in the streets were terrible. Men were talking. Women were screaming. Children were choking. Pigs were whistling. Carts they rattled. Bulls they bellowed. Cows they lowed. Horses they neighed. Cats they caterwauled. Dogs they danced. *Danced!* Could it then be possible? *Danced!* Alas, thought I, *my* dancing days are over! Thus it is ever. What a host of gloomy recollections will ever and anon be awakened in the mind of genius and imaginative contemplation, especially of a genius doomed to the everlasting, and eternal, and continual, and, as one might say, the—*continued*—yes, the *continued and continuous*, bitter, harassing, disturbing, and, if I may be allowed the expression, the *very* disturbing influence of the serene, and godlike, and heavenly, and exalting, and elevated, and purifying effect of what may be rightly termed the most enviable, the most *truly* enviable—nay! the most benignly beautiful, the most deliciously ethereal, and, as it were, the most *pretty* (if I may use so bold an expression) *thing* (pardon me, gentle reader!) in the world—but I am always led away by my feelings. In *such* a mind, I repeat, what a host of recollections are stirred up by a trifle! The dogs danced! *I—**I could not!* They frisked—I wept. They capered—I sobbed aloud. Touching circumstances! which cannot fail to bring to the recollection of the classical reader that exquisite passage in relation to the fitness of things, which is to be found in the commencement of the third volume of that admirable and venerable Chinese novel, the *Jo-Go-Slow*.

In my solitary walk through the city I had two humble

but faithful companions. Diana, my poodle ! sweetest of creatures ! She had a quantity of hair over her one eye, and a blue riband tied fashionably around her neck. Diana was not more than five inches in height, but her head was somewhat bigger than her body, and her tail, being cut off exceedingly close, gave an air of injured innocence to the interesting animal which rendered her a favourite with all.

And Pompey, my negro !—sweet Pompey ! how shall I ever forget thee ? I had taken Pompey's arm. He was three feet in height (I like to be particular) and about seventy, or perhaps eighty, years of age. He had bow-legs and was corpulent. His mouth should not be called small, nor his ears short. His teeth, however, were like pearl, and his large full eyes were deliciously white. Nature had endowed him with no neck, and had placed his ankles (as usual with that race) in the middle of the upper portion of the feet. He was clad with a striking simplicity. His sole garments were a stock of nine inches in height, and a nearly new drab overcoat which had formerly been in the service of the tall, stately, and illustrious Dr. Moneypenny. It was a good overcoat. It was well cut. It was well made. The coat was nearly new. Pompey held it up out of the dirt with both hands.

There were three persons in our party, and two of them have already been the subject of remark. There was a third—that third person was myself. I am the Signora Psyche Zenobia. I am *not* Suky Snobbs. My appearance is commanding. On the memorable occasion of which I speak I was habited in a crimson satin dress, with a sky-blue Arabian mantelet. And the dress had trimmings of green agraffas, and seven graceful flounces of the orange-coloured auricula. I thus formed the third of the party. There was the poodle. There was Pompey. There was myself. We were *three*. Thus it is said there were originally but three Furies—Melty, Nimmy, and Hetty—Meditation, Memory, and Fiddling.

Leaning upon the arm of the gallant Pompey, and attended at a respectful distance by Diana, I proceeded down one of the populous and very pleasant streets of the now deserted Edina. On a sudden, there presented itself to view a church—a Gothic cathedral—vast, venerable, and

with a tall steeple, which towered into the sky. What madness now possessed me ? Why did I rush upon my fate ? I was seized with an uncontrollable desire to ascend the giddy pinnacle, and thence survey the immense extent of the city. The door of the cathedral stood invitingly open. My destiny prevailed. I entered the ominous archway. Where then was my guardian angel ?—if indeed such angels there be. *If!* Distressing monosyllable ! what a world of mystery, and meaning, and doubt, and uncertainty is there involved in thy two letters ! I entered the ominous archway ! I entered ; and, without injury to my orange-coloured auriculas, I passed beneath the portal, and emerged within the vestibule. Thus it is said the immense river Alfred passed, unscathed, and unwetted, beneath the sea.

I thought the staircases would never have an end. *Round !* Yes, they went round and up, and round and up, and round and up, until I could not help surmising, with the sagacious Pompey, upon whose supporting arm I leaned in all the confidence of early affection—I *could* not help surmising that the upper end of the continuous spiral ladder had been accidentally, or perhaps designedly, removed. I paused for breath ; and, in the meantime, an incident occurred of too momentous a nature in a moral, and also in a metaphysical point of view, to be passed over without notice. It appeared to me—indeed I was quite confident of the fact—I could not be mistaken—no ! I had, for some moments, carefully and anxiously observed the motions of my Diana—I say that *I could not be mistaken*—Diana *smelt a rat !* At once I called Pompey's attention to the subject, and he—he agreed with me. There was then no longer any reasonable room for doubt. The rat had been smelled—and by Diana. Heavens ! shall I ever forget the intense excitement of that moment ? Alas ! what is the boasted intellect of man ? The rat !—it was there—that is to say, it was somewhere. Diana smelled the rat. I—I *could* not ! Thus it is said the Prussian Isis has, for some persons, a sweet and very powerful perfume, while to others it is perfectly scentless.

The staircase had been surmounted, and there were now only three or four more upward steps intervening between us and the summit. We still ascended, and now only one

step remained. One step ! One little, little step ! Upon one such little step in the great staircase of human life how vast a sum of human happiness or misery often depends ! I thought of myself, then of Pompey, and then of the mysterious and inexplicable destiny which surrounded us. I thought of Pompey !—alas, I thought of love ! I thought of the many false *steps* which have been taken, and may be taken again. I resolved to be more cautious, more reserved. I abandoned the arm of Pompey, and, without his assistance, surmounted the one remaining step, and gained the chamber of the belfry. I was followed immediately afterwards by my poodle. Pompey alone remained behind. I stood at the head of the staircase, and encouraged him to ascend. He stretched forth to me his hand, and unfortunately in so doing was forced to abandon his firm hold upon the overcoat. Will the gods never cease their persecution ? The overcoat it dropped, and, with one of his feet, Pompey stepped upon the long and trailing skirt of the overcoat. He stumbled and fell—this consequence was inevitable. He fell forwards, and, with his accursed head, striking me full in the—in the breast, precipitated me headlong, together with himself, upon the hard, filthy, and detestable floor of the belfry. But my revenge was sure, sudden, and complete. Seizing him furiously by the wool with both hands, I tore out a vast quantity of the black, and crisp, and curling material, and tossed it from me with every manifestation of disdain. It fell among the ropes of the belfry and remained. Pompey arose, and said no word. But he regarded me piteously with his large eyes and—sighed. Ye gods—that sigh ! It sunk into my heart. And the hair—the wool ! Could I have reached that wool I would have bathed it with my tears, in testimony of regret. But alas ! it was now far beyond my grasp. As it dangled among the cordage of the bell, I fancied it still alive. I fancied that it stood on end with indignation. Thus the *happydandy Flos Aeris* of Java, bears, it is said, a beautiful flower, which will live when pulled up by the roots. The natives suspend it by a cord from the ceiling and enjoy its fragrance for years.

Our quarrel was now made up, and we looked about the room for an aperture through which to survey the city of

Edina. Windows there were none. The sole light admitted into the gloomy chamber proceeded from a square opening, about a foot in diameter, at a height of about seven feet from the floor. Yet what will the energy of true genius not effect? I resolved to clamber up to this hole. A vast quantity of wheels, pinions, and other cabalistic-looking machinery stood opposite the hole, close to it; and through the hole there passed an iron rod from the machinery. Between the wheels and the wall where the hole lay, there was barely room for my body—yet I was desperate, and determined to persevere. I called Pompey to my side.

‘You perceive that aperture, Pompey. I wish to look through it. You will stand here just beneath the hole—so. Now, hold out one of your hands, Pompey, and let me step upon it—thus. Now, the other hand, Pompey, and with its aid I will get upon your shoulders.’

He did everything I wished, and I found, upon getting up, that I could easily pass my head and neck through the aperture. The prospect was sublime. Nothing could be more magnificent. I merely paused a moment to bid Diana behave herself, and assure Pompey that I would be considerate and bear as lightly as possible upon his shoulders. I told him I would be tender of his feelings—*ossi tender que beefsteak*. Having done this justice to my faithful friend, I gave myself up with great zest and enthusiasm to the enjoyment of the scene which so obligingly spread itself out before my eyes.

Upon this subject, however, I shall forbear to dilate. I will not describe the city of Edinburgh. Every one has been to Edinburgh—the classic Edina. I will confine myself to the momentous details of my own lamentable adventure. Having, in some measure, satisfied my curiosity in regard to the extent, situation, and general appearance of the city, I had leisure to survey the church in which I was, and the delicate architecture of the steeple. I observed that the aperture through which I had thrust my head was an opening in the dial-plate of a gigantic clock, and must have appeared, from the street, as a large keyhole, such as we see in the face of French watches. No doubt the true object was to admit the arm of an attendant, to adjust, when necessary, the hands of the clock from within. I

observed also, with surprise, the immense size of these hands, the longest of which could not have been less than ten feet in length, and, where broadest, eight or nine inches in breadth. They were of solid steel apparently, and their edges appeared to be sharp. Having noticed these particulars, and some others, I again turned my eyes upon the glorious prospect below, and soon became absorbed in contemplation.

From this, after some minutes, I was aroused by the voice of Pompey, who declared he could stand it no longer, and requested that I would be so kind as to come down. This was unreasonable, and I told him so in a speech of some length. He replied but with an evident misunderstanding of my ideas upon the subject. I accordingly grew angry, and told him in plain words, that he was a fool, that he had committed an *ignoramus e-clench-eye*, that his notions were mere *insommary Bovis*, and his words little better than an *ennemywerrybor'em*. With this he appeared satisfied, and I resumed my contemplations.

It might have been half an hour after this altercation when, as I was deeply absorbed in the heavenly scenery beneath me, I was startled by something very cold which pressed with a gentle pressure upon the back of my neck. It is needless to say that I felt inexpressibly alarmed. I knew that Pompey was beneath my feet, and that Diana was sitting, according to my explicit directions, upon her hind legs in the farthest corner of the room. What could it be? Alas! I but too soon discovered. Turning my head gently to one side, I perceived, to my extreme horror, that the huge, glittering, scimitar-like minute-hand of the clock, had, in the course of its hourly revolution, *descended upon my neck*. There was, I knew, not a second to be lost. I pulled back at once—but it was too late. There was no chance of forcing my head through the mouth of that terrible trap in which it was so fairly caught, and which grew narrower and narrower with a rapidity too horrible to be conceived. The agony of that moment is not to be imagined. I threw up my hands and endeavoured, with all my strength, to force upward the ponderous iron bar. I might as well have tried to lift the cathedral itself. Down, down, down it came, closer and yet closer. I screamed to Pompey for aid: but he said that I had hurt his feelings

by calling him 'an ignorant old squint eye'. I yelled to Diana; but she only said 'bow-wow-wow', and that 'I had told her on no account to stir from the corner'. Thus I had no relief to expect from my associates.

Meantime the ponderous and terrific *Scythe of Time* (for I now discovered the literal import of that classical phrase) had not stopped, nor was it likely to stop, in its career. Down and still down, it came. It had already buried its sharp edge a full inch in my flesh, and my sensations grew indistinct and confused. At one time I fancied myself in Philadelphia with the stately Dr. Moneypenny, at another in the back parlour of Mr. Blackwood receiving his invaluable instructions. And then again the sweet recollection of better and earlier times came over me, and I thought of that happy period when the world was not all a desert, and Pompey not altogether cruel.

The ticking of the machinery amused me. *Amused me*, I say, for my sensations now bordered upon perfect happiness, and the most trifling circumstances afforded me pleasure. The eternal *click-clack, click-clack, click-clack*, of the clock was the most melodious of music in my ears, and occasionally even put me in mind of the grateful sermonic harangues of Dr. Ollapod. Then there were the great figures upon the dial-plate—how intelligent, how intellectual, they all looked! And presently they took to dancing the Mazurka, and I think it was the figure V who performed the most to my satisfaction. She was evidently a lady of breeding. None of your swaggerers, and nothing at all indelicate in her motions. She did the pirouette to admiration—whirling round upon her apex. I made an endeavour to hand her a chair, for I saw that she appeared fatigued with her exertions—and it was not until then that I fully perceived my lamentable situation. Lamentable indeed! The bar had buried itself two inches in my neck. I was aroused to a sense of exquisite pain. I prayed for death, and, in the agony of the moment, could not help repeating those exquisite verses of the poet Miguel De Cervantes:

Vanny Buren, tan escondida  
Query no te senty venny  
Pork and pleasure, delly morry  
Nommy, torny, darry, widdy!

But now a new horror presented itself, and one indeed sufficient to startle the strongest nerves. My eyes, from the cruel pressure of the machine, were absolutely starting from their sockets. While I was thinking how I should possibly manage without them, one actually tumbled out of my head, and, rolling down the steep side of the steeple, lodged in the rain gutter which ran along the eaves of the main building. The loss of the eye was not so much as the insolent air of independence and contempt with which it regarded me after it was out. There it lay in the gutter just under my nose, and the airs it gave itself would have been ridiculous had they not been disgusting. Such a winking and blinking were never before seen. This behaviour on the part of my eye in the gutter was not only irritating on account of its manifest insolence and shameful ingratitude, but was also exceedingly inconvenient on account of the sympathy which always exists between two eyes of the same head, however far apart. I was forced, in a manner, to wink and to blink, whether I would or not, in exact concert with the scoundrelly thing that lay just under my nose. I was presently relieved, however, by the dropping out of the other eye. In falling it took the same direction (possibly a concerted plot) as its fellow. Both rolled out of the gutter together, and in truth I was very glad to get rid of them.

The bar was now four inches and a half deep in my neck, and there was only a little bit of skin to cut through. My sensations were those of entire happiness, for I felt that in a few minutes, at farthest, I should be relieved from my disagreeable situation. And in this expectation I was not at all deceived. At twenty-five minutes past five in the afternoon precisely, the huge minute-hand had proceeded sufficiently far on its terrible revolution to sever the small remainder of my neck. I was not sorry to see the head which had occasioned me so much embarrassment at length make a final separation from my body. It first rolled down the side of the steeple, then lodged, for a few seconds, in the gutter, and then made its way, with a plunge, into the middle of the street.

I will candidly confess that my feelings were now of the most singular—nay, of the most mysterious, the most

perplexing and incomprehensible character. My senses were here and there at one and the same moment. With my head I imagined, at one time, that I the head, was the real Signora Psyche Zenobia—at another I felt convinced that myself, the body, was the proper identity. To clear my ideas upon this topic I felt in my pocket for my snuff-box, but, upon getting it, and endeavouring to apply a pinch of its grateful contents in the ordinary manner, I became immediately aware of my peculiar deficiency, and threw the box at once down to my head. It took a pinch with great satisfaction, and smiled me an acknowledgment in return. Shortly afterwards it made me a speech, which I could hear but indistinctly without ears. I gathered enough, however, to know that it was astonished at my wishing to remain alive under such circumstances. In the concluding sentences it quoted the noble words of Ariosto—

*Il pover hommy che non sera corty  
And have a combat tenty erry morty ;*

thus comparing me to the hero who, in the heat of the combat, not perceiving that he was dead, continued to contest the battle with inextinguishable valour. There was nothing now to prevent my getting down from my elevation, and I did so. What it was that Pompey saw so *very* peculiar in my appearance I have never yet been able to find out. The fellow opened his mouth from ear to ear, and shut his two eyes as if he were endeavouring to crack nuts between the lids. Finally, throwing off his overcoat, he made one spring for the staircase and disappeared. I hurled after the scoundrel those vehement words of Demosthenes—

*Andrew O' Phlegethon, you really make haste to fly,*

and then turned to the darling of my heart, to the one-eyed ! the shaggy-haired Diana. Alas ! what a horrible vision affronted my eyes ? *Was* that a rat I saw skulking into his hole ? *Are* these the picked bones of the little angel who has been cruelly devoured by the monster ? Ye Gods ! and what *do* I behold—*is* that the departed spirit, the shade, the ghost of my beloved puppy, which I perceive sitting with a grace so melancholy, in the corner ? Harken !

for she speaks, and, heavens! it is in the German of Schiller—

Unt stubby duk, so stubby dun  
Duk she! duk she!

Alas! and are not her words too true?

And if I died at least I died  
For thee—for thee.

Sweet creature! she *too* has sacrificed herself in my behalf. Dogless, niggerless, headless, what *now* remains for the unhappy Signora Psyche Zenobia? Alas—*nothing*! I have done.

### MYSTIFICATION

Slid, if these be your 'passados' and 'montantes', I'll have none of them.  
NED KNOWLES.

THE Baron Ritzner Von Jung was of a noble Hungarian family, every member of which (at least as far back into antiquity as any certain records extend) was more or less remarkable for talent of some description—the majority for that species of *grotesquerie* in conception of which Tieck, a scion of the house, has given some vivid, although by no means the most vivid exemplifications. My acquaintance with Ritzner commenced at the magnificent Chateau Jung, into which a train of droll adventures, not to be made public, threw me during the summer months of the year 18—. Here it was I obtained a place in his regard, and here, with somewhat more difficulty, a partial insight into his mental conformation. In later days this insight grew more clear, as the intimacy which had at first permitted it became more close; and when, after three years separation, we met at G—n, I knew all that it was necessary to know of the character of the Baron Ritzner Von Jung.

I remember the buzz of curiosity which his advent excited within the college precincts on the night of the twenty-fifth of June. I remember still more distinctly, that while he was pronounced by all parties at first sight 'the most remarkable man in the world', no person made any attempt at accounting for this opinion. That he was *unique* appeared so undeniable, that it was deemed

impertinent to inquire wherein the unicity consisted. But, letting this matter pass for the present, I will merely observe that, from the first moment of his setting foot within the limits of the university, he began to exercise over the habits, manners, persons, purses, and propensities of the whole community which surrounded him, an influence the most extensive and despotic, yet at the same time the most indefinite and altogether unaccountable. Thus the brief period of his residence at the university forms an era in its annals, and is characterized by all classes of people appertaining to it or its dependencies as 'that very extraordinary epoch forming the domination of the Baron Ritzner Von Jung'.

Upon his advent to G——n, he sought me out in my apartments. He was then of no particular age, by which I mean that it was impossible to form a guess respecting his age by any data personally afforded. He might have been fifteen or fifty, and *was* twenty-one years and seven months. He was by no means a handsome man—perhaps the reverse. The contour of his face was somewhat angular and harsh. His forehead was lofty and very fair; his nose a snub; his eyes large, heavy, glassy, and meaningless. About the mouth there was more to be observed. The lips were gently protruded, and rested the one upon the other after such fashion that it is impossible to conceive any, even the most complex, combination of human features, conveying so entirely, and so singly, the idea of unmitigated gravity, solemnity, and repose.

It will be perceived, no doubt, from what I have already said, that the Baron was one of those human anomalies now and then to be found, who make the science of *mystification* the study and the business of their lives. For this science a peculiar turn of mind gave him instinctively the cue, while his physical appearance afforded him unusual facilities for carrying his projects into effect. I firmly believe that no student at G——n, during that renowned epoch so quaintly termed the domination of the Baron Ritzner Von Jung, ever rightly entered into the mystery which overshadowed his character. I truly think that no person at the university, with the exception of myself, ever suspected him to be capable of a joke, verbal or practical:—

the old bull-dog at the garden-gate would sooner have been accused—the ghost of Heraclitus—or the wig of the Emeritus Professor of Theology. This, too, when it was evident that the most egregious and unpardonable of all conceivable tricks, whimsicalities, and buffooneries were brought about, if not directly by him, at least plainly through his intermediate agency or connivance. The beauty, if I may so call it, of his art *mystifique*, lay in that consummate ability (resulting from an almost intuitive knowledge of human nature, and a most wonderful self-possession) by means of which he never failed to make it appear that the drolleries he was occupied in bringing to a point, arose partly in spite, and partly in consequence of the laudable efforts he was making for their prevention, and for the preservation of the good order and dignity of Alma Mater. The deep, the poignant, the overwhelming mortification, which upon each such failure of his praiseworthy endeavours, would suffuse every lineament of his countenance, left not the slightest room for doubt of his sincerity in the bosoms of even his most sceptical companions. The adroitness, too, was no less worthy of observation by which he contrived to shift the sense of the grotesque from the creator to the created—from his own person to the absurdities to which he had given rise. In no instance before that of which I speak, have I known the habitual mystific escape the natural consequence of his manœuvres—an attachment of the ludicrous to his own character and person. Continually enveloped in an atmosphere of whim, my friend appeared to live only for the severities of society; and not even his own household have for a moment associated other ideas than those of the rigid and august with the memory of the Baron Ritzner Von Jung.

During the epoch of his residence at G——n it really appeared that the demon of the *dolce far niente* lay like an incubus upon the university. Nothing at least, was done, beyond eating and drinking, and making merry. The apartments of the students were converted into so many pot-houses, and there was no pot-house of them all more famous or more frequented than that of the Baron. Our carousals here were many, and boisterous, and long, and never unfruitful of events.

Upon one occasion we had protracted our sitting until nearly daybreak, and an unusual quantity of wine had been drunk. The company consisted of seven or eight individuals besides the Baron and myself. Most of these were young men of wealth, of high connection, of great family pride, and all alive with an exaggerated sense of honour. They abounded in the most ultra German opinions respecting the *duello*. To these Quixotic notions some recent Parisian publications, backed by three or four desperate, and fatal rencontres at G——n, had given new vigour and impulse ; and thus the conversation, during the greater part of the night, had run wild upon the all-engrossing topic of the times. The Baron, who had been unusually silent and abstracted in the earlier portion of the evening, at length seemed to be aroused from his apathy, took a leading part in the discourse, and dwelt upon the benefits, and more especially upon the beauties, of the received code of etiquette in passages of arms with an ardour, an eloquence, an impressiveness, and an affectionateness of manner, which elicited the warmest enthusiasm from his hearers in general, and absolutely staggered even myself, who well knew him to be at heart a ridiculer of those very points for which he contended, and especially to hold the entire *fanfaronade* of duelling etiquette in the sovereign contempt which it deserves.

Looking around me during a pause in the Baron's discourse (of which my readers may gather some faint idea when I say that it bore resemblance to the fervid, chanting, monotonous, yet musical, sermonic manner of Coleridge) I perceived symptoms of even more than the general interest in the countenance of one of the party. This gentleman, whom I shall call Hermann, was an original in every respect—except, perhaps, in the single particular that he was a very great fool. He contrived to bear, however, among a particular set at the university, a reputation for deep metaphysical thinking, and, I believe, for some logical talent. As a duellist he had acquired great renown, even at G——n. I forget the precise number of victims who had fallen at his hands ; but they were many. He was a man of courage undoubtedly. But it was upon his minute acquaintance with the etiquette of the *duello*, and the *nicety*

of his sense of honour, that he most especially prided himself. These things were a hobby which he rode to the death. To Ritzner, ever upon the look-out for the grotesque, his peculiarities had for a long time past afforded food for mystification. Of this, however, I was not aware ; although, in the present instance, I saw clearly that something of a whimsical nature was upon the *tapis* with my friend, and that Hermann was its especial object.

As the former proceeded in his discourse, or rather monologue, I perceived the excitement of the latter momentarily increasing. At length he spoke ; offering some objection to a point insisted upon by R., and giving his reasons in detail. To these the Baron replied at length (still maintaining his exaggerated tone of sentiment) and concluding, in what I thought very bad taste, with a sarcasm and a sneer. The hobby of Hermann now took the bit in his teeth. This I could discern by the studied hair-splitting *farrago* of his rejoinder. His last words I distinctly remember. 'Your opinions, allow me to say, Baron Von Jung, although in the main correct, are, in many nice points, discreditable to yourself and to the university of which you are a member. In a few respects they are even unworthy of serious refutation. I would say more than this, sir, were it not for the fear of giving you offence (here the speaker smiled blandly), I would say, sir, that your opinions are not the opinions to be expected from a gentleman.'

As Hermann completed this equivocal sentence, all eyes were turned upon the Baron. He became pale, then excessively red ; then, dropping his pocket-handkerchief, stooped to recover it, when I caught a glimpse of his countenance, while it could be seen by no one else at the table. It was radiant with the quizzical expression which was its natural character, but which I had never seen it assume except when we were alone together, and when he unbent himself freely. In an instant afterward he stood erect, confronting Hermann ; and so total an alteration of countenance in so short a period I certainly never saw before. For a moment I even fancied that I had misconceived him, and that he was in sober earnest. He appeared to be stifling with passion, and his face was cadaverously white. For a short time he remained silent, apparently

striving to master his emotion. Having at length seemingly succeeded, he reached a decanter which stood near him, saying as he held it firmly clenched—‘The language you have thought proper to employ, Mynheer Hermann, in addressing yourself to me, is objectionable in so many particulars, that I have neither temper nor time for specification. That my opinions, however, are not the opinions to be expected from a gentleman, is an observation so directly offensive as to allow me but one line of conduct. Some courtesy, nevertheless, is due to the presence of this company, and to yourself, at this moment, as my guest. You will pardon me, therefore, if, upon this consideration, I deviate slightly from the general usage among gentlemen in similar cases of personal affront. You will forgive me for the moderate tax I shall make upon your imagination, and endeavour to consider, for an instant, the reflection of your person in yonder mirror as the living Mynheer Hermann himself. This being done, there will be no difficulty whatever. I shall discharge this decanter of wine at your image in yonder mirror, and thus fulfil all the spirit, if not the exact letter, of resentment for your insult, while the necessity of physical violence to your real person will be obviated.’

With these words he hurled the decanter, full of wine, against the mirror which hung directly opposite Hermann ; striking the reflection of his person with great precision, and of course shattering the glass into fragments. The whole company at once started to their feet, and, with the exception of myself and Ritzner, took their departure. As Hermann went out, the Baron whispered me that I should follow him and make an offer of my services. To this I agreed ; not knowing precisely what to make of so ridiculous a piece of business.

The duellist accepted my aid with his stiff and *ultra recherché* air, and, taking my arm, led me to his apartment. I could hardly forbear laughing in his face while he proceeded to discuss, with the profoundest gravity, what he termed ‘the refinedly peculiar character’ of the insult he had received. After a tiresome harangue in his ordinary style, he took down from his book-shelves a number of musty volumes on the subject of the *duello*, and entertained

me for a long time with their contents; reading aloud, and commenting earnestly as he read. I can just remember the titles of some of the works. There were the 'Ordonnance of Philip le Bel on Single Combat'; the 'Theatre of Honor', by Favyn, and a treatise 'On the Permission of Duels', by Andiguier. He displayed, also, with much pomposity, Brantome's 'Memoirs of Duels', published at Cologne, in 1666, in the types of Elzevir—a precious and unique vellum-paper volume, with a fine margin, and bound by Derôme. But he requested my attention particularly, and with an air of mysterious sagacity, to a thick octavo, written in barbarous Latin by one Hedelin, a Frenchman, and having the quaint title, *Duelli Lex Scripta, et non; aliterque*. From this he read me one of the drollest chapters in the world concerning *Injuriae per applicationem, per constructionem, et per se*, about half of which, he averred, was strictly applicable to his own 'refinedly peculiar' case, although not one syllable of the whole matter could I understand for the life of me. Having finished the chapter, he closed the book, and demanded what I thought necessary to be done. I replied that I had entire confidence in his superior delicacy of feeling, and would abide by what he proposed. With this answer he seemed flattered, and sat down to write a note to the Baron. It ran thus :

SIR,—My friend, Mr. P——, will hand you this note. I find it incumbent upon me to request, at your earliest convenience, an explanation of this evening's occurrences at your chambers. In the event of your declining this request, Mr. P. will be happy to arrange, with any friend whom you may appoint, the steps preliminary to a meeting.

With sentiments of perfect respect,

Your most humble servant,

JOHAN HERMANN.

*To the Baron Ritzner Von Jung,  
August 18th, 18—.*

Not knowing what better to do, I called upon Ritzner with this epistle. He bowed as I presented it; then, with a grave countenance, motioned me to a seat. Having

perused the cartel, he wrote the following reply, which I carried to Hermann.

SIR,—Through our common friend, Mr. P., I have received your note of this evening. Upon due reflection I frankly admit the propriety of the explanation you suggest. This being admitted, I still find great difficulty (owing to the *refinedly peculiar* nature of our disagreement, and of the personal affront offered on my part) in so wording what I have to say by way of apology, as to meet all the minute exigencies, and all the variable shadows of the case. I have great reliance, however, on that extreme delicacy of discrimination, in matters appertaining to the rules of etiquette, for which you have been so long and so pre-eminently distinguished. With perfect certainty, therefore, of being comprehended, I beg leave, in lieu of offering any sentiments of my own, to refer you to the opinions of the Sieur Hedelin, as set forth in the ninth paragraph of the chapter of *Injurie per applicationem, per constructionem, et per se*, in his *Duelli Lex scripta, et non ; aliterque*. The nicety of your discernment in all the matters here treated, will be sufficient, I am assured, to convince you *that the mere circumstance of me referring you to this admirable passage, ought to satisfy your request, as a man of honour, for explanation.*

With sentiments of profound respect,

Your most obedient servant,

VON JUNG.

*The Herr Johan Hermann.*

*August 18th, 18—.*

Hermann commenced the perusal of this epistle with a scowl, which, however, was converted into a smile of the most ludicrous self-complacency as he came to the rigmarole about *Injurie per applicationem, per constructionem, et per se*. Having finished reading, he begged me, with the blindest of all possible smiles, to be seated, while he made reference to the treatise in question. Turning to the passage specified, he read it with great care to himself, then closed the book, and desired me, in my character of confidential acquaintance, to express to the Baron Von Jung his exalted

sense of his chivalrous behaviour, and, in that of second, to assure him that the explanation offered was of the fullest, the most honourable, and the most unequivocally satisfactory nature.

Somewhat amazed at all this, I made my retreat to the Baron. He seemed to receive Hermann's amicable letter as a matter of course, and after a few words of general conversation, went to an inner room and brought out the everlasting treatise *Duelli Lex scripta, et non ; aliterque*. He handed me the volume and asked me to look over some portion of it. I did so, but to little purpose, not being able to gather the least particle of meaning. He then took the book himself, and read me a chapter aloud. To my surprise, what he read proved to be a most horribly absurd account of a duel between two baboons. He now explained the mystery ; showing that the volume, as it appeared *prima facie*, was written upon the plan of the nonsense verses of Du Bartas ; that is to say, the language was ingeniously framed so as to present to the ear all the outward signs of intelligibility, and even of profundity, while in fact not a shadow of meaning existed. The key to the whole was found in leaving out every second and third word alternately, when there appeared a series of ludicrous quizzes, upon a single combat as practised in modern times.

The Baron afterwards informed me that he had purposely thrown the treatise in Hermann's way two or three weeks before the adventure, and that he was satisfied, from the general tenor of his conversation, that he had studied it with the deepest attention, and firmly believed it to be a work of unusual merit. Upon this hint he proceeded. Hermann would have died a thousand deaths rather than acknowledge his inability to understand anything and everything in the universe that had ever been written about the *duello*.

## X-ING A PARAGRAB

As it is well known that the 'wise men' came 'from the East', and as Mr. Touch-and-go Bullet-head came from the East, it follows that Mr. Bullet-head was a wise man; and if collateral proof of the matter be needed, here we have it—Mr. B. was an editor. Irascibility was his sole foible; for in fact the obstinacy of which men accused him was anything but his *foible*, since he justly considered it his *forte*. It was his strong point—his virtue; and it would have required all the logic of a Brownson to convince him that it was 'anything else'.

I have shown that Touch-and-go Bullet-head was a wise man; and the only occasion on which he did not prove infallible, was when, abandoning that legitimate home for all wise men, the East, he migrated to the city of Alexander-the-Great-o-nopolis, or some place of a similar title, out West.

I must do him the justice to say, however, that when he made up his mind finally to settle in that town, it was under the impression that no newspaper, and consequently no editor, existed in that particular section of the country. In establishing 'The Tea-Pot', he expected to have the field all to himself. I feel confident he never would have dreamed of taking up his residence in Alexander-the-Great-o-nopolis, had he been aware that, in Alexander-the-Great-o-nopolis, there lived a gentleman named John Smith (if I rightly remember), who, for many years, had there quietly grown fat in editing and publishing the 'Alexander-the-Great-o-nopolis Gazette'. It was solely, therefore, on account of having been misinformed, that Mr. Bullet-head found himself in Alex—suppose we call it Nopolis 'for short'—but, as he *did* find himself there, he determined to keep up his character for obst—for firmness, and remain. So remain he did; and he did more; he unpacked his press, type, etc., etc., rented an office exactly opposite to that of the 'Gazette', and, on the third morning after his arrival, issued the first number of 'The Alexan'—that is to say, of 'The Nopolis Tea-Pot':—as nearly as I can recollect, this was the name of the new paper.

The leading article, I must admit, was brilliant—not to say severe. It was especially bitter about things in general—and as for the editor of ‘The Gazette’, he was torn all to pieces in particular. Some of Bullet-head’s remarks were really so fiery that I have always, since that time, been forced to look upon John Smith, who is still alive, in the light of a salamander. I cannot pretend to give *all* the ‘Tea-Pot’s’ paragraphs *verbatim*, but one of them ran thus:

‘Oh, yes!—Oh, we perceive! Oh, no doubt! The editor over the way is a genius—Oh, my! Oh, goodness, gracious!—what *is* this world coming to? Oh, *tempora*! Oh, *Moses*!’

A philippic at once so caustic and so classical, alighted like a bombshell among the hitherto peaceful citizens of Nopolis. Groups of excited individuals gathered at the corners of the streets. Everyone awaited, with heartfelt anxiety, the reply of the dignified Smith. Next morning it appeared, as follows:

‘We quote from “The Tea-Pot” of yesterday the sub-joined paragraph:—“Oh, yes! Oh, we perceive! Oh, no doubt! Oh, my! Oh, goodness! Oh, *tempora*! Oh, *Moses*!” Why, the fellow is all O! That accounts for his reasoning in a circle, and explains why there is neither beginning nor end to him, nor to anything that he says. We really do not believe the vagabond can write a word that hasn’t an O in it. Wonder if this O-ing is a habit of his? By-the-by, he came away from Down-East in a great hurry. Wonder if he *O’s* as much there as he does here? “O! it is pitiful”.’

The indignation of Mr. Bullet-head at these scandalous insinuations, I shall not attempt to describe. On the eel-skinning principle, however, he did not seem to be so much incensed at the attack upon his integrity as one might have imagined. It was the sneer at his *style* that drove him to desperation. What!—*he* Touch-and-go Bullet-head!—not able to write a word without an O in it! He would soon let the jackanapes see that he was mistaken. Yes! he would let him see how *much* he was mistaken, the puppy! He, Touch-and-go Bullet-head, of Frogpondium, would let Mr. John Smith perceive that he, Bullet-head, could indite, if it so pleased him, a whole paragraph—ay! a whole article—in which that contemptible vowel should not

*once*—not even *once*—make its appearance. But no;—that would be yielding a point to the said John Smith. *He*, Bullet-head, would make *no* alteration in his style, to suit the caprices of any Mr. Smith in Christendom. Perish so vile a thought! The O forever! He would persist in the O. He would be as O-wy as O-wy could be.

Burning with the chivalry of this determination, the great Touch-and-go, in the next 'Tea-Pot', came out merely with this simple but resolute paragraph, in reference to this unhappy affair:

'The editor of the "Tea-Pot" has the *honour* of advising the editor of "The Gazette" that he (the "Tea-Pot") will take an opportunity in to-morrow morning's paper, of convincing him (the "Gazette") that he (the "Tea-Pot") both can and will be *his own master*, as regards style;—he (the "Tea-Pot") intending to show him (the "Gazette") the supreme, and indeed the withering contempt with which the criticism of him (the "Gazette") inspires the independent bosom of him (the "Tea-Pot") by composing for the especial gratification (?) of him (the "Gazette") a leading article, of some extent, in which the beautiful vowel—the emblem of Eternity—yet so inoffensive to the hyper-exquisite delicacy of him (the "Gazette") shall most certainly *not be avoided* by his (the "Gazette's") most obedient, humble servant, the "Tea-Pot". "So much for Buckingham!"'

In fulfilment of the awful threat thus darkly intimated rather than decidedly enunciated, the great Bullet-head, turning a deaf ear to all entreaties for 'copy', and simply requesting his foreman to 'go to the d——l', when he (the foreman) assured him (the 'Tea-Pot!') that it was high time to 'go to press': turning a deaf ear to everything, I say, the great Bullet-head sat up until day-break, consuming the midnight oil, and absorbed in the composition of the really unparalleled paragraph, which follows:

'So ho, John! how now? Told you so, you know. Don't crow, another time, before you're out of the woods! Does your mother *know* you're out? Oh, no, no!—so go home at once, now, John, to your odious old woods of Concord! Go home to your woods, old owl—go! You wont? Oh, poh, poh, John, don't do so! You've *got* to go.

you know ! So go at once, and don't go slow ; for nobody owns you here, you know. Oh, John, John, if you *don't* go you're no *homo*—no ! You're only a fowl, an owl ; a cow, a sow ; a doll, a poll ; a poor, old, good-for-nothing-to-nobody, log, dog, hog, or frog, come out of a Concord bog. Cool, now—cool ! *Do* be cool, you fool ! None of your crowing, old cock ! Don't frown so—don't ! Don't hollo, nor howl, nor growl, nor bow-wow-wow ! Good Lord, John, how you *do* look ! Told you so, you know—but stop rolling your goose of an old poll about so, and go and drown your sorrows in a bowl !'

Exhausted, very naturally, by so stupendous an effort, the great Touch-and-go could attend to nothing farther that night. Firmly, composedly, yet with an air of conscious power, he handed his MS. to the devil in waiting, and then, walking leisurely home, retired, with ineffable dignity, to bed.

Meantime the devil to whom the copy was entrusted, ran up stairs to his 'case', in an unutterable hurry, and forthwith made a commencement at 'setting' the MS. 'up'.

In the first place, of course—as the opening word was 'So'—he made a plunge into the capital S hole and came out in triumph with a capital S. Elated by this success, he immediately threw himself upon the little-o box with a blindfold impetuosity—but who shall describe his horror when his fingers came up without the anticipated letter in their clutch ? who shall paint his astonishment and rage at perceiving, as he rubbed his knuckles, that he had been only thumping them to no purpose, against the bottom of an *empty* box. Not a single little-o was in the little-o hole ; and, glancing fearfully at the capital-O partition, he found *that*, to his extreme terror, in a precisely similar predicament. Awe-stricken, his first impulse was to rush to the foreman.

'Sir !' said he, gasping for breath, 'I can't never set up nothing without no o's.'

'*What* do you mean by that ?' growled the foreman, who was in a very ill-humour at being kept up so late.

'Why, sir, there beant an o in the office, neither a big un nor a little un !'

'What—what the d——l has become of all that were in the case?'

'I don't know, sir,' said the boy, 'but one of them ere G'zette devils is bin prowling bout here all night, and I spect *he's* gone and cabbaged em every one.'

'Dod rot him! I haven't a doubt of it,' replied the foreman, getting purple with rage—'but I tell you what you do, Bob, that's a good boy—you go over the first chance you get and hook every one of their i's and (d—n them!) their izzards.'

'Jist so,' replied Bob, with a wink and a frown—'I'll be into em, I'll let em know a thing or two; but in de meantime, that ere paragrab? *Mus* go in to-night, you know—else there'll be the d——l to pay, and—'

'And not a *bit* of pitch hot,' interrupted the foreman, with a deep sigh and an emphasis on the 'bit'. 'Is it a *very* long paragraph, Bob?'

'Shouldn't call it a *very* long paragraph,' said Bob.

'Ah, well, then! do the best you can with it! we *must* get to press,' said the foreman, who was over head and ears in work; 'just stick in some other letter for o, nobody's going to read the fellow's trash, any how.'

'*Wery* well,' replied Bob, 'here goes it!' and off he hurried to his case; muttering as he went—'Considdeble vell, them ere expressions, perticcler for a man as doesn't swar. So I's to gouge out all their eyes, eh? and d——n all their gizzards! Vell! this here's the chap as is jist able *for* to do it.' The fact is, that although Bob was but twelve years old and four feet high, he was equal to any amount of fight, in a small way.

The exigency here described is by no means of rare occurrence in printing-offices; and I cannot tell how to account for it, but the fact is indisputable, that when the exigency *does* occur, it almost always happens that *x* is adopted as a substitute for the letter deficient. The true reason, perhaps, is that *x* is rather the most superabundant letter in the cases, or at least *was* so in old times—long enough to render the substitution in question an habitual thing with printers. As for Bob, he would have considered it heretical to employ any other character, in a case of this kind, than the *x* to which he had been accustomed.

'I *shell* have to x this ere paragrab,' said he to himself, as he read it over in astonishment, 'but it's jest about the awfulest o-wy paragrab I ever *did* see': so x it he did, unflinchingly, and to press it went *x-ed*.

Next morning the population of Nopolis were taken all aback by reading, in 'The Tea-Pot', the following extraordinary leader:

'Sx hx, Jxhn! h~~xw~~ n~~xw~~! T~~xld~~ yxu s~~x~~, yxu k~~n~~xw. D~~xn~~'t c~~rxw~~, an~~x~~ther time, bef~~xre~~ yxu're xut x~~f~~ the w~~x~~xds! D~~xes~~ yxur m~~x~~ther k~~n~~xw yxu're xut? Xh, n~~x~~, n~~x~~! s~~x~~ g~~x~~ h~~x~~me at x~~n~~ce, n~~xw~~, J~~x~~hn, t~~x~~ yxur x~~d~~ixus x~~ld~~ w~~x~~xds x~~f~~ C~~x~~nc~~x~~rd! G~~x~~ h~~x~~me t~~x~~ yxur w~~x~~xds, x~~ld~~ x~~w~~l—g~~x~~! Yxu w~~x~~nt? Xh, p~~x~~h, p~~x~~h, J~~x~~hn, d~~xn~~'t d~~x~~ s~~x~~! Yxu've g~~x~~t t~~x~~ g~~x~~, yxu k~~n~~xw! s~~x~~ g~~x~~ at x~~n~~ce, and d~~xn~~'t g~~x~~ s~~l~~xw; f~~xr~~ n~~x~~b~~x~~dy x~~w~~ns yxu here, yxu k~~n~~xw. Xh, J~~x~~hn, J~~x~~hn, if yxu d~~xn~~'t g~~x~~ yxu're n~~x~~ h~~x~~m~~x~~—n~~x~~! Yxu're x~~n~~ly a f~~x~~wl, an x~~w~~l; a c~~xw~~, a s~~xw~~; a d~~x~~ll, a p~~x~~ll; a p~~x~~xr x~~ld~~ g~~x~~x~~d~~-f~~xr~~-n~~x~~th~~ing~~-t~~x~~-n~~x~~b~~x~~dy l~~x~~g, d~~x~~g, h~~x~~g, x~~r~~ f~~r~~xg, c~~x~~me xut x~~f~~ a C~~x~~nc~~x~~rd b~~x~~g. C~~x~~xl, n~~xw~~—c~~x~~xl! D~~x~~ be c~~x~~xl, yxu f~~x~~xl! N~~x~~ne x~~f~~ yxur c~~r~~xwing, x~~ld~~ c~~x~~ck! D~~xn~~'t f~~r~~xwn s~~x~~—d~~xn~~'t! D~~xn~~'t h~~x~~llx, n~~xr~~ h~~x~~wl, n~~xr~~ g~~r~~xwl, n~~xr~~ b~~xw~~-w~~xw~~-w~~xw~~! G~~x~~x~~d~~ L~~x~~rd, J~~x~~hn, h~~xw~~ yxu d~~x~~ l~~x~~xk! T~~xld~~ yxu s~~x~~, yxu k~~n~~xw, but st~~x~~p r~~x~~lling yxur g~~x~~xse x~~f~~ an x~~ld~~ p~~x~~ll ab~~x~~ut s~~x~~, and g~~x~~ and d~~r~~xwn yxur s~~x~~r~~r~~xws in a b~~xw~~l!'

The uproar occasioned by this mystical and cabalistical article, is not to be conceived. The first definite idea entertained by the populace was, that some diabolical treason lay concealed in the hieroglyphics; and there was a general rush to Bullet-head's residence, for the purpose of riding him on a rail; but that gentleman was nowhere to be found. He had vanished, no one could tell how; and not even the ghost of him has ever been seen since.

Unable to discover its legitimate object, the popular fury at length subsided; leaving behind it, by way of sediment, quite a medley of opinion about this unhappy affair.

One gentleman thought the whole an X-ellent joke.

Another said that, indeed, Bullet-head had shown much X-uberance of fancy.

A third admitted him X-entric, but no more.

A fourth could only suppose it the Yankee's design to X-press, in a general way, his X-asperation.

'Say, rather, to set an X-ample to posterity,' suggested a fifth.

That Bullet-head had been driven to an extremity, was clear to all; and in fact, since *that* editor could not be found, there was some talk about lynching the other one.

The more common conclusion, however, was, that the affair was, simply, X-traordinary and in-X-plicable. Even the town mathematician confessed that he could make nothing of so dark a problem. X, everybody knew, was an unknown quantity; but in this case (as he properly observed), there was an unknown quantity of X.

The opinion of Bob, the devil (who kept dark 'about his having X-ed the paragrab'), did not meet with so much attention as I think it deserved, although it was very openly and very fearlessly expressed. He said that, for his part, he had no doubt about the matter at all, that it was a clear case, that Mr. Bullet-head never *could* be persvaded fur to drink like other folks, but vas continually a-svigging o' that ere blessed XXX ale, and, as a naiteral consekvence, it just puffed him up savage, and made him X (cross) in the X-treme.

## DIDDLELING

### CONSIDERED AS ONE OF THE EXACT SCIENCES

Hey, diddle diddle,  
The cat and the fiddle.

SINCE the world began there have been two Jeremys. The one wrote a Jeremiad about usury, and was called Jeremy Bentham. He has been much admired by Mr. John Neal, and was a great man in a small way. The other gave name to the most important of the Exact Sciences, and was a great man in a *great* way—I may say, indeed, in the very greatest of ways.

Diddling—or the abstract idea conveyed by the verb to diddle—is sufficiently well understood. Yet the fact, the deed, the thing *diddling*, is somewhat difficult to define. We may get, however, at a tolerably distinct conception of the matter in hand, by defining—not the thing, diddling, in itself—but man, as an animal that diddles. Had Plato

but hit upon this, he would have been spared the affront of the picked chicken.

Very pertinently it was demanded of Plato, why a picked chicken, which was clearly a 'biped without feathers', was not, according to his own definition, a man? But I am not to be bothered by any similar query. Man is an animal that diddles, and there is *no* animal that diddles *but* man. It will take an entire hen-coop of picked chickens to get over that.

What constitutes the essence, the nature, the principle of diddle is, in fact, peculiar to the class of creatures that wear coats and pantaloons. A crow thievs; a fox cheats; a weasel outwits; a man diddles. To diddle is his destiny. 'Man was made to mourn,' says the poet. But not so:—he was made to diddle. This is his aim—his object—his *end*. And for this reason when a man's diddled we say he's 'done'.

Diddle, rightly considered, is a compound, of which the ingredients are minuteness, interest, perseverance, ingenuity, audacity, *nonchalance*, originality, impertinence, and *grin*.

*Minuteness* :—Your didler is minute. His operations are upon a small scale. His business is retail, for cash, or approved paper at sight. Should he ever be tempted into magnificent speculation, he then, at once, loses his distinctive features, and becomes what we term 'financier'. This latter word conveys the diddle idea in every respect except that of magnitude. A didler may thus be regarded as a banker *in petto*—a 'financial operation', as a diddle at Brobdignag. The one is to the other, as Homer to 'Flaccus'—as a Mastodon to a mouse—as the tail of a comet to that of a pig.

*Interest* :—Your didler is guided by self-interest. He scorns to diddle for the mere *sake* of the diddle. He has an object in view—his pocket—and yours. He regards always the main chance. He looks to Number One. You are Number Two, and must look to yourself.

*Perseverance* :—Your didler perseveres. He is not readily discouraged. Should even the banks break, he cares nothing about it. He steadily pursues his end, and

*Ut canis a corio nunquam absterrebitur uncto,*  
so he never lets go of his game.

*Ingenuity* :—Your didler is ingenious. He has constructiveness large. He understands plot. He invents and

circumvents. Were he not Alexander he would be Diogenes. Were he not a diddler, he would be a maker of patent rat-traps or an angler for trout.

*Audacity* :—Your diddler is audacious. He is a bold man. He carries the war into Africa. He conquers all by assault. He would not fear the daggers of the Frey Herren. With a little more prudence Dick Turpin would have made a good diddler ; with a trifle less blarney, Daniel O'Connell ; with a pound or two more brains, Charles the Twelfth.

*Nonchalance* :—Your diddler is *nonchalant*. He is not at all nervous. He never *had* any nerves. He is never seduced into a flurry. He is never put out—unless put out of doors. He is cool—cool as a cucumber. He is calm—' calm as a smile from Lady Bury '. He is easy—easy as an old glove, or the damsels of ancient Baia.

*Originality* :—Your diddler is original—conscientiously so. His thoughts are his own. He would scorn to employ those of another. A stale trick is his aversion. He would return a purse, I am sure, upon discovering that he had obtained it by an unoriginal diddle.

*Impertinence* :—Your diddler is impertinent. He swaggers. He sets his arms a-kimbo. He thrusts his hands in his trowsers' pockets. He sneers in your face. He treads on your corns. He eats your dinner, he drinks your wine, he borrows your money, he pulls your nose, he kicks your poodle, and he kisses your wife.

*Grin* :—Your *true* diddler winds up all with a grin. But this nobody sees but himself. He grins when his daily work is done—when his allotted labours are accomplished—at night in his own closet, and altogether for his own private entertainment. He goes home. He locks his door. He divests himself of his clothes. He puts out his candle. He gets into bed. He places his head upon the pillow. All this done, and your diddler *grins*. This is no hypothesis. It is a matter of course. I reason *a priori*, and a diddle would be *no* diddle without a grin.

The origin of the diddle is referable to the infancy of the Human Race. Perhaps the first diddler was Adam. At all events, we can trace the science back to a very remote period of antiquity. The moderns, however, have brought it to a perfection never dreamed of by our thick-headed

progenitors. Without pausing to speak of the 'old saws', therefore, I shall content myself with a compendious account of some of the more 'modern instances'.

A very good diddle is this. A housekeeper in want of a sofa, for instance, is seen to go in and out of several cabinet warehouses. At length she arrives at one offering an excellent variety. She is accosted, and invited to enter, by a polite and voluble individual at the door. She finds a sofa well adapted to her views, and, upon inquiring the price, is surprised and delighted to hear a sum named at least twenty per cent. lower than her expectations. She hastens to make the purchase, gets a bill and receipt, leaves her address, with a request that the article be sent home as speedily as possible, and retires amid a profusion of bows from the shop-keeper. The night arrives and no sofa. The next day passes, and still none. A servant is sent to make inquiry about the delay. The whole transaction is denied. No sofa has been sold—no money received—except by the diddler, who played shop-keeper for the nonce.

Our cabinet warehouses are left entirely unattended, and thus afford every facility for a trick of this kind. Visitors enter, look at furniture, and depart unheeded and unseen. Should any one wish to purchase, or to inquire the price of an article, a bell is at hand, and this is considered amply sufficient.

Again, quite a respectable diddle is this. A well-dressed individual enters a shop; makes a purchase to the value of a dollar; finds, much to his vexation, that he has left his pocket-book in another coat pocket; and so says to the shop-keeper—

'My dear sir, never mind!—just oblige me, will you, by sending the bundle home? But stay! I really believe that I have nothing less than a five dollar bill, even *there*. However, you can send four dollars in change *with* the bundle, you know.'

'Very good, sir,' replies the shop-keeper, who entertains, at once, a lofty opinion of the high-mindedness of his customer. 'I know fellows', he says to himself, 'who would just have put the goods under their arm, and walked off with a promise to call and pay the dollar as they came by in the afternoon.'

A boy is sent with the parcel and change. On the route, quite accidentally, he is met by the purchaser, who exclaims: 'Ah! this is my bundle, I see—I thought you had been home with it, long ago. Well, go on! My wife, Mrs. Trotter, will give you the five dollars—I left instructions with her to that effect. The change you might as well give to *me*—I shall want some silver for the Post Office. Very good! One, two, is this a good quarter?—three, four—quite right! Say to Mrs. Trotter that you met me, and be sure now and *do not loiter on the way.*'

The boy doesn't loiter at all—but he is a very long time in getting back from his errand—for no lady of the precise name of Mrs. Trotter is to be discovered. He consoles himself, however, that he has not been such a fool as to leave the goods without the money, and re-entering his shop with a self-satisfied air, feels sensibly hurt and indignant when his master asks him what has become of the change.

A very simple diddle, indeed, is this. The captain of a ship which is about to sail, is presented by an official-looking person, with an unusually moderate bill of city charges. Glad to get off so easily, and confused by a hundred duties pressing upon him all at once, he discharges the claim forthwith. In about fifteen minutes, another and less reasonable bill is handed him by one who soon makes it evident that the first collector was a diddler, and the original collection a diddle.

And here, too, is a somewhat similar thing. A steamboat is casting loose from the wharf. A traveller, portmanteau in hand, is discovered running towards the wharf at full speed. Suddenly, he makes a dead halt, stoops, and picks up something from the ground in a very agitated manner. It is a pocket-book, and—'Has any gentleman lost a pocket-book?' he cries. No one can say that he has exactly lost a pocket-book; but a great excitement ensues, when the treasure trove is found to be of value. The boat however, must not be detained.

'Time and tide wait for no man,' says the captain.

'For God's sake, stay only a few minutes,' says the finder of the book—'the true claimant will presently appear.'

'Can't wait!' replies the man in authority; 'cast off there, d'ye hear?'

'What *am* I to do?' asks the finder, in great tribulation. 'I am about to leave the country for some years, and I cannot conscientiously retain this large amount in my possession. I beg your pardon, sir,' [here he addresses a gentleman on shore] 'but you have the air of an honest man. Will you confer upon me the favour of taking charge of this pocket-book—I *know* I can trust you—and of advertising it? The notes, you see, amount to a very considerable sum. The owner will, no doubt, insist upon rewarding you for your trouble—'

'*Me!*—no, *you!*—it was *you* who found the book.'

'Well, if you *must* have it so—I will take a small reward—just to satisfy your scruples. Let me see—why these notes are all hundreds—bless my soul! a hundred is too much to take—fifty would be quite enough, I am sure—'

'Cast off there!' says the captain.

'But then I have no change for a hundred, and upon the whole, *you* had better—'

'Cast off there!' says the captain.

'Never mind!' cries the gentleman on shore, who has been examining his own pocket-book for the last minute or so—'never mind! I can fix it—here is a fifty on the Bank of North America—throw me the book.'

And the over-conscientious finder takes the fifty with marked reluctance, and throws the gentleman the book, as desired, while the steamboat fumes and fizzles on her way. In about half an hour after her departure, the 'large amount' is seen to be a 'counterfeit presentment', and the whole thing a capital diddle.

A bold diddle is this. A camp-meeting, or something similar, is to be held at a certain spot which is accessible only by means of a free bridge. A diddler stations himself upon this bridge, respectfully informs all passers by of the new county law, which establishes a toll of one cent for foot passengers, two for horses and donkeys, and so forth, and so forth. Some grumble but all submit, and the diddler goes home a wealthier man by some fifty or sixty dollars well earned. This taking a toll from a great crowd of people is an excessively troublesome thing.

A neat diddle is this. A friend holds one of the diddler's promises to pay, filled up and signed in due form, upon the ordinary blanks printed in red ink. The diddler purchases one or two dozen of these blanks, and every day dips one of them in his soup, makes his dog jump for it, and finally gives it to him as a *bonne bouche*. The note arriving at maturity, the diddler, with the diddler's dog, calls upon the friend, and the promise to pay is made the topic of discussion. The friend produces it from his *escritoire*, and is in the act of reaching it to the diddler, when up jumps the diddler's dog and devours it forthwith. The diddler is not only surprised but vexed and incensed at the absurd behaviour of his dog, and expresses his entire readiness to cancel the obligation at any moment when the evidence of the obligation shall be forthcoming.

A very minute diddle is this. A lady is insulted in the street by a diddler's accomplice. The diddler himself flies to her assistance, and, giving his friend a comfortable thrashing, insists upon attending the lady to her own door. He bows, with his hand upon his heart, and most respectfully bids her adieu. She entreats him, as her deliverer, to walk in and be introduced to her big brother and her papa. With a sigh, he declines to do so. 'Is there no way, then, sir,' she murmurs, 'in which I may be permitted to testify my gratitude?'

'Why, yes, madam, there is. Will you be kind enough to lend me a couple of shillings?'

In the first excitement of the moment the lady decides upon fainting outright. Upon second thought, however, she opens her purse-strings and delivers the specie. Now this, I say, is a diddle minute—for one entire moiety of the sum borrowed has to be paid to the gentleman who had the trouble of performing the insult, and who had then to stand still and be thrashed for performing it.

Rather a small, but still a scientific diddle is this. The diddler approaches the bar of a tavern, and demands a couple of twists of tobacco. These are handed to him, when, having slightly examined them, he says:

'I don't much like this tobacco. Here, take it back, and give me a glass of brandy and water in its place.'

The brandy and water is furnished and imbibed, and the

diddler makes his way to the door. But the voice of the tavern-keeper arrests him.

'I believe, sir, you have forgotten to pay for your brandy and water.'

'Pay for my brandy and water!—didn't I give you the tobacco for the brandy and water? What more would you have?'

'But sir, if you please, I don't remember that you paid for the tobacco.'

'What do you mean by that, you scoundrel?—Didn't I give you back your tobacco? Isn't *that* your tobacco lying *there*? Do you expect me to pay for what I did not take?'

'But, sir,' says the publican, now rather at a loss what to say, 'but sir—'

'But me no buts, sir,' interrupts the diddler, apparently in very high dudgeon, and slamming the door after him, as he makes his escape.—'But me no buts, sir, and none of your tricks upon travellers.'

Here again is a very clever diddle, of which the simplicity is not its least recommendation. A purse, or pocket-book, being really lost, the loser inserts in *one* of the daily papers of a large city a fully descriptive advertisement.

Whereupon our diddler copies the *facts* of this advertisement, with a change of heading, of general phraseology, and *address*. The original, for instance, is long, and verbose, is headed 'A Pocket-Book Lost!' and requires the treasure, when found, to be left at No. 1 Tom street. The copy is brief, and being headed with 'Lost' only, indicates No. 2 Dick, or No. 3 Harry street, as the locality at which the owner may be seen. Moreover, it is inserted in at least five or six of the daily papers of the day, while in point of time, it makes its appearance only a few hours after the original. Should it be read by the loser of the purse, he would hardly suspect it to have any reference to his own misfortune. But, of course, the chances are five or six to one, that the finder will repair to the address given by the diddler, rather than to that pointed out by the rightful proprietor. The former pays the reward, pockets the treasure, and decamps.

Quite an analogous diddle is this. A lady of ton has

dropped, somewhere in the street, a diamond ring of very unusual value. For its recovery, she offers some forty or fifty dollars reward—giving, in her advertisement, a very minute description of the gem, and of its settings, and declaring that, upon its restoration to No. so and so, in such and such Avenue, the reward will be paid *instantly*, without a single question being asked. During the lady's absence from home, a day or two afterwards, a ring is heard at the door of No. so and so, in such and such Avenue ; a servant appears ; the lady of the house is asked for and is declared to be out, at which astounding information, the visitor expresses the most poignant regret. His business is of importance and concerns the lady herself. In fact, he had the good fortune to find her diamond ring. But, perhaps it would be as well that he should call again. ' By no means ! ' says the servant ; and ' By no means ! ' says the lady's sister and the lady's sister-in-law, who are summoned forthwith. The ring is clamorously identified, the reward is paid, and the finder nearly thrust out of doors. The lady returns, and expresses some little dissatisfaction with her sister and sister-in-law, because they happen to have paid forty or fifty dollars for a *fac-simile* of her diamond ring—a *fac-simile* made out of real pinchbeck and unquestionable paste.

But as there is really no end to diddling, so there would be none to this essay, were I even to hint at half the variations, or inflections, of which this science is susceptible. I must bring this paper, perforce, to a conclusion, and this I cannot do better than by a summary notice of a very decent, but rather elaborate diddle, of which our own city was made the theatre, not very long ago, and which was subsequently repeated with success, in other still more verdant localities of the Union. A middle-aged gentleman arrives in town from parts unknown. He is remarkably precise, cautious, staid, and deliberate in his demeanour. His dress is scrupulously neat, but plain, unostentatious. He wears a white cravat, an ample waistcoat, made with an eye to comfort alone ; thick-soled cosy-looking shoes, and pantaloons without straps. He has the whole air, in fact, of your well-to-do, sober-sided, exact, and respectable ' man of business ', *par excellence*—one of the stern

and outwardly hard, internally soft, sort of people that we see in the crack high comedies—fellows whose words are so many bonds, and who are noted for giving away guineas, in charity, with the one hand, while, in the way of mere bargain, they exact the uttermost fraction of a farthing with the other.

He makes much ado before he can get suited with a boarding-house. He dislikes children. He has been accustomed to quiet. His habits are methodical—and then he would prefer getting into a private and respectable small family, piously inclined. Terms, however, are no object—only he must insist upon settling his bill on the first of every month (it is now the second), and begs his landlady, when he finally obtains one to his mind, *not* on any account to forget his instructions upon this point—but to send in a bill, *and* receipt, precisely at ten o'clock, on the *first* day of every month, and under no circumstances to put it off to the second.

These arrangements made, our man of business rents an office in a reputable rather than in a fashionable quarter of the town. There is nothing he more despises than pretence. 'Where there is much show,' he says, 'there is seldom anything very solid behind'—an observation which so profoundly impresses his landlady's fancy, that she makes a pencil memorandum of it forthwith, in her great family Bible, on the broad margin of the Proverbs of Solomon.

The next step is to advertise, after some such fashion as this, in the principal business sixpennies of this city—the pennies are eschewed as not 'respectable'—and as demanding payment for all advertisements in advance. Our man of business holds it as a point of his faith that work should never be paid for until done.

**WANTED.**—The advertisers, being about to commence extensive business operations in this city, will require the services of three or four intelligent and competent clerks, to whom a liberal salary will be paid. The very best recommendations, not so much for capacity, as for integrity, will be expected. Indeed, as the duties to be performed, involve high responsibilities, and large amounts of money must necessarily pass through the hands of those engaged,

## 514 DIDDLE AS ONE OF THE EXACT SCIENCE

it is deemed advisable to demand a deposit of fifty dollars from each clerk employed. No person need apply, therefore, who is not prepared to leave this sum in the possession of the advertisers, and who cannot furnish the most satisfactory testimonials of morality. Young gentlemen piously inclined will be preferred. Application should be made between the hours of ten and eleven, A.M., and four and five, P.M., of Messrs.

Bogs, Hogs, Logs, Frogs, & Co.  
No. 110 Dog Street.

By the thirty-first day of the month, this advertisement has brought to the office of Messrs. Bogs, Hogs, Logs, Frogs, and Company, some fifteen or twenty young gentlemen piously inclined. But our man of business is in no hurry to conclude a contract with any—no man of business is *ever* precipitate—and it is not until the most rigid catechism in respect to the piety of each young gentleman's inclination, that his services are engaged and his fifty dollars receipted for, *just* by way of proper precaution, on the part of the respectable firm of Bogs, Hogs, Logs, Frogs, and Company. On the morning of the first day of the next month, the landlady does *not* present her bill, according to promise—a piece of neglect for which the comfortable head of the house ending in *ogs*, would no doubt have chided her severely, could he have been prevailed upon to remain in town a day or two for that purpose.

As it is, the constables have had a sad time of it, running hither and thither, and all they can do is to declare the man of business most emphatically, a 'hen knee high'—by which some persons imagine them to imply that, in fact, he is n. e. i.—by which again the very classical phrase *non est inventus*, is supposed to be understood. In the meantime the young gentlemen, one and all, are somewhat less piously inclined than before, while the landlady purchases a shilling's worth of the best Indian rubber, and very carefully obliterates the pencil memorandum that some fool has made in her great family Bible, on the broad margin of the Proverbs of Solomon.

## THE ANGEL OF THE ODD

## AN EXTRAVAGANZA

It was a chilly November afternoon. I had just consumed an unusually hearty dinner, of which the dyspeptic *truffe* formed not the least important item, and was sitting alone in the dining-room, with my feet upon the fender, and at my elbow a small table which I had rolled up to the fire, and upon which were some apologies for dessert, with some miscellaneous bottles of wine, spirit, and *liqueur*. In the morning I had been reading Glover's 'Leonidas', Wilkie's 'Epigoniad', Lamartine's 'Pilgrimage', Barlow's 'Columbiad', Tuckerman's 'Sicily', and Griswold's 'Curiosities'; I am willing to confess, therefore, that I now felt a little stupid. I made effort to arouse myself by aid of frequent Lafitte, and, all failing, I betook myself to a stray newspaper in despair. Having carefully perused the column of 'houses to let', and the column of 'dogs lost', and then the two columns of 'wives and apprentices runaway', I attacked with great resolution the editorial matter, and, reading it from beginning to end without understanding a syllable, conceived the possibility of its being Chinese, and so re-read it from the end to the beginning, but with no more satisfactory result. I was about throwing away, in disgust,

This folio of four pages, happy work  
Which not even critics criticise,

when I felt my attention somewhat aroused by the paragraph which follows:

'The avenues to death are numerous and strange. A London paper mentions the decease of a person from a singular cause. He was playing at "puff the dart", which is played with a long needle inserted in some worsted, and blown at a target through a tin tube. He placed the needle at the wrong end of the tube, and drawing his breath strongly to puff the dart forward with force, drew the needle into his throat. It entered the lungs, and in a few days killed him.'

Upon seeing this I fell into a great rage, without exactly

knowing why. 'This thing', I exclaimed, 'is a contemptible falsehood—a poor hoax—the lees of the invention of some pitiable penny-a-liner—of some wretched concocter of accidents in Cogaigue. These fellows, knowing the extravagant gullibility of the age, set their wits to work in the imagination of improbable possibilities—of odd accidents, as they term them; but to a reflecting intellect (like mine', I added, in parenthesis, putting my forefinger unconsciously to the side of my nose), 'to a contemplative understanding such as I myself possess, it seems evident at once that the marvellous increase of late in these "odd accidents" is by far the oddest accident of all. For my own part, I intend to believe nothing henceforward that has anything of the "singular" about it.'

'Mein Gott, den, vat a vool you bees for dat!' replied one of the most remarkable voices I ever heard. At first I took it for a rumbling in my ears—such as a man sometimes experiences when getting very drunk—but, upon second thought, I considered the sound as more nearly resembling that which proceeds from an empty barrel beaten with a big stick; and, in fact, this I should have concluded it to be, but for the articulation of the syllables and words. I am by no means naturally nervous, and the very few glasses of Lafitte which I had sipped served to embolden me a little, so that I felt nothing of trepidation, but merely uplifted my eyes with a leisurely movement, and looked carefully around the room for the intruder. I could not, however, perceive any one at all.

'Humph!' resumed the voice, as I continued my survey, 'you mus pe so dronk as de pig, den, for not zee me as I zit here at your zide.'

Hereupon I bethought me of looking immediately before my nose, and there, sure enough, confronting me at the table sat a personage nondescript, although not altogether indescribable. His body was a wine-pipe, or a rum-puncheon, or something of that character, and had a truly Falstaffian air. In its nether extremity were inserted two kegs, which seemed to answer all the purposes of legs. For arms there dangled from the upper portion of the carcass two tolerably long bottles, with the necks outward for hands. All the head that I saw the monster possessed

of was one of those Hessian canteens which resemble a large snuff-box with a hole in the middle of the lid. This canteen (with a funnel on its top, like a cavalier cap slouched over the eyes) was set on edge upon the puncheon, with the hole toward myself; and through this hole, which seemed puckered up like the mouth of a very precise old maid, the creature was emitting certain rumbling and grumbling noises which he evidently intended for intelligible talk.

'I zay', said he, 'you mos pe dronk as de pig, vor zit dare and not zee me zit ere; and I zay, doo, you mos pe pigger vool as de goose, vor to dispelief vat iz print in de print. 'Tiz de troof—dat it iz—eberry vord ob it.'

'Who are you, pray?' said I, with much dignity, although somewhat puzzled; 'how did you get here? and what is it you are talking about?'

'As vor ow I com'd ere,' replied the figure, 'dat iz none of your pizziness; and as vor vat I be talking apout, I be talk apout vat I tink proper; and as vor who I be, vy dat is de very ting I com'd here for to let you zee for yourself.'

'You are a drunken vagabond,' said I, 'and I shall ring the bell and order my footman to kick you into the street.'

'He! he! he!' said the fellow, 'hu! hu! hu! dat you can't do.'

'Can't do!' said I, 'what do you mean?—I can't do what?'

'Ring de pell,' he replied, attempting a grin with his little villanous mouth.

Upon this I made an effort to get up, in order to put my threat into execution; but the ruffian just reached across the table very deliberately, and hitting me a tap on the forehead with the neck of one of the long bottles, knocked me back into the arm-chair from which I had half arisen. I was utterly astounded; and, for a moment, was quite at a loss what to do. In the meantime, he continued his talk.

'You zee,' said he, 'it iz te bess vor zit still; and now you shall know who I pe. Look at me! zee! I am te *Angel ov te Odd*.'

'And odd enough, too,' I ventured to reply; 'but I was always under the impression that an angel had wings.'

‘Te wing!’ he cried, highly incensed, ‘vat I pe do mit te wing? Mein Gott! do you take me vor a shicken?’

‘No—oh no!’ I replied, much alarmed, ‘you are no chicken—certainly not.’

‘Well, den, zit still and pehabe yourself, or I’ll rap you again mid me vist. It iz te shicken ab te wing, und te owl ab te wing, und te imp ab te wing, und te head-teuffel ab te wing. Te angel ab *not* te wing, and I am te *Angel ov te Odd*.’

‘And your business with me at present is—is—’

‘My pizziness!’ ejaculated the thing, ‘vy vat a low bred buppy you mos pe vor to ask a gentleman und an angel about his pizziness!’

This language was rather more than I could bear, even from an angel; so, plucking up courage, I seized a salt-cellar which lay within reach, and hurled it at the head of the intruder. Either he dodged, however, or my aim was inaccurate; for all I accomplished was the demolition of the crystal which protected the dial of the clock upon the mantel-piece. As for the Angel, he evinced his sense of my assault by giving me two or three hard consecutive raps upon the forehead as before. These reduced me at once to submission, and I am almost ashamed to confess that either through pain or vexation, there came a few tears into my eyes.

‘Mein Gott!’ said the Angel of the Odd, apparently much softened at my distress; ‘mein Gott, te man is eder ferry drunk or ferry zorry. You mos not trink it so strong—you mos put te water in te wine. Here, trink dis, like a goot veller, und don’t gry now—don’t!’

Hereupon the Angel of the Odd replenished my goblet (which was about a third full of port) with a colourless fluid that he poured from one of his hand bottles. I observed that these bottles had labels about their necks, and that these labels were inscribed ‘Kirschwasser’.

The considerate kindness of the Angel mollified me in no little measure; and, aided by the water with which he diluted my port more than once, I at length regained sufficient temper to listen to his very extraordinary discourse. I cannot pretend to recount all that he told me, but I gleaned from what he said that he was the genius

who presided over the *contretemps* of mankind, and whose business it was to bring about the *odd accidents* which are continually astonishing the sceptic. Once or twice, upon my venturing to express my total incredulity in respect to his pretensions, he grew very angry indeed, so that at length I considered it the wiser policy to say nothing at all, and let him have his own way. He talked on, therefore, at great length, while I merely leaned back in my chair with my eyes shut, and amused myself with munching raisins and filiping the stems about the room. But, by-and-by, the Angel suddenly construed this behaviour of mine into contempt. He arose in a terrible passion, slouched his funnel down over his eyes, swore a vast oath, uttered a threat of some character which I did not precisely comprehend, and finally made me a low bow and departed, wishing me, in the language of the archbishop in *Gil-Blas*, '*beaucoup de bonheur et un peu plus de bon sens*'.

His departure afforded me relief. The *very* few glasses of Lafitte that I had sipped had the effect of rendering me drowsy, and I felt inclined to take a nap of some fifteen or twenty minutes, as is my custom after dinner. At six I had an appointment of consequence, which it was quite indispensable that I should keep. The policy of insurance for my dwelling house had expired the day before; and, some dispute having arisen, it was agreed that, at six, I should meet the board of directors of the company and settle the terms of a renewal. Glancing upward at the clock on the mantel-piece (for I felt too drowsy to take out my watch), I had the pleasure to find that I had still twenty-five minutes to spare. It was half past five; I could easily walk to the insurance office in five minutes; and my usual siestas had never been known to exceed five and twenty. I felt sufficiently safe, therefore, and composed myself to my slumbers forthwith.

Having completed them to my satisfaction, I again looked toward the time-piece and was half inclined to believe in the possibility of odd accidents when I found that, instead of my ordinary fifteen or twenty minutes, I had been dozing only three; for it still wanted seven and twenty of the appointed hour. I betook myself again to my nap, and at length a second time awoke, when, to

my utter amazement, it *still* wanted twenty-seven minutes of six. I jumped up to examine the clock, and found that it had ceased running. My watch informed me that it was half past seven; and, of course, having slept two hours, I was too late for my appointment. 'It will make no difference,' I said: 'I can call at the office in the morning and apologize; in the meantime what can be the matter with the clock?' Upon examining it I discovered that one of the raisin stems which I had been flippin' about the room during the discourse of the Angel of the Odd, had flown through the fractured crystal, and lodging, singularly enough, in the key-hole, with an end projecting outward, had thus arrested the revolution of the minute hand.

'Ah!' said I, 'I see how it is. This thing speaks for itself. A natural accident, such as *will* happen now and then!'

I gave the matter no further consideration, and at my usual hour retired to bed. Here, having placed a candle upon a reading stand at the bed head, and having made an attempt to peruse some pages of the 'Omnipresence of the Deity', I unfortunately fell asleep in less than twenty seconds, leaving the light burning as it was.

My dreams were terrifically disturbed by visions of the Angel of the Odd. Methought he stood at the foot of the couch, drew aside the curtains, and, in the hollow, detestable tones of a rum puncheon, menaced me with the bitterest vengeance for the contempt with which I had treated him. He concluded a long harangue by taking off his funnel-cap, inserting the tube into my gullet, and thus deluging me with an ocean of Kirschwasser, which he poured, in a continuous flood, from one of the long-necked bottles that stood him instead of an arm. My agony was at length insufferable, and I awoke just in time to perceive that a rat had run off with the lighted candle from the stand, but *not* in season to prevent his making his escape with it through the hole. Very soon, a strong suffocating odour assailed my nostrils; the house, I clearly perceived, was on fire. In a few minutes the blaze broke forth with violence, and in an incredibly brief period the entire building was wrapped in flames. All egress from my chamber, except through a window, was cut off. The crowd, however, quickly pro-

cured and raised a long ladder. By means of this I was descending rapidly, and in apparent safety, when a huge hog, about whose rotund stomach, and indeed about whose whole air and physiognomy, there was something which reminded me of the Angel of the Odd—when this hog, I say, which hitherto had been quietly slumbering in the mud, took it suddenly into his head that his left shoulder needed scratching, and could find no more convenient rubbing-post than that afforded by the foot of the ladder. In an instant I was precipitated and had the misfortune to fracture my arm.

This accident, with the loss of my insurance, and with the more serious loss of my hair, the whole of which had been singed off by the fire, predisposed me to serious impressions, so that, finally, I made up my mind to take a wife. There was a rich widow disconsolate for the loss of her seventh husband, and to her wounded spirit I offered the balm of my vows. She yielded a reluctant consent to my prayers. I knelt at her feet in gratitude and adoration. She blushed and bowed her luxuriant tresses into close contact with those supplied me, temporarily, by Grandjean. I know not how the entanglement took place, but so it was. I arose with a shining pate, wigless; she in disdain and wrath, half buried in alien hair. Thus ended my hopes of the widow by an accident which could not have been anticipated, to be sure, but which the natural sequence of events had brought about.

Without despairing, however, I undertook the siege of a less implacable heart. The fates were again propitious for a brief period; but again a trivial incident interfered. Meeting my betrothed in an avenue thronged with the *élite* of the city, I was hastening to greet her with one of my best considered bows, when a small particle of some foreign matter, lodging in the corner of my eye, rendered me, for the moment, completely blind. Before I could recover my sight, the lady of my love had disappeared—irreparably affronted at what she chose to consider my premeditated rudeness in passing her by ungreeted. While I stood bewildered at the suddenness of this accident (which might have happened, nevertheless, to any one under the sun), and while I still continued incapable of sight, I was

accosted by the Angel of the Odd, who proffered me his aid with a civility which I had no reason to expect. He examined my disordered eye with much gentleness and skill, informed me that I had a drop in it, and (whatever a 'drop' was) took it out, and afforded me relief.

I now considered it high time to die (since fortune had so determined to persecute me), and accordingly made my way to the nearest river. Here, divesting myself of my clothes (for there is no reason why we cannot die as we were born), I threw myself headlong into the current; the sole witness of my fate being a solitary crow that had been seduced into the eating of brandy-saturated corn, and so had staggered away from his fellows. No sooner had I entered the water than this bird took it into his head to fly away with the most indispensable portion of my apparel. Postponing, therefore, for the present, my suicidal design, I just slipped my nether extremities into the sleeves of my coat, and betook myself to a pursuit of the felon with all the nimbleness which the case required and its circumstances would admit. But my evil destiny attended me still. As I ran at full speed, with my nose up in the atmosphere, and intent only upon the purloiner of my property, I suddenly perceived that my feet rested no longer upon *terra-firma*; the fact is, I had thrown myself over a precipice, and should inevitably have been dashed to pieces but for my good fortune in grasping the end of a long guide-rope, which depended from a passing balloon.

As soon as I sufficiently recovered my senses to comprehend the terrific predicament in which I stood or rather hung, I exerted all the power of my lungs to make that predicament known to the aeronaut overhead. But for a long time I exerted myself in vain. Either the fool could not, or the villain would not perceive me. Meantime the machine rapidly soared, while my strength even more rapidly failed. I was soon upon the point of resigning myself to my fate, and dropping quietly into the sea, when my spirits were suddenly revived by hearing a hollow voice from above, which seemed to be lazily humming an opera air. Looking up, I perceived the Angel of the Odd. He was leaning with his arms folded, over the rim of the car; and with a pipe in his mouth, at which he puffed leisurely,

seemed to be upon excellent terms with himself and the universe. I was too much exhausted to speak, so I merely regarded him with an imploring air.

For several minutes, although he looked me full in the face, he said nothing. At length removing carefully his meerschaum from the right to the left corner of his mouth, he condescended to speak.

'Who pe you,' he asked, 'und what der teuffel you pe do dare?'

To this piece of impudence, cruelty, and affectation, I could reply only by ejaculating the monosyllable 'Help!'

'Elp!' echoed the ruffian—'not I. Dare iz te pottle—elp yourself, und pe tam'd!'

With these words he let fall a heavy bottle of Kirsch-wasser which, dropping precisely upon the crown of my head, caused me to imagine that my brains were entirely knocked out. Impressed with this idea, I was about to relinquish my hold and give up the ghost with a good grace, when I was arrested by the cry of the Angel, who bade me hold on.

'Old on!' he said; 'don't pe in te urry—don't! Will you pe take de odder pottle, or ave you pe got zober yet and come to your zenzen?'

I made haste, hereupon, to nod my head twice—once in the negative, meaning thereby that I would prefer not taking the other bottle at present—and once in the affirmative, intending thus to imply that I *was* sober and *had* positively come to my senses. By these means I somewhat softened the Angel.

'Und you pelief, ten,' he inquired, 'at te last? You pelief, ten, in te possibility of te odd?'

I again nodded my head in assent.

'Und you ave pelief in *me*, te Angel of te Odd?'

I nodded again.

'Und you acknowledge tat you pe te blind dronk und te vool?'

I nodded once more.

'Put your right hand into your left hand preeches pocket, ten, in token ov your vull zubmizzion unto te Angel ov te Odd.'

This thing, for very obvious reasons, I found it quite

impossible to do. In the first place, my left arm had been broken in my fall from the ladder, and, therefore, had I let go my hold with the right hand, I must have let go altogether. In the second place, I could have no breeches until I came across the crow. I was therefore obliged, much to my regret, to shake my head in the negative—intending thus to give the Angel to understand that I found it inconvenient, just at that moment, to comply with his very reasonable demand! No sooner, however, had I ceased shaking my head than—

‘Go to der teuffel, ten!’ roared the Angel of the Odd.

In pronouncing these words, he drew a sharp knife across the guide-rope by which I was suspended, and as we then happened to be precisely over my own house (which, during my peregrinations, had been handsomely rebuilt), it so occurred that I tumbled headlong down the ample chimney and alit upon the dining-room hearth.

Upon coming to my senses (for the fall had very thoroughly stunned me), I found it about four o’clock in the morning. I lay outstretched where I had fallen from the balloon. My head grovelled in the ashes of an extinguished fire, while my feet reposed upon the wreck of a small table, overthrown, and amid the fragments of a miscellaneous dessert, intermingled with a newspaper, some broken glasses and shattered bottles, and an empty jug of the Schiedam Kirschwasser. Thus revenged himself the Angel of the Odd.

## MELLONTA TAUTA

ON BOARD BALLOON ‘SKYLARK’, April 1, 2848.

Now, my dear friend—now, for your sins, you are to suffer the infliction of a long gossiping letter. I tell you distinctly that I am going to punish you for all your impertinences by being as tedious, as discursive, as incoherent, and as unsatisfactory as possible. Besides, here I am, cooped up in a dirty balloon, with some one or two hundred of the *canaille*, all bound on a *pleasure* excursion (what a funny idea some people have of pleasure!) and I have no

prospect of touching *terra firma* for a month at least. Nobody to talk to. Nothing to do. When one has nothing to do, then is the time to correspond with one's friends. You perceive, then, why it is that I write you this letter—it is on account of my *ennui* and your sins.

Get ready your spectacles and make up your mind to be annoyed. I mean to write at you every day during this odious voyage.

Heigho! when will any *Invention* visit the human pericranium? Are we forever to be doomed to the thousand inconveniences of the balloon? Will *nobody* contrive a more expeditious mode of progress? This jog-trot movement, to my thinking, is little less than positive torture. Upon my word we have not made more than a hundred miles the hour since leaving home! The very birds beat us—at least some of them. I assure you that I do not exaggerate at all. Our motion, no doubt, seems slower than it actually is—this on account of our having no objects about us by which to estimate our velocity, and on account of our going with the wind. To be sure, whenever we meet a balloon we have a chance of perceiving our rate, and then, I admit, things do not appear so very bad. Accustomed as I am to this mode of travelling, I cannot get over a kind of giddiness whenever a balloon passes us in a current directly overhead. It always seems to me like an immense bird of prey about to pounce upon us and carry us off in its claws. One went over us this morning about sunrise, and so nearly overhead that its drag-rope actually brushed the net-work suspending our car, and caused us very serious apprehension. Our captain said that if the material of the bag had been the trumpery varnished 'silk' of five hundred or a thousand years ago, we should inevitably have been damaged. This silk, as he explained it to me, was a fabric composed of the entrails of a species of earth-worm. The worm was carefully fed on mulberries—a kind of fruit resembling a water-melon—and, when sufficiently fat, was crushed in a mill. The paste thus arising was called *papyrus* in its primary state, and went through a variety of processes until it finally became 'silk'. Singular to relate, it was once much admired as an article of *female dress*! Balloons were also very generally constructed from it,

A better kind of material, it appears, was subsequently found in the down surrounding the seed-vessels of a plant vulgarly called *euphorbium*, and at that time botanically termed milk-weed. This latter kind of silk was designated as silk-buckingham, on account of its superior durability, and was usually prepared for use by being varnished with a solution of gum caoutchouc—a substance which in some respects must have resembled the *gutta percha* now in common use. This caoutchouc was occasionally called India rubber or rubber of whist, and was no doubt one of the numerous *fungi*. Never tell me again that I am not at heart an antiquarian.

Talking of drag-ropes—our own, it seems, has this moment knocked a man overboard from one of the small magnetic propellers that swarm in ocean below us—a boat of about six thousand tons, and, from all accounts, shamefully crowded. These diminutive barques should be prohibited from carrying more than a definite number of passengers. The man, of course, was not permitted to get on board again, and was soon out of sight, he and his life-preserver. I rejoice, my dear friend, that we live in an age so enlightened that no such a thing as an individual is supposed to exist. It is the mass for which the true Humanity cares. By-the-by, talking of Humanity, do you know that our immortal Wiggins is not so original in his views of the Social Condition and so forth, as his contemporaries are inclined to suppose? Pundit assures me that the same ideas were put, nearly in the same way, about a thousand years ago, by an Irish philosopher called Furrier, on account of his keeping a retail shop for cat peltries and other furs. Pundit *knows*, you know; there can be no mistake about it. How very wonderfully do we see verified every day, the profound observation of the Hindoo Aries Tottle (as quoted by Pundit)—‘Thus must we say that, not once or twice, or a few times, but with almost infinite repetitions, the same opinions come round in a circle among men.’

*April 2.*—Spoke to-day the magnetic cutter in charge of the middle section of floating telegraph wires. I learn that when this species of telegraph was first put into operation by Horse, it was considered quite impossible to convey the

wires over sea ; but now we are at a loss to comprehend where the difficulty lay ! So wags the world. *Tempora mutantur*—excuse me for quoting the Etruscan. What *would* we do without the Atlantic telegraph ? (Pundit says Atlantic was the ancient adjective.) We lay to a few minutes to ask the cutter some questions, and learned, among other glorious news, that civil war is raging in Africa, while the plague is doing its good work beautifully both in Yurope and Ayesher. Is it not truly remarkable that, before the magnificent light shed upon philosophy by Humanity, the world was accustomed to regard War and Pestilence as calamities ? Do you know that prayers were actually offered up in the ancient temples to the end that these *evils* (!) might not be visited upon mankind ? Is it not really difficult to comprehend upon what principle of interest our forefathers acted ? Were they so blind as not to perceive that the destruction of a myriad of individuals is only so much positive advantage to the mass !

*April 3.*—It is really a very fine amusement to ascend the rope-ladder leading to the summit of the balloon-bag and thence survey the surrounding world. From the car below, you know the prospect is not so comprehensive—you can see little vertically. But seated here (where I write this) in the luxuriously-cushioned open piazza of the summit, one can see everything that is going on in all directions. Just now, there is quite a crowd of balloons in sight, and they present a very animated appearance, while the air is resonant with the hum of so many millions of human voices. I have heard it asserted that when Yellow or (as Pundit *will* have it) Violet, who is supposed to have been the first aeronaut, maintained the practicability of traversing the atmosphere in all directions, by merely ascending or descending until a favourable current was attained, he was scarcely hearkened to at all by his contemporaries, who looked upon him as merely an ingenious sort of madman, because the philosophers (!) of the day declared the thing impossible. Really now it does seem to me *quite* unaccountable how anything so obviously feasible could have escaped the sagacity of the ancient *savants*. But in all ages the great obstacles to advancement in Art have been opposed by the so-called men of science. To be sure, *our*

men of science are not quite so bigoted as those of old :— oh, I have something *so* queer to tell you on this topic. Do you know that it is not more than a thousand years ago since the metaphysicians consented to relieve the people of the singular fancy that there existed but *two possible roads for the attainment of Truth!* Believe it if you can! It appears that long, long ago, in the night of Time, there lived a Turkish philosopher (or Hindoo possibly) called Aries Tottle. This person introduced, or at all events propagated what was termed the deductive or *a priori* mode of investigation. He started with what he maintained to be *axioms* or 'self-evident truths', and thence proceeded 'logically' to results. His greatest disciples were one Neulid and one Cant. Well, Aries Tottle flourished supreme until the advent of one Hog, surnamed the 'Ettrick Shepherd', who preached an entirely different system, which he called the *a posteriori* or inductive. His plan referred altogether to Sensation. He proceeded by observing, analyzing, and classifying facts—*instantiæ naturæ*, as they were affectedly called—into general laws. Aries Tottle's mode, in a word, was based on *noumena*; Hog's on *phenomena*. Well, so great was the admiration excited by this latter system that, at its first introduction, Aries Tottle fell into disrepute; but finally he recovered ground and was permitted to divide the realm of Truth with his more modern rival. The *savants* now maintained that the Aristotelian and *Baconian* roads were the sole possible avenues to knowledge. 'Baconian,' you must know, was an adjective invented as equivalent to Hog-ian and more euphonious and dignified.

Now, my dear friend, I do assure you, most positively, that I represent this matter fairly, on the soundest authority; and you can easily understand how a notion so absurd on its very face must have operated to retard the progress of all true knowledge—which makes its advances almost invariably by intuitive bounds. The ancient idea confined investigation to *crawling*; and for hundreds of years so great was the infatuation about Hog especially, that a virtual end was put to all thinking properly so called. No man dared utter a truth to which he felt himself indebted to his *Soul* alone. It mattered not whether the truth was

even *demonstrably* a truth, for the bullet-headed *savants* of the time regarded only *the road* by which he had attained it. They would not even *look* at the end. 'Let us see the means,' they cried, 'the means!' If, upon investigation of the means, it was found to come neither under the category Aries (that is to say Ram) nor under the category Hog, why then the *savants* went no farther, but pronounced the 'theorist' a fool, and would have nothing to do with him or his truth.

Now, it cannot be maintained, even, that by the crawling system the greatest amount of truth would be attained in any long series of ages, for the repression of *imagination* was an evil not to be compensated for by any superior *certainty* in the ancient modes of investigation. The error of these Jurmains, these Vrinch, these Inglitch, and these Amriccans (the latter, by the way, were our own immediate progenitors), was an error quite analogous with that of the wiseacre who fancies that he must necessarily see an object the better the more closely he holds it to his eyes. These people blinded themselves by details. When they proceeded Hoggishly, their 'facts' were by means always facts—a matter of little consequence had it not been for assuming that they *were* facts and must be facts because they appeared to be such. When they proceeded on the path of the Ram, their course was scarcely as straight as a ram's horn, for they *never had* an axiom which was an axiom at all. They must have been very blind not to see this, even in their own day; for even in their own day many of the long 'established' axioms had been rejected. For example—'*Ex nihilo, nihil fit*'; 'a body cannot act where it is not'; 'there cannot exist antipodes'; 'darkness cannot come out of light'—all these, and a dozen other similar propositions, formerly admitted without hesitation as axioms, were, even at the period of which I speak, seen to be untenable. How absurd in these people, then, to persist in putting faith in 'axioms' as immutable bases of Truth! But even out of the mouths of their soundest reasoners it is easy to demonstrate the futility, the impalpability of their axioms in general. Who *was* the soundest of their logicians? Let me see! I will go and ask Pundit and be back in a minute. . . . . Ah, here we have it!

Here is a book written nearly a thousand years ago and lately translated from the Inglitch—which, by the way, appears to have been the rudiment of the Amriccan. Pundit says it is decidedly the cleverest ancient work on its topic, Logic. The author (who was much thought of in his day) was one Miller, or Mill; and we find it recorded of him, as a point of some importance, that he had a mill-horse called Bentham. But let us glance at the treatise!

Ah!—‘Ability or inability to conceive,’ says Mr. Mill, very properly, ‘is in no case to be received as a criterion of axiomatic truth’. What *modern* in his senses would ever think of disputing this truism? The only wonder with us must be, how it happened that Mr. Mill conceived it necessary even to hint at any thing so obvious. So far good—but let us turn over another page. What have we here?—‘Contradictories cannot both be true—that is, cannot co-exist in nature.’ Here Mr. Mill means, for example, that a tree must be either a tree or not a tree—that it cannot be at the same time a tree and not a tree. Very well; but I ask him *why*. His reply is this—and never pretends to be any thing else than this—‘Because it is impossible to conceive that contradictories can both be true’. But this is no answer at all, by his own showing; for has he not just admitted as a truism that ‘ability or inability to conceive is *in no case* to be received as a criterion of axiomatic truth’.

Now I do not complain of these ancients so much because their logic is, by their own showing, utterly baseless, worthless, and fantastic altogether, as because of their pompous and imbecile proscription of all *other* roads of Truth, of all *other* means for its attainment than the two preposterous paths—the one of creeping and the one of crawling—to which they have dared to confine the Soul that loves nothing so well as to *soar*.

By-the-by, my dear friend, do you not think it would have puzzled these ancient dogmaticians to have determined by *which* of their two roads it was that the most important and most sublime of *all* their truths was, in effect, attained? I mean the truth of Gravitation. Newton owed it to Kepler. Kepler admitted that his three laws were *guessed at*—these three laws of all laws which led the great Inglitch

mathematician to his principle, the basis of all physical principle—to go behind which we must enter the Kingdom of Metaphysics. Kepler guessed—that is to say *imagined*. He was essentially a 'theorist'—that word now of so much sanctity, formerly an epithet of contempt. Would it not have puzzled these old moles too, to have explained by which of the two 'roads' a cryptographist unriddles a cryptograph of more than usual secrecy, or by which of the two roads Champollion directed mankind to those enduring and almost innumerable truths which resulted from his deciphering the Hieroglyphics?

One word more on this topic and I will be done boring you. Is it not *passing* strange that, with their eternal prating about *roads* to Truth, these bigoted people missed what we now so clearly perceive to be the great highway—that of Consistency? Does it not seem singular how they should have failed to deduce from the works of God the vital fact that a perfect consistency *must* be an absolute truth! How plain has been our progress since the late announcement of this proposition! Investigation has been taken out of the hands of the ground-moles and given, as a task, to the true and only true thinkers, the men of ardent imagination. These latter *theorize*. Can you not fancy the shout of scorn with which my words would be received by our progenitors were it possible for them to be now looking over my shoulder? These men, I say *theorize*; and their theories are simply corrected, reduced, systematized—cleared, little by little, of their dross of inconsistency—until, finally, a perfect consistency stands apparent which even the most stolid admit, because it *is* a consistency, to be an absolute and an unquestionable *truth*.

*April 4.*—The new gas is doing wonders, in conjunction with the new improvement with gutta percha. How very safe, commodious, manageable, and in every respect convenient are our modern balloons! Here is an immense one approaching us at the rate of at least a hundred and fifty miles an hour. It seems to be crowded with people—perhaps there are three or four hundred passengers—and yet it soars to an elevation of nearly a mile, looking down upon poor us with sovereign contempt. Still a hundred or even two hundred miles an hour is slow travelling, after

all. Do you remember our flight on the railroad across the Kanadaw continent?—fully three hundred miles the hour—that was travelling. Nothing to be seen, though—nothing to be done but flirt, feast, and dance in the magnificent saloons. Do you remember what an odd sensation was experienced when, by chance, we caught a glimpse of external objects while the cars were in full flight? Everything seemed unique—in one mass. For my part, I cannot say but that I preferred the travelling by the slow train of a hundred miles the hour. Here we were permitted to have glass windows—even to have them open—and something like a distinct view of the country was attainable. . . . . Pundit says that *the route* for the great Kanadaw railroad must have been in some measure marked out about nine hundred years ago! In fact, he goes so far as to assert that actual traces of a road are still discernible—traces referable to a period quite as remote as that mentioned. The track, it appears, was *double* only; ours, you know, has twelve paths; and three or four new ones are in preparation. The ancient rails were very slight, and placed so close together as to be, according to modern notions, quite frivolous, if not dangerous in the extreme. The present width of track—fifty feet—is considered, indeed, scarcely secure enough. For my part, I make no doubt that a track of some sort *must* have existed in very remote times, as Pundit asserts; for nothing can be clearer, to my mind, than that, at some period—not less than seven centuries ago, certainly—the Northern and Southern Kanadaw continents were *united*: the Kanawdians, then, would have been driven, by necessity, to a great railroad across the continent.

*April 5.*—I am almost devoured by *ennui*. Pundit is the only conversible person on board; and he, poor soul! can speak of nothing but antiquities. He has been occupied all the day in the attempt to convince me that the ancient Amriccans *governed themselves*!—did ever anybody hear of such an absurdity?—that they existed in a sort of every-man-for-himself confederacy, after the fashion of the ‘prairie dogs’ that we read of in fable. He says that they started with the queerest idea conceivable, viz.: that all men are born free and equal—this in the very teeth of the

laws of *gradation* so visibly impressed upon all things both in the moral and physical universe. Every man 'voted', as they called it—that is to say, meddled with public affairs—until, at length, it was discovered that what is everybody's business is nobody's, and that the 'Republic' (so the absurd thing was called) was without a government at all. It is related, however, that the first circumstance which disturbed, very particularly, the self-complacency of the philosophers who constructed this 'Republic', was the startling discovery that universal suffrage gave opportunity for fraudulent schemes, by means of which any desired number of votes might at any time be polled, without the possibility of prevention or even detection, by any party which should be merely villanous enough not to be ashamed of the fraud. A little reflection upon this discovery sufficed to render evident the consequences, which were that rascality *must* predominate—in a word, that a republican government *could* never be anything but a rascally one. While the philosophers, however, were busied in blushing at their stupidity in not having foreseen these inevitable evils, and intent upon the invention of new theories, the matter was put to an abrupt issue by a fellow of the name of *Mob*, who took everything into his own hands and set up a despotism, in comparison with which those of the fabulous Zeros and Hellofagabaluses were respectable and delectable. This *Mob* (a foreigner, by-the-by), is said to have been the most odious of all men that ever encumbered the earth. He was a giant in stature—insolent, rapacious, filthy; had the gall of a bullock with the heart of an hyena and the brains of a peacock. He died, at length, by dint of his own energies, which exhausted him. Nevertheless, he had his uses, as everything has, however vile, and taught mankind a lesson which to this day it is in no danger of forgetting—never to run directly contrary to the natural analogies. As for Republicanism, no analogy could be found for it upon the face of the earth—unless we except the case of the 'prairie dogs', an exception which seems to demonstrate, if anything, that democracy is a very admirable form of government—for dogs.

*April 6.*—Last night had a fine view of Alpha Lyræ, whose disk, through our captain's spy-glass, subtends an

angle of half a degree, looking very much as our sun does to the naked eye on a misty day. Alpha Lyræ, although so *very* much larger than our sun, by-the-by, resembles him closely as regards its spots, its atmosphere, and in many other particulars. It is only within the last century, Pundit tells me, that the binary relation existing between these two orbs began even to be suspected. The evident motion of our system in the heavens was (strange to say !) referred to an orbit about a prodigious star in the centre of the galaxy. About this star, or at all events about a centre of gravity common to all the globes of the Milky Way and supposed to be near Alcyone in the Pleiades, every one of these globes was declared to be revolving, our own performing the circuit in a period of 117,000,000 of years ! We, with our present lights, our vast telescopic improvements, and so forth, of course find it difficult to comprehend *the ground* of an idea such as this. Its first propagator was one Mudler. He was led, we must presume, to this wild hypothesis by mere analogy in the first instance ; but, this being the case, he should have at least adhered to analogy in its development. A great central orb *was*, in fact, suggested ; so far Mudler was consistent. This central orb, however, dynamically, should have been greater than all its surrounding orbs taken together. The question might then have been asked—‘ Why do we not see it ? ’—*we*, especially, who occupy the mid region of the cluster—the very locality *near* which, at least, must be situated this inconceivable central sun. The astronomer, perhaps, at this point, took refuge in the suggestion of non-luminosity ; and here analogy was suddenly let fall. But even admitting the central orb non-luminous, how did he manage to explain its failure to be rendered visible by the incalculable host of glorious suns glaring in all directions about it ? No doubt what he finally maintained was merely a centre of gravity common to all the revolving orbs—but here again analogy must have been let fall. Our system revolves, it is true, about a common centre of gravity, but it does this in connection with and in consequence of a material sun whose mass more than counter-balances the rest of the system. The mathematical circle is a curve composed of an infinity of straight lines ; but

this idea of the circle—this idea of it which, in regard to all earthly geometry, we consider as merely the mathematical, in contradistinction from the practical, idea—is, in sober fact, the *practical* conception which alone we have any right to entertain in respect to those Titanic circles with which we have to deal, at least in fancy, when we suppose our system, with its fellows, revolving about a point in the centre of the galaxy. Let the most vigorous of human imaginations but attempt to take a single step towards the comprehension of a circuit so unutterable! It would scarcely be paradoxical to say that a flash of lightning itself, travelling *forever* upon the circumference of this inconceivable circle, would still *forever* be travelling in a straight line. That the path of our sun along such a circumference—that the direction of our system in such an orbit—would, to any human perception, deviate in the slightest degree from a straight line even in a million of years, is a proposition not to be entertained; and yet these ancient astronomers were absolutely cajoled, it appears, into believing that a decisive curvature had become apparent during the brief period of their astronomical history—during the mere point—during the utter nothingness of two or three thousand years! How incomprehensible, that considerations such as this did not at once indicate to them the true state of affairs—that of the binary revolution of our sun and Alpha Lyræ around a common centre of gravity!

*April 7.*—Continued last night our astronomical amusements. Had a fine view of the five Nepturian asteroids, and watched with much interest the putting up of a huge impost on a couple of lintels in the new temple at Daphnis in the moon. It was amusing to think that creatures so diminutive as the lunarians, and bearing so little resemblance to humanity, yet evinced a mechanical ingenuity so much superior to our own. One finds it difficult, too, to conceive the vast masses which these people handle so easily, to be as light as our reason tells us they actually are.

*April 8.*—Eureka! Pundit is in his glory. A balloon from Kanadaw spoke us to-day and threw on board several late papers; they contain some exceedingly curious information relative to Kanawdian or rather to Amriccan

antiquities. You know, I presume, that labourers have for some months been employed in preparing the ground for a new fountain at Paradise, the emperor's principal pleasure garden. Paradise, it appears, has been, *literally* speaking, an island time out of mind—that is to say, its northern boundary was always (as far back as any records extend) a rivulet, or rather a very narrow arm of the sea. This arm was gradually widened until it attained its present breadth—a mile. The whole length of the island is nine miles; the breadth varies materially. The entire area (so Pundit says) was, about eight hundred years ago, densely packed with houses, some of them twenty stories high; land (for some most unaccountable reason) being considered as especially precious just in this vicinity. The disastrous earthquake, however, of the year 2050, so totally uprooted and overwhelmed the town (for it was almost too large to be called a village) that the most indefatigable of our antiquarians have never yet been able to obtain from the site any sufficient data (in the shape of coins, medals, or inscriptions) wherewith to build up even the ghost of a theory concerning the manners, customs, &c. &c. &c., of the aboriginal inhabitants. Nearly all that we have hitherto known of them is, that they were a portion of the Knickerbocker tribe of savages infesting the continent at its first discovery by Recorder Riker, a knight of the Golden Fleece. They were by no means uncivilized, however, but cultivated various arts and even sciences after a fashion of their own. It is related of them that they were acute in many respects, but were oddly afflicted with a monomania for building what, in the ancient Amriccan, was denominated 'churches'—a kind of pagoda instituted for the worship of two idols that went by the names of Wealth and Fashion. In the end, it is said, the island became, nine-tenths of it, church. The women, too, it appears, were oddly deformed by a natural protuberance of the region just below the small of the back—although, most unaccountably, this deformity was looked upon altogether in the light of a beauty. One or two pictures of these singular women have, in fact, been miraculously preserved. They look very odd, *very*—like something between a turkey-cock and a dromedary.

Well, these few details are nearly all that have descended to us respecting the ancient Knickerbockers. It seems, however, that while digging in the centre of the emperor's garden (which, you know, covers the whole island), some of the workmen unearthed a cubical and evidently chiselled block of granite, weighing several hundred pounds. It was in good preservation, having received, apparently, little injury from the convulsion which entombed it. On one of its surfaces was a marble slab with (only think of it!) *an inscription—a legible inscription*. Pundit is in ecstasies. Upon detaching the slab, a cavity appeared, containing a leaden box filled with various coins, a long scroll of names, several documents which appear to resemble newspapers, with other matters of intense interest to the antiquarian! There can be no doubt that all these are genuine Amriccan relics belonging to the tribe called Knickerbocker. The papers thrown on board our balloon are filled with fac-similes of the coins, MSS., typography, &c. &c. I copy for your amusement the Knickerbocker inscription on the marble slab:—

This Corner Stone of a Monument to the  
Memory of  
GEORGE WASHINGTON,  
was laid with appropriate ceremonies on the  
19TH DAY OF OCTOBER, 1847,  
the anniversary of the surrender of  
Lord Cornwallis  
to General Washington at Yorktown,  
A. D. 1781,  
under the auspices of the  
Washington Monument Association of the  
city of New York.

This, as I give it, is a verbatim translation done by Pundit himself, so there *can* be no mistake about it. From the few words thus preserved, we glean several important items of knowledge, not the least interesting of which is the fact that a thousand years ago *actual* monuments had fallen into disuse—as was all very proper—the people contenting themselves, as we do now, with a mere indication of the design to erect a monument at some future time; a corner-stone being cautiously laid by itself ‘solitary and alone’ (excuse me for quoting the great Amriccan poet Benton!)

as a guarantee of the magnanimous *intention*. We ascertain, too, very distinctly, from this admirable inscription, the how, as well as the where and the what, of the great surrender in question. As to the *where*, it was Yorktown (wherever that was), and as to the *what*, it was General Cornwallis (no doubt some wealthy dealer in corn). *He* was surrendered. The inscription commemorates the surrender of—what?—why, ‘of Lord Cornwallis’. The only question is what could the savages wish him surrendered for. But when we remember that these savages were undoubtedly cannibals, we are led to the conclusion that they intended him for sausage. As to the *how* of the surrender, no language can be more explicit. Lord Cornwallis was surrendered (for sausage) ‘under the auspices of the Washington Monument Association’—no doubt a charitable institution for the depositing of corner-stones.—But, Heaven bless me! what is the matter? Ah, I see—the balloon has collapsed, and we shall have a tumble into the sea. I have, therefore, only time enough to add that, from a hasty inspection of the fac-similes of newspapers, &c. &c., I find that *the* great men in those days among the Amriccans, were one John, a smith, and one Zacchary, a tailor.

Good bye, until I see you again. Whether you ever get this letter or not is a point of little importance, as I write altogether for my own amusement. I shall cork the MS. up in a bottle however, and throw it into the sea.

Yours everlastingly,

PUNDITA.

## LOSS OF BREATH

### A TALE NEITHER IN NOR OUT OF ‘BLACKWOOD’

O breathe not, &c.—MOORE’S MELODIES.

THE most notorious ill-fortune must in the end, yield to the untiring courage of philosophy—as the most stubborn city to the ceaseless vigilance of an enemy. Salmanezer, as we have it in the holy writings, lay three years before Samaria; yet it fell. Sardanapalus—see Diodorus—maintained himself seven in Nineveh; but to no purpose. Troy expired at the close of the second lustrum; and Azoth, as

Aristæus declares upon his honour as a gentleman, opened at last her gates to Psammitticus, after having barred them for the fifth part of a century. \* \* \*

'Thou wretch!—thou vixen!—thou shrew!' said I to my wife on the morning after our wedding, 'thou witch!—thou hag!—thou whipper-snapper!—thou sink of iniquity!—thou fiery-faced quintessence of all that is abominable!—thou—thou—' here standing upon tiptoe, seizing her by the throat, and placing my mouth close to her ear, I was preparing to launch forth a new and more decided epithet of opprobrium, which should not fail, if ejaculated, to convince her of her insignificance, when, to my extreme horror and astonishment, I discovered that *I had lost my breath*.

The phrases 'I am out of breath', 'I have lost my breath', &c., are often enough repeated in common conversation; but it had never occurred to me that the terrible accident of which I speak could *bona fide* and actually happen! Imagine—that is if you have a fanciful turn—imagine, I say, my wonder—my consternation—my despair!

There is a good genius, however, which has never entirely deserted me. In my most ungovernable moods I still retain a sense of propriety, *et le chemin des passions me conduit*—as Lord Edouard in the 'Julie' says it did him—*à la philosophie véritable*.

Although I could not at first precisely ascertain to what degree the occurrence had affected me, I determined at all events to conceal the matter from my wife, until further experience should discover to me the extent of this my unheard of calamity. Altering my countenance, therefore, in a moment, from its beuffed and distorted appearance, to an expression of arch and coquettish benignity, I gave my lady a pat on the one cheek, and a kiss on the other, and without saying one syllable (Furies! I could not), left her astonished at my drollery, as I pirouetted out of the room in a *Pas de Zephyr*.

Behold me then safely ensconced in my private *boudoir*, a fearful instance of the ill consequences attending upon irascibility—alive, with the qualifications of the dead—dead, with the propensities of the living—an anomaly on the face of the earth—being very calm, yet breathless.

Yes! breathless. I am serious in asserting that my breath was entirely gone. I could not have stirred with it a feather if my life had been at issue, or sullied even the delicacy of a mirror. Hard fate!—yet there was some alleviation to the first overwhelming paroxysm of my sorrow. I found, upon trial, that the powers of utterance which, upon my inability to proceed in the conversation with my wife, I then concluded to be totally destroyed, were in fact only partially impeded, and I discovered that had I at that interesting crisis, dropped my voice to a singularly deep guttural, I might still have continued to her the communication of my sentiments; this pitch of voice (the guttural) depending, I find, not upon the current of the breath, but upon a certain spasmodic action of the muscles of the throat.

Throwing myself upon a chair, I remained for some time absorbed in meditation. My reflections, be sure, were of no consolatory kind. A thousand vague and lachrymatory fancies took possession of my soul—and even the idea of suicide flitted across my brain; but it is a trait in the perversity of human nature to reject the obvious and the ready, for the far-distant and equivocal. Thus I shuddered at self-murder as the most decided of atrocities while the tabby cat purred strenuously upon the rug, and the very water-dog wheezed assiduously under the table; each taking to itself much merit for the strength of its lungs, and all obviously done in derision of my own pulmonary incapacity.

Oppressed with a tumult of vague hopes and fears, I at length heard the footsteps of my wife descending the staircase. Being now assured of her absence, I returned with a palpitating heart to the scene of my disaster.

Carefully locking the door on the inside, I commenced a vigorous search. It was possible, I thought that, concealed in some obscure corner, or lurking in some closet or drawer, might be found the lost object of my inquiry. It might have a vapoury—it might even have a tangible form. Most philosophers, upon many points of philosophy, are still very unphilosophical. William Godwin, however, says in his 'Mandeville', that 'invisible things are the only realities', and this all will allow, is a case

in point. I would have the judicious reader pause before accusing such asseverations of an undue quantum of absurdity. Anaxagoras, it will be remembered, maintained that snow is black, and this I have since found to be the case.

Long and earnestly did I continue the investigation : but the contemptible reward of my industry and perseverance proved to be only a set of false teeth, two pairs of hips, an eye, and a bundle of *billets-doux* from Mr. Windenough to my wife. I might as well here observe that this confirmation of my lady's partiality for Mr. W. occasioned me little uneasiness. That Mrs. Lackobreath should admire anything so dissimilar to myself was a natural and necessary evil. I am, it is well known, of a robust and corpulent appearance, and at the same time somewhat diminutive in stature. What wonder then that the lath-like tenuity of my acquaintance, and his altitude, which has grown into a proverb, should have met with all due estimation in the eyes of Mrs. Lackobreath. But to return.

My exertions, as I have before said, proved fruitless. Closet after closet—drawer after drawer—corner after corner—were scrutinized to no purpose. At one time, however, I thought myself sure of my prize, having in rummaging a dressing-case, accidentally demolished a bottle of Grandjean's Oil of Archangels—which, as an agreeable perfume, I here take the liberty of recommending.

With a heavy heart I returned to my *boudoir*—there to ponder upon some method of eluding my wife's penetration, until I could make arrangements prior to my leaving the country, for to this I had already made up my mind. In a foreign climate, being unknown, I might, with some probability of success, endeavour to conceal my unhappy calamity—a calamity calculated, even more than beggary, to estrange the affections of the multitude, and to draw down upon the wretch the well-merited indignation of the virtuous and the happy. I was not long in hesitation. Being naturally quick, I committed to memory the entire tragedy of 'Metamora'. I had the good fortune to recollect that in the accentuation of this drama, or at least of such portion of it as is allotted to the hero, the tones of voice in which I found myself deficient were altogether unnecessary,

and that the deep guttural was expected to reign monotonously throughout.

I practised for some time by the borders of a well-frequented marsh ;—herein, however, having no reference to a similar proceeding of Demosthenes, but from a design peculiarly and conscientiously my own. Thus armed at all points, I determined to make my wife believe that I was suddenly smitten with a passion for the stage. In this, I succeeded to a miracle ; and to every question or suggestion found myself at liberty to reply in my most frog-like and sepulchral tones with some passage from the tragedy—any portion of which, as I soon took great pleasure in observing, would apply equally well to any particular subject. It is not to be supposed, however, that in the delivery of such passages I was found at all deficient in the looking asquint—the showing my teeth—the working my knees—the shuffling my feet—or in any of those unmentionable graces which are now justly considered the characteristics of a popular performer. To be sure they spoke of confining me in a strait-jacket—but, good God ! they never suspected me of having lost my breath.

Having at length put my affairs in order, I took my seat very early one morning in the mail stage for —, giving it to be understood, among my acquaintances, that business of the last importance required my immediate personal attendance in that city.

The coach was crammed to repletion ; but in the uncertain twilight the features of my companions could not be distinguished. Without making any effectual resistance, I suffered myself to be placed between two gentlemen of colossal dimensions ; while a third, of a size larger, requesting pardon for the liberty he was about to take, threw himself upon my body at full length, and falling asleep in an instant, drowned all my guttural ejaculations for relief, in a snore which would have put to blush the roarings of the bull of Phalaris. Happily the state of my respiratory faculties rendered suffocation an accident entirely out of the question.

As, however, the day broke more distinctly in our approach to the outskirts of the city, my tormentor arising and adjusting his shirt-collar, thanked me in a very friendly

manner for my civility. Seeing that I remained motionless (all my limbs were dislocated and my head twisted on one side), his apprehensions began to be excited ; and arousing the rest of the passengers, he communicated in a very decided manner, his opinion that a dead man had been palmed upon them during the night for a living and responsible fellow-traveller ; here giving me a thump on the right eye, by way of demonstrating the truth of his suggestion.

Hereupon all, one after another (there were nine in company), believed it their duty to pull me by the ear. A young practising physician, too, having applied a pocket-mirror to my mouth, and found me without breath, the assertion of my persecutor was pronounced a true bill ; and the whole party expressed a determination to endure tamely no such impositions for the future, and to proceed no farther with any such carcasses for the present.

I was here, accordingly, thrown out at the sign of the ' Crow ' (by which tavern the coach happened to be passing), without meeting with any farther accident than the breaking of both my arms, under the left hind wheel of the vehicle. I must besides do the driver the justice to state that he did not forget to throw after me the largest of my trunks, which, unfortunately falling on my head, fractured my skull in a manner at once interesting and extraordinary.

The landlord of the ' Crow ', who is a hospitable man, finding that my trunk contained sufficient to indemnify him for any little trouble he might take in my behalf, sent forthwith for a surgeon of his acquaintance, and delivered me to his care with a bill and receipt for ten dollars.

The purchaser took me to his apartments and commenced operations immediately. Having cut off my ears, however, he discovered signs of animation. He now rang the bell, and sent for a neighbouring apothecary with whom to consult in the emergency. In case of his suspicions with regard to my existence proving ultimately correct, he, in the meantime, made an incision in my stomach, and removed several of my viscera for private dissection.

The apothecary had an idea that I was actually dead. This idea I endeavoured to confute, kicking and plunging

with all my might, and making the most furious contortions—for the operations of the surgeon had, in a measure, restored me to the possession of my faculties. All, however, was attributed to the effects of a new galvanic battery, wherewith the apothecary, who is really a man of information, performed several curious experiments, in which, from my personal share in their fulfilment, I could not help feeling deeply interested. It was a source of mortification to me nevertheless, that although I made several attempts at conversation, my powers of speech were so entirely in abeyance, that I could not even open my mouth; much less then make reply to some ingenious but fanciful theories of which, under other circumstances, my minute acquaintance with the Hippocratic pathology would have afforded me a ready confutation.

Not being able to arrive at a conclusion, the practitioners remanded me for further examination. I was taken up into a garret; and the surgeon's lady having accommodated me with drawers and stockings, the surgeon himself fastened my hands, and tied up my jaws with a pocket handkerchief—then bolted the door on the outside as he hurried to his dinner, leaving me alone to silence and to meditation.

I now discovered to my extreme delight that I could have spoken had not my mouth been tied up by the pocket handkerchief. Consoling myself with this reflection, I was mentally repeating some passages of the 'Omnipresence of the Deity', as is my custom before resigning myself to sleep, when two cats, of a greedy and vituperative turn, entering at a hole in the wall, leaped up with a flourish *a la Catalani*, and alighting opposite one another on my visage, betook themselves to indecorous contention for the paltry consideration of my nose.

But, as the loss of his ears proved the means of elevating to the throne of Cyrus, the Magian or Mige-Gush of Persia, and as the cutting off his nose gave Zopyrus possession of Babylon, so the loss of a few ounces of my countenance proved the salvation of my body. Aroused by the pain, and burning with indignation, I burst, at a single effort, the fastenings and the bandage.—Stalking across the room I cast a glance of contempt at the belligerents, and throwing

open the sash to their extreme horror and disappointment, precipitated myself, very dexterously, from the window.

The mail-robber W——, to whom I bore a singular resemblance, was at this moment passing from the city jail to the scaffold erected for his execution in the suburbs. His extreme infirmity, and long-continued ill-health, had obtained him the privilege of remaining unmanacled; and habited in his gallows costume—one very similar to my own—he lay at full length in the bottom of the hangman's cart (which happened to be under the windows of the surgeon at the moment of my precipitation) without any other guard than the driver who was asleep, and two recruits of the sixth infantry, who were drunk.

As ill-luck would have it, I alit upon my feet within the vehicle. W——, who was an acute fellow, perceived his opportunity. Leaping up immediately, he bolted out behind, and turning down an alley, was out of sight in the twinkling of an eye. The recruits, aroused by the bustle, could not exactly comprehend the merits of the transaction. Seeing, however, a man, the precise counterpart of the felon, standing upright in the cart before their eyes, they were of opinion that the rascal (meaning W——) was after making his escape (so they expressed themselves), and, having communicated this opinion to one another, they took each a dram, and then knocked me down with the butt-ends of their muskets.

It was not long ere we arrived at the place of destination. Of course nothing could be said in my defence. Hanging was my inevitable fate. I resigned myself thereto with a feeling half stupid, half acrimonious. Being little of a cynic, I had all the sentiments of a dog. The hangman, however, adjusted the noose about my neck. The drop fell.

I forbear to depict my sensations upon the gallows; although here, undoubtedly, I could speak to the point, and it is a topic upon which nothing has been well said. In fact, to write upon such a theme it is necessary to have been hanged. Every author should confine himself to matters of experience. Thus Mark Antony composed a treatise upon getting drunk.

I may just mention, however, that die I did not. My body *was*, but I had no breath *to be* suspended; and but

for the knot under my left ear (which had the feel of a military stock) I dare say that I should have experienced very little inconvenience. As for the jerk given to my neck upon the falling of the drop, it merely proved a corrective to the twist afforded me by the fat gentleman in the coach.

For good reasons, however, I did my best to give the crowd the worth of their trouble. My convulsions were said to be extraordinary. My spasms it would have been difficult to beat. The populace *encored*. Several gentlemen swooned; and a multitude of ladies were carried home in hysterics. Pinxit availed himself of the opportunity to retouch, from a sketch taken upon the spot, his admirable painting of the 'Marsyas flayed alive'.

When I had afforded sufficient amusement, it was thought proper to remove my body from the gallows;—this the more especially as the real culprit had in the meantime been retaken and recognized; a fact which I was so unlucky as not to know.

Much sympathy was, of course, exercised in my behalf, and as no one made claim to my corpse, it was ordered that I should be interred in a public vault.

Here, after due interval, I was deposited. The sexton departed, and I was left alone. A line of Marston's 'Mal-content'—

Death 's a good fellow and keeps open house—

struck me at that moment as a palpable lie.

I knocked off, however, the lid of my coffin, and stepped out. The place was dreadfully dreary and damp, and I became troubled with *ennui*. By way of amusement, I felt my way among the numerous coffins ranged in order around. I lifted them down, one by one, and breaking open their lids, busied myself in speculations about the mortality within.

'This,' I soliloquized, tumbling over a carcass, puffy, bloated, and rotund—'this has been, no doubt, in every sense of the word, an unhappy—an unfortunate man. It has been his terrible lot not to walk, but to waddle—to pass through life not like a human being, but like an elephant—not like a man, but like a rhinoceros.

'His attempts at getting on have been mere abortions,

and his circumgyratory proceedings a palpable failure. Taking a step forward, it has been his misfortune to take two towards the right, and three towards the left. His studies have been confined to the poetry of Crabbe. He can have no idea of the wonder of a *pirouette*. To him a *pas de papillon* has been an abstract conception. He has never ascended the summit of a hill. He has never viewed from any steeple the glories of a metropolis. Heat has been his mortal enemy. In the dog-days his days have been the days of a dog. Therein, he has dreamed of flames and suffocation—of mountains upon mountains—of Pelion upon Ossa. He was short of breath—to say all in a word, he was short of breath. He thought it extravagant to play upon wind instruments. He was the inventor of self-moving fans, wind-sails, and ventilators. He patronized Du Pont the bellows-maker, and died miserably in attempting to smoke a cigar. His was a case in which I feel a deep interest—a lot in which I sincerely sympathize.

‘But here,’—said I—‘here’—and I dragged spitefully from its receptacle a gaunt, tall, and peculiar-looking form whose remarkable appearance struck me with a sense of unwelcome familiarity—‘here is a wretch entitled to no earthly commiseration’. Thus saying, in order to obtain a more distinct view of my subject, I applied my thumb and fore-finger to its nose, and causing it to assume a sitting position upon the ground, held it thus, at the length of my arm, while I continued my soliloquy.

—‘Entitled’, I repeated, ‘to no earthly commiseration. Who indeed would think of compassionating a shadow? Besides, has he not had his full share of the blessings of mortality? He was the originator of tall monuments—shot-towers—lightning-rods—lombardy poplars. His treatise upon ‘Shades and Shadows’ has immortalized him. He edited with distinguished ability the last edition of ‘South on the Bones’. He went early to college and studied pneumatics. He then came home, talked eternally, and played upon the French-horn. He patronized the bag-pipes. Captain Barclay, who walked against Time, would not walk against *him*. Windham and Allbreath were his favourite writers,—his favourite artist, Phiz. He died gloriously while inhaling gas—*levique flatu corrumpitur*, like

the *fama pudicitiae* in Hieronymus.<sup>1</sup> He was indubitably a—

‘How *can* you?—how—*can*—you?’—interrupted the object of my animadversions, gasping for breath, and tearing off, with a desperate exertion, the bandage around its jaws—‘how *can* you, Mr. Lackobreath, be so infernally cruel as to pinch me in that manner by the nose? Did you not see how they had fastened up my mouth—and you *must* know—if you know anything—how vast a superfluity of breath I have to dispose of! If you do *not* know, however, sit down and you shall see.—In my situation it is really a great relief to be able to open one’s mouth—to be able to expatiate—to be able to communicate with a person like yourself, who do not think yourself called upon at every period to interrupt the thread of a gentleman’s discourse.—Interruptions are annoying and should undoubtedly be abolished—don’t you think so?—no reply, I beg you,—one person is enough to be speaking at a time.—I shall be done by-and-by, and then you may begin.—How the devil, sir, did you get into this place?—not a word I beseech you—been here some time myself—terrible accident!—heard of it, I suppose—awful calamity!—walking under your windows—some short while ago—about the time you were stage-struck—horrible occurrence!—heard of ‘catching one’s breath,’ eh?—hold your tongue I tell you!—I caught somebody else’s!—had always too much of my own—met Blab at the corner of the street—wouldn’t give me a chance for a word—couldn’t get in a syllable edgewise—attacked, consequently, with epilepsy—Blab made his escape—damn all fools!—they took me up for dead, and put me in this place—pretty doings all of them!—heard all you said about me—every word a lie—horrible!—wonderful!—outrageous—hideous!—incomprehensible!—et cetera—et cetera—et cetera—et cetera—’

It is impossible to conceive my astonishment at so unexpected a discourse; or the joy with which I became gradually convinced that the breath so fortunately caught by the gentleman (whom I soon recognized as my neighbour

<sup>1</sup> *Tenera res in feminis famas pudicitiae, et quasi flos pulcherrimus, cito ad levem marcessit auram, levique flatu corrumpitur, maxime, &c.—Hieronymus ad Salvinam.*

Windenough) was, in fact, the identical expiration mislaid by myself in the conversation with my wife. Time, place, and circumstance rendered it a matter beyond question. I did not, however, immediately release my hold upon Mr. W.'s proboscis—not at least during the long period in which the inventor of lombardy poplars continued to favour me with his explanations.

In this respect I was actuated by that habitual prudence which has ever been my predominating trait. I reflected that many difficulties might still lie in the path of my preservation which only extreme exertion on my part would be able to surmount. Many persons, I considered, are prone to estimate commodities in their possession—however valueless to the then proprietor—however troublesome, or distressing—in direct ratio with the advantages to be derived by others from their attainment, or by themselves from their abandonment. Might not this be the case with Mr. Windenough? In displaying anxiety for the breath of which he was at present so willing to get rid, might I not lay myself open to the exactions of his avarice? There are scoundrels in this world, I remembered with a sigh, who will not scruple to take unfair opportunities with even a next door neighbour, and (this remark is from Epictetus) it is precisely at that time when men are most anxious to throw off the burden of their own calamities that they feel the least desirous of relieving them in others.

Upon considerations similar to these, and still retaining my grasp upon the nose of Mr. W., I accordingly thought proper to model my reply.

'Monster!' I began in a tone of the deepest indignation, 'monster; and double-winded idiot!—dost *thou*, whom for thine iniquities, it has pleased heaven to accurse with a two-fold respiration—dost *thou*, I say, presume to address me in the familiar language of an old acquaintance?—"I lie", forsooth! and "hold my tongue", to be sure!—pretty conversation indeed, to a gentleman with a single breath!—all this, too, when I have it in my power to relieve the calamity under which thou dost so justly suffer—to curtail the superfluities of thine unhappy respiration.'

Like Brutus, I paused for a reply—with which, like a tornado, Mr. Windenough immediately overwhelmed me.

Protestation followed upon protestation, and apology upon apology. There were no terms with which he was unwilling to comply, and there were none of which I failed to take the fullest advantage.

Preliminaries being at length arranged, my acquaintance delivered me the respiration ; for which (having carefully examined it) I gave him afterwards a receipt.

I am aware that by many I shall be held to blame for speaking, in a manner so cursory, of a transaction so impalpable. It will be thought that I should have entered more minutely into the details of an occurrence by which—and this is very true—much new light might be thrown upon a highly interesting branch of physical philosophy.

To all this I am sorry that I cannot reply. A hint is the only answer which I am permitted to make. There were *circumstances*—but I think it much safer upon consideration to say as little as possible about an affair so delicate—*so delicate*, I repeat, and at the time involving the interests of a third party whose sulphurous resentment I have not the least desire, at this moment, of incurring.

We were not long after this necessary arrangement in effecting an escape from the dungeons of the sepulchre. The united strength of our resuscitated voices was soon sufficiently apparent. Scissors, the Whig Editor, republished a treatise upon ‘ the nature and origin of subterranean noises ’. A reply—rejoinder—confutation—and justification—followed in the columns of a Democratic Gazette. It was not until the opening of the vault to decide the controversy, that the appearance of Mr. Windenough and myself proved both parties to have been decidedly in the wrong.

I cannot conclude these details of some very singular passages in a life at all times sufficiently eventful, without again recalling to the attention of the reader the merits of that indiscriminate philosophy which is a sure and ready shield against those shafts of calamity which can neither be seen, felt, nor fully understood. It was in the spirit of this wisdom that, among the Ancient Hebrews, it was believed the gates of Heaven would be inevitably opened to that sinner, or saint, who, with good lungs and implicit confidence, should vociferate the word ‘ *Amen !* ’ It was in the

spirit of this wisdom that, when a great plague raged at Athens, and every means had been in vain attempted for its removal, Epimenides, as Laertius relates in his second book of that philosopher, advised the erection of a shrine and temple 'to the proper God'.

LYTTLETON BARRY.

## THE MAN THAT WAS USED UP

### A TALE OF THE LATE BUGABOO AND KICKAPOO CAMPAIGN

*Pleurez, pleurez, mes yeux, et fondez vous en eau !  
La moitié de ma vie a mis l'autre au tombeau.* CORNEILLE.

I CANNOT just now remember when or where I first made the acquaintance of that truly fine-looking fellow, Brevet Brigadier-General John A. B. C. Smith. Some one *did* introduce me to the gentleman, I am sure—at some public meeting, I know very well—held about something of great importance, no doubt—at some place or other, I feel convinced,—whose name I have unaccountably forgotten. The truth is—that the introduction was attended, upon my part, with a degree of anxious embarrassment which operated to prevent any definite impressions of either time or place. I am constitutionally nervous—this, with me, is a family failing, and I can't help it. In especial, the slightest appearance of mystery—of any point I cannot exactly comprehend—puts me at once into a pitiable state of agitation.

There was something, as it were, remarkable—yes, *remarkable*, although this is but a feeble term to express my full meaning—about the entire individuality of the personage in question. He was, perhaps, six feet in height, and of a presence singularly commanding. There was an *air distingué* pervading the whole man, which spoke of high breeding, and hinted at high birth. Upon this topic—the topic of Smith's personal appearance—I have a kind of melancholy satisfaction in being minute. His head of hair would have done honour to a Brutus ;—nothing could be more richly flowing, or possess a brighter gloss. It was of a jetty black ;—which was also the colour, or more properly

the no colour, of his unimaginable whiskers. You perceive I cannot speak of these latter without enthusiasm ; it is not too much to say that they were the handsomest pair of whiskers under the sun. At all events, they encircled, and at times partially overshadowed, a mouth utterly unequalled. Here were the most entirely even, and the most brilliantly white of all conceivable teeth. From between them, upon every proper occasion, issued a voice of surpassing clearness, melody, and strength. In the matter of eyes, also, my acquaintance was pre-eminently endowed. Either one of such a pair was worth a couple of the ordinary ocular organs. They were of a deep hazel, exceedingly large and lustrous ; and there was perceptible about them, ever and anon, just that amount of interesting obliquity which gives pregnancy to expression.

The bust of the General was unquestionably the finest bust I ever saw. For your life you could not have found a fault with its wonderful proportion. This rare peculiarity set off to great advantage a pair of shoulders which would have called up a blush of conscious inferiority into the countenance of the marble Apollo. I have a passion for fine shoulders, and may say that I never beheld them in perfection before. The arms altogether were admirably modelled. Nor were the lower limbs less superb. These were, indeed, the *ne plus ultra* of good legs. Every connoisseur in such matters admitted the legs to be good. There was neither too much flesh, nor too little,—neither rudeness nor fragility. I could not imagine a more graceful curve than that of the *os femoris*, and there was just that due gentle prominence in the rear of the *fibula* which goes to the conformation of a properly proportioned calf. I wish to God my young and talented friend Chiponchipino, the sculptor, had but seen the legs of Brevet Brigadier-General John A. B. C. Smith.

But although men so absolutely fine-looking are neither as plenty as reasons or blackberries, still I could not bring myself to believe that *the remarkable* something to which I alluded just now—that the odd air of *je ne sais quoi* which hung about my new acquaintance—lay altogether, or indeed at all, in the supreme excellence of his bodily endowments. Perhaps it might be traced to the *manner* ;—yet

here again I could not pretend to be positive. There *was* a primness, not to say stiffness, in his carriage—a degree of measured, and, if I may so express it, of rectangular precision, attending his every movement, which, observed in a more diminutive figure, would have had the least little savour in the world, of affectation, pomposity, or constraint, but which noticed in a gentleman of his undoubted dimensions, was readily placed to the account of reserve, *hauteur*—of a commendable sense, in short, of what is due to the dignity of colossal proportion.

The kind friend who presented me to General Smith whispered in my ear some few words of comment upon the man. He was a *remarkable* man—a *very* remarkable man—indeed one of the *most* remarkable men of the age. He was an especial favourite, too, with the ladies—chiefly on account of his high reputation for courage.

‘In *that* point he is unrivalled—indeed he is a perfect desperado—a down-right fire-eater, and no mistake,’ said my friend, here dropping his voice excessively low, and thrilling me with the mystery of his tone.

‘A downright fire-eater, and *no* mistake. Showed *that*, I should say, to some purpose, in the late tremendous swamp-fight away down South, with the Bugaboo and Kickapoo Indians.’ [Here my friend opened his eyes to some extent.] ‘Bless my soul!—blood and thunder, and all that!—*prodigies* of valour!—heard of him of course?—you know he’s the man’——

‘Man alive, how *do* you do? why how *are* ye? *very* glad to see ye, indeed!’ here interrupted the General himself, seizing my companion by the hand as he drew near, and bowing stiffly, but profoundly, as I was presented. I then thought (and I think so still), that I never heard a clearer nor a stronger voice, nor beheld a finer set of teeth: but I *must* say that I was sorry for the interruption just at that moment, as, owing to the whispers and insinuations afore-said, my interest had been greatly excited in the hero of the Bugaboo and Kickapoo campaign.

However, the delightfully luminous conversation of Brevet Brigadier-General John A. B. C. Smith soon completely dissipated this chagrin. My friend leaving us immediately, we had quite a long *tête-à-tête*, and I was not

only pleased but *really*—instructed. I never heard a more fluent talker, or a man of greater general information. With becoming modesty, he forebore, nevertheless, to touch upon the theme I had just then most at heart—I mean the mysterious circumstances attending the Bugaboo war—and, on my own part, what I conceive to be a proper sense of delicacy forbade me to broach the subject; although, in truth, I was exceedingly tempted to do so. I perceived, too, that the gallant soldier preferred topics of philosophical interest, and that he delighted especially in commenting upon the rapid march of mechanical invention. Indeed, lead him where I would, this was a point to which he invariably came back.

‘There is nothing at all like it,’ he would say; ‘we are a wonderful people, and live in a wonderful age. Parachutes and rail-roads—man-traps and spring-guns! Our steam-boats are upon every sea, and the Nassau balloon packet is about to run regular trips (fare either way only twenty pounds sterling) between London and Timbuctoo. And who shall calculate the immense influence upon social life—upon arts—upon commerce—upon literature—which will be the immediate result of the great principles of electro magnetism! Nor, is this all, let me assure you! There is really no end to the march of invention. The most wonderful—the most ingenious—and let me add, Mr.—Mr.—Thompson, I believe, is your name—let me add, I say, the most *useful*—the most truly *useful* mechanical contrivances, are daily springing up like mushrooms, if I may so express myself, or, more figuratively, like—ah—grasshoppers—like grasshoppers, Mr. Thompson—about us and ah—ah—ah—around us!’

Thompson, to be sure, is not my name; but it is needless to say that I left General Smith with a heightened interest in the man, with an exalted opinion of his conversational powers, and a deep sense of the valuable privileges we enjoy in living in this age of mechanical invention. My curiosity, however, had not been altogether satisfied, and I resolved to prosecute immediate inquiry among my acquaintances touching the Brevet Brigadier-General himself, and particularly respecting the tremendous events *quorum pars magna fuit*, during the Bugaboo and Kickapoo campaign.

The first opportunity which presented itself, and which (*horresco referens*) I did not in the least scruple to seize, occurred at the Church of the Reverend Doctor Drummummupp, where I found myself established, one Sunday, just at sermon time, not only in the pew, but by the side, of that worthy and communicative little friend of mine, Miss Tabitha T. Thus seated, I congratulated myself, and with much reason, upon the very flattering state of affairs. If any person knew anything about Brevet Brigadier-General John A. B. C. Smith, that person, it was clear to me, was Miss Tabitha T. We telegraphed a few signals, and then commenced, *sotto voce*, a brisk tête-à-tête.

‘Smith!’ said she, in reply to my very earnest inquiry; ‘Smith!—why, not General John A. B. C.? Bless me, I thought you *knew* all about *him*! This is a wonderfully inventive age! Horrid affair that!—a bloody set of wretches, those Kickapoos!—fought like a hero—prodigies of valour—immortal renown. Smith!—Brevet Brigadier-General John A. B. C.!—why, you know he’s the man’—

‘Man,’ here broke in Doctor Drummummupp, at the top of his voice, and with a thump that came near knocking the pulpit about our ears; ‘man that is born of a woman hath but a short time to live; he cometh up and is cut down like a flower!’ I started to the extremity of the pew, and perceived by the animated looks of the divine, that the wrath which had nearly proved fatal to the pulpit had been excited by the whispers of the lady and myself. There was no help for it; so I submitted with a good grace, and listened, in all the martyrdom of dignified silence, to the balance of that very capital discourse.

Next evening found me a somewhat late visitor at the Rantipole theatre, where I felt sure of satisfying my curiosity at once, by merely stepping into the box of those exquisite specimens of affability and omniscience, the Misses Arabelli and Miranda Cognoscenti. That fine tragedian, Climax, was doing Iago to a very crowded house, and I experienced some little difficulty in making my wishes understood; especially as our box was next the slips, and completely overlooked the stage.

‘Smith?’ said Miss Arabella, as she at length compre-

hended the purport of my query ; ‘ Smith ?—why, not General John A. B. C. ? ’

‘ Smith ? ’ inquired Miranda, musingly. ‘ God bless me, did you ever behold a finer figure ? ’

‘ Never, madam, but *do* tell me ’——

‘ Or so inimitable grace ? ’

‘ Never, upon my word !—but pray inform me ’——

‘ Or so just an appreciation of stage effect ? ’

‘ Madam ! ’

‘ Or a more delicate sense of the true beauties of Shakespeare ? Be so good as to look at that leg ! ’

‘ The devil ! ’ and I turned again to her sister.

‘ Smith ? ’ said she, ‘ why, not General John A. B. C. ? Horrid affair that, wasn’t it ?—great wretches, those Bugaboos—savage and so on—but we live in a wonderfully inventive age !—Smith !—O yes ! great man !—perfect desperado—immortal renown—prodigies of valour ! *Never heard !* ’ [This was given in a scream.] ‘ Bless my soul !—why, he’s the man ’——

‘ —mandragora

Nor all the drowsy syrups of the world  
Shall ever medicine thee to that sweet sleep  
Which thou owd’st yesterday ! ’

here roared out Climax just in my ear, and shaking his fist in my face all the time, in a way that I *couldn’t* stand, and I *wouldn’t*. I left the Misses Cognoscenti immediately, went behind the scenes forthwith, and gave the beggarly scoundrel such a thrashing as I trust he will remember to the day of his death.

At the *soirée* of the lovely widow, Mrs. Kathleen O’Trump, I was confident that I should meet with no similar disappointment. Accordingly, I was no sooner seated at the card-table, with my pretty hostess for a *vis-à-vis*, than I propounded those questions the solution of which had become a matter so essential to my peace.

‘ Smith ? ’ said my partner, ‘ why, not General John A. B. C. ? Horrid affair that, wasn’t it ?—diamonds, did you say ?—terrible wretches those Kickapoos !—we are playing *whist*, if you please, Mr. Tattle—however, this is the age of invention, most certainly *the* age, one may say—*the age par excellence*—speak French ?—oh, quite a hero—

perfect desperado !—*no hearts*, Mr. Tattle ? I don't believe it !—immortal renown and all that—prodigies of valour ! *Never heard !* !—why, bless me, he's the man'——

'Mann ?—*Captain Mann* ?' here screamed some little feminine interloper from the farthest corner of the room. 'Are you talking about Captain Mann and the duel ?—oh, I *must* hear—do tell—go on, Mrs. O'Trump !—do now go on !' And go on Mrs. O'Trump did—all about a certain Captain Mann, who was either shot or hung, or should have been both shot and hung. Yes ! Mrs. O'Trump, she went on, and I—I went off. There was no chance of hearing anything farther that evening in regard to Brevet Brigadier-General John A. B. C. Smith.

Still I consoled myself with the reflection that the tide of ill luck would not run against me forever, and so determined to make a bold push for information at the rout of that bewitching little angel, the graceful Mrs. Pirouette.

'Smith ?' said Mrs. P., as we twirled about together in a *pas de zephyr*, 'Smith ?—why not General John A. B. C. ? Dreadful business that of the Bugaboos, wasn't it ?—terrible creatures, those Indians !—*do* turn out your toes ! I really am ashamed of you—man of great courage, poor fellow !—but this is a wonderful age for invention—O dear me, I'm out of breath—quite a desperado—prodigies of valour—*never heard !* !—can't believe it—I shall have to sit down and enlighten you—Smith ! why, he's the man'——

'*Man-Fred*, I tell you !' here bawled out Miss Bas-Bleu, as I led Mrs. Pirouette to a seat. 'Did ever anybody hear the like ? It's *Man-Fred*, I say, and not at all by any means *Man-Friday*.' Here Miss Bas-Bleu beckoned to me in a very peremptory manner ; and I was obliged, will I nill I, to leave Mrs. P. for the purpose of deciding a dispute touching the title of a certain poetical drama of Lord Byron's. Although I pronounced, with great promptness, that the true title was *Man-Friday*, and not by any means *Man-Fred*, yet when I returned to seek Mrs. Pirouette she was not to be discovered, and I made my retreat from the house in a very bitter spirit of animosity against the whole race of the Bas-Bleus.

Matters had now assumed a really serious aspect, and

I resolved to call at once upon my particular friend, Mr. Theodore Sinivate ; for I knew that here at least I should get something like definite information.

'Smith ?' said he, in his well-known peculiar way of drawling out his syllables ; 'Smith ?—why, not General John A. B. C. ? Savage affair that with the Kickapo-o-o-os, wasn't it ? Say ! don't you think so ?—perfect despera-a-ado—great pity, 'pon my honour !—wonderfully inventive age !—pro-o-odigies of valour ! By the by, did you ever hear about Captain Ma-a-a-a-n ?'

'Captain Mann be d—d !' said I, 'please to go on with your story.'

'Hem !—oh well !—quite *la même cho-o-ose*, as we say in France. Smith, eh ? Brigadier-General John A—B—C. ? I say'—[here Mr. S. thought proper to put his finger to the side of his nose]—'I say, you don't mean to insinuate now, really and truly, and conscientiously, that you don't know all about that affair of Smith's, as well as I do, eh ? Smith ? John A—B—C. ? Why, bless me, he's the ma-a-an'—

'*Mr. Sinivate*,' said I, imploringly, 'is he the man in the mask ?'

'No-o-o !' said he, looking wise, 'nor the man in the mo-o-on.'

This reply I considered a pointed and positive insult, and so left the house at once in high dudgeon, with a firm resolve to call my friend, Mr. Sinivate, to a speedy account for his ungentlemanly conduct and ill-breeding.

In the meantime, however, I had no notion of being thwarted touching the information I desired. There was one resource left me yet. I would go to the fountain-head. I would call forthwith upon the General himself, and demand, in explicit terms, a solution of this abominable piece of mystery. Here, at least, there should be no chance for equivocation. I would be plain, positive, peremptory—as short as pie-crust—as concise as Tacitus or Montesquieu.

It was early when I called, and the General was dressing ; but I pleaded urgent business, and was shown at once into his bed-room by an old negro valet, who remained in attendance during my visit. As I entered the chamber, I looked about, of course, for the occupant, but did not

immediately perceive him. There was a large and exceedingly odd-looking bundle of something which lay close by my feet on the floor, and, as I was not in the best humour in the world, I gave it a kick out of the way.

'Hem! ahem! rather civil that, I should say!' said the bundle, in one of the smallest, and altogether the funniest little voices, between a squeak and a whistle, that I ever heard in all the days of my existence.

'Ahem! rather civil that, I should observe.'

I fairly shouted with terror, and made off, at a tangent, into the farthest extremity of the room.

'God bless me! my dear fellow,' here again whistled the bundle, 'what—what—what—why, what *is* the matter? I really believe you don't know me at all.'

What *could* I say to all this—what *could* I? I staggered into an arm-chair, and, with staring eyes and open mouth, awaited the solution of the wonder.

'Strange you shouldn't know me though, isn't it?' presently re-squeaked the nondescript, which I now perceived was performing, upon the floor, some inexplicable evolution, very analogous to the drawing on of a stocking. There was only a single leg, however, apparent.

'Strange you shouldn't know me, though, isn't it? Pompey, bring me that leg!' Here Pompey handed the bundle, a very capital cork leg, already dressed, which it screwed on in a trice; and then it stood up before my eyes.

'And a bloody action it *was*,' continued the thing, as if in a soliloquy; 'but then one musn't fight with the Bugaboos and Kickapoos, and think of coming off with a mere scratch. Pompey, I'll thank you now for that arm. Thomas' [turning to me] 'is decidedly the best hand at a cork leg; but if you should ever want an arm, my dear fellow, you must really let me recommend you to Bishop.' Here Pompey screwed on an arm.

'We had rather hot work of it, that you may say. Now, you dog, slip on my shoulders and bosom! Pettitt makes the best shoulders, but for a bosom you will have to go to Ducrow.'

'Bosom!' said I.

'Pompey, will you *never* be ready with that wig?

Scalping is a rough process after all ; but then you can procure such a capital scratch at De L'Orme's.'

'Scratch !'

'Now, you nigger, my teeth ! For a *good* set of these you had better go to Parmly's at once ; high prices, but excellent work. I swallowed some very capital articles, though, when the big Bugaboo rammed me down with the butt-end of his rifle.'

'Butt-end ! ram down !! my eye !!'

'O yes, by-the-by, my eye—here, Pompey, you scamp, screw it in ! Those Kickapoos are not so very slow at a gouge ; but he's a belied man, that Dr. Williams, after all ; you can't imagine how well I see with the eyes of his make.'

I now began very clearly to perceive that the object before me was nothing more nor less than my new acquaintance, Brevet Brigadier-General John A. B. C. Smith. The manipulations of Pompey had made, I must confess, a very striking difference in the appearance of the personal man. The voice, however, still puzzled me no little ; but even this apparent mystery was speedily cleared up.

'Pompey, you black rascal,' squeaked the General, 'I really do believe you would let me go out without my palate.'

Hereupon the negro, grumbling out an apology, went up to his master, opened his mouth with the knowing air of a horse-jockey, and adjusted therein a somewhat singular-looking machine, in a very dexterous manner, that I could not altogether comprehend. The alteration, however, in the entire expression of the General's countenance was instantaneous and surprising. When he again spoke, his voice had resumed all that rich melody and strength which I had noticed upon our original introduction.

'D—n the vagabonds !' said he, in so clear a tone that I positively started at the change, 'D—n the vagabonds ! they not only knocked in the roof of my mouth, but took the trouble to cut off at least seven-eighths of my tongue. There isn't Bonfanti's equal, however, in America, for really good articles of this description. I can recommend you to him with confidence' [here the General bowed],

'and assure you that I have the greatest pleasure in so doing.'

I acknowledged his kindness in my best manner, and took leave of him at once, with a perfect understanding of the true state of affairs—with a full comprehension of the mystery which had troubled me so long. It was evident. It was a clear case. Brevet Brigadier-General John A. B. C. Smith was the man——was *the man that was used up*.

## THE BUSINESS MAN

Method is the soul of business.—OLD SAYING.

I AM a business man. I am a methodical man. Method is *the* thing, after all. But there are no people I more heartily despise, than your eccentric fools who prate about method without understanding it ; attending strictly to its letter, and violating its spirit. These fellows are always doing the most out-of-the-way things in what they call an orderly manner. Now here—I conceive—is a positive paradox. True method appertains to the ordinary and the obvious alone, and cannot be applied to the *outré*. What definite idea can a body attach to such expressions as 'methodical Jack o' Dandy', or 'a systematical Will o' the Wisp'?

My notions upon this head might not have been so clear as they are, but for a fortunate accident which happened to me when I was a very little boy. A good-hearted old Irish nurse (whom I shall not forget in my will) took me up one day by the heels, when I was making more noise than was necessary, and, swinging me round two or three times, d——d my eyes for 'a skreeking little spalpeen', and then knocked my head into a cocked hat against the bed-post. This, I say, decided my fate, and made my fortune. A bump arose at once on my sinciput, and turned out to be as pretty an organ of *order* as one shall see on a summer's day. Hence that positive appetite for system and regularity which has made me the distinguished man of business that I am.

If there is anything on earth I hate, it is a genius. Your

geniuses are all arrant asses—the greater the genius the greater the ass—and to this rule there is no exception whatever. Especially, you cannot make a man of business out of a genius, any more than money out of a Jew, or the best nutmegs out of pine-knots. The creatures are always going off at a tangent into some fantastic employment, or ridiculous speculation, entirely at variance with the ‘fitness of things’, and having no business whatever to be considered as a business at all. Thus you may tell these characters immediately by the nature of their occupations. If you ever perceive a man setting up as a merchant or a manufacturer; or going into the cotton or tobacco trade, or any of those eccentric pursuits; or getting to be a dry-goods dealer, or soap-boiler, or something of that kind; or pretending to be a lawyer, or a blacksmith, or a physician—anything out of the usual way—you may set him down at once as a genius, and then, according to the rule-of-three, he’s an ass.

Now I am not in any respect a genius, but a regular business man. My Day-book and Ledger will evince this in a minute. They are well kept, though I say it myself; and, in my general habits of accuracy and punctuality, I am not to be beat by a clock. Moreover, my occupations have been always made to chime in with the ordinary habitudes of my fellow-men. Not that I feel the least indebted, upon this score, to my exceedingly weak-minded parents, who, beyond doubt, would have made an arrant genius of me at last, if my guardian angel had not come, in good time, to the rescue. In biography the truth is everything, and in autobiography it is especially so—yet I scarcely hope to be believed when I state, however solemnly, that my poor father put me, when I was about fifteen years of age, into the counting-house of what he termed ‘a respectable hardware and commission merchant doing a capital bit of business!’ A capital bit of fiddlestick! However, the consequence of this folly was, that in two or three days, I had to be sent home to my button-headed family in a high state of fever, and with a most violent and dangerous pain in the sinciput, all round about my organ of order. It was nearly a gone case with me then—just touch-and-go for six weeks—the physicians giving me up and all that sort of

thing. But, although I suffered much, I was a thankful boy in the main. I was saved from being a 'respectable hardware and commission merchant, doing a capital bit of business', and I felt grateful to the protuberance which had been the means of my salvation, as well as to the kind-hearted female who had originally put these means within my reach.

The most of boys run away from home at ten or twelve years of age, but I waited till I was sixteen. I don't know that I should have gone, even then, if I had not happened to hear my old mother talk about setting me up on my own hook in the grocery way. The *grocery* way!—only think of that! I resolved to be off forthwith, and try and establish myself in some *decent* occupation, without dancing attendance any longer upon the caprices of these eccentric old people, and running the risk of being made a genius of in the end. In this project I succeeded perfectly well at the first effort, and by the time I was fairly eighteen, found myself doing an extensive and profitable business in the Tailor's Walking-Advertisement line.

I was enabled to discharge the onerous duties of this profession, only by that rigid adherence to system which formed the leading feature of my mind. A scrupulous *method* characterized my actions as well as my accounts. In my case, it was method—not money—which made the man: at least all of him that was not made by the tailor whom I served. At nine, every morning, I called upon that individual for the clothes of the day. Ten o'clock found me in some fashionable promenade or other place of public amusement. The precise regularity with which I turned my handsome person about, so as to bring successively into view every portion of the suit upon my back, was the admiration of all the knowing men in the trade. Noon never passed without my bringing home a customer to the house of my employers, Messrs. Cut and Comeagain. I say this proudly, but with tears in my eyes—for the firm proved themselves the basest of ingrates. The little account about which we quarrelled and finally parted, cannot, in any item, be thought overcharged, by gentlemen really conversant with the nature of the business. Upon this point, however, I feel a degree of proud satisfaction in

permitting the reader to judge for himself. My bill ran thus :

*Messrs. Cut and Comeagain, Merchant Tailors.*

		<i>To Peter Proffit, Walking Advertiser.</i>		<i>Drs.</i>
July 10.	To promenade, as usual, and customer brought home,			\$00 25
July 11.	To do do do			25
July 12.	To one lie, second class ; damaged black cloth sold for invisible green,			25
July 13.	To one lie, first class, extra quality and size ; recommending milled sattinet as broadcloth,			75
July 20.	To purchasing brand new paper shirt collar or dickey, to set off gray Petersham,			2
Aug. 15.	To wearing double-padded bobtail frock (thermometer 706 in the shade),			25
Aug. 16.	Standing on one leg three hours, to show off new-style strapped pants at 12½ cents per leg per hour,			37½
Aug. 17.	To promenade, as usual, and large customer brought (fat man),			50
Aug. 18.	To do do (medium size),			25
Aug. 19.	To do do (small man and bad pay),			6
				<hr/> \$2 96½

The item chiefly disputed in this bill was the very moderate charge of two pennies for the dickey. Upon my word of honour, this *was not* an unreasonable price for that dickey. It was one of the cleanest and prettiest little dickeys I ever saw ; and I have good reason to believe that it effected the sale of three Petershams. The elder partner of the firm, however, would allow me only one penny of the charge, and took it upon himself to show in what manner four of the same sized conveniences could be got out of a sheet of foolscap. But it is needless to say that I stood upon the *principle* of the thing. Business is business, and should be done in a business way. There was no *system* whatever in swindling me out of a penny—a clear fraud of fifty per cent.—no *method* in any respect. I left at once the employment of Messrs. Cut and Comeagain, and set up in the Eye-Sore line by myself—one of the most lucrative, respectable, and independent of the ordinary occupations.

My strict integrity, economy, and rigorous business habits, here again came into play. I found myself driving a flourishing trade, and soon became a marked man upon

'Change'. The truth is, I never dabbled in flashy matters, but jogged on in the good old sober routine of the calling—a calling in which I should, no doubt, have remained to the present hour, but for a little accident which happened to me in the prosecution of one of the usual business operations of the profession. Whenever a rich old hunk, or prodigal heir, or bankrupt corporation, gets into the notion of putting up a palace, there is no such thing in the world as stopping either of them, and this every intelligent person knows. The fact in question is indeed the basis of the Eye-Sore trade. As soon, therefore, as a building project is fairly afoot by one of these parties, we merchants secure a nice corner of the lot in contemplation, or a prime little situation just adjoining or right in front. This done, we wait until the palace is half-way up, and then we pay some tasty architect to run us up an ornamental mud hovel, right against it; or a Down-East or Dutch Pagoda, or a pig-sty, or an ingenious little bit of fancy work, either Esquimaux, Kickapoo, or Hottentot. Of course, we can't afford to take these structures down under a bonus of five hundred per cent. upon the prime cost of our lot and plaster. *Can we?* I ask the question. I ask it of business men. It would be irrational to suppose that we can. And yet there was a rascally corporation which asked me to do this very thing—this *very thing*! I did not reply to their absurd proposition, of course; but I felt it a duty to go that same night, and lamp-black the whole of their palace. For this, the unreasonable villains clapped me into jail; and the gentlemen of the Eye-Sore trade could not well avoid cutting my connection when I came out.

The Assault and Battery business, into which I was now forced to adventure for a livelihood, was somewhat ill-adapted to the delicate nature of my constitution; but I went to work in it with a good heart, and found my account, here as heretofore, in those stern habits of methodical accuracy which had been thumped into me by that delightful old nurse—I would indeed be the basest of men not to remember her well in my will. By observing, as I say, the strictest system in all my dealings, and keeping a well-regulated set of books, I was enabled to get over many serious difficulties, and, in the end, to establish myself very

decently in the profession. The truth is, that few individuals, in any line, did a snugger little business than I. I will just copy a page or so out of my Day-Book ; and this will save me the necessity of blowing my own trumpet—a contemptible practice, of which no high-minded man will be guilty. Now, the Day-Book is a thing that don't lie.

'Jan. 1.—New Year's day. Met Snap in the street, groggy. Mem—he'll do. Met Gruff shortly afterwards, blind drunk. Mem—he'll answer too. Entered both gentlemen in my Ledger, and opened a running account with each.

'Jan. 2.—Saw Snap at the Exchange, and went up and trod on his toe. Doubled his fist and knocked me down. Good !—got up again. Some trifling difficulty with Bag, my attorney. I want the damages at a thousand, but he says that, for so simple a knock-down, we can't lay them at more than five hundred. Mem—must get rid of Bag—no *system* at all.

'Jan. 3.—Went to the theatre, to look for Gruff. Saw him sitting in a side box, in the second tier, between a fat lady and a lean one. Quizzed the whole party through an opera-glass, till I saw the fat lady blush and whisper to G. Went round, then, into the box, and put my nose within reach of his hand. Wouldn't pull it—no go. Blew it, and tried again—no go. Sat down then, and winked at the lean lady, when I had the high satisfaction of finding him lift me up by the nape of the neck, and fling me over into the pit. Neck dislocated, and right leg capitally splintered. Went home in high glee, drank a bottle of champagne, and booked the young man for five thousand. Bag says it'll do.

'Feb. 15.—Compromised the case of Mr. Snap. Amount entered in Journal—fifty cents—which see.

'Feb. 16.—Cast by that villain, Gruff, who made me a present of five dollars. Costs of suit, four dollars and twenty-five cents. Nett profit—see Journal—seventy-five cents.'

Now, here is a clear gain, in a very brief period, of no less than one dollar and twenty-five cents—this is in the mere cases of Snap and Gruff ; and I solemnly assure the reader that these extracts are taken at random from my Day-Book.

It's an old saying, and a true one, however, that money is nothing in comparison with health. I found the exactions of the profession somewhat too much for my delicate state of body ; and, discovering, at last, that I was knocked all out of shape, so that I didn't know very well what to make of the matter, and so that my friends, when they met me in the street, couldn't tell that I was Peter Proffit at all, it occurred to me that the best expedient I could adopt, was to alter my line of business. I turned my attention, therefore, to Mud-Dabbling, and continued it for some years.

The worst of this occupation, is, that too many people take a fancy to it, and the competition is in consequence excessive. Every ignoramus of a fellow who finds that he hasn't brains in sufficient quantity to make his way as a walking advertiser, or an eye-sore-prig, or a salt and batter man, thinks, of course, that he'll answer very well as a dabbler of mud. But there never was entertained a more erroneous idea than that it requires no brains to mud-dabble. Especially, there is nothing to be made in this way without *method*. I did only a retail business myself, but my old habits of *system* carried me swimmingly along. I selected my street-crossing, in the first place, with great deliberation, and I never put down a broom in any part of the town *but that*. I took care, too, to have a nice little puddle at hand, which I could get at in a minute. By these means I got to be well known as a man to be trusted ; and this is one-half the battle, let me tell you, in trade. Nobody ever failed to pitch *me* a copper, and got over *my* crossing with a clean pair of pantaloons. And, as my business habits, in this respect, were sufficiently understood, I never met with any attempt at imposition. I wouldn't have put up with it, if I had. Never imposing upon anyone myself, I suffered no one to play the possum with me. The frauds of the banks of course I couldn't help. Their suspension put me to ruinous inconvenience. These, however, are not individuals, but corporations ; and corporations, it is very well known, have neither bodies to be kicked, nor souls to be damned.

I was making money at this business, when, in an evil moment, I was induced to merge in the Cur-Spattering—a somewhat analogous, but, by no means, so respectable a

profession. My location, to be sure, was an excellent one, being central, and I had capital blacking and brushes. My little dog, too, was quite fat and up to all varieties of snuff. He had been in the trade a long time, and, I may say, understood it. Our general routine was this ;—Pompey, having rolled himself well in the mud, sat upon end at the shop door, until he observed a dandy approaching in bright boots. He then proceeded to meet him, and gave the Wellingtons a rub or two with his wool. Then the dandy swore very much, and looked about for a boot-black. There I was, full in his view, with blacking and brushes. It was only a minute's work, and then came a sixpence. This did moderately well for a time ;—in fact, I was not avaricious, but my dog was. I allowed him a third of the profit, but he was advised to insist upon half. This I couldn't stand—so we quarrelled and parted.

I next tried my hand at the Organ-grinding for a while, and may say that I made out pretty well. It is a plain, straightforward business, and requires no particular abilities. You can get a music-mill for a mere song, and, to put it in order, you have but to open the works, and give them three or four smart raps with a hammer. It improves the tone of the thing, for business purposes, more than you can imagine. This done, you have only to stroll along, with the mill on your back, until you see tan-bark in the street, and a knocker wrapped up in buckskin. Then you stop and grind ; looking as if you meant to stop and grind till doomsday. Presently a window opens, and somebody pitches you a sixpence, with a request to 'Hush up and go on', &c. I am aware that some grinders have actually afforded to 'go on' for this sum ; but for my part, I found the necessary outlay of capital too great, to permit of my 'going on' under a shilling.

At this occupation I did a good deal ; but, somehow, I was not quite satisfied, and so finally abandoned it. The truth is, I laboured under the disadvantage of having no monkey—and American streets are *so* muddy, and a Democratic rabble is *so* obtrusive, and so full of demnition mischievous little boys.

I was now out of employment for some months, but at length succeeded, by dint of great interest, in procuring a

situation in the Sham-Post. The duties, here, are simple, and not altogether unprofitable. For example :—very early in the morning I had to make up my packet of sham letters. Upon the inside of each of these I had to scrawl a few lines—on any subject which occurred to me as sufficiently mysterious—signing all the epistles Tom Dobson, or Bobby Tompkins, or anything in that way. Having folded and sealed all, and stamped them with sham postmarks—New Orleans, Bengal, Botany Bay, or any other place a great way off—I set out, forthwith, upon my daily route, as if in a very great hurry. I always called at the big houses to deliver the letters, and receive the postage. Nobody hesitates at paying for a letter—especially for a double one—people are *such* fools—and it was no trouble to get round a corner before there was time to open the epistles. The worst of this profession was, that I had to walk so much and so fast ; and so frequently to vary my route. Besides, I had serious scruples of conscience. I can't bear to hear innocent individuals abused—and the way the whole town took to cursing Tom Dobson and Bobby Tompkins, was really awful to hear. I washed my hands of the matter in disgust.

My eighth and last speculation has been in the Cat-Growing way. I have found this a most pleasant and lucrative business, and, really, no trouble at all. The country, it is well-known, has become infested with cats—so much so of late, that a petition for relief, most numerous and respectably signed, was brought before the legislature at its late memorable session. The assembly, at this epoch, was unusually well-informed, and, having passed many other wise and wholesome enactments, it crowned all with the Cat-Act. In its original form, this law offered a premium for cat-heads (fourpence a-piece), but the Senate succeeded in amending the main clause, so as to substitute the word '*tails*' for '*heads*'. This amendment was so obviously proper, that the house concurred in it *nem. con.*

As soon as the Governor had signed the bill, I invested my whole estate in the purchase of Toms and Tabbies. At first, I could only afford to feed them upon mice (which are cheap), but they fulfilled the Scriptural injunction at so marvellous a rate, that I at length considered it my best

policy to be liberal, and so indulged them in oysters and turtle. Their tails, at a legislative price, now bring me in a good income ; for I have discovered a way, in which, by means of Macassar oil, I can force three crops in a year. It delights me to find, too, that the animals soon get accustomed to the thing, and would rather have the appendages cut off than otherwise. I consider, myself, therefore, a made man, and am bargaining for a country seat on the Hudson.
